Heritage Signature® Auction #1281

U.S. Coins

Featuring: The Gary Verner Collection

November 8-9 & 11, 2018 | Dallas

FLOOR Signature® Sessions 1-3
(Floor, Telephone, HERITAGELive!®, Internet, Fax, and Mail)

Heritage Auctions, Dallas • 1st Floor Auction Room
3500 Maple Avenue • Dallas, TX 75219

Session 1 – PREMIER
Thursday, November 8 • 6:00 PM CT • Lots 3001–3349

Session 2
Friday, November 9 • 1:00 PM CT • Lots 3350–3846

Session 3
Friday, November 9 • 6:00 PM CT • Lots 3847–4351

INTERNET Signature® Session 4
(HERITAGELive!®, Internet, Fax, & Mail only Session)

Session 4
Sunday, November 11 • 3:00 PM CT • Lots 7001–8176

LOT SETTLEMENT AND PICK-UP
Weekdays starting Friday, November 9th 10:00 AM – 1:00 PM CT by appointment only.

Extended Payment Terms available. Email: Credit@HA.com

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

Buyer's Premium Per Lot:
This auction is subject to a Buyer's Premium of 20% (minimum $19) per lot.

TX Auctioneer Licenses: Teia Baber 16624; Edward Beardsley 16632; Sarah Davies 17505; Nicholas Dawes 16784; Sophie Duncan 17901; Christopher Dykstra 16601; Fiona Elias 17126; Francesca Felgar 17902; Samuel Foose 11727; Alissa Ford 17104; Kathleen Guzman 16142; Gregory Holman 17653; Roberta Kramer 17439; Brent Randall Lewis 17881; Jennifer Jayne Marsh 17105; Marina Medina 17512; Bob Merrill 13408; Paul Minshull 16591; Rochelle Mortenson 17898; Scott Peterson 13256; Michael Provenzale 17157; Catherine Rigdon 17897; Michael Sadler 16129; Barry Sandoval 17649; Martin Scammel, Jr. 17659; Nathan Schar 17365; Kimberly Serrano 17657; Anthony Singleton 17507; Andrea Voss 16406; Jacob Walker 16413; Brian Wiedman 17894; Adam Williams 17893; Phillip Wooten 17656.

PRELIMINARY LOT VIEWING
By appointment only. Contact Roy Porras at 214-409-1295 or RoyP@HA.com (All times subject to change).

BIDDING METHODS

HERITAGE Live!®[1] Bidding
Bid live on your computer or mobile, anywhere in the world, during the Auction using our HERITAGELive!® program at HA.com/Live

Live Floor Bidding
Bid in person during the floor sessions.

Live Telephone Bidding (Floor Sessions Only)
Phone bidding must be arranged 24 hours before your session begins. Client Service: 866-835-3243

Internet Absentee Bidding
Proxy bidding ends ten minutes prior to the session start time. Live Proxy bidding continues through the session. HA.com/1281

Fax Bidding
Fax bids must be received 24 hours before your session begins. Fax: 214-409-1425

Phone: 214-528-3500 • 877-HERITAGE (437-4824)
Fax: 214-409-1425
Direct Client Service Line: 866-835-3243
Email: Bid@HA.com

HERITAGE AUCTIONS HA.com

Dear Bidder,

A special three-day auction event at Heritage's Dallas World Headquarters (3500 Maple Avenue) kicks off on Wednesday, November 7 with two floor sessions devoted exclusively to The Eric P. Newman Collection. A full slate of U.S. Coins Signature sessions follow, with the Premier Session on Thursday evening, and two floor sessions on Friday – one in the afternoon, followed by an evening session. Our online-only Internet Signature® Session is on Saturday afternoon for the Eric P. Newman Collection and on Sunday afternoon for U.S. Coins.

The Eric P. Newman Collection auction offers an eclectic mix of currency, coins, coin scales, coin-related mechanical devices, plus an extensive collection of books, literature, and numismatic ephemera. The lots are featured in three separate catalogs – one for currency, one for books and literature, and a third catalog for all other items of numismatic interest. Many unique and unusual treasures gathered over the better part of a century provide insight into the varied interests of Eric P. Newman, and demonstrate the depth of his intellectual and collecting pursuits.

On Thursday, our popular Premier Session takes center stage with high-quality, rare gold from The Marcello Collection, which made a memorable debut during the October Chicago Signature event. A Very Large Size Hentsch ingot from the *S.S. Central America* shipwreck – the fifth-largest Hentsch of the shipwreck finds – is just one highlight of the Marcello Collection. Other consignors add key date gold and Territorial Gold to this strong segment of the auction, including the rare, original 1857-S J.L. Polhemus countermarked 1857-S double eagle, an historic coin from the well-known 1985 Van Ormer Collection.

Barber coinage enthusiasts and Walking Liberty specialists will have a field day during the Premier Session, Floor Session 2, and the Internet Signature® Session, headlined by our Featured Collection:

THE GARY VERNER COLLECTION

The following words were penned by Eric Verner, Gary Verner's nephew:

"Born ten years plus one day after D-Day, Gary Verner was a lover of beauty. He worked tirelessly to acquire only the best-looking coins, evaluating them himself and looking always for the undervalued, the diamonds in the rough. He had a collector's spirit, and a practiced eye. He wasn't just a coin collector, he was a numismatist, and each coin was selected with great care. His collection represents years of study and countless hours of squinting. The people he allowed around him loved him, his quick wit and dry humor drew people in despite a gruff exterior. He loved terrible movies and terrible foods. He ate well-done steaks with ketchup and onions while watching "Mr. No Legs" on VHS. He had all his credit card numbers, past and present, memorized. He loved old black and white pictures and women with big hair. He did what was right, often begrudgingly, but he still did it. He gave generously to a local Las Vegas charity because they sent him a Christmas card that amused him. I think the best and shortest way to explain who Gary Verner was would be to simply repeat his answer to a doctor who saw him in the hospital. During the first examination, the doctor looked Gary over and asked why he used a wheelchair and hadn't walked in over 30 years. Gary shrugged and said in his raspy voice: 'Just don't feel like it.'"

We can add that Gary had a preference for prooflike coins when they met his exacting standards. Many of the Barber pieces (dimes through half dollars) are either semiprooflike or prooflike. An 1892-O half dollar, in fact, was once confirmed as a proof by Walter Breen, but the Breen certification letter was lost. When submitted to NGC, the coin came back Unc Details (it displays a light cleaning). We think that, if asked whether to resubmit the coin, Gary would answer with a single word. "Nah."

To all of our friends, clients, and dealer associates, welcome to Dallas! This is our opportunity to meet and serve you, and we look forward to assisting you with lot viewing, buying, selling, consigning, or simply answering any questions you might have. As always, we accept bids through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding and online bids with HERITAGE Live!®.

Good Luck with your bids!

Sincerely,

Greg Rohan
President

Todd Imhof
Executive Vice-President

SESSION ONE

COLONIALS

St. Patrick Halfpenny, XF45
Very Rare Vlack 4-E Variety

3001 **(1670-75) St. Patrick Halfpenny XF45 PCGS Secure. Vlack 4-E, Breen-204, W-11540.** This rare St. Patrick halfpenny variety has small letters on both the obverse and reverse. These Irish imports are attributed to Mark Newby of Dublin who emigrated to New Jersey (then West Jersey) in 1681. Among other things, Newby brought a quantity of St. Patrick halfpennies and convinced the state legislature to accept the coins for small transactions. This chocolate-brown piece is smooth with strong devices. The brass plug is on the upper right portion of the crown. Listed on page 53 of the 2019 *Guide Book*. Population: 1 in 45, 1 finer (6/18). NGC ID# AUAS, PCGS# 46

1787 Massachusetts Half Cent, MS65 Brown
Ryder 4-C, W-5940

3002 **1787 Massachusetts Half Cent MS65 Brown PCGS. Ryder 4-C, W-5940, R.2.** The H is centered directly over the eagle's head, and the date is closely spaced on this Massachusetts half cent. The design features are fully rendered. Only the dentils are a touch incomplete (the coin is struck slightly off-center toward 5:30 on the obverse). Glossy surfaces present varying shades of light and deep brown color with steel-blue accents also seen. Minor roughness occurs at the central obverse. Listed on page 71 of the 2019 *Guide Book*. NGC ID# 2B22, PCGS# 296

1790 Standish Barry Threepence, VF20
A Classic Rarity, W-8510

3003 **1790 Standish Barry Threepence VF20 PCGS. Breen-1019, W-8510, R.6.** Die alignment: 360°. Boldly struck peripheries encompass more softly struck centers, as is generally the case on these rare post-Colonial issues, of which perhaps two dozen pieces are known. The uniquely expressed date — JULY 4 90 — is boldly distinct on this threepence, while BALTIMORE is faint at LTI. The central portrait is a bit soft on the face, but retains clear features. The reverse is representative of known examples at this grade level and even finer. The central THREE PENCE is quite weak, a characteristic seen on even the finest known pieces. Most of Barry's name is clear, though the initial ST of his first name and final Y of BARRY are faint. The planchet is slightly out of round, and the strike is a touch off-center toward 12 o'clock. This piece shows no sign of the prominent die cracks visible on both sides of the magnificent MS64 example — the finest known in private hands — sold by us in January 2015 as part of the Donald G. Partrick Collection.

The identity of the obverse figure has been the subject of much speculation, with Barry himself and George Washington being the most commonly proposed identifications. In the Spring 2009 issue of the *C4 Newsletter*, however, Max B. Spiegel discussed his discovery of an 1843 article from the *Baltimore Sun* stating that the figure depicted was James Calhoun, who was serving in a position analogous to Mayor in Baltimore on July 4, 1790. Comparison of contemporary portraits of Calhoun and the threepence's obverse figure strongly suggest that this attribution is accurate. An exciting opportunity to acquire this classic early American rarity. Listed on page 87 of the 2019 *Guide Book*. NGC ID# 2B5N, PCGS# 609

1794 Talbot, Allum and Lee Cent
NEW YORK Variety, PR65 Red and Brown

3004 **1794 Talbot, Allum & Lee Cent PR65 Red and Brown PCGS.** Large ampersand above YORK. Lovely rose, magenta, orange, and gunmetal-blue colors adorn this 1794 Talbot, Allum, & Lee Cent, an available variety in circulated grades but rare in proof format, especially with substantial mint red color still present. The fields are nicely mirrored, and the strike is good aside from slight softness on the center of the ship and opposite on the lower legs. A couple of tiny spots are seen near the second E in COMMERCE, but these are only mentioned for accuracy and do not reduce the eye appeal. Listed on page 88 of the 2019 *Guide Book*. Population: 6 in 65 Red and Brown, 0 finer (9/18).
John J. Ford, Jr. (Stacks, 5/2004), lot 339; The Michael Casper Collection, Part Three / Palm Beach Signature (Heritage, 3/2006), where it brought $11,501.15. NGC ID# 2B5Y, PCGS# 90635

HALF CENTS

1825 C-2, B-2 Half Cent, MS65 Brown
Scarce Early Die State

3005 **1825 C-2, B-2, R.1, MS65 Brown PCGS Secure.** Manley Die State 1.0, showing bold details including the repunched star 12 and a sharp stem end. The early die state is considered scarcer than either of the later die states. This lovely example has rich and fully lustrous chocolate-brown surfaces with areas of lighter brown and traces of faint bluish overtones. Our EAC grade MS63. Population: 5 in 65 (2 in 65+) Brown, 0 finer (9/18). NGC ID# 222T, PCGS# 35249 Base PCGS# 1141

1849 Half Cent, MS65 Brown
C-1, Large Date, None Finer

3006 **1849 Large Date, C-1, B-4, R.2, MS65 Brown PCGS Secure.** All 1849 half cent circulation strikes (39,864 coins) feature a Large Date. This glossy Gem Brown example is the plate coin for PCGS CoinFacts. The rims are broad and square, and the design is fully detailed. Abundant copper-orange color glows from the motif recesses. Our EAC grade MS62. Population: 6 in 65 Brown, 0 finer in this category (10/18). NGC ID# 26Y5, PCGS# 35318 Base PCGS# 1218

LARGE CENTS

1793 Wreath Cent, S-6, B-7, VF35
Vine and Bars Edge, 'Sprung Die'

3007 **1793 Wreath, Vine and Bars Edge, S-6, B-7, R.3, VF35 PCGS.** Breen Die State IV. The bulge in the left obverse field is faint but clear, and a die crack travels through Liberty's lower lip. The three leaves above the date on this obverse die are broad and lean to the right. Sheldon-6 cents were reportedly struck April 4 through 9, possibly totaling 7,000 or 8,000 pieces. This Choice VF survivor has pleasing medium brown surfaces. Detail is slightly soft over the highest points of Liberty's portrait. Dentilation is partial on the obverse, complete on the reverse. A couple of small rim bumps are noted at 3 o'clock on the obverse, but these are largely insignificant. There is one thin pinscratch in the adjacent field. That is the only noteworthy mark. To be sure, this 1793 Wreath cent would make a marvelous first-year type coin. Our EAC grade VF20. NGC ID# 223H, PCGS# 35450 Base PCGS# 1347

1793 Wreath Cent, Fine 12
S-9, Vine and Bars Edge

3008 **1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2, Fine 12 PCGS.** An olive-brown example of this widely collected first-year, single-year design subtype. All of the legends are clear, and although small marks are scattered, none merit comment save for a few minor left obverse rim dings. Minutely granular here and there. Our EAC grade VG7.
Ex: Long Beach Signature (Heritage, 2/2009), lot 166, where it realized $4,887.50. NGC ID# 223H, PCGS# 35459 Base PCGS# 1347

1797 S-123, B-12 Cent, MS64 Brown
Famous Nichols' Find Variety

3009 **1797 Reverse of 1797, Stems, S-123, B-12, R.4, MS64 Brown PCGS Secure. CAC.** The Nichols' Find included a quantity of Mint State 1796 S-119, 1797 S-123, and 1797 S-135 large cents, said to be discovered at Gallows Hill in Salem, Massachusetts. It turns out that Gallows Hill was not the site where the Salem witches were executed more than a century before this coin was minted. The large cent hoard, said to be as many as 1,000 pieces, was attributed to David Nichols, having come in to the possession of the Nichols family prior to the 1860s. This impressive Choice Mint State piece retains traces of original mint red on its lustrous chestnut-brown and pale blue surfaces. Our EAC grade MS62. NGC ID# 2242, PCGS# 35909 Base PCGS# 1422

1846 N-13 Tall Date Cent, MS65 Brown

3010 **1846 Tall Date, N-13, R.3, MS65 Brown PCGS Secure. CAC.** Grellman Die State b, with die crumbling inside the lower part of the R in AMERICA. This beautiful Gem cent exhibits a dusting of powder-blue toning over its lustrous light chocolate-brown surfaces that retain hints of original mint red. Both sides exhibit typical grade-consistent marks that are inconsequential and only visible with magnification. Our EAC grade MS62. Population for 1846 Tall Date: 4 in 65 Brown (1 in 65+ Brown), 0 finer (9/18). NGC ID# 226C, PCGS# 403889 Base PCGS# 1871

PROOF LARGE CENT

1849 N-18 Cent, PR64 Red and Brown
Considerable Mint Orange Remaining

3011 **1849 N-18, R.6, PR64 Red and Brown PCGS. CAC.** This near-Gem proof is among the approximately two dozen surviving examples of the N-18 die pairing, all in proof format. The reverse die was used for seven proof-only die pairings from 1844 through this year. The obverse here shows the curl tip pointing just right of the inner loop of the 8, and the bust tip, the left flag of the 1, the base of the 1, and the left edge of a dentil all align. The surfaces range from light tan to considerable mint orange remaining on the obverse portrait. A small nick shows on Liberty's cheek, along with a faint oval dark spot behind the head. The strike is somewhat soft on the highest hair curls. Our EAC grade PR63. Population: 3 in 64 Red and Brown, 2 finer (9/18). PCGS# 400589 Base PCGS# 1977

PROOF FLYING EAGLE CENTS

1856 Snow-3 Flying Eagle Cent, VF Details

3012 **1856 Snow-3 — Cleaned — PCGS Genuine Secure. VF Details.** Light repunching on the upright of the 5 in the date aids in identifying the Snow-3 variety. On this piece, a loupe reveals evidence of an old cleaning in the finely textured surfaces, although deep olive hues have since been reintroduced into the protected areas of the fields. Detail is strong for the VF Details level, and the appearance is moderately pleasing.

1856 Proof Flying Eagle Cent, VF Details Accessible Example of This Famous Key Snow-9 Die Pair

3013 **1856 Snow-9 — Repaired — PCGS Genuine Secure. VF Details.** Die lines above the I in UNITED and at the end of the left bow ribbon confirm the attribution for this usually-seen Snow-9 variety. While the 1856 Flying Eagle cent, a pattern rather than a regular issue but often collected as such, is out of reach for many enthusiasts, this VF Details example provides an opportunity some might not otherwise have. Each side displays wear over the motifs, though the rims remain broad and sharp. The surfaces are bright and show extensive signs of tooling, explaining the grade.

INDIAN CENTS

1877 Indian Cent, MS64 Brown Rich Burgundy-Brown Color

3014 **1877 MS64 Brown PCGS Secure.** Burgundy-brown and deep olive hues earn this Choice example a Brown color designation, although tiny tinges of original copper-red remain in the most protected areas. Luster shimmers beneath the toning on this sharp 1877 Indian cent and there are no bothersome abrasions. An exceptionally eye-appealing example of this key date, especially for the grade. NGC ID# 2284, PCGS# 2127

1887 Cent, Satiny MS66 Red Few Pieces Are Known Finer

3015 **1887 MS66 Red PCGS Secure.** Copper-orange and rose hues adorn satiny luster on this unabraded, almost carbon-free Premium Gem. There is some minor strike softness on the upper left portion of the wreath from grease in the die, but the Liberty portrait is sharp. Both sides are clashed with peripheral die cracks, and metal flowlines in the margins further endorse a late die state for this conditionally rare Registry Set coin. Population: 27 in 66 (5 in 66+) Red, 3 finer (9/18). NGC ID# 228F, PCGS# 2159

1889 Cent, MS66 Red Top-Grade Registry Coin

3016 **1889 MS66 Red PCGS.** This Premium Gem 1889 Indian cent is among the finest Red coins certified, and it is conditionally rare as such. PCGS and NGC have a combined population of only 17 MS66 Red pieces (9/18). This example is satiny with copper-orange and peach-gold hues across each side. The upper three headdress feathers are weak, but the wreath leaves are well-defined. Only a few scattered pepper specks are visible. NGC ID# 2732, PCGS# 2174

1908-S Cent, MS66+ Red Just One Coin Numerically Finer

3017 **1908-S MS66+ Red PCGS Secure. CAC.** Branch mints refrained from the production of cents until 1908, when the San Francisco Mint struck 1.1 million Indian Head representatives. Aside from being a popular semikey, the 1908-S is a legitimate condition rarity in MS66 Red. Slight softness occurs on the feathertips and shield of this piece (as always), but the eye appeal more than compensates. Each side emits frosty mint luster over copper-gold surfaces. A single mark under (S)T(ATES) acts as a pedigree identifier. Population: 69 in 66 (9 in 66+) Red, 1 finer. CAC: 17 in 66, 0 finer (9/18). NGC ID# 2296, PCGS# 2234

LINCOLN CENTS

1909-S VDB Cent, MS66 Red
Scarce in High Grades and With Full Red Luster

3018 **1909-S VDB MS66 Red PCGS.** Both collectors and the general public took note of the tiny mintage for the 1909-S VDB as well as the designer's initials that were quickly removed after the coin's initial release. These two factors led to widespread accumulations of the S-VDB. However, few pieces have survived the past 109 years with the mint red intact and well-preserved enough to warrant the MS66 grade. This is a bright, original example with the expected yellow-cast to the original mint luster. Few post-strike impairments are noted. Only 14 other pieces have been so graded by PCGS (10/18). NGC ID# 22B2, PCGS# 2428

1910-S Cent, MS66+ Red
Among the Finest at CAC

3019 **1910-S MS66+ Red PCGS Secure. CAC.** Bright yellow-gold luster is imbued with greenish tints and delicate copper-orange undertones on this high-end Premium Gem Red 1910-S cent. Sharp design elements complement undisturbed surfaces, and no carbon spotting is seen. The 1910-S is scarce in this grade, and PCGS lists only eight Superb Gem Red coins finer (9/18). NGC ID# 22B6, PCGS# 2440

1914-D Cent, MS64 Red and Brown
Brighter Luster Than Usually Seen

3020 **1914-D MS64 Red and Brown PCGS.** This key date near-Gem Red and Brown representative displays mostly copper-gold luster, imbued with some speckles of light tan. This is an exceptionally well-struck example, as most show "slight softening of the numerals and lettering." A few minute marks limit the grade. NGC ID# 22BH, PCGS# 2472

1914-D Cent, MS64 Red and Brown
Elusive CAC-Approved Coin

3021 **1914-D MS64 Red and Brown PCGS. CAC.** The frosty, luminous surfaces of this near-Gem Red and Brown coin are original. On the obverse, the viewer enjoys deep fire-orange coloration that might earn a full Red designation on its own merit. However, a more subdued chestnut-gold hue across the reverse produces the Brown aspect of the grade. This key-date Lincoln cent is well-struck. Scattered carbon spots are small and not out of line for the grade. NGC ID# 22BH, PCGS# 2472

1915 Cent, MS67 Red
Registry Set Contender

3022 **1915 MS67 Red PCGS Secure.** Available in lower grades, the 1915 Lincoln cent is conditionally scarce in MS66 Red, and it is a major rarity at the Superb Gem level. This Registry-grade example displays a full strike despite evidence of minor die erosion in the margins. Original, satiny mint luster glows on each side with a fiery-orange hue, and no bothersome surface imperfections are seen. Population: 14 in 67 (1 in 67+) Red, 1 finer (9/18). NGC ID# 22BK, PCGS# 2479

1920 Lincoln Cent, Exceptional MS67 Red
Tied for Finest Certified

3023 **1920 MS67 Red PCGS Secure.** With no examples certified above the numeric MS67 Red grade, this magnificent Superb Gem is a logical candidate for any top-ranked Registry Set or advanced Lincoln cent collection. Glistening pumpkin-orange color radiates from smooth and unmarked surfaces, while the strike is first-rate. There are no carbon spots to report, and a mere handful of tiny flecks are scattered on the reverse unseen to the unaided eye, visible with a strong loupe.

The huge mintage of more than 310 million pieces saw the expected overuse of the dies, and many 1920 cents show grainy surfaces as a result. Not here, with the coin apparently struck from fresh dies on a good planchet. Crisp devices stand out against satin-smooth fields. PCGS reports just 16 coins in this grade, including one Plus-graded piece. NGC adds only four examples to the list of finest-known candidates (10/18). NGC ID# 22C3, PCGS# 2524

1922 No D Cent, AU58
FS-401, Strong Reverse

3024 **1922 No D, Strong Reverse, FS-401, AU58 PCGS. CAC.** Die Pair 2. The average grade for this popular variety falls between VF25 and VF30. This nearly Uncirculated survivor features the usual softness on the motto and portrait, and the D mintmark is entirely missing as a result of lapping. A strong second 2 in the date is diagnostic. The reverse, struck from a fresh die, is boldly defined on the upper wheat stalks and the legends. Original brown surfaces exhibit faint accents of rose and peach-orange. Partial prints appear in the left obverse field. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

PROOF LINCOLN CENT

1909 VDB Cent, PR61 Red and Brown
Key Matte Proof Issue

3025 **1909 VDB PR61 Red and Brown ANACS.** The 1909 VDB Lincoln cent is easily the most popular issue in the series in matte proof format. It is a single-year type with a low production of 1,194 pieces. This PR61 representative features broad, squared-off rims and complete strike detail on the devices. Each side display light brown coloration with glowing copper-orange accents and hints of reddish-violet in the fields. A few tiny carbon specks are typical. Housed in a small sized holder. NGC ID# 22KR, PCGS# 3301

TWO CENT PIECE

1872 Two Cent Piece, MS64 Red and Brown
Doubled Die Obverse, FS-101

3026 **1872 Doubled Die Obverse, FS-101, MS64 Red and Brown PCGS. CAC.** TRUST is lightly die doubled. The final business-strike issue, which had a small run of 65,000 pieces. By 1872, small denomination coins had returned to circulation, which negated the need for the two cent piece. This lustrous cent is mostly orange-red apart from an area of steel-blue across the central reverse. Well-struck and only lightly marked. NGC ID# 22NG, PCGS# 38293 Base PCGS# 3613

PROOF TWO CENT PIECE

1873 Two Cent, PR65 Red
Closed 3, So-Called 'Original' Strike

3027 **1873 Closed 3 PR65 Red PCGS Secure.** High-end Red examples of the Closed 3 proof 1873 two cent piece are rare. This Gem is fully struck and shows a hint of contrast on each side amid original coppery-orange and golden surfaces. Only a few unobtrusive flecks are visible beneath a loupe. Population: 18 in 65 Red, 15 finer (9/18). NGC ID# 5L57, PCGS# 3653

THREE CENT SILVER

1854 Three Cent Silver, MS66
First-Year Type Two Representative

3028 **1854 MS66 PCGS.** The three cent silver design underwent two significant alterations throughout the course of its production. Initially, the six-sided star had a plain border. In 1854, the outer edge of the star was strengthened, and two silhouette lines were added, increasing the apparent size. In 1859, one of the additional outer lines was removed. This is a conditionally rare Premium Gem example of the Type Two design. Both sides have multicolor toning and satiny mint luster. The strike is sharp, although the reverse shows moderate die lapping. Population: 16 in 66 (1 in 66+), 2 finer (9/18). NGC ID# 22Z3, PCGS# 3670

1865 Three Cent Silver, MS65
Low Mintage of 8,000 Coins

3029 **1865 MS65 PCGS. CAC.** After millions of three cent silver coins were struck during the early years of the series, the denomination quickly became a nuisance in circulation. These silver coins stopped circulating altogether during and after the Civil War. The 8,000 pieces struck in 1865 were likely produced to pay off odd amounts for silver and gold deposits at the Mint. This dusky golden-gray Gem is well-struck with a heavily clashed obverse. The shield and denomination show a hint of softness. Housed in a green label holder with a matching CAC approval sticker. Population: 11 in 65, 17 finer. CAC: 3 in 65, 15 finer (9/18). NGC ID# 22ZF, PCGS# 3685

1866 Three Cent Silver, MS67
Tied for Finest at NGC

3030 **1866 MS67 NGC.** Late-date three cent silver coins were never meant for circulation. Instead, they were used to pay off odd amounts to depositors of gold or silver at the Mint. This 1866 Superb Gem, one of 22,000 pieces struck, showcases melded blue, violet, and golden-russet patina over essentially unmarked and fully struck surfaces. A hint of contrast is evident between the frosted motifs and semireflective fields. Census: 5 in 67 (2 in 67 ★), 0 finer (10/18). NGC ID# 22NK, PCGS# 3686

THREE CENT NICKEL

1882 Three Cent Nickel, MS67
A Top-Grade Registry Candidate

3031 **1882 MS67 PCGS Secure.** This Superb Gem is among the finest 1882 three cent nickels known, and it is a major rarity as such. PCGS and NGC combined list only a half dozen coins in this grade (9/18). This piece shimmers with seemingly flawless luster, showing just a hint of light golden toning. The strike is sharp and eye appeal exceeds all expectations. Population: 4 in 67 (1 in 67+), 0 finer (9/18). NGC ID# 275D, PCGS# 3750

SHIELD NICKEL

1880 Shield Nickel, XF45
Cornerstone Circulation-Strike Issue

3032 **1880 XF45 PCGS Secure.** The 1880 claims the lowest circulation-strike mintage in the Shield nickel series with a mere 16,000 coins. Uncirculated examples are major condition rarities, so those looking for business strikes only are often forced to choose from small group of high-end circulated examples like this Choice XF survivor. Modest friction from a brief stay in circulation fails to obscure the leaf veins or star centers. Smooth nickel-gray surfaces display a few golden accents. Population: 9 in 45, 47 finer (9/18). NGC ID# 276E, PCGS# 3810

PROOF SHIELD NICKEL

1877 Shield Nickel, PR66 Cameo
Stark Contrast

3033 **1877 PR66 Cameo PCGS. CAC.** This boldly struck and carefully preserved Premium Gem Cameo has few superiors at PCGS. The contrast is outstanding and the surfaces show just a hint of light golden toning. The 1877 Shield nickel is a proof only issue, essential for a complete date set of this series. Only 900 pieces are reported struck. Population: 55 in 66 (6 in 66+) Cameo, 9 finer; 3 in 66 (1 in 66+) Deep Cameo, 0 finer. CAC: 33 in 66, 4 finer (9/18).
Ex: Summer FUN Signature (Heritage, 7/2015), lot 3041, which realized $6,462.50. NGC ID# 276U, PCGS# 83831

PROOF LIBERTY NICKEL

1883 With CENTS Liberty Nickel, PR67 Cameo
Starkly Contrasted Registry Coin

3034 **1883 With CENTS PR67 Cameo PCGS Secure.** This is a sharp Superb Gem with stark cameo contrast and barely a trace of light golden toning. Eye appeal is as remarkable as the level of preservation. Close inspection with a loupe reveals faint repunching on the base of the 1 in the date, as well as on the outside edges of the 3. With CENTS proofs are rarely offered so fine. Population: 9 in 67 (1 in 67+) Cameo, 0 finer; 2 in 67 Deep Cameo, 0 finer (9/18). NGC ID# 277S, PCGS# 83881

BUFFALO NICKELS

1913-D Type One Nickel, MS67+
Only Two Coins Finer at PCGS

3035 **1913-D Type One MS67+ PCGS Secure. CAC.** Finely textured surfaces display nearly complete definition on the obverse motifs, while the reverse is struck from worn dies and exhibits extensive cracks and softness around the margins. Heavy clash marks appear under the chin. This phenomenally high-end, CAC-approved Superb Gem enjoys scintillating mint luster and total brilliance. Population: 87 in 67 (11 in 67+), 2 finer. CAC: 34 in 67, 0 finer (10/18). NGC ID# 22PX, PCGS# 3916

1926-S Buffalo Nickel, MS64
Prize Date in Choice Mint State

3036 **1926-S MS64 PCGS Secure.** In general, 1926-S nickels are a homely bunch, with weak strikes and substandard eye appeal. Choice About Uncirculated coins are scarce and finer examples are rare. This softly lustrous, nickel-gray coin displays attractive, problem-free surfaces and near-Gem quality. The strike is a notch below sharp — still strong for the issue — with minimal signs of die wear and impressive visual allure. PCGS reports just 15 numerically finer pieces (10/18). NGC ID# 22S7, PCGS# 3959

1927-S Nickel, MS65
One Finer Example at PCGS

3037 **1927-S MS65 PCGS.** This semikey issue comes better-struck than the 1927-D, but it is scarce at the Gem level and rarely seen offered. Brilliant nickel-gray surfaces are awash in soft mint frost. Strike incompleteness is limited to the bison's head and shoulder, while the other motifs are bold. A clean example for a high-end set of Buffalo nickels. Population: 41 in 65 (4 in 65+), 1 finer (9/18). NGC ID# 22SA, PCGS# 3962

1929-S Nickel, Wondrously Toned MS67 ★
The Finest-Certified NGC Example

3038 **1929-S MS67 ★ NGC.** Blushes of honey-gold, powder-blue, and orange patina embrace this crisply struck and well-preserved branch mint nickel. The innermost feather is only partially present, the result of a lapped die, and the Indian has faint clashmarks (as made) from IN GOD WE TRUST below the chin. Seven other 1929-S nickels have been certified as MS67 by NGC with none finer (9/18). However, only the present Superb Gem has additionally received a Star designation from that service, which denotes superior eye appeal. Thus, this is the single highest NGC-graded 1929-S nickel.
Ex: FUN Signature (Heritage, 1/2004), lot 5442, where it brought $8,050; FUN Signature (Heritage, 1/2012), lot 5275, where it brought $8,050 again. NGC ID# 22SG, PCGS# 3968

1938-D Buffalo Nickel, Luminous MS68
Top-Grade Condition Rarity

3039 **1938-D MS68 PCGS.** The 1938-D Buffalo nickel is readily available as a type coin, even in Superb Gem condition. However, precious few examples are known as fine as MS68, and none are numerically finer. This top-grade coin displays shimmering luster and delicate lilac and ice-blue toning. Greenish-gold hues appear around portions of the outer peripheries. Under a loupe, the only visible surface characteristics are the metal flowlines produced by die erosion, with no evidence of surface contact. Population: 33 in 68 (2 in 68+), 0 finer (9/18). NGC ID# 22T2, PCGS# 3984

EARLY HALF DIME

1797 15 Stars Half Dime, XF40
V-2, LM-1

3040 **1797 15 Stars, V-2, LM-1, R.3, XF40 NGC.** The 1797 half dimes with 15 obverse stars were the first of the date minted, using an obverse die that must have been engraved early in 1796 before Tennessee became the 16th state. There is no doubt that the die was completed except for the final digit of the date, and when it carried over to 1797 without being used the previous year, a final 7 completed the date, and it was put into use even though it had an incorrect star count. The die was certainly used because of a shortage of acceptable steel to create new dies. The shortage of steel was also responsible for dies being used well beyond their ordinary life, leaving modern collectors with an amazing array of die states, like the present coin that has heavy die cracks on both sides. The surfaces are mostly medium gray with lighter gray on the devices. The central design motifs are weak, but the overall appearance is strong. Only a few faint scratches and abrasions are present on this wholesome piece.
Ex: Long Beach Signature (Heritage, 2/2009), lot 827, where it realized $6,325. NGC ID# 22ZZ, PCGS# 38597 Base PCGS# 4258

BUST HALF DIME

1835 V-7, LM-10 Half Dime, MS66+
Small Date, Small 5C

3041 **1835 Small Date, Small 5C, V-7, LM-10, R.1, MS66+ NGC.** The 5 in the denomination has a small triangular flag and is under the fletching. This magnificently toned Premium Gem is overtly high-end for the grade. Original shades of blue, violet, rose, and gold toning cover beautifully preserved, sharply struck surfaces. The visual quality is exquisite. An outstanding type or date representative. NGC ID# 232H, PCGS# 38719 Base PCGS# 4285

SEATED HALF DIME

1837 Half Dime, MS66+
Frosty No Stars Type Coin

3042 **1837 No Stars, Small Date (Flat Top 1) MS66+ PCGS Secure. CAC.** The devices are sharp and vibrant luster engulfs each side of this mostly brilliant Premium Gem type coin. Die erosion around the margins blurs portions of the border dentils. Small areas of golden border toning warm the peripheries, and no abrasions are immediately visible. All 1837 Seated half dimes are No Stars coins and the Small Date variant is scarce in high grade. Plus-graded by PCGS with CAC endorsement. PCGS population: 17 in 66 (3 in 66+), 7 finer. CAC: 10 in 66, 7 finer (9/18). NGC ID# 232M, PCGS# 4312

SEATED DIMES

1857 Seated Dime, MS66+
Lustrous and High-End for the Grade

3043 **1857 F-102, R.3, MS66+ PCGS Secure.** A thin die line on Liberty's knee and the position of the date numerals identify this variety. The 1857 Seated dime in MS66 is a genuine condition rarity, and finer pieces are virtually uncollectible. This Plus-designated coin displays brilliant, softly frosted luster and unabraded surfaces. Some strike weakness is noted on Liberty's temple but it is minor. Eye appeal is outstanding. Population: 10 in 66 (3 in 66+), 1 finer (9/18). PCGS# 538091 Base PCGS# 4614

1859 Dime, Brilliant MS67
Only One Finer at Each Service

3044 **1859 F-107, R.3, MS67 NGC.** This variety shows tiny die chips near stars 2 through 8, 12, and 13. Obverse 7 is the only die with this date placement relative to the shield point. The reverse is perfect. There had been a severe oversupply of subsidiary silver coins in the East since the passage of the Mint Act of 1853, which reduced the silver weight of the half dime, dime, quarter, and half dollar. The law explicitly prohibited the free coinage of silver, yet Mint Director James Ross Snowden continued to accept all silver bullion deposits throughout the 1850s, striking subsidiary coins without consideration for their commercial demand. The overabundance of small-denomination silver coins in Atlantic cities helps to explain the relative availability of high-grade P-mint dimes from the mid-to-late 1850s, including the 1859 (429,200 pieces produced).

This Superb Gem 1859 dime is brilliant throughout and displays shimmering luster. Typical strike incompleteness is confined to the right obverse stars, Liberty's head, and right (facing) hand. Eye appeal is outstanding. Census: 14 in 67 (1 in 67 ★), 1 finer (10/18). *Ex: Palm Beach Signature (Heritage, 11/2004), lot 6206; Gardner Collection, Part IV (Heritage, 10/2015), lot 98259; Dallas Signature (Heritage, 12/2017), lot 3589.* NGC ID# 2394, PCGS# 538139 Base PCGS# 4619

PROOF SEATED DIMES

1860 Dime, Beautifully Toned PR67
An Exemplary Type Coin

3045 **1860 Doubled Die Reverse, F-101, R.3, PR67 PCGS Secure.** Minor reverse die doubling is evident on ONE DIME. This is the only recorded proof die marriage of the 1860 dime. Superb Gem examples are rarely offered, with or without cameo contrast. This non-Cameo displays a razor-sharp strike and deeply reflective fields. Beautiful gold, sea-green, blue, and violet toning covers each side in concentric circles. Population: 8 in 67, 0 finer; 7 in 67 (3 in 67+) Cameo, 1 finer (9/18). NGC ID# 23CJ, PCGS# 539007 Base PCGS# 4753

1868 Dime, PR66 Ultra Cameo
Rare So Well-Contrasted

3046 **1868 PR66 Ultra Cameo NGC. F-104, R.3.** Ultra or Deep Cameo examples of the proof 1868 Seated Liberty dime are rare. NGC has seen only six such coins, including two in this grade and two that are finer; PCGS reports five Deep Cameos, the sole finest of which is in this grade (9/18). This Premium Gem has sharp detail and stark field-device contrast. Light golden toning warms each side, with deeper amber color around a portion of the outer reverse border. Preservation and eye appeal are outstanding. NGC ID# 23CS, PCGS# 94761

BARBER DIMES

1892 Barber Dime, Colorful MS67 ★

3047 **1892 MS67 ★ NGC. CAC.** Golden-brown, green, red, and ocean-blue colors bathe this lustrous, well-preserved, and intricately struck Superb Gem. Those who collect by the first year of type should give strong consideration to this gorgeously toned representative. Census: 23 in 67 (2 in 67 ★, 1 in 67+★), 0 finer. CAC: 23 in 67, 1 finer (9/18). NGC ID# 23DK, PCGS# 4796

1895-O Dime, MS64
Toned, Semiprooflike Example of This Key Issue

3048 **1895-O MS64 PCGS. CAC.** Aside from the legendary 1894-S rarity, the most elusive Barber dime is the 1895-O. Just 440,000 pieces were struck, and it commands high prices from Good to Mint State, towering over the rest of its regularly struck competition. The present near-Gem offers delightful eye appeal. Blue-green, peach, and pale silver-gray shadings are dominant, with strong luster shining beneath. The obverse exhibits considerable frost on the portrait, while the well-defined reverse lacks the degree of frost but offers a level of reflectivity in the fields. Population: 9 in 64 (1 in 64+), 12 finer. CAC: 2 in 64, 8 finer (9/18).
Ex: Long Beach Signature (Heritage, 5/2009), lot 464, where it brought $18,400.
From The Gary Verner Collection. NGC ID# C4KL, PCGS# 4807

1899-O Dime, Sharply Struck MS66 Prooflike
The Only Prooflike Example Certified

3049 **1899-O MS66 Prooflike NGC.** The *Guide Book to Barber Silver Coins* estimates only 45 to 55 pieces are known in MS65 or finer grades, continuing the string of O-mint rarities. This incredible piece is uncommon in two ways: Not only is it justifiably ranked Prooflike, it shows an uncommonly bold strike for an O-mint Barber dime, many of which show weakness. The hair and headband are all complete, and there is just a touch of softness on the lower-left leaf. This silver-white piece also shows little evidence of coin-to-coin contact. This is the only Prooflike piece of the issue at NGC, in any grade (9/18).
Ex: Long Beach Signature (Heritage, 2/2008), lot 159, where it realized $7,475.
From The Gary Verner Collection. NGC ID# 23EA, PCGS# 4819

1902-S Dime, Delicately Toned MS66
Semiprooflike Fields

3050 **1902-S MS66 PCGS. CAC.** Ex: Lily Nicole Collection. The 1902-S is similar in rarity to its New Orleans counterpart, scarce in all Mint State grades and rare finer than MS64. This Premium Gem representative displays bold motifs set against noticeably semiprooflike fields. Pale shades of lime-green, champagne, and lavender-blue color accent the mirrors, most prominently on the reverse. When last sold in 2015, this piece was a part of the Current #1 PCGS Registry Set of Barber Dimes, Circulation Strikes. Population: 11 in 66, 1 finer. CAC: 10 in 66, 2 finer (9/18).
Ex: Central States Signature (Heritage, 4/2015), lot 3930, where it brought $5,875.
From The Gary Verner Collection. NGC ID# 23EL, PCGS# 4829

1912-S Dime, MS67 Prooflike
The Only Certified Prooflike Example

3051 **1912-S MS67 Prooflike NGC.** Although numerous 1912-S Barber dimes exist in the lower Mint State echelons — that is, lower than the present piece — in MS67 this piece is tied for finest certified with a single other MS67 (a non-Prooflike). Another MS67 piece at PCGS tied for numerically finest honors. This is also the only Mint State 1912-S in any grade certified as Prooflike at NGC (PCGS does not certify Prooflike Barber dimes).

This silver-white Superb Gem lacks any discernible coloration, save for a few darker microflecks that appear under a loupe, but the devices are thickly frosted — the reverse more so than the obverse — and the fields are brilliantly mirrored, as expected. Both sides are remarkably distraction-free. An unimprovable coin, both technically and aesthetically.

Ex: Long Beach Signature (Heritage, 2/2008), lot 207, where it brought $8,625.

From The Gary Verner Collection. NGC ID# 23FP, PCGS# 4862

MERCURY DIMES

1927-D Mercury Dime, MS65 Full Bands
A Strike and Condition Rarity From the 1920s

3052 **1927-D MS65 Full Bands PCGS.** Ex: Larry Shapiro. The surfaces display satiny luster with lightly spotted darker toning on the obverse, a bit more consistent and bright on the reverse. The striking details only show minor weakness on the highest points of Liberty's hair and the lower diagonal of the reverse fasces. Perusal with a glass reveals a couple of shallow scrapes on Liberty's neck and ticks on the central bands, the lower diagonal, and elsewhere, none singularly distracting but overall perhaps limiting an even higher grade. Population: 37 in 65 (3 in 65+) Full Bands, 17 finer (9/18).

Ex: Larry Shapiro #1 All-Time Finest Mercury Dimes Full Bands Basic PCGS Registry Set/FUN Auction (Heritage, 1/2006), lot 1895; FUN Signature (Heritage, 1/2011), lot 4571, where it brought $8,050.

NGC ID# 23HV, PCGS# 4963

1927-S Dime, MS65 Full Bands
Seldom Encountered With Complete Definition

3053 **1927-S MS65 Full Bands PCGS.** Mercury dime specialist David Lange states that Full Band Gems of this date are among the keys to the series, as they are frequently deficient in this area. Flat band or partially split band pieces are the rule. This particular Gem features sharp definition not only on the middle bands, but on all of the design elements. There is no indistinctness on the peripheral reverse lettering as is so often the case with this and other dates of the 1920s. Adding to the coin's eye appeal is the veneer of light gold toning that adheres to lustrous, virtually unabraded surfaces on each side. Population: 35 in 65 Full Bands, 22 finer (9/18).

From The Reed Hawn Collection of Mercury Dimes / Pittsburgh Signature (Heritage, 8/2004), lot 5792, where it brought $6,325.

NGC ID# 23HW, PCGS# 4965

1930 Dime, MS67 Full Bands
Among the Finest Certified

3054 **1930 MS67 Full Bands PCGS Secure.** A plentiful date in most grades, the 1930 Mercury dime is conditionally rare in MS67 Full Bands and unknown finer (10/18). This champagne-tinted piece displays some bluish toning in the centers and has vibrant, glistening mint luster. The strike is sharp throughout, adding to the appeal and technical excellence of this Registry-grade 1930 dime. Population: 25 in 67 (2 in 67+) Full Bands, 0 finer (10/18). NGC ID# 23J5, PCGS# 4979

TWENTY CENT PIECES

1875-S Twenty Cent, Frosty MS66
High-End Type Coin

3055 **1875-S MS66 PCGS Secure. BF-5, R.2.** BF-5 is known in a late die state with a shattered reverse and a rim cud below the date on the obverse. This piece lacks the rim cud on the obverse, and while the reverse is extensively cracked, the breaks are not as prominent as they are on the later state. This coin's appeal is as a type coin. The 1875-S twenty cent piece is scarce in MS66 and a major rarity finer, but it is the most plentiful issue in the series so well-preserved. This example displays shimmering original luster with golden interiors and blue-green borders. Some strike softness is noted on several border stars and the upper edge of the eagle's left (facing) wing. Population: 77 in 66 (11 in 66+), 6 finer (9/18). NGC ID# 23R7, PCGS# 5298

1875-S/S Twenty Cent, Frosty MS66
FS-302, Misplaced Date, Repunched Mintmark

3056 **1875-S/S Misplaced Date, FS-302, BF-16, R.1, MS66 NGC.** FS-302 shows a boldly repunched mintmark that resembles a dollar sign, and on the obverse the top of a misplaced digit (possibly a 5) is in the dentils below the 7 in the date. The snowy-white surfaces are unblemished and show a faint tint of light golden border toning. Strike weakness affects the border stars and areas of the Liberty portrait, but the reverse is better-defined. The 1875-S twenty cent piece is scarce in this grade and rare finer. Census: 54 in 66 (2 in 66+, 3 in 66 ★), 9 finer (9/18). NGC ID# 23R7, PCGS# 145009 Base PCGS# 5298

PROOF TWENTY CENT PIECE

1876 Twenty Cent, PR65
Irrefutably Original, Great Eye Appeal

3057 **1876 PR65 NGC. CAC. BF-4, R.4.** The top of the 1 is completely right of the shield point. Without question, though, the key attribute of this high-end Gem twenty cent piece is its irrefutable originality. The surfaces are richly toned in blue, lavender, russet, and golden patina, yet the fields remain flashy and the devices still appear frosty in contrast. Housed in a former generation holder with CAC approval. NGC ID# 27H3, PCGS# 5304

EARLY QUARTERS

1796 B-2 Quarter, AG3
Rare Early Silver Type Coin

3058 **1796 B-2, R.3, AG3 PCGS.** The Small Eagle quarter is among the rarest silver types, struck in only one year and in limited number due to the preference of bullion depositors for the silver dollar denomination. The present example has deep gray toning and a bold date. The portrait and eagle are well-outlined. Most of the stars are distinct. The upper-reverse legend is worn smooth but most of the lower-reverse legend is clear. The upper reverse displays a few light pinscratches.
Ex: ANA Signature (Heritage, 10/2012), lot 4095, where it brought $7,050. NGC ID# 23RA, PCGS# 38920 Base PCGS# 5310

1806 B-3 Quarter, AU58
Lustrous Type Coin

3059 **1806 B-3, R.1, AU58 PCGS Secure.** Tompkins Die State 3/5, both dies heavily clashed and cracked. B-3 is a plentiful variety, often encountered in type collectors' cabinets. The I in LIBERTY is from a broken punch missing the right foot, and the denomination on the reverse is placed so that neither the 5 nor the C touch the eagle's tailfeathers or the fletchings. This lustrous near-Mint coin is weakly struck along the right-hand obverse border and across the upper-central reverse, with the stars and eagle's head indistinct. Light golden interiors cede to blue-gray borders, offering strong eye appeal. NGC ID# 23RD, PCGS# 38929 Base PCGS# 5314

SEATED QUARTERS

1867 Quarter Dollar, MS66
The Single Finest by Two Grades
A Remarkable Condition Rarity

3060 **1867 MS66 NGC. Briggs 1-A.** The Philadelphia Mint struck only 20,000 quarter dollars in 1867. Annual mintages of quarters gradually declined during the Civil War, when hoarding of silver coinage was widespread, and they did not return even to a six-figure level at any mint until 1871. The 1867 survives mainly in worn condition, being rare in Mint State. Moreover, the present MS66 coin is the sole finest piece known by a full two grade points. The Condition Census for this issue consists of the present coin and a trio of MS64 pieces reported at PCGS. NGC and PCGS combined list a handful of Select examples and pieces in lesser condition, which are themselves recognized condition rarities. But this piece stands above the others as the ultimate. Sharp definition on the devices and frosty luster in the fields produces tremendous eye appeal, warmed by light golden toning. Under a loupe, only the most insignificant abrasions are visible. This remarkable 1867 Seated Liberty quarter does not share its status with any other example — it is unchallenged as the finest piece available. NGC ID# 23UD, PCGS# 5470

1882 Seated Liberty Quarter, MS67
Brilliant Cartwheel Luster

3061 **1882 MS67 PCGS Secure. Briggs 1-A, Flynn-RPD-001.** The faint remnant of a repunched 1 is evident to the left of the primary 1's base. The 1882 Seated Liberty quarter boasts a small mintage of 15,200 coins, but many pieces were preserved at the time of issue for numismatic purposes. This Superb Gem is conditionally rare. Brilliant, radiant luster engulfs this frosty type coin with a remarkable degree of eye appeal. A few stars are incompletely struck, but the devices are sharp. No abrasions are observed. Population: 19 in 67, 2 finer (9/18). NGC ID# 23VE, PCGS# 5514

PROOF SEATED QUARTER

1864 Quarter Dollar, PR66
Beautifully Toned

3062 **1864 PR66 NGC. Briggs 3-C.** Vivid ocean-blue, violet, mint-green, and orange-gold hues adorn each side of this Premium Gem proof, complementing sharp design elements and deeply reflective fields. Modest cameo contrast is apparent on the obverse. The 1864 proof quarter is rare in this grade. NGC lists a handful of Cameos in the same condition but no Ultra Cameos. This is a high-end coin with spectacular eye appeal. Census: 10 in 66, 5 finer; 4 in 66 Cameo, 2 finer (9/18). NGC ID# 23WS, PCGS# 5560

BARBER QUARTERS

1896-S Quarter, MS62 Prooflike
A Low-Mintage Series Key
The Only Prooflike Piece Certified

3063 **1896-S MS62 Prooflike NGC.** The 1896-S is one of three major key dates in the Barber quarter series. This series is heavily collected today, but at the time of issue, Barber coinage was often viewed as inferior artistically, and its then-modern production caused it to be forfeited to commercial circulation. Barber quarters were a workhorse of commerce, and as a result, high-mintage issues today are conditionally scarce or rare in Uncirculated condition. Low-mintage dates are major condition keys. The 1896-S is a low-mintage condition key, but it is also a key date in circulated grades. Only 188,039 pieces were struck. Circulated survivors are available but expensive compared to most issues. Mint State coins are decidedly rare in any grade. This piece is distinguished as being the only coin in any grade designated Prooflike, a designation awarded to deeply reflective coins by NGC only. Subtle cameo contrast is apparent on each side, and the strike is needle-sharp. Were it not for the San Francisco mintmark, the appearance is akin to that of a lightly marked proof. The interiors are brilliant, surrounded by light golden border toning. Eye appeal is outstanding. Census: 4 in 62 (1 in 62 Prooflike), 27 finer (9/18).
From The Gary Verner Collection. NGC ID# 23Y9, PCGS# 5615

1901-S Quarter, VF25
Key Issue in the Series
Remarkably Clean and Original Example

3064 **1901-S VF25 PCGS. CAC.** David Lawrence's Obverse B with both 1s in the date centered between denticles, and Reverse A with the mintmark slightly angled and low. The 1901-S circulated extensively in the channels of commerce, as seen by the majority of certified coins in the Poor to Very Good range. Mid-range Very Fine pieces such as the present offering are not seen that frequently; indeed, they are quite unusual as PCGS and NGC have graded only 14 VF25s.

The light silver-gray surfaces exhibit well-defined devices. All the letters in LIBERTY show clearly except for the legs of the R. Likewise, all the letters on the reverse motto ribbon show. Close examination reveals remarkably clean surfaces, unusual for a coin that has seen moderate circulation. Furthermore, both sides are original. This key-date representative, well-deserving of the CAC endorsement (one of only three CAC-endorsed VF 1901-S quarters), will see spirited bidding among Barber quarter specialists. Population: 11 in 25, 63 finer. CAC: 3 in 25, 8 finer (9/18). NGC ID# 23YR, PCGS# 5630

1905-O Barber Quarter, MS66+
Ex: Clapp-Eliasberg-Gardner, Condition Census
Direct Purchase From the New Orleans Mint

3065 **1905-O MS66+ PCGS Secure. CAC.** Described in the Eliasberg catalog as: "Heather and light golden toning over lustrous, satiny surfaces ... an outstanding gem specimen that is worthy of special note by the interested bidder." Each side displays incompleteness of strike on the high points — a hallmark of the Louisiana facility. The overall preservation is unsurpassed. This Superb Gem traces its origin directly back to the New Orleans Mint in 1905, a claim only a handful of coins can rightly make. In addition to its historical significance, Registry specialists will also recognize this coin's importance as one of the finer-known survivors of this scarcely saved issue. A fabulous representative of what David Lawrence called a "magic" date. There are just two coins reported finer, one each at PCGS and NGC. Population: 14 in 66 (4 in 66+), 1 finer. CAC: 7 in 66, 1 finer (9/18).
Ex: Purchased directly from the New Orleans Mint by John M. Clapp (11/1905); John H. Clapp; Clapp Estate; Louis E. Eliasberg, Sr. via Stack's (1942); Eliasberg Collection (Bowers and Merena, 4/1997), lot 1585; unknown intermediaries; purchased from David Lawrence Rare Coins by Eugene Gardner (10/1999); Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98579, which realized $11,750.
NGC ID# 23Z3, PCGS# 5640

1909-O Quarter Dollar, MS64+
Sole CAC Coin for the Grade

3066 **1909-O MS64+ PCGS. CAC.** The 1909-O Barber quarter circulated extensively. Mint State survivors are scarce, and those grading finer than MS64 are decidedly rare. This Plus-graded near-Gem is the only coin for the grade with a CAC endorsement. Luster is satiny with light golden toning, and the strike is sharp throughout. Only a few small marks are apparent beneath a loupe. Population: 20 in 64 (1 in 64+), 8 finer. CAC: 1 in 64, 4 finer (9/18).
From The Gary Verner Collection. NGC ID# 23ZJ, PCGS# 5655

1913-S Quarter, Semiprooflike AU58
Lowest Mintage of the Series

3067 **1913-S AU58 PCGS.** The 1913-S is one of the "big three" key dates in the Barber quarter series, and of the three it boasts the lowest mintage — just 40,000 coins. There is a cluster of Mint State survivors in median grades, but the majority of the 1913-S survivorship resides in VF and lower grades, especially AG to VG condition. Attractive About Uncirculated pieces are genuinely rare — rarer than Uncirculated coins. This near-Mint example is semiprooflike and brilliant, showing barely a trace of high-point wear. Faint slide marks appear to be the only surface imperfections. Worthy of note is considerable strike weakness on both sides. It affects several obverse stars, the hair and leaves around LIBERTY, and the lower half of the eagle. Population: 4 in 58, 71 finer (9/18).
From The Gary Verner Collection. NGC ID# 23ZW, PCGS# 5666

PROOF BARBER QUARTER

1901 Quarter, PR67 Deep Cameo
A Major Condition Rarity

3068 **1901 PR67 Deep Cameo PCGS Secure.** PCGS has designated only four proof 1901 Barber quarters as Deep Cameos, including one in PR65 and three in PR67. NGC lists no Ultra Cameos in any grade (9/18). This Superb Gem proof showcases needle-sharp detail and stark field-device contrast. Light golden toning warms each side, and the preservation is exceptional across the fields and design elements. Population: 3 in 67 Deep Cameo, 0 finer (9/18). NGC ID# 2XD8, PCGS# 95687

STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter, AU Details
Pleasing Color and Design Definition

3069 **1916 — Improperly Cleaned — NGC Details. AU.** The cleaning on this coin noted by NGC is old, and the surfaces have since retoned a pleasing gunmetal-gray and golden hue that accentuates the relief of the design. The figure of Liberty and the eagle show little wear, in keeping with the AU Details grade. The date is sharp and abrasions are minimal. Liberty's head lacks full detail, although it is uncertain how much of the weakness is due to wear. This is a pleasing coin considering the noted cleaning, and it will fit in well with an otherwise problem-free collection of Standing Liberty quarters in circulated grades. NGC ID# 43XR, PCGS# 5704

1918/7-S Quarter, Unc Details
Untoned and Well-Defined, FS-101

3070 **1918/7-S FS-101 — Environmental Damage — PCGS Genuine Secure. Unc Details.** This famous listing is the only major die variety in the Standing Liberty quarter series. The obverse die was fitted to two different hubs — dated 1917 and 1918 — during its hubbing process. Working dies received two or three hub impressions each, being annealed in between, creating a window of opportunity for hubbing overdates such as this to be created. Both sides of this coin are untoned and well-defined. However, the surfaces are unnaturally subdued, possibly the result of cleaning, preventing a numeric grade.

1919 Quarter, MS67 Full Head
Beautifully Toned and Preserved

3071 **1919 MS67 Full Head PCGS Secure.** The 1919 quarter was produced in copious quantity (more than 11.3 million pieces) and is one of the most plentiful pre-1925 Type Two issues in high-grade Full Head, rivaled only by the 1917 Type Two. Unlike issues from the late 1920s, Full Head 1919 quarters often exhibit bold definition not only on the head, but also the shield rivets, the gown lines, the stars, and the leading edge of the eagle's left (facing) wing, making the date ideal for type purposes. This piece does not disappoint in that regard, showing frosty luster highlighting the sharp detail on each side. Rich amber-gold, pale violet, and ocean-blue hues surround warm golden centers, and the surfaces are free of any distracting disturbances. Population: 36 in 67 (2 in 67+) Full Head, 2 finer (9/18).
Ex: Purchased by Gene Gardner from Aspen Park Rare Coins (9/2006); Eugene H. Gardner Collection, Part I (Heritage, 6/2014), lot 30452. NGC ID# 243B, PCGS# 5729

1921 Quarter, MS66+ Full Head
Remarkably High-End

3072 **1921 MS66+ Full Head PCGS Secure. CAC.** A condition rarity of the Standing Liberty quarter series and a semikey date overall, this 1921 coin is among the finest examples that we have seen in recent years. This issue is essentially uncollectible in MS67 Full Head for the majority of numismatists, and the supply of Premium Gems is small. Moreover, this frosty example stands above its peers with the Plus designation and a CAC green label. We have previously handled only a single MS66+ Full Head coin, in the New York Signature (Heritage, 10/2015), lot 3234, which realized nearly $13,000 without a CAC endorsement. At the least, this CAC coin is the technical equal of its predecessor. Liberty's head and the shield are sharp, although the shield normally is on the 1921. However, this piece also has a well-defined date area, which is rarely found in combination with full head detail. Light golden toning graces each side and daubs of deeper amber color appear in the upper obverse margins. Preservation and eye appeal are superb. Population: 28 in 66 (3 in 66+) Full Head, 2 finer. CAC: 12 in 66, 3 finer (9/18). NGC ID# 243H, PCGS# 5741

Doris Doscher, model for the Standing Liberty quarter

1927-S Quarter Dollar, MS64 Full Head
A Premier Series Rarity

3073 **1927-S MS64 Full Head NGC.** The 1927-S is one of the great rarities of the Standing Liberty quarter series with Full Head definition; it is many times rarer than the 1916 and equally as rare as the sought-after 1918/7-S overdate. The 1927-S was struck during an era when the San Francisco Mint was having difficulty producing sharp strikes consistently. Standing Liberty quarter expert J.H. Cline wrote in an April 4th, 1991 *Coin World* article:

> "The San Francisco Mint facilities had more problems with the minting of the Standing Liberty, Mailed Breast quarter dollars than the Philadelphia or Denver Mints. The 1918-S, 1924-S, 1926-S and 1927-S quarter dollars are well-known examples of San Francisco pieces frequently lacking head, shield and toe detail."

The second-lowest production figure of the series (396,000 pieces) did not help the survival rate of Full Head 1927-S quarters. Cline, writing in *Standing Liberty Quarters*, fourth edition, estimates no more than 10 Full Head specimens survive at the Gem grade level, and PCGS and NGC's combined population shows only 46 Full Head pieces in all grades (3/14), a number that is possibly inflated by resubmissions.

This near-Gem Full Head representative exhibits uncharacteristically strong definition on Liberty's head, chain mail, toes, and stars, as well as the reed and bead around the border. Minor softness is seen on the shield lines and rivets, the eagle's breast, and the leading edge of the left (facing) wing, though the overall strike is still exceptional. Close examination reveals fine die striations in the fields around the devices, likely from an attempt to remove clash marks, the remnants of which are still visible on the reverse. Frosty, virtually untoned luster blankets both sides, with a few faint golden accents seen periodically across the surfaces. An exceptional example of this characteristically weak key-date San Francisco issue. Census: 7 in 64 Full Head, 5 finer (9/18).
Ex: Central States Signature (Heritage, 4/2014), lot 5593. NGC ID# 243W, PCGS# 5765

WASHINGTON QUARTERS

1932 Washington Quarter, MS67
Inaugural Year of Issue, None Finer

3074 **1932 MS67 PCGS.** The 1932 quarter is not only a popularly sought-after first-year issue, it also boasts one of the lower mintages in this long-running series. Merely 5.4 million coins were struck. Many were saved and survive in MS64, MS65, and MS66, but the issue becomes a significant condition rarity at the Superb Gem level. This is one of nine coins so-graded at PCGS. There are another four MS67 submissions at NGC. Both firms have yet to encounter a finer example (9/18).

The surfaces of this frosty piece are partly brilliant and partly toned in a thin veneer of gold and powder-blue. Washington's hair and the eagle's feathers are boldly struck. Magnification yields just a handful of microscopic flecks. NGC ID# 2447, PCGS# 5790

1950-S/D Quarter, Frosty MS67
Tied for Finest at PCGS

3075 **1950-S/D FS-601 MS67 PCGS Secure.** The underlying D is plainly evident beneath the primary S mintmark on this variety, the two mintmarks being well-centered on each other. Examples of this *Guide Book* variety are scarce in high grade, and PCGS has seen only seven Superb Gems with none finer (9/18). This piece is frosty and well-struck with near-flawless luster. Flecks of russet and amber border toning surround champagne-tinted interiors. NGC ID# 245V, PCGS# 145639 Base PCGS# 5845

PROOF WASHINGTON QUARTER

1953 Quarter, PR68 Deep Cameo
Top-End Registry Set Candidate

3076 **1953 PR68 Deep Cameo PCGS.** The proof 1953 Washington quarter is usually available, but Registry-grade pieces in PR68 Deep Cameo are rare. This example is among the finest Deep Cameos at PCGS. It showcases stark white-on-black contrast and seemingly infinite depth of mirroring in the fields. The devices are fully struck and frosted. This top-grade coin is almost flawless in its preservation. Population: 12 in 68 Deep Cameo, 0 finer (9/18). NGC ID# 4C5K, PCGS# 95985

EARLY HALF DOLLARS

1794 Flowing Hair Half, VF20
O-101, Sharply Struck

3077 **1794 O-101, T-7, High R.3, VF20 NGC.** The master dies for the Flowing Hair half dollars consisted of just the bust on the obverse and the eagle on the reverse. Working dies were made by hand with punches and graving tools to create the date, stars, and lettering on the obverse, and the laurel branches, leaves, berries, and legend on the reverse. Because the average working die only produced 4,000 pieces (or less), a total of six obverse dies and seven reverse dies were needed to produce 23,464 half dollars dated 1794.

The Overton-101 variety is the most available 1794 variety by far, but it is scarce both in terms of surviving examples and demand. This coin shows strong definition on all of the devices and an attractive, medium-gray patina. Golden highlights occupy the recesses. A few light adjustment marks are seen at the upper-left reverse, and several small marks are scattered across the surfaces, visible with a glass.

Ex: Hilt Collection / Central States Signature (Heritage, 4/2015), lot 5052, where it brought $12,925. NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051

1794 Half Dollar, Colorful VF20
Rare O-106 Variety, Early Die State

3078 **1794 O-106, T-4, Low R.6, VF20 PCGS.** Tompkins Die State 1/1, as usual, but nonetheless rare. Overton-106 was the fourth die variety struck at the Mint in 1794 and the first use of the familiar reverse that was later employed for Overton-101. This O-106 coin is in the early die state, before the crack develops at the F in OF. The rims are sharp, and the central devices are bold. A few faint adjustment marks are discernible on the central part of Liberty's portrait and at the right-hand obverse border, although they are unnoticed by the unaided eye. Sea-green interiors cede to olive, russet, and orange-gold toning around the margins. No O-106 coins are known in Mint State, and only a handful of pieces are finer than this example. NGC ID# 24E6, PCGS# 39208 Base PCGS# 6051

1795 Flowing Hair Half Dollar, O-117a, XF40
Lightly Toned With Traces of Luster

3079 1795 2 Leaves, O-117a, T-3, R.4, XF40 PCGS Secure. Tompkins Die State 4/2. The obverse shows the diagnostic O-117a die crack from the bust to border, between the date and star 15, with a faint branch crack to the tops of 95, confirming the Overton variety. This example is sharply defined for a Choice VF coin, with hints of luster apparent in the protected areas. The surfaces display light gray toning with splashes of ivory on the high points. A short streak of deep toning through star 1 joins numerous light abrasions and lines visible with a lens. A pleasing example of the issue, seldom found in finer grades. NGC ID# 24E7, PCGS# 39234 Base PCGS# 6052

1795 Flowing Hair Half Dollar, VF25
S Over D in STATES Blunder, O-129a

3080 1795 2 Leaves, Second S Over D, O-129a, T-7, R.7, VF25 PCGS. One of the more interesting engraving blunders of the Flowing Hair half varieties — a similar error occurred on some 1795 half eagles. This example is a late state of the dies, with an impressive reverse die crack meandering from the bottom rim, through the ribbon bow, across the eagle's head, and to the opposite rim. A golden sheen overlays the gray-silver surfaces of this early, two-leaf half, which displays only a few small defects and nice appeal.
Ex: San Francisco Signature (Heritage, 3/2014), lot 10334, which realized $4,112.50. NGC ID# 24E7, PCGS# 39260 Base PCGS# 6052

1806 O-116 Half Dollar, AU55
Pointed 6, Stem Reverse

3081 1806 Pointed 6, Stem, O-116, T-20, R.3, AU55 PCGS. Tompkins Die State 3/5. The third use of obverse 9, now with the recut TY still sharply visible but not as bold as on O-114 or O-115. This piece has a heavy die crack from the tail to the top of UNITED and STATES. This is a plentiful variety in this die state and popular for type and date representation. Luster remains in the fields of this Choice AU coin, illuminating yellow-gold and pistachio-green toning. Lilac-gray overtones are less obvious. The strike shows considerable central weakness, typical for many of the 1806 and 1807 half dollars. Although not in the Condition Census, this piece is clearly finer than most survivors.
Ex: Alpine Numismatics (2004); FUN Signature (Heritage, 1/2008), lot 1386, which realized $4,600. NGC ID# 24EJ, PCGS# 39319 Base PCGS# 6071

1806 Half Dollar, VF30
O-122, Pointed 6

3082 1806 Pointed 6, Stem, O-122, T-25, R.6, VF30 PCGS. Tompkins Die State 3. This rare variety is immediately identifiable by the vertical die crack extending from the eagle's tail feathers to the top of the shield, as O-122 was the only die marriage this reverse was used for. Light gray in color with ample remaining detail amid the wear evident on the highest points. Herrman lists only five sales of finer examples of this variety. This piece is the Tompkins plate coin.
Ex: ANA Signature (Heritage, 7/2008), lot 464, which realized $9,200; Central States Signature (Heritage, 4-5/2010), lot 2111, which realized $5,462.50. PCGS# 39328 Base PCGS# 6071

BUST HALF DOLLARS

1807 Capped Bust Half Dollar, AU58
O-112, Large Stars, 50 Over 20

3083 **1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU58 PCGS. CAC.** This 50 Over 20 reverse was paired with two different obverses. Overton-112 is the far more collectible variety. It is distinguished by the complete left foot on the 1 in the date. This near-Mint half dollar from the first year of John Reich's design is remarkably clean, lustrous, and well-detailed. There are only two obvious marks, one on Liberty's neck and another below the eagle's beak. The peripheral elements are slightly drawn to the rims, and a faint clash mark occurs above the right (facing) wing. NGC ID# 24EN, PCGS# 39356 Base PCGS# 6086

1812 Half Dollar, O-110, MS64+
Sharp and Beautifully Toned

3084 **1812 Large 8, O-110, R.1, MS64+ PCGS Secure.** The Plus designation sets this lustrous, sharp O-110 half dollar apart from its peers. Original ocean-blue and amber border toning surrounds lilac and golden-russet interiors, while a radiant cartwheel effect illuminates each side. Stars 1 and 2 on the obverse show minor weakness, but the design elements are otherwise sharply rendered on this beautifully preserved Large 8 type coin. NGC ID# 24EW, PCGS# 39457 Base PCGS# 6100

1815/2 O-101 Half Dollar, AU Details

3085 **1815/2 O-101, R.2 — Cleaned — PCGS Genuine. AU Details.** Central detail is moderately sharp on this AU-level 1815/2 half dollar, however the border stars and the denomination are weakly impressed. Dusky stone-gray surfaces are slightly glossy from an old cleaning and there is some planchet roughness in the lower reverse margin. On the obverse, several old pinscratches are seen on the portrait. Only one die variety exists for this issue, making it a key date among Capped Bust halves.

1828 Half Dollar, Toned MS65
O-118a, Square Base 2, Small 8s

3086 **1828 Square Base 2, Small 8s, Large Letters, O-118a, R.4, MS65 NGC.** A die crack along the lower reverse aids in attribution of this slightly scarcer die variety. In addition to vibrant mint luster, this Gem Capped Bust type coin displays beautiful ocean-blue, violet, and orange-gold toning over unabraded surfaces. The stars and central devices are razor-sharp, creating spectacular eye appeal. The 1828 half dollar is scarce in this condition regardless of variety. The toning on this piece is merely an additional hallmark. PCGS# 39774 Base PCGS# 6151

1829/7 Half Dollar, O-101a, MS64
Important *Guide Book* Variety

3087 **1829/7 O-101a, R.1, MS64 PCGS Secure.** According to Steve Herrman's Autumn 2018 listing, this near-Gem example of Overton-101a ranks solidly in the Condition Census for the popular overdate variety. Struck from a late die stage, with the dies lapped to the extent that the eagle seems perched in mid-air. Underdigits are clearly present beneath 2 and 9, with recutting on the 1 and 8 as well. Slate-blue and pale-gold accents waft over pearlescent silver-gray patina, while the devices display a pinpoint-sharp strike over essentially mark-free, frosted surfaces. We note two tiny dots of dark toning on Liberty's jawline. NGC ID# 24FT, PCGS# 39808 Base PCGS# 6155

PROOF BUST HALF DOLLAR

1818 O-107 Proof Half Dollar
Very Rare in Proof Format

3088 **1818 — Cleaned — NGC Details. Proof. O-107, High R.7 as a Proof.** A brilliant and razor-sharp half dollar with mirrored fields and bagmark-free surfaces. Both sides exhibit delicate vertical hairlines. The unlisted prime die state of O-107 with an unfinished surface on the field beneath the eagle's head, die rust above the rightmost leaf pair, a pronounced bulge near the bust tip, and a thick horizontal die line at 12 o'clock. These characteristics were mostly lapped away on later commercial strikings from the die pair. Two other proof 1818 O-107 half dollars are known: the Green-Newman-Pogue specimen (lot 2029 in the 9/2015 Stack's Bowers Pogue II auction), and the Thomas Cleneay specimen (lot 1142 in the 12/1890 Chapman Brothers auction, later as lot 2741 in the 2/1961 Kreisberg-Schulman auction). The Pogue II catalog lists three *confirmed* proof 1818 half dollars of other die marriages: the Smithsonian, Eliasberg, and Hain-Byers specimens. Additionally, the 7/2013 Superior auction offered as lot 1124 an Uncertified O-113 half dollar with the dual grades of PR65 and MS66, and Walter Breen claimed proof status for two Uncertified 1818/7 halves (respectively O-101 and O-102) from the Oviedo Collection auctioned by Stack's in 9/1983. NGC ID# 24G8, PCGS# 6193

REEDED EDGE HALF DOLLARS

1836 Reeded Edge Half Dollar, GR-1, AU53
Toned and Well-Detailed

3089 **1836 Reeded Edge, GR-1, R.2, AU53 NGC.** The Capped Bust, Reeded Edge half dollar was struck from 1836 into 1839, but only the 1836 and 1837 issues have the denomination written as "50 CENTS." Later Reeded Edge halves employ a reverse similar to that of the Seated half dollar series, with the denomination written "HALF DOL." Between the 1836 and 1837 Reeded Edge halves, the 1836 is significantly scarcer. Indeed, it is a key date of the entire Reeded Edge type. This About Uncirculated example displays strong detail beneath deep olive-green and gray patina. Strike weakness affects the right-hand obverse stars. NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

1839 Reeded Edge Half, MS64+
GR-5, Only One Finer for the Variety

3090 **1839 Large Letters, GR-5, R.2, MS64+ NGC.** The 1839 GR-5 variety is easily identified by weakness on the lower half of the date and the nearby stars. Likewise, some letters on the reverse legend and denomination fade — perhaps the dies were misaligned, or the working die improperly prepared. This is a high-end Choice Uncirculated example, richly frosted and lustrous, with varying intensities of reddish-tan toning that bespeak originality of the surfaces. Marks are virtually nonexistent, while the strike has enough areas of central sharpness to counterbalance the Mint-related softness around the peripheries. This example is apparently the second-finest known of the variety according to both the Dick Graham reference and Stephen Herrman's Autumn, 2018 Condition Census. NGC Census (all 1839 varieties): 44 in 64 (1 in 64+), 8 finer (10/18). NGC ID# 24G6, PCGS# 531102 Base PCGS# 6179

SEATED HALF DOLLARS

1846 Half Dollar, Toned MS63
FS-301, WB-104, 6 Over Horizontal 6
High-End CAC-Endorsed Example

3091 **1846 6 Over Horizontal 6, WB-104, Die Pair 7, R.3, FS-301, MS63 PCGS. CAC.** This is one of the more remarkable varieties in the Seated half dollar series — the 6 in the date was first entered sideways, then repunched upright. Examples are rarely found this fine. Sharp design elements complement frosty luster and original toning. Vivid amber and aquamarine border toning surrounds warm sun-orange interiors, and abrasions are minimal. Population: 5 in 63, 1 finer. CAC: 4 in 63, 1 finer (9/18). NGC ID# 24H6, PCGS# 409888 Base PCGS# 6254

1856-O Half Dollar, MS65
Rich Peripheral Patina

3092 **1856-O WB-101, Die Pair 2, R.4, MS65 PCGS Secure.** Bands of blue-green and autumn-brown endow the borders of this lustrous and virtually unabraded Gem. The sole apparent imperfection is an incomplete strike on the fletchings and left (facing) claw. The 1856-O is readily obtained in well-circulated condition, but the antebellum issue becomes rare at the MS65 level. Population (all varieties included): 22 in 65, 3 finer (9/18). NGC ID# 24HP, PCGS# 572095 Base PCGS# 6288

1874-S Arrows Half Dollar, MS64
High-End for the Grade

3093 **1874-S Arrows, Small Wide S, WB-101, Die Pair 1, R.3, MS64 PCGS Secure. CAC.** The 1874-S is a slightly better With Arrows date. Uncirculated examples are scarce in all grades and are decidedly rare in Choice and finer condition. This CAC-approved coin is remarkably well-preserved for the grade, showing satiny luster with no mentionable abrasions. Delicate iridescence warms each side, and the design elements exhibit sharp definition. Population: 16 in 64, 3 finer. CAC: 4 in 64, 3 finer (9/18). PCGS# 572223 Base PCGS# 6348

PROOF SEATED HALF DOLLARS

1858 Half Dollar, PR65 Cameo
Few Cameos Known

3094 **1858 PR65 Cameo NGC.** The year 1858 was the first in which the Mint produced large quantities of proof coinage to be sold in sets to the general public. The *Guide Book* lists a production of 300+ proofs. This figure comes from adding 210 pieces struck for proof sets to an unknown number of additional coins that were possibly sold individually. The Wiley-Bugert reference (1993) suggests as many as 400 pieces may have been struck. It is possible that if more than 300 coins were struck, not all were sold to collectors. PCGS estimates a survivorship of just 80 to 100 pieces in all grades, and the combined NGC and PCGS population is just 144 coins, including likely duplication from resubmissions. With many duplicate appearances of individual coins, we have handled a proof 1858 half dollar on only 84 occasions, which strongly suggests that the survivorship is much lower than the suggested *Guide Book* mintage — likely more in line with the PCGS survival estimate.

This Gem Cameo is a special coin, being one of only eight Cameos reported by NGC and PCGS combined with no Ultra or Deep Cameos known. The finest Cameos include this Gem, one other PR65 at PCGS, and a PR66 coin at NGC that is finer (9/18). This piece offers deeply mirrored fields and modest contrast. A hint of light golden toning is barely noticeable. Only the eagle's left (facing) talons show strike weakness. NGC ID# 27TH, PCGS# 86412

1864 Half Dollar, Toned PR66
Sharp and Attractive

3095 **1864 PR66 PCGS Secure.** Vivid blue and lavender toning resides in the centers on this Premium Gem proof, ceding to bright yellow-gold and mint-green hues around the borders. This razor-sharp proof is beautifully preserved and has tremendous visual appeal. The 1864 proof is rarely offered this fine. PCGS lists two Deep Cameos in PR66, but most of the coins known in this condition are non-Cameos. This piece might have garnered a Cameo designation were it not for the attractive toning on each side. Population: 8 in 66 (1 in 66+), 1 finer; 2 in 66 Deep Cameo, (9/18). NGC ID# 27TR, PCGS# 6418

Sketch of Seated Liberty by Thomas Sully

1876 Half Dollar, PR66 Deep Cameo
The Sole Deep Cameo at CAC
Tied for Finest at PCGS

1876 PR66 Deep Cameo PCGS Secure. CAC. The argument could be made that this is the finest-known proof 1876 half dollar. This issue is incredibly rare with Deep Cameo contrast, only four such coins reported by PCGS and none by NGC (9/18). Although a few PR67 coins are known in the non-Cameo and Cameo categories, this Premium Gem is tied for the finest in the Deep Cameo category. It is also the only Deep Cameo proof endorsed by CAC in any grade. The strike is sharp and each side displays a delicate golden hue over frosted devices and fully mirrored fields. The preservation is outstanding, earning high marks for eye appeal. Population: 2 in 66 Deep Cameo, 0 finer. CAC: 1 in 66, 0 finer (9/18). NGC ID# 27UA, PCGS# 96437

1885 Half Dollar, PR67+ Cameo
Outstanding Overall Quality

3097 **1885 PR67+ Cameo NGC.** Eye appeal and technical quality are virtually unimprovable — a serious consideration for those building specialized sets of Seated Liberty coinage. Rose-toned centers progress to rings of violet, blue, gold, and magenta around the borders. The devices display a thick layer of frost that contrasts against the watery, unmarked fields. The 1885 is a low total-mintage issue with just 5,200 circulation strikes and 930 proofs. Census: 10 in 67 Cameo (1 in 67+, 1 in 67 ★, 1 in 67+★), 2 finer (10/18). NGC ID# 27UL, PCGS# 86446

BARBER HALF DOLLARS

1892-O Half Dollar, Unc Details
Liquidlike Mirroring in the Fields
Attractive Reverse Toning

3098 **1892-O — Improperly Cleaned — NGC Details. Unc.** When we offered this remarkable 1892-O Barber half dollar in the 2011 Central States Signature, it was accompanied by a typed letter, signed by Walter Breen, declaring it a branch mint proof, or what some collectors today would consider a specimen strike. Indeed, the mirroring in the fields is liquidlike, reminiscent of the watery fields of a SP66 ★ NGC coin that we sold in a more recent Central States Signature (Heritage, 4/2013), lot 4291, for more than $108,000. The depth of mirroring on this coin is remarkable for a circulation strike, and the sharpness of the strike throughout the stars and central devices gives the undeniable *appearance* of a proof. The only oddity is the New Orleans mintmark. After studying high-resolution images of the SP66 ★ coin, we believe that this piece was struck from different dies — based off of several die polish lines in the reverse field and faint clash marks on this coin. Nonetheless, we cannot ignore the prooflike qualities, nor the *possibility* that this piece was struck as a presentation coin of some sort.

Hairlines on both sides betray a light cleaning, which keeps this coin from a numeric grade. These hairlines are mostly on the obverse amid light golden toning. The reverse displays vivid ocean-blue and violet border toning around an orange-gold interior. Even if this coin is nothing more than a deeply prooflike circulation strike, it is undeniably special — the strike quality and eye appeal of this lightly cleaned 1892-O Barber half dollar surpass that of most problem-free circulation strikes known. At the very least, it deserves a premium bid on that attribute alone.

Ex: Central States Signature (Heritage, 4/2011), lot 5193, which realized $12,650.

From The Gary Verner Collection.

1901-O Barber Half, MS64 Prooflike
The Only Prooflike Certified of This Issue

3099 **1901-O MS64 Prooflike NGC.** The 1901-O is primarily only seen in Good-Very Good grades, even XF and AU coins are scarce. Probably no more than a few dozen near-Gem and finer examples are extant. This is a bright, essentially untoned coin. The reverse shows only a remnant of the usually soft details on the eagle and shield. A few small marks on Liberty's cheek and neck, and on the shield are all that limit the grade. The fields are bright and reflective, giving the coin a distinctly Prooflike texture. This is the only Prooflike 1901-O certified by NGC. To underscore its conditional scarcity, only 17 near-Gems have been graded with eight finer (9/18).
Ex: Pittsburgh Signature (Heritage, 8/2004), lot 6270, where it realized $7,187.50.
From The Gary Verner Collection. NGC ID# 24MD, PCGS# 6490

1903 Half Dollar, MS65
Near the Condition Census

3100 **1903 MS65 PCGS Secure.** Gem Barber half dollars are elusive across the entire series. Even the most plentiful issues are rarely encountered in top grades. The 1903 is an example with only 22 coins in grades of MS65 or finer by PCGS and NGC combined (9/18). This lovely half dollar exhibits satiny mint luster and sharp design definition with pale gold and emerald toning. Population: 11 in 65 (1 in 65+), 6 finer (9/18). NGC ID# 24MJ, PCGS# 6495

1905 Barber Half Dollar, MS66
Seldom Available This Fine

3101 **1905 MS66 PCGS.** Frosty silver luster radiates boldly from both sides of this sharply struck and attractive Premium Gem 1905 half. Rare found finer, the coin displays traces of golden toning around the margins. Nearly full details on the central elements adds to the visual and technical merit of the piece. The 1905 is a low-mintage issue in the series (fifth-lowest, to be exact) — an often undervalued Philadelphia date among Barber halves. Population: 10 in 66 (3 in 66+), 3 finer (9/18).
From The Gary Verner Collection. NGC ID# 28PX, PCGS# 6501

1914 Barber Half, MS65
Popular, Low-Mintage Issue

3102 **1914 MS65 PCGS.** A fully struck Gem with pleasing luster and nearly unabraded fields. The light gold toning is barely discernible on each side, the overall presentation being one of mint brilliance. The low mintage of the 1914 with only 124,300 pieces struck is recognized and valued in all grades by Barber half collectors. Housed in a green label holder. Population: 12 in 65 (1 in 65+), 3 finer (9/18).
Ex: Long Beach Signature (Heritage, 9/2007), lot 1648, where it brought $8,797.50. NGC ID# 24NN, PCGS# 6530

PROOF BARBER HALF DOLLARS

1894 Half Dollar, PR67 Cameo
Entirely Brilliant

3103 **1894 PR67 Cameo NGC.** A mintage of 972 proofs ranks among the highest totals in the series, second only to the first-year 1892. This all-brilliant Superb Gem delivers the pronounced white-on-black contrast collectors enjoy. Raised design elements are richly frosted and surrounded by reflective fields. The obverse features a complete impression, while minor incompleteness occurs on the eagle's neck and the right shield-wing juncture. Census: 15 in 67 Cameo (2 in 67+), 2 finer (9/18). NGC ID# 24NW, PCGS# 86541

1902 Half Dollar, Toned PR67
Exceptionally Well-Preserved Surfaces

3104 **1902 PR67 NGC. CAC.** One would be hard pressed to find a more attractive and better-preserved proof Barber half. This is just an extraordinary coin. The fields are deeply mirrored on each side, and this intense reflectivity serves to highlight the lovely toning. Both obverse and reverse have the same colors: emerald green and smoky gray-rose, but the configuration is different on each side. Much of the original brilliance still is in evidence in the center of the obverse. There are virtually no flaws on this coin. A check-shaped lint mark is barely visible behind Liberty's mouth, but we do not see any other pre- or post-striking impairments. Census: 17 in 67 (3 in 67 ★), 2 finer. CAC: 12 in 67, 0 finer (9/18). NGC ID# 24P6, PCGS# 6549

WALKING LIBERTY HALF DOLLARS

1916 Walking Liberty Half Dollar, MS66
Elusive CAC-Approved Example

3105 **1916 MS66 PCGS. CAC.** Exceptionally well-preserved surfaces yield frosty original luster on this CAC-endorsed Premium Gem. It is rare to encounter a CAC endorsement on this first-year issue in such a high grade. Moreover, higher-graded coins at PCGS and NGC are decidedly rare. This piece is sharp in the centers and lacks any mentionable abrasions. PCGS lists only six finer representatives. CAC: 34 in 66, 4 finer (9/18).
From The Gary Verner Collection. NGC ID# 24PL, PCGS# 6566

1916 Walking Liberty Half, MS66
First Year of Issue for This Popular Series

3106 **1916 MS66 PCGS. CAC.** Only 608,000 pieces were struck of this first-year issue, and many were set aside as mementoes. While numerous examples are known in MS66, few are finer. This piece is distinguished by its glowing mint luster, which is abundantly evident beneath the light layer of pale golden and lilac toning. Exceptionally well struck for an early Walker with no mentionable abrasions. NGC ID# 24PL, PCGS# 6566

1916-S Half Dollar, Frosty MS65
First S-Mint Representative

3107 **1916-S MS65 PCGS.** The inaugural-date status of the 1916-S combined with its small mintage of 508,000 coins (fourth-lowest total in the series) explain its perennial popularity. Each side is typically frosty, though the level of preservation is anything but usual. This strongly defined Gem is conditionally scarce, and finer representatives are exceedingly rare. Bright with translucent lilac-gray accents. PCGS reports only 14 finer submissions (9/18). NGC ID# 24PN, PCGS# 6568

1917-D Walking Liberty Half, MS65
Reverse Mintmark

3108 **1917-D Reverse MS65 PCGS.** The Reverse Mintmark variant is the scarcer of the two 1917-D half dollar varieties, despite having a significantly higher mintage than the former issue (1.94 million versus just more than 765,000 pieces). The issue is marginally available through the MS64 grade level, but becomes notably scarce in Gem condition, and anything finer is a major rarity, out of reach for most collectors. This representative is boldly struck, with broad rims and full thumb separation on Liberty's branch hand. Matte-like luster accentuates the light golden hue that graces each side, and the overall eye appeal is significant. A couple small ticks on Liberty's right leg are the only abrasions of note. Population: 51 in 65 (2 in 65+), 5 finer (9/18).
Ex: Summer FUN Signature (Heritage, 7/2015), lot 3167, where it brought $14,100. NGC ID# 24PS, PCGS# 6571

1917-S Half Dollar, MS64
Obverse Mintmark, Strong Detail

3109 **1917-S Obverse MS64 NGC.** A lovely example of what is normally a difficult issue to locate in high grades. The entirety of the obverse is blanketed in a veil of gold patina with glints of blue and magenta at the lower border. The reverse remains almost fully brilliant, save for a similar blush of yellow-gold along the left margin. The rims are broad and the central devices display strong detail. There are 31 higher-graded submissions at NGC (10/18).
From The Gary Verner Collection. NGC ID# 26G7, PCGS# 6572

Adolph Weinman, designer of the Walking Liberty half dollar.

1917-S Obverse Half Dollar, MS64
Scarce Early Issue

3110 **1917-S Obverse MS64 PCGS. CAC.** Only 952,000 pieces were struck of the Obverse variant of the 1917-S half. It has proved to be a conditional rarity with only a few dozen Gem or finer examples known. This is one of the finer near-Gem coins obtainable. The reverse is faintly tinged with golden toning and more obvious orange-to-rose hues are present on the obverse. The mint luster is soft and swirling, and a streak of reddish-brown toning descends from the center of the M in AMERICA into the eagle's wing. PCGS has graded 46 numerically finer examples (9/18).
Ex: Long Beach Signature (Heritage, 2/2011), lot 3783, where it realized $6,325. NGC ID# 26G7, PCGS# 6572

1917-S Half Dollar, Reverse Mintmark
Rare CAC-Approved Gem

3111 **1917-S Reverse MS65 PCGS. CAC.** The Reverse Mintmark variant of the 1917-S Walking Liberty half dollar is scarce in Gem condition and rare finer. CAC-endorsed coins are rarely seen in MS65 and are prohibitively rare finer. Even so, the Reverse Mintmark variety is a trifle more plentiful in these grades than its Obverse Mintmark counterpart and may be the better option for the quality-conscious date collector.

The present coin is impressively well-struck on the central devices and shows frosty, original mint luster. Some delicate olive-gold border toning attractively frames brilliant interiors. A loupe is required to locate any grade-limiting marks, which are virtually invisible to the naked eye. In fact, as the CAC endorsement suggest, this piece borders on a higher grade. Population: 53 in 65 (2 in 65+), 12 finer. CAC: 16 in 65, 3 finer (9/18). NGC ID# 24PU, PCGS# 6573

1919 Half Dollar, MS66
Fully Struck, Strong Eye Appeal

3112 **1919 MS66 NGC.** Each side is mostly light golden in color with additional splashes of lavender-gray patina over the obverse and a slight olive cast near the upper-reverse border. A lens reveals a couple of tiny marks: one on the hand, one on the eagle's leg, and three small reeding marks on the wing. Truly an extraordinary representative with complete design detail and elegant eye appeal. The 1919 Walking Liberty half dollar is rarely offered this fine, and only a few higher-grade representatives are known, none of which are certified by NGC. This is an outstanding example for the Registry Set collector. Census: 11 in 66, 0 finer (10/18). NGC ID# 24PY, PCGS# 6577

1919 Walking Liberty Half, MS66
Superb Strike and Luster

3113 **1919 MS66 PCGS. CAC.** Faint golden tint complements frosty, largely undisturbed mint luster on each side of this early Philadelphia Mint Walker. The strike is bold throughout, with notable definition on Liberty's head and branch hand, as well as on the eagle's right (facing) leg, which is often soft on pre-1940s issues. Housed in an old green label holder.

A scarcer early Philadelphia issue, the 1919 Walking Liberty half is most frequently seen only in MS64 and lower grades, with Gems being scarce and finer pieces rare. The date is also one of the better-made of the early issues, making it highly popular among specialists who recognize the scarcity of sharply struck Walkers from this period. The present Premium Gem example combines superior preservation and bold detail for a high degree of appeal. Population: 22 in 66, 5 finer. CAC: 7 in 66, 5 finer (9/18).

Ex: Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98551, where it brought $32,900. NGC ID# 24PY, PCGS# 6577

1919-D Walker Half Dollar, MS62
Radiant Satin Mint Luster

3114 **1919-D MS62 NGC.** This Denver issue serves as a standout condition rarity. Among certified coins, the average grade awarded by the leading services falls between VF35 and XF40. All Mint State coins are challenging, in part because the 1919-D was not especially well-produced. This example has impressively radiant satin mint luster over brilliant surfaces. Central design definition is lacking, as is so often the case. Grazes and bagmarks are surprisingly scant.
From The Gary Verner Collection. NGC ID# 24PZ, PCGS# 6578

1919-D Walking Liberty Half, MS63
Seldom Encountered in High Grade

3115 **1919-D MS63 PCGS.** The 1919-D Walking Liberty half dollar claims a nominal mintage of 1.65 million pieces, but the issue was not well-produced and contemporary collectors saved few examples for numismatic purposes. As a result, the 1919-D is a challenging issue in high grades and even attractive MS63 examples are seldom encountered.

This attractive Select specimen exhibits well-detailed design elements, with just a touch of the usual softness on Liberty's hair and wreath hand. Satiny mint luster radiates from the pleasing surfaces and only minor, scattered signs of contact are evident. NGC ID# 24PZ, PCGS# 6578

1919-S Half Dollar, MS64
Brightly Frosted

3116 **1919-S MS64 NGC.** The 1919-S Walking Liberty half dollar saw extensive circulation. Few coins were saved in high grades, and those that were, like this near-Gem, are subject to strong collector demand in today's market. Smooth surfaces are brightly frosted. Glints of gold patina around the obverse border are the only source of color. The head and branch hand are well-defined, while the skirt lines and upper portions of the date digits show slight weakness. NGC has graded 28 finer submissions (10/18).
From The Gary Verner Collection. NGC ID# 24R2, PCGS# 6579

1919-S Half Dollar, Frosty MS65
Rarely Offered Finer

3117 **1919-S MS65 PCGS.** The 1919-D is a famous series condition rarity at the Gem grade level, almost uncollectible finer. Its San Francisco counterpart — offered here — is somewhat more plentiful by comparison, but it is itself a scarce date in this grade. Finer 1919-S half dollars are rarely offered. In fact, among all issues in the series, the 1919-S Walking Liberty half dollar is consistently one of the most difficult dates to locate with Gem surfaces. This piece fits the grade perfectly. Frosty, unabraded mint luster yields a tinge of golden color overall and produces a vibrant cartwheel effect. The usual strike weakness is noted on Liberty's branch hand and the eagle's trailing leg. Population: 41 in 65 (3 in 65+), 12 finer (9/18). NGC ID# 24R2, PCGS# 6579

1920-D Half Dollar, MS63
Underrated Rarity in High Grades

3118 **1920-D MS63 NGC.** Despite its mintage of 1.5 million coins, the 1920-D can prove just as elusive in MS63 or finer condition as either the 1921 or the 1921-D, both famously challenging issues. Gold, blue, and magenta toning frames brilliant satin centers. This Select example displays bold detail on Liberty's head and branch hand. The tops of the date digits are incomplete. A loupe is required to view most of the grade-limiting marks.
From The Gary Verner Collection. NGC ID# 24R4, PCGS# 6581

1920-S Half Dollar, MS65
Rare in Higher Grades

3119 **1920-S MS65 PCGS.** Pale silver overall with hints of golden-tan color appearing mostly at the margins. Detail on Liberty's head is above-average and the thumb on the branch hand is distinct, if not fully rounded. A faint wire rim appears at the top of the obverse. While the 1920-S is not one of the lowest-mintage issues in the Walking Liberty half dollar series, with a mintage in excess of 4.6 million representatives, it is scarce nonetheless at the Gem level and a clear condition rarity any better. PCGS has certified a mere eight representatives as MS66 or finer (9/18).
Ex: ANA National Money Show Auction (Heritage, 2-3/2014), lot 3932, where it brought $12,337.50. NGC ID# 24R5, PCGS# 6582

1921 Half Dollar, Lightly Toned MS64
Vibrantly Lustrous Key-Date Coin

3120 **1921 MS64 PCGS.** Frosty original luster exhibits warm golden toning with russet and lilac accents on each side. This near-Gem is well-struck, showing almost full definition of Liberty's branch hand and the eagle's trailing leg. A few scattered abrasions are not bothersome. The 1921 is a well-recognized key date in the Walking Liberty half dollar series due to its low mintage of 246,000 pieces. Examples are occasionally available in the low Uncirculated grades, but Choice and finer pieces are elusive. NGC ID# 24R6, PCGS# 6583

1921-D Half Dollar, MS63
Important Key Issue

3121 **1921-D MS63 PCGS.** The 1921-D Walking Liberty half boasts the lowest mintage of the series (208,000 coins), and is one of the most challenging dates in Mint State. Jeff Ambio, writing in his *Strategy Guide* for the series, states: "A 1921-D that grades even MS-62 or MS-63 represents an extremely important buying opportunity in any numismatic market." In Gem, this Denver issue is conditionally rare.

This Select example shows a soft golden-gray hue over each side, with only a few minor abrasions to limit the grade. Liberty's figure and the eagle's central feathers exhibit some of the usual softness, but partial thumb separation is nonetheless evident on Liberty's branch hand.

Ex: Summer FUN Signature (Heritage, 7/2015), lot 3169, where it brought $15,275. NGC ID# 24R7, PCGS# 6584

1921-D Half Dollar, Well-Struck MS64
Low-Mintage Key, Lightly Toned

3122 **1921-D MS64 PCGS.** This is a well-struck example of the key-date 1921-D half dollar, showing good definition on Liberty's branch hand and only slight incompleteness on the eagle's trailing leg. Golden-russet toning embraces satiny original luster, and grade-limiting abrasions are unobtrusive to the naked eye. The 1921-D boasts the lowest mintage of the three 1921 keys (208,000 coins). This is also the lowest mintage in the series. Examples of this issue are sought-after in all grades due to the wide-ranging popularity of the Walking Liberty half dollar as a date and mintmark collection. However, coins grading finer than MS64 are rare. PCGS lists just 38 such submissions (9/18).
From The Gary Verner Collection. NGC ID# 24R7, PCGS# 6584

1921-S Half Dollar, MS62
Ultimate High-Grade Key

3123 **1921-S MS62 NGC.** From a mintage of 548,000 coins, the 1921-S is the ultimate high-grade key date in this widely collected series. Perhaps lower-mintage issues like the 1916-S, 1921, and 1921-D were set aside in greater numbers by speculators. Regardless, probably only a few hundred 1921-S half dollars survive across all Mint State grade levels. As a whole, the date's average certified grade falls between F15 and VF20.

Both sides are bright and practically devoid of toning, save for hints of dusky gold and crimson on the obverse. The 1921-S tends to come softly struck over the highest points, and this MS62 is typical in that regard. Luster is moderately subdued, though the reverse is noticeably more vibrant. A cornerstone example for any serious collection.
From The Gary Verner Collection. NGC ID# 24R8, PCGS# 6585

1921-S Half Dollar, Pleasing MS63
Key San Francisco Issue

3124 **1921-S MS63 PCGS.** The 1921-S is the most elusive half dollar of this year in high grade. The San Francisco Mint struck 548,000 pieces — more than twice the number of coins produced by either Philadelphia or Denver, but the higher mintage does not translate into availability in high grade. On the West Coast — an area supplied almost exclusively by the San Francisco Mint — half dollars and larger denominations tended to circulate to a greater extent than they did on the eastern seaboard. According to census data, the Mint State survivorship of the 1921-S half dollar is less than half that of the 1921-D, and nearly one third that of the 1921. At public auction, this issue appears in Uncirculated condition barely more than half as often as its Denver and Philadelphia counterparts. This collector-grade Select example displays softly frosted luster with minimal abrasions and a hint of light golden toning that is barely perceptible. The usual strike weakness is seen on Liberty's head, the branch hand, and the eagle's trailing leg. NGC ID# 24R8, PCGS# 6585

1927-S Walking Liberty Half, MS65
None Finer at NGC

3125 **1927-S MS65 NGC.** On close inspection, slight separation can be detected between Liberty's thumb and index finger, and some detail is present on Liberty's head and the eagle's leg. This amount of detail is rare on the 1927-S, one of the most poorly struck issues of the series. The unmarked surfaces display vibrant satiny mint luster and outstanding eye appeal. NGC has not graded an example in higher numeric grade (9/18). NGC ID# 24RA, PCGS# 6587

1928-S Walking Liberty Half, MS65
Remarkably Strong Strike for the Issue

3126 **1928-S MS65 PCGS.** The 1928-S is both an absolute rarity with only 1.9 million pieces struck as well as a strike rarity. This unquestioned Gem shows most of the definition on the skirt lines of Liberty and good detail on the eagle's feathers. The mint luster is bright and frosted with just a hint of pale golden patina present. Population: 64 in 65 (2 in 65+), 8 finer (9/18). NGC ID# 24RB, PCGS# 6588

1933-S Half Dollar, MS65
Frosty and Fully Struck

3127 **1933-S MS65 NGC.** This San Francisco issue was well-produced and relatively well-saved in high grades, making it a collectible date from the early part of the Walker half series. Each side is fully struck and brilliant, though specks of golden color adorn the upper obverse. Clean surfaces emit bright mint frost, adding to the appeal. ***From The Gary Verner Collection.*** NGC ID# 24RE, PCGS# 6591

1934 Half Dollar, Frosty MS68
A Top-Grade Registry Coin

3128 **1934 MS68 PCGS.** The 1934 Walker is plentiful in most grades, but it is a major rarity in MS68, the finest grade achieved. Coins at this level are top acquisitions for Registry Set collectors. Such pieces are rarely offered at auction, especially in a PCGS holder. This example displays delicate champagne and sky-blue toning on each side over frosty luster and exceptionally sharp design elements. Only a few faint, tiny marks are visible beneath a loupe, which are almost entirely lost amid the luster and eye appeal. Population: 8 in 68, 0 finer (9/18). NGC ID# 24RF, PCGS# 6592

1934-S Half Dollar, Frosty MS67
A Condition Rarity and Registry Candidate

3129 **1934-S MS67 PCGS Secure.** The 1934-S is usually available in grades through MS66, but Superb Gems are decidedly rare. This MS67 coin is among the finest certified. Each side is brilliant and fully struck, showing frosty original luster and no mentionable abrasions. We have handled a 1934-S Walker in this grade on only eight previous occasions, just three of which were within the last decade. Moreover, three of the five current highest-rated PCGS Registry sets lack an example of this issue in the finest possible grade. Recent Heritage auctions of 1934-S half dollars in MS67 have garnered $20,000 to more than $30,000. This is the first such coin that we have handled in nearly three years. Population: 9 in 67, 0 finer (9/18). NGC ID# 24RH, PCGS# 6594

1937-S Half Dollar, MS67
Impossible to Upgrade

3130 **1937-S MS67 PCGS.** Superb Gem condition is the level at which the 1937-S half dollar (2 million coins struck) becomes scarce. Additionally, it is impossible to upgrade at that level. This Walker half is remarkably well-struck. It boasts daubs of thin gold color over frosty, largely brilliant surfaces void of serious abrasions. Population: 41 in 67 (2 in 67+), 0 finer (9/18). NGC ID# 24RT, PCGS# 6603

1938-D Half Dollar, MS67
Top-Grade Registry Coin

3131 **1938-D MS67 PCGS.** The 1938-D is a semikey date in the series, boasting a small mintage of 491,600 coins. Examples are usually available for a price, but Superb Gems are seldom encountered. This MS67 coin is among the finest pieces known. Delicate hints of olive toning are evident on the obverse, but the coin is otherwise frosty and brilliant. No abrasions distract from the eye appeal. Liberty's branch hand and the eagle's trailing leg are a trifle soft, as usual for the 1938-D. Population: 50 in 67 (4 in 67+), 0 finer (9/18). NGC ID# 24RV, PCGS# 6605

1938-D Walker, Brilliant MS67
High-End and Scarce

3132 **1938-D MS67 PCGS. CAC.** This satiny Superb Gem displays original luster with no perceptible toning, and under a loupe the fields are found to be devoid of abrasions. Liberty's branch hand and the eagle's trailing leg are a trifle soft as usual, but the overall strike is pleasing for this Denver issue. None are numerically finer at either service (9/18). Housed in a green label holder. NGC ID# 24RV, PCGS# 6605

1946 Half Dollar, MS66
FS-801, Doubled Die Reverse

3133 **1946 Doubled Die Reverse, FS-801, MS66 PCGS Secure. CAC.** FS-801 denotes wide die doubling on all reverse design elements. This Premium Gem example — CAC endorsed for exceptional quality and eye appeal — has some faint metal flowlines in the margins, but all of the die doubling is clear. No toning appears on this piece. It is slightly soft on Liberty's branch hand and the eagle's trailing leg but it is well-struck elsewhere. FS-801 is relatively plentiful overall, but only a small fraction of the Mint State 1946 half dollars known represent this variety. FS-801 is a rarity in MS66 and is unknown finer at PCGS. Population: 31 in 66 (5 in 66+), 0 finer. CAC: 18 in 66, 0 finer (9/18). NGC ID# 24SJ, PCGS# 145152 Base PCGS# 6632

FRANKLIN HALF DOLLAR

1961 Franklin Half Dollar, MS66
Rare Full Bell Lines Example

3134 **1961 MS66 Full Bell Lines PCGS Secure. CAC.** From a mintage of 8.2 million pieces, the 1961 Franklin half dollar is generally not a well-struck issue and examples in MS66 condition, with Full Bell Lines, are seldom encountered. This sharply detailed Premium Gem does show complete definition on the bell lines, and the well-preserved, lustrous surfaces are blanketed in attractive shades of golden-tan and lavender toning. Population: 21 in 66 (2 in 66+) Full Bell Lines, 0 finer. CAC: 5 in 66, 0 finer (9/18). NGC ID# 24TN, PCGS# 86680

PROOF KENNEDY HALF DOLLARS

1964 Kennedy Half, PR68 Deep Cameo
Beautiful White-on-Black Registry Coin
Accented Hair Variety

3135 **1964 Accented Hair, FS-401, PR68 Deep Cameo PCGS.** The *Cherrypickers'* reference calls the Accented Hair proof "somewhat common in variety terms," although we would add that Deep Cameo examples are genuinely scarce regardless of grade. In Superb Gem condition, Deep Cameo Accented Hair Kennedy halves are rare. Such is the importance of this Registry Set candidate. The coin is almost flawlessly preserved and yields liquidlike reflectivity in the fields. The devices are fully struck and frost-white. A 1964 proof type coin in this condition would be a major interest to Kennedy half collectors, and the Accented Hair variety only boosts this piece's appeal. Population: 19 in 68 Deep Cameo, 1 finer (9/18). NGC ID# 24WG, PCGS# 145627 Base PCGS# 96801

1968-S Half Dollar, PR70 Deep Cameo
Dramatic Contrast, Registry Essential

3136 **1968-S PR70 Deep Cameo PCGS.** The 1968-S was the first proof Kennedy half dollar struck in the 40% silver alloy, and only the second proof issue in the series due to a hiatus in 1965, '66, and '67, during which proof set production was suspended and the Mint instead produced Special Mint Sets. The 1968-S proof Kennedy half dollar is plentiful with Deep Cameo contrast, but such coins are decidedly rare in the flawless PR70 numeric grade, in which this piece resides. Only 16 coins are so-graded at PCGS (9/18). Phenomenal sharpness and stark white-on-black contrast drape this Registry coin with exceptional visual appeal, and the surfaces are pristine.
Ex: Long Beach Signature (Heritage, 9/2006), lot 2344; Long Beach Signature (Heritage, 5-6/2012), lot 4190. NGC ID# 24WK, PCGS# 96804

EARLY DOLLARS

1795 Flowing Hair Dollar, Fine 15
Two Leaves Variant, B-1, BB-21

3137 **1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, Fine 15 PCGS.** This light gray Flowing Hair dollar is housed in a green label PCGS holder. The surfaces exhibit faint champagne patina with occasional splashes of darker toning. This plentiful variety is popular with collectors for its blundered obverse with the 7 punched over a previous 1.
Ex: FUN Signature (Heritage, 1/2009), lot 4248, where it brought $4,312.50. NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853

1795 Flowing Hair Dollar, VF30
Two Leaves, B-1, BB-21

3138 **1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, VF30 NGC.** Bowers Die State I. This plentiful variety features the Head of 1795. One point of star 1 touches the lowest curl, and the reverse berries are arranged 9x10 with one centered under the right foot of the first A in AMERICA. Dentilation is complete and the stars and legends are bold. Normal blending occurs over the central devices. Pleasing stone-gray patina covers each side, lightening a touch on the highest points of the design. NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853

1795 Flowing Hair Dollar, VF25
B-6, BB-25, Three Leaves

3139 **1795 Flowing Hair, Three Leaves, B-6, BB-25, R.3, VF25 ANACS.** No adjustment marks are visible on the obverse, and only a few faint ones appear along the left reverse periphery. On the obverse some faint circulated hairline scratches are visible in the very center, giving the erroneous impression of a silver plug at certain angles. Hints of luster illuminate the protected regions of the fields, and the smooth slate-gray surfaces show warm golden undertones in those areas. Eye appeal is excellent for the grade on this Flowing Hair, Three Leaves type coin. NGC ID# 24WZ, PCGS# 39975 Base PCGS# 6852

1795 Flowing Hair Dollar, XF40
B-5, BB-27, Three Leaves

3140 **1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, XF40 NGC.** Bowers Die State II. The die line behind Liberty's head is a ready attribution aid for the BB-27 die pair, which is plentiful and popular for type purposes. This piece is well-detailed with glossy surfaces and deep blue-gray and lilac toning over each side. Remnants of adjustment marks are visible along the lower obverse border, and strike weakness affects the border dentils on the opposite reverse rim. A problem-free coin with excellent eye appeal for the grade.
Ex: Long Beach Signature (Heritage, 6/2000), lot 7947, which realized $3,910. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1795 Draped Bust Dollar, VF30
B-14, BB-51, Off-Center Portrait
Attractive, Original Color

3141 **1795 Draped Bust, Off-Center, B-14, BB-51, R.2, VF30 PCGS Secure.** Bowers Die State I, no die clashing. An attractive midgrade example of the BB-51 Off-Center Draped Bust design, which was soon replaced by the portrait visually centered (BB-52). Bluish-gray toning lightens to silver-gray at a few of the high points, and only tiny marks exist on the original, sharply defined surfaces. We note a shallow rim bump at 7 o'clock on the obverse (mostly hidden by the holder) and a tiny, Mint-made planchet void at U in UNITED. There are no adjustment marks. This *Guide Book* variety is necessary to complete the major 1795 design types. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

1797 B-3, BB-71 Dollar, Choice VF
10x6 Stars, Large Letters

3142 **1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, VF35 PCGS Secure.** Die State III, as usual. A moderately available variety, ideal for type purposes. This is an impressively attractive midgrade example with strong remaining detail that includes complete border dentils. Pale lavender accents primarily steel-gray surfaces, though deeper gunmetal hues are seen in the border recesses and lighter gray shades preside over the relief elements. A lack of adjustment marks further increases the eye appeal. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

1797 Dollar, B-3, BB-71, XF40
10x6 Stars *Guide Book* Variety

3143 **1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, XF40 PCGS.** Bowers Die State III, both dies lapped. BB-71 is one of only three die marriages for the 1797 silver dollar, and it is the only one with the 10x6 obverse star formation. The small die variety count owes itself to a small mintage for this issue. Only 7,776 dollars were struck during the 1797 calendar year, although 1797-dated dies may have been used into 1798 production. BB-71 corresponds to the 10x6 Stars *Guide Book* variety, making it an essential acquisition for many collectors of early dollars. This lightly circulated coin displays deep lilac-gray and gold patina. No adjustment marks are visible and detail is sharp. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

1797 Dollar, Pleasing VF20
B-1, BB-73

3144 **1797 9x7 Stars, Large Letters, B-1, BB-73, R.3, VF20 PCGS.** The highest wave of hair, under the upright of E in LIBERTY, is faint. On the reverse a leaf ends under the center of the upright of (STAT)E(S). This piece offers smooth, pinkish-gray surfaces with an even appearance and a pleasing level of detail remaining for the grade.
Ex: Long Beach Signature (Heritage, 5/2008), lot 830, where it realized $4,025. NGC ID# 24X4, PCGS# 40003 Base PCGS# 6863

1798 Large Eagle Dollar, B-23, BB-105, AU50
Pointed 9, Wide Date

3145 **1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3, AU50 PCGS.** Bowers Die State III. The hair curl near star 1 and the third cloud on the reverse show signs of lapping. Diagnostics for this variety include star 13 close to the bust, the arrowhead centered under the N in UNITED, and the leaf tip under the left side of the I in AMERICA. Silver-gray patina in varying shades graces the minimally worn surfaces of this About Uncirculated Draped Bust dollar. Glimpses of luster appear around the stars. NGC ID# 24X6, PCGS# 40022 Base PCGS# 40018

1799/8 Draped Bust Dollar, AU58
15 Stars Reverse, B-3, BB-141

3146 **1799/8 15 Stars Reverse, B-3, BB-141, R.3, AU58 NGC.** Ex: Durango Collection. Bowers-Borckardt Die State IV. The 1799 Draped Bust dollar claims the largest mintage of the series, at 423,515 pieces. Based on current availability, it seems likely that some of the coins were actually struck from 1798-dated dies that were still serviceable in 1799. Twenty two die varieties are known for the date, with three varieties struck using a single overdated obverse die from 1798.

The present coin is an attractive near-Mint specimen of the popular BB-141 *Guide Book* variety, with the overdated obverse and the 15 star reverse. The engraver must have impressed 15 stars on this reverse die in error, and then attempted to cover the first star on the left and last star on the right by enlarging the two nearest clouds to cover up these errant devices. Despite his best efforts, two star points still protrude from the bottoms of these clouds. In addition, the dentils on the lower-right obverse of this coin are strongly doubled, the result of clashing with the reverse die. Only a trace of actual wear shows on the well-detailed design elements, and the lightly abraded, lustrous surfaces show a few hints of pale gold and lavender-gray toning. NGC ID# 24X8, PCGS# 40064 Base PCGS# 6883

1799 Bust Dollar, XF45
7x6 Stars, B-10, BB-163

3147 **1799 7x6 Stars, B-10, BB-163, R.2, XF45 NGC.** One of the more plentiful varieties of 1799 and collectible at the Choice XF level. Both sides show deeply toned charcoal-gray color. This is a well-struck example with typical die cracks on the reverse, and no adjustment marks. A few small abrasions are reported on Liberty's cheek and hair.

Ex: Palm Beach Signature (Heritage, 3/2006), lot 1625, where it realized $4,046. NGC ID# 24X7, PCGS# 40054 Base PCGS# 6878

1799 Draped Bust Dollar, Sharp AU50
B-9, BB-166, 7x6 Stars

3148 **1799 7x6 Stars, B-9, BB-166, R.1, AU50 PCGS.** Bowers Die State II. A sharp, even die impression is a hallmark of this coin, and the sharpness of the AU detail allows it to be fully appreciated by the viewer. No adjustment marks are visible, and luster remains in the fields, especially around the borders. Barely a brush of wear is visible. Warm orange-gold, olive, and lilac-blue toning encompasses each side, masking a few trivial contact marks on each side. NGC ID# 24X7, PCGS# 40057 Base PCGS# 6878

GOBRECHT DOLLAR

1836 Gobrecht Dollar, AU Details
Judd-60 Original, Coin Alignment, Die State D

3149 **1836 Name on Base, Judd-60 Original, Coin Alignment, Pollock-65, R.1 — Edge Repaired — PCGS Genuine. AU Details.** Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the D in DOLLAR). Die State D. This well-known die state is characterized by the straight die clash mark that points toward the AT in STATES. However, we want to be clear: This die clash mark is the weakest we have ever seen. It is only visible because we know exactly where to look and have seen many dozens of this and later die states that all have this angling mark. (It is most easily seen by holding the coin with the eagle's head closest to the viewer and tilting the coin slowly under a light.) Nevertheless, the surfaces show only slight evidence of handling. The edge repair is most obvious on the reverse. Light gray toning is seen over each side.

PROOF SEATED DOLLARS

1844 Seated Dollar, Sharp PR62
Modest Cameo Contrast
Only 10 to 15 Pieces Known

3150 **1844 PR62 PCGS Secure. OC-P1, High R.6.** Proof 1844 Seated Liberty dollars are major rarities, seldom offered at auction. While many early dollars of this type are just prooflike business strikes, genuine proofs of 1844 are easily differentiated from their more common counterparts. On the obverse, circulation strikes show misplaced date numerals in the lower part of Liberty's gown, while proofs do not. Moreover, the proof reverse is the same die that was used for most proof dollar coinage from 1840 through 1854.

The proof survivorship is small, measured at just 10 to 15 coins according to PCGS, and "15 or so" pieces in the estimation of Dick Osburn and Brian Cushing. A few impaired examples are known. This PR62 coin has scattered light marks that limit the grade, but the razor-sharp detail and deeply mirrored fields balance the eye appeal. The fields have modest sea-green toning, which contrasts with the light golden devices to produce a modest cameo effect. A truly eye-appealing coin for the grade and an outstanding example of this rare early proof silver dollar. NGC ID# 24ZU, PCGS# 6985

1861 Seated Dollar, PR63 Cameo
Low Cameo Survivorship

3151 **1861 PR63 Cameo PCGS. OC-P2, Low R.4.** Osburn-Cushing Die State a/a. PCGS lists only 33 Cameo examples of the 1861 proof dollar, none finer than PR65. No Deep Cameos are listed. This collectible Select Cameo representative displays full detail and strong contrast with mostly brilliant-white surfaces. Struck from the original proof dies. Under a loupe, a few field lines limit the grade but do not detract. NGC ID# 252F, PCGS# 87004

1862 Seated Dollar, PR64+ Cameo
Attractively Toned No Motto Proof Type Coin

3152 **1862 PR64+ Cameo PCGS Secure. CAC. OC-P2, High R.3.** Osburn-Cushing Die State a/a. Later die states of this proof reverse show small die breaks on the tips of two olive leaves. As a date, the proof 1862 Seated dollar is a rarity in Cameo grades and nearly uncollectible with Deep Cameo contrast. This is the only Plus-graded Choice Cameo at PCGS (9/18). Vivid blue toning clings to the borders, leaving the interiors with a warm golden glow. The fields are deeply reflective, framing well-struck design elements. Population: 8 in 64 (1 in 64+) Cameo, 1 finer; 2 in 64 Deep Cameo, 0 finer. CAC: 5 in 64, 2 finer (9/18). NGC ID# 252G, PCGS# 87005

1868 Silver Dollar, PR64+ Deep Cameo
The Top Coin at CAC

3153 **1868 PR64+ Deep Cameo PCGS Secure. CAC. OC-P2, High R.3.** PCGS has graded only 14 proof 1868 Seated dollars with a Deep Cameo designation. This Plus-graded near-Gem is the sole finest with a CAC endorsement. A delicate golden tint warms the ice-white, frosted devices and mercurylike fields. This is a fully struck coin with exceptional preservation and unending eye appeal. Population: 7 in 64 (2 in 64+) Deep Cameo, 3 finer. CAC: 1 in 64, 0 finer (9/18). NGC ID# 252P, PCGS# 97016

TRADE DOLLARS

1874-CC Trade Dollar, MS63
Heavily Exported Trade Issue

3154 **1874-CC MS63 PCGS Secure.** Tall CC, period after FINE. The 1874-CC Trade dollar was heavily exported to the Orient for trade. Many surviving examples of the issue are chopmarked, including some coins in MS63 and MS64. This Select example has no chopmarks. It is fully struck, untoned, and satiny with a vibrant cartwheel effect. No significant abrasions are seen. Population: 53 in 63 (3 in 63+), 27 finer (9/18). NGC ID# 2532, PCGS# 7035

1877-S Trade Dollar, MS66
Top-Notch Color and Luster

3155 **1877-S MS66 NGC.** Large S. More than 9.5 million pieces were struck of the 1877-S Trade dollar, making it a logical choice for type purposes. Fantastic eye appeal is the hallmark of this Gem 1877-S Trade dollar, showing lovely pastel patina in dappled shades of pale blue, gray, rose, and golden-orange. All of the star radials are struck up on this coin — in itself a rarity — and the fine details of the central devices on both sides are also well-impressed. The PCGS TrueView for this coin shows the ample luster to good advantage. Census: 5 in 66 (1 in 66 ★), 1 finer (9/18). NGC ID# 253E, PCGS# 7046

1878-S Trade Dollar, Toned MS65
Reflective Fields

3156 **1878-S MS65 PCGS.** In 1878, only the Carson City and San Francisco Mints produced business-strike Trade dollars, and mostly just the San Francisco Mint. The 1878-S is the last non-proof issue in the series. Although more than 4.1 million pieces were struck, later coinage of S-mint Morgan dollars in 1878 was more than double that amount. The 1878-S Trade dollar is readily available through MS64, but as with most issues of this type, it is conditionally scarce at the Gem level. This MS65 piece displays a sharp strike and beautiful lavender, blue, and golden-gray toning. The obverse fields are prooflike, while the reverse is semiprooflike. Population: 25 in 65 (3 in 65+), 23 finer (9/18). NGC ID# 253G, PCGS# 7048

PROOF TRADE DOLLAR

1879 Trade Dollar, PR65
Old Green Holder, Beautifully Toned

3157 **1879 PR65 PCGS.** The Philadelphia Mint ceased coinage of circulation-strike Trade dollars after 1877, although the branch mints in San Francisco and Carson City continued production into 1878. By 1879, the only Trade dollars available were limited numbers of proofs, designated for distribution in silver proof sets. This Gem 1879 proof displays sharp central definition with trivial weakness on some peripheral stars. Lovely greenish-gold interiors cede to yellow-gold, violet, and forest-green borders. The fields are deeply mirrored and eye appeal is outstanding. Housed in an old green label holder. NGC ID# 27YR, PCGS# 7059

MORGAN DOLLARS

1879-CC Morgan Dollar, MS62
Scarcer Carson City Issue

3158 **1879-CC MS62 PCGS.** Normal Mintmark. The 1879-CC Morgan dollar is an elusive branch mint issue, from a small mintage of 756,000 pieces. This impressive MS62 example displays well-detailed design elements, with a touch of the usual softness on the hair above the ear. The lightly marked, lustrous surfaces show subtle hints of lavender toning. NGC ID# 253U, PCGS# 7086

1879-CC Silver Dollar, MS63
CAC-Endorsed and Eye-Appealing

3159 **1879-CC MS63 PCGS. CAC.** Frosty mint luster covers the devices, while the fields display a hint of reflectivity amid vibrant cartwheel luster. Brilliant interiors cede to yellow-gold border toning, which frames the devices. Minor strike weakness on the eagle's breast and the hair above Liberty's ear is barely noticed. Abrasions are minimal. The 1879-CC is the second-scarcest Carson City issue in the Morgan dollar series, trailing only the 1889-CC, which is a major key date series-wide. NGC ID# 253U, PCGS# 7086

1880-S Morgan Dollar, MS68
Gleaming, Nearly Flawless Luster

3160 **1880-S MS68 PCGS Secure.** Brilliant luster gleams from the near-flawless surfaces of this Morgan dollar type coin, illuminating sharp, luminescent devices and pristine fields. Under a loupe, the only deterrents to an even finer grade are a couple of trivial grazes on Liberty's nose. Eye appeal abounds on this dazzling Registry-grade 1880-S dollar. PCGS and NGC each list only five finer non-Prooflike examples of this popular issue (9/18). NGC ID# 2544, PCGS# 7118

1880-S Morgan, MS67 Deep Mirror Prooflike
Green CAC, Green Label Holder
A Rarity This Fine

3161 **1880-S MS67 Deep Mirror Prooflike PCGS. CAC.** The 1880-S is one of the most plentiful dates in the Morgan dollar series. It is also one of the most well-made, with thousands of sharp, deeply prooflike coins known. Nonetheless, Deep Mirror Prooflike pieces are rarely seen as fine as MS67, where this CAC-endorsed Registry coin resides. Each side is sharp and virtually flawless, showing stark cameo contrast. The frosted devices and liquidlike fields show light golden tinting and are free of abrasions. Housed in a green label holder. Population: 28 in 67 (1 in 67+) Deep Mirror Prooflike, 2 finer. CAC: 5 in 67, 0 finer (9/18). NGC ID# 2544, PCGS# 97119

1882 Morgan Dollar, MS67
Vividly Toned and Frosty

3162 **1882 MS67 PCGS Secure.** Yellow-orange, sea-green, cobalt-blue, violet, and amber-gold form more or less concentric circles on this Superb Gem 1882 Morgan dollar. Trivial strike softness on the hair above Liberty's ear is barely noticed, and the frosty luster is without a single mentionable defect. The 1882 Morgan is a rarity in this grade and unknown finer. PCGS has not even certified a Prooflike or Deep Mirror Prooflike coin so fine. Population: 12 in 67 (1 in 67+), 0 finer (9/18). NGC ID# 254A, PCGS# 7132

1882-CC Dollar, MS67 ★
Great Visual Appeal

3163 **1882-CC MS67 ★ NGC.** An arc of multicolor patina crosses the left side of the obverse from about 7 o'clock to 1 o'clock. The rest of that side is brilliant, as is the central reverse, which maintains a ring of colorful toning around the rim. This Carson City Superb Gem, likely derived from the GSA hoard, is well-struck and exceptionally clean. The only notable mark is on the eagle's upper breast. Census: 62 in 67 (1 in 67+, 4 in 67 ★, 1 in 67+★), 0 finer (10/18). NGC ID# 254S, PCGS# 7134

1885-CC Dollar, MS66 Deep Mirror Prooflike
Outstanding Quality and Aesthetic Appeal

3164 **1885-CC MS66 Deep Mirror Prooflike PCGS. CAC.** Despite the small mintage of 228,000 pieces, the 1885-CC Morgan exists by the tens of thousands, ironically mostly in mint condition. Even Premium Gems can be located with little difficulty. Deep Mirror Prooflike examples such as the present MS66 offering, however, are infrequently seen. Its deeply mirrored fields yield fabulous contrast with the frosted devices that exhibit bold definition, and the untoned surfaces have been well cared for. These factors add up to outstanding eye appeal, appropriately recognized by CAC. Population: 51 in 66 (7 in 66+) Deep Mirror Prooflike, 2 finer (9/18).
Ex: Long Beach Signature (Heritage, 6/2014), lot 4663, where it brought $11,750. NGC ID# 254S, PCGS# 97161

1889-CC Dollar, Lightly Toned AU53
Above Average Appeal for the Grade

3165 **1889-CC AU53 NGC.** Traces of mint luster add considerable eye appeal to this About Uncirculated 1889-CC, which is the undisputed greatest rarity of the Carson City Morgan dollar series. Light, silver-gray patina walks the fine line between toned and untoned surfaces. The coin is sharply defined for the AU53 level, with minor high-point rub that does not interfere with the otherwise crisp details. Inoffensive field chatter accounts for the assigned grade. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, Choice AU
Bright Carson City Key Date

3166 **1889-CC AU55 PCGS Secure.** This Choice AU 1889-CC Morgan dollar shows a trivial amount of rub over the central high points, scattered marks, including minor hairlines, and slightly subdued mint luster in the open fields — all normal for the grade. It is far finer than the typical VF example offered, often with various surface problems such as cleaning. Both sides are bright and untoned. Original luster remains around the motifs. A lovely, high-end example of this famous key date. NGC ID# 2559, PCGS# 7190

1889-CC Silver Dollar, AU55
Reflective Fields

3167 **1889-CC AU55 PCGS Secure.** Light high-point wear prevents a Mint State designation on this 1889-CC dollar, while the fields display prooflike reflectivity in the protected areas. Scattered abrasions are not bothersome for the grade. Coinage of silver dollars at Carson City in 1889 amounted to 350,000 coins, all struck late in the year after the mint reopened following a four-year hiatus. Most examples of this issue circulated extensively or were later melted. No significant quantities of 1889-CC dollars were ever released from the Treasury at a later date, as was the case with many other CC-mint issues in the series. NGC ID# 2559, PCGS# 7190

1889-CC Silver Dollar, MS62
Few Examples Preserved in Mint State

3168 **1889-CC MS62 PCGS Secure.** The 1889-CC was the first silver dollar struck at the Carson City Mint since mid-1885. The mintage of 350,000 pieces was accomplished entirely in the final quarter of the year. Large quantities of this issue were paid out into commerce during the 19th century, as silver dollars circulated far more in the western territories than they did along the East Coast. Circulated 1889-CC dollars are in abundance today as a result, and Mint State coins are infrequently encountered. The 1889-CC is the rarest of the Carson City Morgans, and it is a series key in all grades, particularly at the Mint State level. This MS62 coin displays cartwheel luster and sharp design elements. Abrasions on Liberty's cheek limit the grade. Light olive-gold toning clings to the obverse borders and warms the entire reverse, attesting to the originality of the surfaces. NGC ID# 2559, PCGS# 7190

1890-CC Dollar, MS65+
Spectacular Toning and Preservation

3169 **1890-CC MS65+ PCGS Secure.** Beautiful multicolor toning covers each side of this Plus-graded Gem Carson City Morgan. Vivid sun-gold, violet, and blue colors surround the obverse border, framing sea-green and gold across the interior. On the reverse, rose-gold, sea-green, and lilac border toning surrounds mottled orange-gold color in the center. Neither side of this high-end Gem has distracting abrasions and the strike is above average. PCGS lists only 16 finer non-Prooflike coins (9/18). We anticipate a high level of interest in this breathtaking 1890-CC Morgan dollar, a coin that is arguably the finest we have seen in the Gem grade level. NGC ID# 255D, PCGS# 7198

1891-CC Silver Dollar, MS66
Conditionally Rare Registry Coin

3170 **1891-CC MS66 PCGS Secure.** The 1891-CC is a better date among Carson City Morgans, but it is usually available for a price in Mint State. More than 5,600 examples were distributed to the public through the GSA sales of the 1970s. However, few examples from the GSA sales or any other source were preserved carefully enough to warrant a Premium Gem grade. This MS66 coin is rare. Liberty's cheek is virtually flawless, and only a few faint field marks are visible beneath a loupe. Original blue-green toning surrounds the borders, while the interiors display amber, gold, and lilac-gray coloration. The usual touch of strike weakness appears on the hair above Liberty's ear. Population: 40 in 66 (6 in 66+), 1 finer; 1 in 66 Prooflike, 1 finer (9/18). NGC ID# 255H, PCGS# 7206

1892-O Morgan Dollar, MS65
Rare Prooflike Representative

3171 **1892-O MS65 Prooflike ANACS.** The 1892-O Morgan is usually obtainable in the absolute sense, but cross over into the pursuit of Prooflike examples, and the issue becomes a major rarity. PCGS and NGC combined have certified only 27 Prooflike examples in all grades, with only one finer than MS64 (9/18). This ANACS-certified coin is tied for finest with a single PCGS coin, showing beautifully preserved surfaces and subtle field-motif contrast. A touch of striking weakness in the centers is typical for the issue, and the overall eye appeal is exceptional. An important coin for the knowledgeable collector.
Ex: Houston Money Show Signature (Heritage, 12/2014), lot 3668, where it realized $9,400. NGC ID# 255N, PCGS# 7217

1893-CC Morgan Dollar, MS62
Final Carson City Issue

3172 **1893-CC MS62 NGC.** The Carson City Mint struck a small production of 677,000 Morgan dollars in 1893, before being closed for coinage operations on June 1. The issue is difficult to locate in high grade, but lower Mint State examples are usually available. This attractive MS62 coin offers sharply detailed design elements and lustrous surfaces with some scattered, minor signs of contact. NGC ID# 255S, PCGS# 7222

1893-CC Dollar, MS62
Frosty Interiors, Colorful Rims

3173 **1893-CC MS62 PCGS Secure.** The 1893-CC is collectible in grades ranging from Fair 2 to MS64, producing an average certified assessment of XF40. This lustrous MS62 coin is significantly finer than what is typically encountered. It enjoys bright, frosty interiors with a ring of golden-orange, violet, and blue patina around the rims. Detail is incomplete over Liberty's ear and the eagle's breast, and bagmarks are peppered throughout. NGC ID# 255S, PCGS# 7222

1893-CC Silver Dollar, MS63
Radiant and Slightly Reflective

3174 **1893-CC MS63 PCGS Secure.** The final Carson City issue in the Morgan dollar series is also one of the better dates with a CC mintmark in high grade. This Select example has a few abrasions on Liberty's cheek that limit the grade, but eye appeal is nonetheless pleasing for the MS63 level, boosted by semiprooflike reflectivity in the fields. The usual strike weakness is noted on the eagle's breast and the hair above Liberty's ear. NGC ID# 255S, PCGS# 7222

1893-CC Morgan, Toned MS64

3175 **1893-CC MS64 PCGS.** The 1893-CC is usually available for a price as fine as MS64, but it is rare in higher grades. Moreover, most of the MS64 pieces that we have seen are brilliant or nearly so. This issue is rarely offered in Choice condition with attractive toning. The present piece is vividly colored, showing ocean-blue and greenish hues on the obverse, joined by olive-gold and lilac. The reverse is light golden, with the toning deepening around the rims. Trivial strike weakness is noted on the eagle's breast and the hair above Liberty's ear, but the overall sharpness is significantly above average for the 1893-CC dollar. PCGS lists only 15 finer non-Prooflike coins, plus a single numerically finer Prooflike piece (10/18). NGC ID# 255S, PCGS# 7222

1893-S Morgan Dollar, AU53
Partially Lustrous Fields

3176 **1893-S AU53 PCGS Secure.** The San Francisco Mint struck a series-low mintage of just 100,000 Morgan dollars in 1893. All the coins were delivered in January, before the effects of the Panic of 1893 resulted in the repeal of the Sherman Silver Purchase Act. There was no demand for silver dollars in the national economy at the time and government vaults were overflowing with unneeded silver dollars for years to come. It seems likely that much of the small mintage was held in government storage for some time and released into circulation when the glut of circulating silver dollars subsided. Most coins that remained in long term government custody were probably melted in 1918, under the provisions of the Pittman Act, as the 1893-S was not well-represented in the Treasury releases of the 1960s. Today, the average survivor is in the VF-XF grade range and high-grade specimens are rare.

This is an impressive AU53 example that exhibits just a trace of wear on the well-detailed design elements. The lightly abraded surfaces retain much of their original mint luster and show subtle hints of pale gold and lavender toning. This coin should find a home in a fine collection of Morgan dollars. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, AU55
Seldom Offered Finer
Cornerstone Issue

3177 **1893-S AU55 PCGS.** The 1893-S is a key date in the Morgan dollar series and one that reflects the economic landscape of the era. The Panic of 1893 is most often attributed to a run on gold reserves, unfettered railroad speculation, and commercial bank insolvency. There is no doubt that these factors played a major role. However, a 2009 article by Brandon R. DuPont entitled "Panic in the Plains: Agricultural Markets and the Panic of 1893" suggests that the Panic was worsened by shocks to agricultural markets. Drought conditions in the West during the summer months of 1893 significantly reduced crop yields and farmers' incomes. Western banks were heavily exposed to such disturbances because they had provided so many mortgages to farmers. The banks failed as loans went unpaid, compounding the effects of the more mainstream causes of the financial crisis. The regional nature of the Panic is reflected in the San Francisco Mint's Morgan dollar output in 1893. While silver dollar mintages were low at all mints in 1893, only 100,000 pieces were coined at the California facility.

This Choice AU S-mint dollar is totally untoned. There are small marks and thin hairlines on each side, but they are minor. Well-defined motifs displays minimal trace of friction. Much finer than average and seldom offered in better condition. NGC ID# 255U, PCGS# 7226

1895-S Dollar, MS63
Brilliant and Semiprooflike

3178 **1895-S MS63 PCGS Secure.** The 1895-S is one of two circulation-strike issues for the year along with the 1895-O, which proves more difficult to acquire in high grades. Bowers writes about the 1895-S: "Most Mint State coins are well struck and have excellent lustre. Many have semi-prooflike surfaces." This Select example conforms to that description. Contrast is noticeable and central detail is good. Both sides are brilliant, and while marks are peppered over each side, only one abrasion on the chin is singularly obvious. NGC ID# 255Z, PCGS# 7238

1897-O Morgan Dollar, Frosty MS64
Highly Elusive This Fine

3179 **1897-O MS64 PCGS.** Frosty, luminous mint luster engulfs gold-tinted surfaces on this well-preserved Choice 1897-O dollar. Strike weakness on the eagle's breast and the hair above Liberty's ear is typical of this New Orleans issue. The 1897-O Morgan is scarce in MS64 and rare finer. Moreover, almost no coins in this condition have prooflike fields, which adds demand to nonprooflike coins such as this. Population: 45 in 64 (2 in 64+), 14 finer; 2 in 64 Deep Mirror Prooflike, 0 finer (9/18). NGC ID# 2565, PCGS# 7248

1898 Silver Dollar, MS67+
Tied for Finest at PCGS

3180 **1898 MS67+ PCGS Secure.** This virtually brilliant, lustrous Superb Gem is among the finest 1898 Morgan dollars certified. PCGS lists only 11 Plus-graded non-Prooflike MS67 coins with none finer; two Prooflike and one Deep Mirror Prooflike example are also graded MS67, but none are Plus-designated as this non-Prooflike coin is (9/18). The strike is sharp and the preservation is superb. Eye appeal is outstanding on this top-of-the-line Registry coin. NGC ID# 2568, PCGS# 7252

1899-O Morgan Dollar, MS67+
Among the Finest at CAC

3181 **1899-O MS67+ PCGS Secure. CAC.** Brilliant cartwheel luster shimmers across each side of this high-end Superb Gem, highlighting well-struck design elements. A few truly faint luster grazes on Liberty's cheek and hidden within the eagle's breast feathers are all that prevent this coin from achieving a full MS68 grade. The high quality is recognized by CAC. The 1899-O Morgan dollar is elusive in MS67, and PCGS lists only 14 such coins with a Plus designation; there is just a single MS68 coin finer at PCGS and NGC combined (9/18). NGC ID# 256C, PCGS# 7260

1901 Silver Dollar, MS63
Sought-After Condition Key

3182 **1901 MS63 PCGS Secure.** The 1901 is among the more famous condition keys in the Morgan dollar series. Circulated examples of this issue are plentiful, but it becomes challenging to acquire for many collectors in the lower Mint State levels. In MS63 it is genuinely scarce, and finer coins are rare. The 1901 Morgan in Gem condition is one of the rarest dates in the series. In *A Guide Book of Morgan Silver Dollars*, fifth edition, Q. David Bowers gives the 1901 an Optimal Collecting Grade of only MS60, which vividly represents just how difficult it is to find a nice, higher-grade Mint State example of this issue. This Select representative is significantly finer than that entry-level MS60 grade, yet it is not so high-end that it is out of reach for collectors. Abrasions are light and unobtrusive. Warm golden toning on each side lightens in the centers, producing attractive eye appeal. Luster is satiny. NGC ID# 256J, PCGS# 7272

1902-S Dollar, Brilliant MS66
Only Five Coins Graded Higher

3183 **1902-S MS66 PCGS Secure.** The cheek and fields on both sides are incredibly preserved, nearly mark-free, and almost certainly deserving a higher-grade. Softness over the centers is likely the only thing that stands in the way of an even finer technical assessment. Smooth surfaces are wholly untoned and frosty. The 1902-S is scarce at this grade level and there are only five coins graded higher, all at PCGS. Population: 57 in 66 (7 in 66+), 5 finer (9/18). NGC ID# 256P, PCGS# 7282

PROOF MORGAN DOLLARS

1881 Morgan Dollar, PR67+ Spectacular Toning and Eye Appeal From the Gardner Collection

3184 **1881 PR67+ PCGS Secure. CAC.** Although the official mintage is 984 proofs, 105 pieces went unsold and were melted, placing the 1881 issue at the low end of proof production for the early 1880s. A general uptick in quality over earlier issues adds to the date's reputation for high quality.

Although it technically lacks cameo contrast, this Plus-graded and CAC-endorsed coin makes up for it with spectacular patina and a razor-sharp impression. A lightly toned region at the upper-right obverse hints at the cameo effect that once appeared on that side. The rest of the specimen, however, now exhibits rich violet, blue-green, orange, and jade patina. The fields are exquisitely preserved, and the overall visual appeal is grand. This gorgeous Superb Gem Morgan dollar is one of the issue's finest survivors. Population: 11 in 67 (4 in 67+), 2 finer. CAC: 5 in 67, 0 finer (9/18).
Ex: ANA Signature (Heritage, 8/2007), lot 1762; FUN Signature (Heritage, 1/2008), lot 2999; Eugene H. Gardner Collection (Heritage, 10/2014), lot 98628; Dallas Signature (Heritage, 11/2017), lot 16865; Dallas Signature (Heritage, 3/2018), lot 3111. NGC ID# 27Z5, PCGS# 7316

1886 Silver Dollar, Toned PR66+ Sharp and Attractively Toned

3185 **1886 PR66+ PCGS Secure.** The population of the proof 1886 Morgan dollar thins considerably at the Premium Gem level, and finer coins are decidedly rare. This piece is Plus-graded and beautifully toned. It is the only Plus-graded Premium Gem at PCGS. Rose-gold, aquamarine, violet, and amber toning covers each side, preventing consideration for a Cameo designation but offering its own brand of outstanding eye appeal. The strike is sharp and the preservation is superb. Population: 13 in 66 (1 in 66+), 5 finer; 5 in 66 Cameo, 3 finer; 0 in 66 Deep Cameo, 2 finer (9/18). NGC ID# 27ZF, PCGS# 7321

1895 Morgan Dollar, Colorfully Toned PR63
Pleasing Example of This High-Demand Rarity

3186 **1895 PR63 NGC.** Collectors seeking an 1895 silver dollar are forced to rely on one of the 880 proof dollars originally distributed in proof sets. Most of those proof sets have long since been broken up to access the extremely popular dollars, which are the sole representatives of the P-mint production for the year. A phantom Philadelphia mintage of 12,000 business strikes is listed in the Mint record, but no such coins are confirmed, and if one ever does magically appear, it will not change the strong demand for 1895 proofs at all.

This is an originally toned proof, with pale reddish-gold interiors and rainbow iridescence at the borders. Blue accents occupy the recesses in Liberty's hair and surround the raised devices. A few light marks account for the Select proof grade. Toned Morgan dollar enthusiasts will want to give this PR63 example a long look and a strong bid. NGC ID# 27ZR, PCGS# 7330

1895 Morgan Dollar, PR66
Stark, Undesignated Cameo Contrast
Old Green Label Holder

3187 **1895 PR66 PCGS.** The 1895 proof has long been regarded as the king of Morgan dollars. It is not any more rare in the absolute sense than most other proof Morgans, but collector demand for this issue is exponentially greater due to the fact that no circulation strikes are known for the date. The 1895 is essential for a complete proof set of Morgan dollars as well as a complete date and mintmark set — both of which are widely popular collecting avenues for the series.

Mint records record a production 12,000 circulation-strike dollars in 1895 at Philadelphia. This entry has long been considered an accounting error, referring to dollars of a different date. The Chapman brothers, for example, believed that no circulation strikes were coined. The 1895 proof, as early as 1896, had a reputation for rarity, with proof sets of this date garnering a premium at auction solely on the influence of the dollar.

Another school of thought about circulation-strike 1895 dollars is that 12,000 pieces were indeed struck but were never distributed to the public, likely being melted down at the Mint decades later under the dictates of the Pittman Act of 1918. Both theories regarding circulation strikes of this date reach the same conclusion: the 1895 Morgan dollar is only known in proof format today.

This Premium Gem example stands apart from most other 1895 proofs not only for its remarkable condition, but also for its cameo contrast and residency in an old green label PCGS holder. The old slab insert makes no mention of cameo contrast, although this PR66 coin is indeed a Cameo on both sides. Light golden toning warms the frosty devices and mirrored fields, and close study of the surfaces fails to reveal a single contact mark. This coin excels among high-end 1895 proof Morgans and presents remarkable eye appeal and quality. It will undoubtedly be the hallmark of a high-end Morgan dollar collection when it changes hands on the auction block. Population: 16 in 66, 6 finer; 6 in 66 (2 in 66+) Cameo, 9 finer; 10 in 66 (4 in 66+) Deep Cameo, 8 finer (9/18). NGC ID# 27ZR, PCGS# 7330

1900 Dollar, Richly Toned PR65

3188 **1900 PR65 PCGS.** Deep violet, blue, and gold patina blankets most of this Gem proof Morgan dollar. The central reverse is minimally toned. The entire effect confirms the originality of the coin, which likely resided in a sulphur-rich envelope for many years. Both sides maintain flashy, reflective fields. Contrast is subdued on the obverse and more noticeable on the reverse. Population: 24 in 65, 13 finer (9/18). NGC ID# 3KYV, PCGS# 7335

PEACE DOLLARS

1926 Peace Dollar, MS66+
None Are Finer at PCGS

3189 **1926 MS66+ PCGS Secure. CAC.** The 1926 Peace dollar is only marginally scarce in MS66, but Plus-graded coins in this grade are rare — just 22 such pieces are reported at PCGS. Moreover, PCGS lists no Superb Gems finer for this issue (9/18). Frosty, shimmering cartwheel luster grants each side of this CAC-endorsed Registry coin exceptional eye appeal. No bothersome abrasions are seen. The strike is sharp and only the barest trace of light champagne toning is visible. CAC: 66 in 66, 0 finer (9/18). NGC ID# 257N, PCGS# 7367

1927-S Peace Dollar, MS65
Only One Coin Finer at PCGS

3190 **1927-S MS65 NGC.** The 1927-S is one of only four dates in the Peace dollar series with a mintage of less than 1 million coins. Just 866,000 pieces were struck, which corresponds to conditional scarcity in Gem condition today. A mere three coins are known finer than this level. Offered here is a frosty, golden-toned Gem with well-struck design elements and clean surfaces. Eye appeal is excellent. Census: 75 in 65 (1 in 65+), 1 finer (9/18). NGC ID# 26J6, PCGS# 7372

1934 Peace Dollar, MS66+
Few Finer Pieces Are Known

3191 **1934 MS66+ PCGS Secure. CAC.** This issue's availability declines rapidly above MS65. Premium Gems are elusive, particularly with a Plus designation and/or CAC endorsement, as is seen on the present coin. Finer examples are major rarities. This piece displays sharp motifs and blazing, frost-white luster. Only the most insignificant luster grazes are visible upon close examination. PCGS lists just five finer representatives (9/18). NGC ID# 257Y, PCGS# 7375

1934 Peace Dollar, MS66+
Few Pieces Known Finer
Scarce With CAC Endorsement

3192 **1934 MS66+ PCGS Secure. CAC.** Blazing frost-white luster engulfs this high-end Premium Gem in a dazzling cartwheel effect, which illuminates sharp design elements and exceptional preservation. The combination of the Plus designation and the CAC green label earns this coin high marks in all regards. The 1934 Peace dollar boasts a small mintage of less than 1 million coins. It is occasionally available in MS66, but PCGS lists only six Superb Gems finer. CAC: 63 in 66, 1 finer (10/18). NGC ID# 257Y, PCGS# 7375

EARLY PROOF SET

1881 Four-Piece Silver Proof Set, PR61 to PR63 Prior Generation Holders, All CAC Endorsed

3193 **1881 Four-Piece Silver Proof Set, PR61 to PR63 NGC. CAC.** The coins are well-matched for toning and condition, individually housed in prior generation NGC slabs with consecutive certification numbers. All four pieces are CAC endorsed. Included are:

Dime PR62. Appealing for the grade with mirrored fields and sharp, satiny devices. Blue-green and lavender toning on both sides recedes to a light golden hue along the upper obverse border.

Quarter PR62. A sharp proof with reflective fields and traditional aquamarine and lavender toning. No distractions are seen.

Half Dollar PR63. The highest-grade coin in this set is toned with sea-green, blue-gray, and lavender hues much like the quarter dollar. The strike is sharp and eye appeal is pleasing.

Trade Dollar PR61. Toned much like the other coins in the set with blue-gray and lavender hues. The strike is needle-sharp, although some dullness in the obverse fields prevents a finer grade from NGC. (Total: 4 coins)

GOLD DOLLARS

1855-C Type Two Gold Dollar, AU55 Deep Reddish-Gold Color

3194 **1855-C AU55 NGC. Variety 2.** This is the more often seen of two varieties, featuring the date slightly further right. Doug calls the 1855-C the rarest Charlotte gold dollar in high grades after the 1849-C Open Wreath. This orange and reddish-gold Choice About Uncirculated example is characteristically defined and shows heavy clash marks around the portrait. Perhaps 30 or 40 pieces are known across all AU grades, while two to five Mint State coins are believed extant. NGC ID# 25C5, PCGS# 7533

1858-S Gold Dollar, MS62 Conditionally Rare

3195 **1858-S MS62 NGC.** An entire collection of S-mint gold dollars needs only seven coins. The San Francisco Mint produced limited quantities of this denomination, almost all prior to the Civil War. In 1858, 10,000 pieces were struck. This MS62 coin is tied with two others as the finest at NGC. NGC in total reports just 100 grading events for this date in all grades combined (10/18). Satiny surfaces have deep, original orange-gold luster and sharply struck design elements. No significant abrasions are seen. NGC ID# 25CK, PCGS# 7550

PROOF GOLD DOLLARS

1863 Gold Dollar, PR65 Cameo
Only 50 Proofs Struck

3196 **1863 PR65 Cameo NGC.** In spite of drastically lowered mintages for both silver and gold coins during the Civil War, the production of proof gold dollars actually increased from 35 pieces in 1862 to 50 in 1863. The number certified by both services is 35, including non-Cameo, Cameo, and Deep / Ultra Cameo pieces. An admittedly undetermined number of resubmissions and crossovers are undoubtedly included in that 35-piece total, probably leaving 25 or so individual proofs of this date. This piece displays remarkable cameo contrast on each side. The coin shows even, light reddish-gold color and there are no noticeable contact marks. There is, however, a possible pedigree identifier: A short, curved lint mark is located just above the second plume of the headdress. A remarkably well-preserved early proof gold dollar. Census: 1 in 65 Cameo, 3 finer (10/18). NGC ID# 25E6, PCGS# 87613

1877 Gold Dollar, PR62 Cameo
Likely Fewer Than 15 Proofs Extant

3197 **1877 PR62 Cameo PCGS Secure.** The reported mintage of 20 gold dollar proofs derives from the total number of gold proof sets struck in 1877. It is possible a few additional individual coins were produced on-demand, but even so, this is a tremendous rarity. Likely fewer than 15 examples survive in all, with or without Cameo contrast. This starkly contrasted yellow-gold proof features jet-black fields and frosty devices. Hairlines on each explain the grade. Population: 1 in 62 Cameo, 3 finer (9/18). NGC ID# 25EL, PCGS# 87627

CLASSIC QUARTER EAGLES

1836 Script 8 Quarter Eagle, MS63
Head of 1835, Variety 11

3198 **1836 Script 8 MS63 PCGS Secure. Variety 11, R.2.** The lack of a berry on the stem is the key pick-up point for this Script 8 variety, with a die crack extending from the rim through the left-hand points of star 6 to the nearby coronet and beyond. The central hair curls and horizontal shield lines are a bit soft on this Select Uncirculated example, but the coin is otherwise sharp, and the lustrous, partially reflective surfaces show only minor marks. Scarce any finer. Population: 40 in 63 (3 in 63+), 16 finer (9/18). NGC ID# 25FU, PCGS# 7694

1838 Classic Head Quarter Eagle, MS63+
Conditionally Rare Type Coin

3199 **1838 MS63+ PCGS Secure. CAC. Breen-6146, Variety 19, R.2.** In the short-lived Classic Head quarter eagle series, the 1834 to 1836 issues are the most plentiful in Mint State. Later dates are scarce or rare so fine, which corresponds proportionately to the lower mintages of this period. Coinage surpassed 100,000 pieces annually in 1834 and '35, and in 1836 more than 547,000 coins were struck. In 1837, quarter eagle coinage dropped to barely more than 45,000 coins, and in 1838 production was similarly low with only 47,030 pieces struck. Most surviving Mint State examples of the 1838 issue are in MS63 and lower grades. This is the sole Plus-graded coin for the grade at PCGS, and finer pieces are decidedly rare. Sharp design elements complement frosty, well-preserved greenish-gold surfaces. A few light abrasions are unobtrusive. Population: 8 in 63 (1 in 63+), 8 finer. CAC: 6 in 63, 0 finer (9/18). NGC ID# 25FY, PCGS# 7696

1839-O Classic Head Quarter Eagle, AU53
Popular New Orleans Issue, Medallic Turn

3200 **1839-O AU53 NGC. Breen-6153, Variety 28, R.4.** Low Date, Close Fraction. Examples of this variety, the scarcer of two for the year, are often found in medallic turn, as here. The 1839-O quarter eagle is always popular as the first gold issue struck at the New Orleans Mint. It is also the only Classic Head product from the Louisiana facility and the only one with an obverse mintmark. This partly lustrous AU53 representative features deep olive-gold color and extensive cracks on the reverse. Definition is somewhat mushy but it does not detract. From a mintage of 17,781 pieces, of which 350 to 400 survive. NGC ID# 25G7, PCGS# 7701

LIBERTY QUARTER EAGLES

1841-D Two and a Half, XF40
Scarce in All Grades

3201 **1841-D XF40 NGC. Variety 2-C.** Southern gold specialist Doug Winter calls the 1841-D quarter eagle one of the "rarest coins of any denomination produced at this mint." From a mintage of 4,164 pieces, it is believed that only 80 to 100 pieces survive in all grades. This XF coin is sharply detailed for the grade and the strike is above average. The surfaces have bright yellow-gold color and scattered abrasions. Census: 6 in 40, 41 finer (9/18). Housed in a prior generation holder. NGC ID# 54TW, PCGS# 7722

1846 Quarter Eagle, MS61
Razor-Sharp Strike, Rare Any Finer

3202 **1846 MS61 PCGS Secure.** A total of 35 Mint State grading events are reported at PCGS and NGC combined, but that total is likely inflated by resubmissions and crossovers. Undoubtedly, the 1846 quarter eagle is a rarity in Uncirculated condition, certainly any finer than this razor-sharp, yellow-gold MS61 representative. Luster is moderately subdued in the open fields but vibrant elsewhere. Chatter occurs above Liberty's head, and fine hairlines appear on each side. Population: 6 in 61, 5 finer (10/18). NGC ID# 25GZ, PCGS# 7740

1847-C Two and a Half, MS62
Rare in Uncirculated Condition

3203 **1847-C MS62 NGC. Variety 1.** The 1847-C quarter eagle comes from a mintage of only 23,226 pieces. This issue circulated extensively in the South. The Charlotte Mint accepted significant amounts of local domestic bullion for coinage, and the quarter eagles and half eagles produced with that gold were readily returned to the local economy. Mint State 1847-C quarter eagles are rarely offered. This piece is well-struck for the issue and displays pleasing olive-gold patina with satiny mint luster. No mentionable abrasions are present. Census: 12 in 62, 7 finer (10/18). NGC ID# 25H6, PCGS# 7745

1855-C Quarter Eagle, MS62+
Only 3,677 Coins Struck

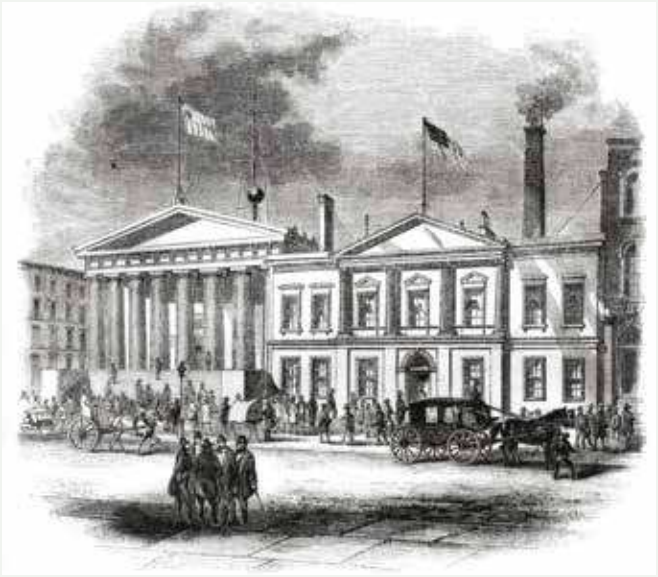

3204 **1855-C MS62+ PCGS Secure. Variety 1.** North Carolina gold represented 91% of deposits at the Charlotte Mint in 1855 — an average proportion relative to other imports from South Carolina and California. The vast majority of the $216,606 in total domestic gold deposited was diverted toward the production of half eagles in 1855, although small quantities of gold dollars and quarter eagles were also manufactured. This is one of just 3,677 quarter eagles minted for the issue. Between 85 and 105 examples are believed extant, including six or seven coins in Mint State (the certification totals are inflated).

The 1855-C has a reputation for being one of the worst-struck Charlotte quarter eagles. This example is better struck than many we have seen, with nearly full star radials, clear wing and neck feathers, and bold olive leaves. The eagle's left leg and surrounding area is typically weak. Each side is softly lustrous with yellow-gold color and minimal marks. A terrific example of the lowest-mintage North Carolina two and a half dollar. Population: 4 in 62 (1 in 62+), 3 finer (9/18). NGC ID# 25J5, PCGS# 7775

1858 Two and a Half, MS64
Shimmering Original Luster

3205 **1858 MS64 PCGS Secure.** Uncirculated examples of the 1858 quarter eagle are relatively scarce overall, but Choice coins are decidedly rare. PCGS and NGC combined report only three pieces finer than this. The current coin displays shimmering rose-gold luster and no distracting abrasions. Slight strike softness on the eagle's left (facing) leg and the hair curls around Liberty's face is typical of Liberty quarter eagles from this period. Population: 8 in 64, 1 finer (9/18). NGC ID# 25JG, PCGS# 7786

1876-S Two and a Half, MS64
The Sole Finest Certified

3206 **1876-S MS64 PCGS Secure.** We are proud to offer here the sole finest-certified 1876-S Liberty quarter eagle. This is the first time that a coin in this grade has appeared at public auction. However, even in MS63 this issue is a major rarity. We last handled an MS63 coin in the FUN Signature (Heritage, 1/2014), lot 6468, where it realized $8,225. This Choice example makes its debut as one of only two high-end examples of the date to appear at public auction within the last decade. Shimmering, frosty luster glistens on each side with rich honey-gold coloration. The usual strike softness appears on the eagle's neck and left (facing) leg, but the eye appeal remains outstanding. A hairline scratch in the left obverse field is the only imperfection of note, and it is faint. An outstanding example of this conditionally rare San Francisco issue. NGC ID# 7JS6, PCGS# 7825

1888 Quarter Eagle, MS66
Tied for Finest at PCGS

3207 **1888 MS66 PCGS Secure.** The Mint manufactured 16,001 quarter eagles in 1888. Few saw circulation, accounting for the issue's accessibility through MS64 and occasionally MS65. Examples become Registry-grade condition rarities in Premium Gem. Indeed, none are finer at PCGS, and NGC has only seen one submission in MS67. This frosty, razor-sharp two and a half enjoys scintillating mint luster over luminous yellow-gold surfaces. Ticks are nearly indistinguishable to the unaided eye. Population: 9 in 66 (2 in 66+), 0 finer (9/18). NGC ID# 25LC, PCGS# 7840

1895 Two and a Half, MS65
Elusive in High Grade

3208 **1895 MS65 PCGS Secure.** The 1895 Liberty quarter eagle is conditionally scarce in MS65 and rare finer. PCGS reports dozens of MS66 coins finer than the present Gem, although we believe many of those are duplicate submissions of just a few coins from upgrade attempts — PCGS has not certified an MS67 example of this issue. In more than two decades, we have handled a PCGS-graded Premium Gem on only 11 occasions, which strongly suggests the 49-coin population at PCGS (mostly Plus-graded entries) is artificially inflated. The Gem offered here is scarce and well-preserved with sharp design elements and frosty yellow-gold luster. Population: 16 in 65 (1 in 65+), 49 finer (9/18). NGC ID# 25LK, PCGS# 7847

1902 Quarter Eagle, MS67
Fully Struck

3209 **1902 MS67 NGC.** Quarter eagle output jumped to 133,540 pieces in 1902. Examples of this issue can be found up to MS67 but rarely any finer. A full strike and radiant mint luster define this Superb Gem. Lively yellow-gold surfaces lack overt signs of contact. NGC has graded six submissions higher (10/18). NGC ID# 25LT, PCGS# 7854

1903 Quarter Eagle, MS67+
Fully Struck, Vibrant Luster
Just One Piece Finer at PCGS

3210 **1903 MS67+ PCGS Secure. CAC.** This beautifully preserved Superb Gem type coin glistens with frosty, yellow-gold luster and razor-sharp design elements. No distracting abrasions are seen, although a loupe reveals several tiny copper-colored discolorations around the date. Eye appeal is outstanding, as recognized by the PCGS Plus designation and CAC endorsement. Fewer than half a dozen numerically finer examples of the 1903 quarter eagle are certified by PCGS and NGC combined. PCGS population: 8 in 67+, 1 finer. CAC: 21 in 67, 0 finer (9/18). NGC ID# 2688, PCGS# 7855

1906 Quarter Eagle, MS67+
High-End Type Coin
Rare With CAC Endorsement

3211 **1906 MS67+ PCGS Secure. CAC.** The 1906 Liberty quarter eagle is plentiful and a popular type coin. However, this high-end Superb Gem example is conditionally scarce, and it is a rarity with the CAC green label. Frosty, virtually flawless luster highlights sharp design elements and original yellow-gold coloration. Eye appeal is exceptional. Only a few finer representatives are known to survive. Population: 82 in 67 (9 in 67+), 2 finer. CAC: 32 in 67, 1 finer (9/18). NGC ID# 7JW8, PCGS# 7858

PROOF LIBERTY QUARTER EAGLES

1897 Quarter Eagle, PR65 Deep Cameo
Finely Textured Jet-Black Fields
Exceptional Production Quality

3212 **1897 PR65 Deep Cameo PCGS Secure. CAC.** Proofs struck during the final years of the 19th century are famous for their exceptional production quality. Examples are often found well-preserved with Cameo or Ultra Cameo contrast. Additionally, a healthy total of 136 pieces were manufactured in 1897, making this a popular issue to represent the Liberty Head type. The certification totals at NGC and PCGS are grossly inflated, but probably 100 to 125 pieces survive across all levels, and few are finer than this PR65 Ultra Cameo offering. The finely textured jet-black fields are eye-catching and produce stark contrast against thickly frosted devices. A full strike with broad, square rims meets, or even exceeds expectations. A terrific proof impression. Population: 5 in 65 (1 in 65+) Deep Cameo, 13 finer. CAC: 6 in 65, 16 finer (9/18). NGC ID# 288L, PCGS# 97923

1901 Two and a Half, PR66 Deep Cameo
Rare High-End Proof Type Coin

3213 **1901 PR66 Deep Cameo PCGS Secure. CAC.** The proof quarter eagle mintage of 1901 was the highest in the Liberty Head series at 223 pieces. This issue is a popular type coin in high grade, but it is not nearly as plentiful as the certified population reports suggest. PCGS and NGC combined report 264 grading events — by a large margin, more coins than were ever struck. By contrast, including duplicate appearances by some coins, we have handled an example of this "plentiful" proof issue on only 69 occasions over the past 25 years. Thus, the 1901 proof quarter eagle is scarce overall and it is a genuine condition rarity in the finer grades. This piece is fully struck and starkly contrasted with bright yellow-gold color. The surfaces are virtually flawless, and the CAC endorsement further adds to the appeal. Population: 10 in 66 (4 in 66+) Deep Cameo, 12 finer. CAC: 10 in 66, 9 finer (9/18). NGC ID# 288R, PCGS# 97927

1903 Quarter Eagle, PR64
Old Green Label Holder

3214 **1903 PR64 PCGS.** The Mint struck 197 proof quarter eagles in 1903. This issue is relatively plentiful among Liberty quarter eagle proofs, but it is still scarce overall. The certified population figures are inflated by resubmissions. This near-Gem displays a full strike and deep orange-gold coloration. The fields are deeply mirrored and beautifully preserved. No cameo contrast is apparent on this coin, although such is the rule for proof coinage of this period. PCGS lists only one Cameo 1903 proof quarter eagle and no Deep Cameos. Housed in an old green label holder. Population: 40 in 64, 35 finer (9/18). NGC ID# 288T, PCGS# 7929

1905 Two and a Half, PR65
Sharp and Beautiful
Rare in This Grade

3215 **1905 PR65 PCGS.** The certified population of the proof 1905 quarter eagle gives an unrealistic survival estimate. Only 144 pieces were struck, yet the combined PCGS and NGC census is 278 pieces. Over the past couple of decades, the grading services have varied in strictness when awarding grades to proof coins, and designating pieces as Cameos and Deep or Ultra Cameos was not always done. These factors contributed to an uncommonly high number of resubmissions, inflating the certified population for most grades. Since our Permanent Auction Archives began in 1993, we have handled a proof of this date on 67 occasions, including reappearances of some coins. Most of the pieces that we have seen graded below the Gem level. It is reasonable to estimate that fewer than 100 1905 proof quarter eagles are known.

This Gem displays full detail and liquidlike mirroring, bathed in original apricot-orange color. Under a loupe, the fields reveal no mentionable lines or marks, and eye appeal is outstanding. Population: 23 in 65, 11 finer; 2 in 65 Cameo, 9 finer (9/18). NGC ID# 7KG5, PCGS# 7931

INDIAN QUARTER EAGLES

1911-D Quarter Eagle, MS61
Singular Series Key Date

3216 **1911-D MS61 NGC.** A paltry 55,680 quarter eagles were struck at the Colorado branch mint in 1911. The issue holds up as the singular key date in its series, subject to ever-strong demand. Detail is exceptionally bold, including the mintmark, which is strong despite the lack of formal designation on the older-style NGC insert. Red-gold surfaces feature soft, satiny mint luster and a number of fine, shallow marks. NGC ID# 7KR7, PCGS# 7943

1911-D Two and a Half, MS61
Original Color

3217 **1911-D MS61 PCGS.** Strong D. This well-detailed example has satiny olive-gold mint luster with only light field marks that limit the grade. The coloration is original, which is significant considering how many low-end Uncirculated and AU pieces have been brightened in an effort to receive a higher grade from the certification services. The mintmark is bold on this piece, a collector-grade example of the series-key issue. NGC ID# 7KR7, PCGS# 7943

1914 Two and a Half, MS64+
Elusive CAC-Approved Example

3218 **1914 MS64+ PCGS Secure. CAC.** Lovely lilac and orange-gold hues adorn the recesses of this high-end Choice 1914 quarter eagle, while the fields display iridescent olive-gold coloration. This piece is sharp and beautifully preserved, easily earning the CAC endorsement. In MS65, the 1914 Indian quarter eagle is a condition key. This piece is just a whisper away from such quality, and its eye appeal is arguably equal to it. PCGS lists 66 finer submissions. CAC: 83 in 64, 9 finer (10/18). NGC ID# 7KRA, PCGS# 7946

1914-D Two and a Half, MS65
Luminous Surfaces, Conditionally Rare

3219 **1914-D MS65 NGC.** The 1914-D is a better date in the series, not so much because it is scarce in all grades but because it is a famous condition rarity in MS65, and this drives uncommonly strong collector demand for attractive coins in slightly lesser grades. For the advanced collector, this coin requires no compromise in quality. It grades MS65 NGC, which places it among the finest examples of the issue that are realistically available. A lone higher-grade coin is reported, which grades MS67 NGC. This piece is softly frosted and beautifully preserved. Luster shimmers beneath a light, and the mintmark and eagle's feathers are sharp. On the obverse, the usual strike weakness is noted on the lower headdress feathers. Census: 47 in 65 (2 in 65+), 1 finer (9/18). NGC ID# 2899, PCGS# 7947

1925-D Indian Quarter Eagle, MS66
None Certified Finer at PCGS

3220 **1925-D MS66 PCGS.** No quarter eagles were produced in the period between 1916 and 1924, but the Denver Mint produced a large mintage of 578,000 pieces in 1925. The 1925-D is an available date in most grades, and a favorite of mintmark type collectors. The population drops off sharply at the MS66 level, and finer examples are virtually unobtainable.

The present coin is an impressive Premium Gem with yellow and rose-gold surfaces that show occasional hints of lilac. The design elements are well-struck, but evidence of die buckling can be seen on the reverse at the rims. Vibrant mint luster adds to the considerable eye appeal. Population: 39 in 66 (1 in 66+), 0 finer (9/18).

Ex: Long Beach Signature (Heritage, 9/2011), lot 4255, where it realized $9,775. NGC ID# 7KRD, PCGS# 7949

THREE DOLLAR GOLD PIECES

1855 Three Dollar Gold, MS64
Only a Few Finer Pieces Are Known

3221 **1855 MS64 PCGS.** The fields have subtle reflectivity, although they are not truly mirrored. Nonetheless, this lemon-gold near-Gem displays well-struck design elements and is devoid of significant abrasions. Eye appeal is outstanding. The 1855 three dollar gold piece comes from a fairly substantial mintage of 50,555 coins, the third-highest in the series. Yet, it is a rarity in MS64 and finer grades. Population: 30 in 64 (3 in 64+), 5 finer (9/18). NGC ID# 25M6, PCGS# 7972

1856 Three Dollar, MS63
Shimmering Mint Luster

3222 **1856 MS63 PCGS.** The 1856 three dollar gold is one of many favorites in the series for type collectors. The issue is relatively scarce in high grade but it is plentiful enough overall to be available with frequency at the middle levels such as this. Sharp design elements complement shimmering tangerine-gold luster. Scattered light contact marks account for the grade but are not bothersome. Population: 37 in 63, 38 finer (9/18). NGC ID# 25M8, PCGS# 7974

1857 Three Dollar Gold, MS63
A Rarity Any Finer

3223 **1857 MS63 PCGS.** The Mint State availability of this issue declines in MS63, and the date is genuinely rare just one point finer. Offered here is a collector-grade Select example with exceptional eye appeal and original orange-gold luster. Scattered light marks account for the grade but none are individually bothersome. The bowknot shows the only noticeable strike weakness. Population: 27 in 63 (4 in 63+), 8 finer (9/18). NGC ID# 7K5G, PCGS# 7976

1879 Three Dollar Gold, MS64+
Well-Preserved and Lustrous

3224 **1879 MS64+ PCGS.** Only 3,000 business-strike three dollar gold pieces were struck at the Philadelphia Mint in 1879, after a substantial mintage the year before satisfied the needs of the national economy for several years. This Plus-graded Choice example offers sharply detailed design elements and well-preserved orange-gold surfaces with vibrant mint luster throughout. PCGS has graded 49 numerically finer examples (4/18). NGC ID# 25N2, PCGS# 8001

1885 Three Dollar Gold, MS64
Prooflike and Conditionally Scarce
Only 800 Pieces Minted

3225 **1885 MS64 NGC.** By the 1880s, three dollar gold pieces circulated little, and consistently tiny mintage figures reflected the limited demand. In 1885, only 800 coins were struck for commercial purposes, which would ultimately be the second-lowest mintage in the entire series. Contemporary collectors preserved many examples of this low-mintage issue, making it much more available today than its trivial mintage would suggest. Likely at least one-fourth of the mintage survives. Nonetheless, Choice Mint State examples are conditionally scarce, and finer examples are rare. This near-Gem displays deeply prooflike fields and sharp design elements. Greenish-gold and peach-orange hues adorn each side, and no bothersome abrasions are seen. Census: 16 in 64, 5 finer (10/18). NGC ID# 7KDP, PCGS# 8007

PROOF THREE DOLLAR GOLD PIECE

1882 Three Dollar Gold, PR67 Cameo
The Sole Finest Proof Certified
Remarkable Condition and Appeal

3226 **1882 PR67 Cameo NGC.** The mintage of proof three dollar gold pieces in 1882 was about midway between the ultra-low productions of just a few years before and the low three-figure mintages of later years. Only 76 pieces were struck, and 50 to 60 pieces are thought to survive. The combined NGC and PCGS certified population totals 79 coins, which is obvious inflated by resubmissions. This Superb Gem is the sole finest Cameo example certified, and it is a numeric grade above the finest non-Cameo and Ultra/Deep Cameo pieces known (9/18). We have never before offered an 1882 proof in this grade. In fact, we have previously handled only one PR66 coin, a non-Cameo in the FUN Signature (Heritage, 1/2001), lot 8166, which garnered a then-impressive $20,700. Recently, a PR64+ Cameo PCGS CAC coin in the Central States Signature (Heritage, 4/2018), realized more than $22,800. This piece is nearly three full grade points finer than that coin, and its eye appeal is comparably superior.

Close examination of the glimmering fields and sharp, frosty devices finds them virtually flawless. You can count on one hand the number of faint field lines that might prevent a finer grade, although they are just as easily die polish lines as they are hairlines. The surfaces are bright yellow-gold and contrast is stark on both sides. Eye appeal is off the charts. NGC ID# 28AR, PCGS# 88046

EARLY HALF EAGLES

1804 Half Eagle, CAC-Approved MS62
BD-5, Small Over Large 8
A Rare Die Variety

3227 **1804 Small Over Large 8, BD-5, High R.6, MS62 PCGS. CAC.** Bass-Dannreuther Die State a/k, as always. A bisecting die crack from the tip of the eagle's left (facing) wing through the shield to the E in AMERICA led to the retirement of this workhorse reverse die, which was employed for a total of six die marriages in 1803 and 1804. This dramatic Repunched Date obverse is seen here in the first of three uses, currently in a perfect die state.

BD-5 is a major rarity among 1804 half eagle varieties. Only 15 to 18 pieces are believed extant, one of which is housed in the Bass Core Collection. Harry W. Bass, Jr. at one point owned two examples of the variety, including the former Norweb coin. We last handled a BD-5 example in the FUN Signature (Heritage, 1/2013), lot 7085 — the coin was graded AU55 PCGS and garnered $11,750. This piece is Mint State and lustrous. Both sides are razor-sharp throughout the border stars, central devices, and the stars above the eagle's head. Yellow-gold surfaces yield scattered abrasions, including a couple of prominent marks in the obverse field below the TY in LIBERTY. CAC-endorsed and an appealing example of this rare die variety. PCGS# 519895 Base PCGS# 8086

1805 Heraldic Eagle Five Dollar, AU53
BD-1, Only 175-225 Pieces Believed Known

3228 **1805 BD-1, High R.3, AU53 NGC.** Bass-Dannreuther Die State a/a. Only 175-225 pieces are believed known in all grades of this die variety. This is an attractive wheat-gold representative of the scarce Heraldic Eagle type. The cap and profile show minor wear but substantial luster remains across minimally abraded surfaces. Light parallel roller marks on the upper reverse are as made.
Ex: Philadelphia Signature (Heritage, 8/2012), lot 4563, where it realized $9,987.50. NGC ID# 25P4, PCGS# 45615 Base PCGS# 8088

1805 Half Eagle, BD-1, MS63
Lustrous Mint State Type Coin
Conditionally Scarce

3229 **1805 BD-1, High R.3, MS63 PCGS Secure.** Bass-Dannreuther Die State a/a. BD-1 is the most plentiful 1805 half eagle variety, with as many as 225 pieces believed extant, according to John Dannreuther in *Early U.S. Gold Coin Varieties*. Although a common date among early gold issues, the 1805 half eagle is conditionally scarce in MS63 and rare finer. All varieties combined, we have previously handled a Select example of this date on only 16 occasions with a comparably small number of finer pieces. Much more often seen are AU-level coins, many of which are impaired.

The piece offered here displays softly frosted yellow-gold luster and an even strike. No adjustment marks are seen at the borders but a few do appear on the upper hair curls of the obverse portrait. Slight strike weakness occurs on the border stars and the eagle's left (facing) wing junction. The only grade-limiting surface imperfection is some light chatter in the obverse fields. A high-end type or date representative. Population (all varieties included): 39 in 63 (1 in 63+), 21 finer (9/18). NGC ID# 25P4, PCGS# 45615 Base PCGS# 8088

1805 BD-3 Five Dollar, AU Details
Partial Luster Remains

3230 **1805 BD-3, High R.5 — Damaged — NGC Details. AU.** Bass-Dannreuther Die State b/e. Fine die cracks can be seen occasionally around the obverse periphery, which likely develop in a later state into more serious breakage that results in this obverse being retired after just one die pairing. BD-3 is rare — only 35 to 45 pieces are believed extant. This AU-level coin is well-detailed and partially lustrous with pleasing greenish-gold surfaces. Remnants of adjustment marks are visible on the reverse shield. On the obverse, a loupe reveals faint "dimples" in the fields and on the portrait that resemble hammered sheet metal — the visual effect is a fine granular appearance to the unaided eye, but the greater effect is the denial of a numeric grade from NGC.

1807 BD-8 Half Eagle, VF20
First-Year Bust Left Type Coin

3231 **1807 Bust Left, BD-8, R.2, VF20 NGC.** Bass-Dannreuther Die State d/b. Clashed, as usual, although wear makes it somewhat difficult to detect. This first-year Bust Left half eagle shows the top of the 5 in the denomination pointing to the fletching. Deep yellow-gold color yields to reddish-violet accents on each side. The surfaces are lightly hairlined, and a small dig occurs on Liberty's chin. This mid-grade representative of the collectible BD-8 variety would make a wonderful type coin. Housed in a prior generation holder. NGC ID# CKLH, PCGS# 507607 Base PCGS# 8101

1807 Bust Left Half Eagle, MS64
BD-8, Sharp First-Year Type Coin

3232 **1807 Bust Left, BD-8, R.2, MS64 PCGS Secure.** Bass-Dannreuther Die State d/b, clashed as usual. BD-8 is a plentiful Bust Left variety, ideal for type collectors. However, high-grade Uncirculated examples are conditionally rare. This near-Gem displays frosty, luminous mint luster and bright yellow-gold coloration. Only a few light grazes are visible beneath a loupe, giving this piece outstanding eye appeal. The strike is razor-sharp.

We have seen only a handful of 1807 Bust Left fives so fine in recent years. In the FUN Signature (Heritage, 1/2018), lot 5024, an MS64+ PCGS coin realized $40,800. This example is almost every bit as well-preserved as that piece with equal luster and eye appeal. We look forward to placing it in a high-end early gold collection. Population (all varieties included): 24 in 64 (1 in 64+), 6 finer (9/18). NGC ID# CKLH, PCGS# 507607 Base PCGS# 8101

1810 Large Date Half Eagle, AU55
BD-4, Large 5 Reverse

3233 **1810 Large Date, Large 5, BD-4, R.2, AU55 PCGS Secure.** Bass-Dannreuther Die State a/a. A Choice About Uncirculated coin, ideal for type, with much luster still visible at the peripheries. The BD-4 variety features Large Date numerals and a Large 5 in the denomination. It is the most readily available variety not only among 1810 half eagles, but for all early half eagles regardless of date. This example is sharply struck, pleasing, and minimally abraded. A few light adjustment marks are visible at the lower obverse margin, but they do not affect the portrait. A thin pinscratch is noted adjacent to stars 1 to 3. Greenish-gold surfaces display orange accents at the reverse legend. NGC ID# BFXP, PCGS# 507598 Base PCGS# 8108

1813 BD-1 Half Eagle, AU55
Pleasing Capped Head Left Type Coin

3234 **1813 BD-1, R.2, AU55 NGC.** Bass-Dannreuther Die State b/b, both dies lightly clashed. BD-1 is the more plentiful of two 1813 half eagle die varieties and an ideal candidate for type purposes. Later dates in the Capped Head Left design type are major melt rarities seldom within the grasp of the average collector. Several hundred 1813 BD-1 coins survive across all grades. This Choice AU representative displays satiny luster and pleasing olive-gold patina. The strike is sharp and even, and wear is light. NGC ID# 25PM, PCGS# 519907 Base PCGS# 8116

1813 BD-1 Half Eagle, AU55
Lovely Olive and Red-Gold Color

3235 **1813 BD-1, R.2, AU55 NGC.** Bass-Dannreuther die state b/b, lightly clashed. The Capped Bust Left, Large Diameter half eagle was introduced in 1813 and would remain in production through 1829. According to John Dannreuther, "This type was more extensively hoarded *and* melted than the prior one ... ." BD-1 is distinguished by the the first S in STATES far right of the scroll edge. Deep olive and red-gold color is highly appealing. Light friction is seen, but the motifs retain strong detail, including nearly complete star radials. Partly lustrous with an expected number of small superficial marks. NGC ID# 25PM, PCGS# 519907 Base PCGS# 8116

LIBERTY HALF EAGLES

1843-D Medium D Five Dollar, MS61
Mint State Rarity

3236 **1843-D Medium D MS61 PCGS. Variety 10-G.** The yellow-gold surfaces of this rare Mint State specimen display luster in the recessed areas and exhibit well-struck devices, including the feathers on the eagle's legs, elements that are often weak (Winter, 2013). Distributed marks are consistent with the grade, but these are fewer and less severe than the very heavy, deep abrasions seen on the majority of survivors. The mintage of 98,452 pieces seems plentiful, but Uncirculated pieces are rare and nearly always confined to MS63 and below. Population: 6 in 61, 8 finer (9/18). NGC ID# 25T4, PCGS# 8215

1860-D Half Eagle, MS61
Reflective Fields

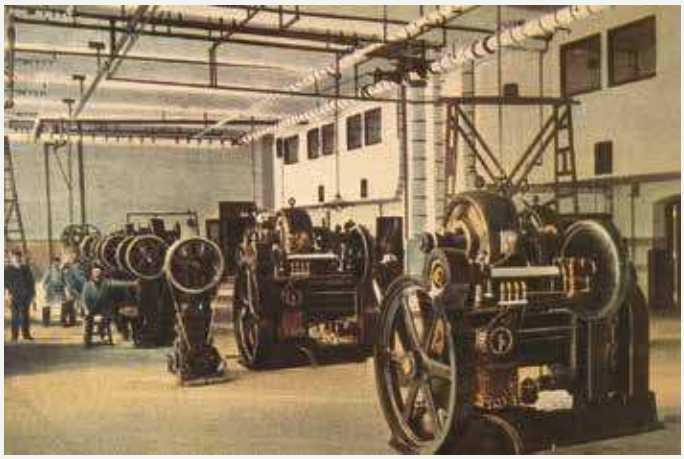

3237 **1860-D Medium D MS61 PCGS Secure. Variety 46-GG.** All Mint State 1860-D half eagles certified by PCGS are of this Medium D variety, and these pieces are conditionally rare. Doug Winter estimates that fewer than 275 examples of this issue survive in all grades, with as few as a dozen pieces being in true Uncirculated condition. Some duplication is likely represented in the certified population figures. The present coin displays sharp obverse stars and hair curls and is undeniably Mint State. Strike weakness on the eagle's neck is not bothersome. The bright straw-gold surfaces are lightly marked but lack severe abrasions. An appealing Mint State Dahlonega half eagle. Population: 12 in 61, 16 finer (9/18). NGC ID# 25VH, PCGS# 8286

1903 Five Dollar, MS66
High-End Condition Rarity

3238 **1903 MS66 PCGS.** Like most 20th century Liberty Head issues, the 1903 five is a plentiful type coin issue in most grades. However, it is conditionally rare in MS66 and almost uncollectible finer. This Premium Gem is sharp and frosty with vibrant peach-gold luster that shimmers beneath a light. The surface preservation is nearly flawless. Population: 15 in 66, 1 finer (9/18). NGC ID# 25Z2, PCGS# 8407

INDIAN HALF EAGLES

1908-S Indian Head Five, MS65
Beautiful Luster, Rare CAC Endorsement

3239 **1908-S MS65 PCGS Secure. CAC.** The San Francisco Mint struck no half eagles in 1907, and in 1908, only 82,000 pieces were produced. Moreover, all of the 1908 coinage was of the new Indian Head type, designed by Bela Lyon Pratt. Pratt's design replaced the long-running Liberty Head motif that had been in use since 1839. Redesigning the United States' gold coinage in the early 20th century was a project originally awarded to Augustus Saint-Gaudens, whose artistry was employed for the eagle and double eagle. However, after Saint-Gaudens died in 1907, other sculptors were employed to continue the overall of America's coinage designs.

Pratt's half eagle series is one of the most popular gold series collected by date and mintmark. The 1908-S, because of its low mintage, is a semikey date in Uncirculated condition, and it is genuinely scarce in MS65. Finer pieces are rarely offered. This CAC-endorsed Gem offers beautifully preserved, shimmering mint luster and original orange-gold coloration. The strike is sharp and no distracting abrasions are seen. Population: 52 in 65 (1 in 65+), 20 finer. CAC: 15 in 65, 2 finer (9/18). NGC ID# 65K3, PCGS# 8512

1915-S Half Eagle, MS62
Challenging San Francisco Issue

3240 **1915-S MS62 PCGS Secure.** Gleaming orange-gold color dominates both sides, and occasional accents of silver-lilac add greatly to the eye appeal of this sharp and attractive Mint State 1915-S. The mintage was low at the outset — just 164,000 pieces — and frequent bagmarks plus an indifferent peripheral strike haunt most examples of the issue. This coin is considerably above average in those categories. Marks are limited to a few microscopic field lines and tiny ticks. As usual, the mintmark is indistinct but recognizable. PCGS reports just 59 numerically finer coins (10/18). NGC ID# 25ZR, PCGS# 8531

1929 Five Dollar Indian, MS63
Singular Rarity in the Series

3241 **1929 MS63 PCGS Secure.** The final-year 1929 half eagle is the most significant rarity in the series, although its mintage of 662,000 coins would never lead one to suspect that was the case. The issue's lack of availability stems directly from the economic context in which it was produced. By October 1929, the American economy was in freefall — a position it would remain in through the early to mid-1930s. The five dollar gold coin was not needed in circulation, and few 1929 half eagles were distributed to banks. Instead, the majority sat in Treasury vaults and were melted after 1933.

This Select Uncirculated example is well-struck throughout — a trait often lacking among survivors. Mint luster is softly frosted and radiates over the warm yellow-gold surfaces. Small ticks and grazes appear on each side, but the only marks of note occur below the ED in UNITED. NGC ID# 28E2, PCGS# 8533

EARLY EAGLE

1799 Large Obverse Stars Eagle, XF40
BD-10, CAC-Approved and Colorful

3242 **1799 Large Obverse Stars, BD-10, R.3, XF40 PCGS Secure. CAC.** Bass-Dannreuther Die State a/a. BD-10 is the final die marriage that employs a 1799-dated obverse. It is also one of the two most plentiful varieties for the year and the most available Large Stars marriage. All of these factors make BD-10 a popular choice for date and type collectors. This CAC-endorsed XF representative is highly appealing and one of the most colorful examples of the variety that we have ever handled. Deep violet and copper-orange patina encompasses each side, complementing sharply detailed design elements that exhibit only slight high-point wear. An exceptional type coin and the only 1799 eagle in this grade approved by CAC (9/18). NGC ID# 2625, PCGS# 45723 Base PCGS# 8562

LIBERTY EAGLES

1841 Ten Dollar, AU58
Elusive Early Liberty Head Type Coin

3243 **1841 AU58 PCGS.** Although scarce in AU58 and better grades, the 1841 ten dollar is nonetheless one of the more readily obtainable Philadelphia issues from the 1840s. This near-Mint example shows a bold strike with remnants of luster in the protected regions of the fields. Bright yellow-gold surfaces are uniformly abraded, as expected for the issue and grade. Population: 11 in 58 (1 in 58+), 8 finer (9/18). NGC ID# 262H, PCGS# 8582

1844-O Eagle, AU58
Largely Lustrous, Rare Any Finer

3244 **1844-O AU58 PCGS Secure. Variety 5.** Partial mint luster radiates from both sides of this yellow-gold, lightly abraded eagle, while a sharp strike is seen on both sides. A substantial mintage of 118,700 pieces translates to availability only through VF and XF grades. In About Uncirculated condition, the 1844-O becomes notably elusive and it is rare in Mint State. Five die pairs are known for the issue. This variety shows recutting on the inner left curve of the mintmark and faint die cracks that are visible above stars 3 through 7. Population: 10 in 58, 6 finer (9/18). NGC ID# 554G, PCGS# 8591

1855 Eagle, Lustrous MS61
Popular Slanted 5s

3245 **1855 MS61 NGC.** The Slanted 5s are always popular with collectors, and this was the final year they were employed by the Mint. Detail softens slightly toward the lower obverse and upper reverse, but the majority of this lustrous MS61 ten dollar gold piece is strongly rendered. Each side presents a number of small abrasions. An attractive honey-gold representative. Census: 30 in 61 (2 in 61+), 7 finer (10/18). NGC ID# 263L, PCGS# 8616

1871-S Eagle, AU53
Scarce in All Grades

3246 **1871-S AU53 NGC.** A scarce date in any grade with Bowers and Winter estimating 110 to 130 coins extant from a mintage of 16,500 pieces. This AU53 1871-S eagle is perfect for any enthusiastic specialist taking on this challenging series. Detail is good, the protected areas retaining glints of original luster. Light yellow-gold surfaces are abraded, but no more so than usual for the issue, which circulated extensively out West. Census: 7 in 53, 13 finer (10/18). NGC ID# 264Y, PCGS# 8662

1872-S Ten Dollar, Lustrous AU58
A Rarity This Fine

3247 **1872-S AU58 PCGS Secure.** Only 17,300 Liberty eagles were struck at San Francisco in 1872, almost all of which circulated extensively. High-end AU survivors are rare, and Mint State coins are virtually uncollectible. This near-Mint example displays sharp detail and retains partial luster in the fields. The original golden surfaces are luminous and appealing, showing only light field chatter instead of unsightly abrasions. Population: 5 in 58, 1 finer (9/18). NGC ID# 2653, PCGS# 8665

1874-S Eagle, AU58
Among the Finest Certified
Unknown in Mint State

3248 **1874-S AU58 PCGS Secure.** Unknown in full Mint State, this near-Mint 1874-S ranks among the finest known of this conditionally rare S-mint issue. Just 10,000 pieces were struck, and apparently the entire mintage was placed into circulation. Even the finest eagle collections almost always lack an 1874-S of this quality.

Mint luster remains among the stars and surrounds the date, while the reverse is even more lustrous and retains frosty eye appeal. A scant smidgeon of wear and a scattering of light marks confirms a brief stay in circulation. We last offered an example of this quality more than four years ago, and it may be many years before we offer another. Population: 4 in 58, 0 finer (9/18). NGC ID# 2659, PCGS# 8671

1877 Ten Dollar, MS60
Only Three Mint State Survivors
Blatantly Prooflike, Ultra-Low Mintage

3249 **1877 MS60 PCGS Secure.** The Philadelphia Mint continued a trend in 1877 that began in 1875: the output of only a few hundred ten dollar gold coins per year. Specifically, that total amounted to 797 circulation strikes in 1877. This issue is nearly as rare as the 1876, while the 1875 is still the hands-down key. PCGS pegs the estimated survivorship of the 1877 at only 50 to 65 coins, almost all of which are in circulated grades. In his *Analysis of Auction Records* (1980), David Akers called the 1877 "one of the rarest, lowest mintage dates in the entire series," and noted that he had only ever seen one piece that qualified as Uncirculated: "[It] is by far the finest I have seen or heard of." In their gold *Encyclopedia* (2008), Garrett and Guth accentuate the rarity of this issue in Uncirculated condition: "There's a brick wall separating the circulated pieces from their Mint State counterparts."

Today, just three 1877 eagles have been certified Mint State, including this MS60 coin and a pair of MS61s — all PCGS-certified. This piece is the CoinFacts plate coin. One of the MS61 pieces last appeared at auction more than a decade ago (Goldbergs, 2/2007), when it realized $42,550. The other MS61 coin last appeared at auction more than three years ago (Stack's, 3/2015), when it realized $64,625. Simply put: an Uncirculated 1877 Liberty ten is an incredible difficult issue to acquire.

This coin is fully prooflike and displays a razor-sharp strike. Deep orange-gold and tangerine color adorns each side, save for on the obverse portrait where rose-gold patina prevails. Scattered marks in the fields define the MS60 grade, but they are surprisingly unobtrusive. A case could be made for this to be the most eye-appealing 1877 Liberty ten known in Mint State. Population: 1 in 60, 2 finer (9/18). NGC ID# 265F, PCGS# 8677

1881-CC Ten Dollar, Lustrous MS61
A Rarity in Uncirculated Condition

3250 **1881-CC MS61 PCGS.** Annual gold eagle coinages at Carson City were little more than token quantities until 1891. In fact, the mintage of the 1881-CC — 24,015 coins — was the highest pre-1891 production total of this denomination from the Nevada branch mint. This issue is popular with collectors but it is also scarce in Mint State. Rarely are pieces offered finer than the present. Frosty yellow-gold luster cartwheels around the obverse, illuminating sharp design elements. The reverse is also sharp but shows deeper orange-gold color with a cyan area to the right of the eagle's head, where the remnant of a mint-made grease streak is visible. Population: 23 in 61, 10 finer (9/18). NGC ID# 265X, PCGS# 8692

1885-S Eagle, MS64
Tied for the Finest Certified

3251 **1885-S MS64 PCGS Secure.** Despite a respectable mintage of 228,000 coins, the 1885-S is an important condition rarity as only nine examples are certified as MS64 by PCGS and NGC, and none have earned a finer grade (9/18). This Choice Mint State piece has brilliant wheat-gold luster with wisps of yellow near the borders. Both sides exhibit minimal, grade-consistent marks. Population: 7 in 64, 0 finer (9/18). NGC ID# 554W, PCGS# 8707

1886-S Ten Dollar, MS64+
High-End Condition Rarity

3252 **1886-S MS64+ PCGS. CAC.** A mintage of 826,000 coins helps explain the availability of the 1886-S eagle in most grades, but examples become conditionally rare at the Choice grade level. Faint rose accents and thickly frosted mint luster appear over medium yellow-gold surfaces on this piece. The devices display full definition. Minimal abrasions for the grade, as suggested by the Plus designation and CAC approval sticker. Population: 47 in 64 (8 in 64+), 4 finer. CAC: 8 in 64, 2 finer (9/18). NGC ID# 554Y, PCGS# 8709

1906 Ten Dollar, Frosty MS66
Condition Census Rarity

3253 **1906 MS66 PCGS Secure.** The 1906 Liberty eagle is a major rarity in Premium Gem condition and nearly uncollectible finer. The last time an MS66 coin appeared at public auction was in the Central States Signature (Heritage, 4-5/2010), lot 2291, where a PCGS coin realized $21,850. A finer example of this issue has not made an auction appearance in more than a decade. We are pleased to offer this piece, a sharp, shimmering type coin with remarkably clean, frosty surfaces. Eye appeal is outstanding. Original yellow-gold luster produces hints of greenish and rose color at certain angles. Certainly a Condition Census coin and one of the finest pieces we have seen. Population: 2 in 66, 3 finer (9/18). NGC ID# 7JHG, PCGS# 8759

1906-O Eagle, Conditionally Rare MS64
Remarkably Clean, Satiny Surfaces

3254 **1906-O MS64 PCGS. Variety 1.** The only known variety. This is the final eagle produced at the New Orleans Mint. Mint State coins are scarce through MS63 and rare any finer. The olive-gold surfaces of this near-Gem specimen display pleasing luster and sharply struck design features. Occasional stray marks are far fewer and less severe than what might be expected for the garde designation. Great overall eye appeal. Population: 23 in 64 (3 in 64+), 5 finer (9/18).
Ex: Long Beach Signature (Heritage, 6/2014), lot 4872, where it brought $8,225. NGC ID# 53FB, PCGS# 8761

PROOF LIBERTY EAGLE

1902 Ten Dollar, PR64
Only 113 Pieces Struck
Reflective, Textured Fields

3255 **1902 PR64 PCGS.** The 1902 eagle is a challenging issue in any format with only 82,500 circulation strikes and 113 proofs. Naturally, the latter are much more difficult to find in the absolute sense. PCGS CoinFacts estimates only 45 to 60 specimens survive, with PR64 being the most frequently awarded grade at that service, although the total is almost certainly inflated by resubmissions. Additionally, only one submission at PCGS has been awarded a Cameo designation. These coins were struck in the first year that the Mint switched to an all-brilliant finish for proof production.

Each side of this piece displays the deeply reflective mirrors and razor-sharp detail one would expect to see. There are tiny contact marks interspersed across the profound orange-gold surfaces. Die polish lines are as-made. A beautiful example with finely textured fields. Population: 21 in 64 (1 in 64+), 7 finer (9/18). NGC ID# 28G9, PCGS# 8842

INDIAN EAGLES

1907 No Motto Eagle, MS64
Spectacular Example for the Grade

3256 **1907 No Motto MS64 NGC. CAC.** A spectacular example of the inaugural circulation-strike Saint-Gaudens Indian Head eagle. Orange-gold surfaces are exceptionally unabraded for the Choice assessment, explaining the CAC approval sticker. Boldly defined with shimmering mint frost throughout. Worthy of a premium bid. Encapsulated in a former generation holder. NGC ID# 28GF, PCGS# 8852

1908 Indian Eagle, MS64
Low-Mintage No Motto Issue

3257 **1908 No Motto MS64 PCGS Secure.** The few near-Gem eagles that exist from the short-lived No Motto design attract both type collectors and Indian gold specialists alike. The issue's 33,500-piece mintage is less than 10% of its With Motto counterpart, accounting for its overall scarcity, and among No Motto tens it is much scarcer than the 1907 issue. This example is nearly free of marks in its open fields, and shows just a minor abrasion at the upper cheekbone. The strike is consistently sharp throughout the coin, and soft mint luster glows from appealing khaki-gold surfaces. Population: 79 in 64 (2 in 64+), 43 finer (9/18). NGC ID# 28GG, PCGS# 8853

1908-S Ten Dollar Indian, MS62
Low Mintage, Conditionally Scarce Issue

3258 **1908-S MS62 PCGS Secure.** The San Francisco Mint hit the ground running when it struck the 1908-S tens, its first attempt at the newly introduced Indian Head design. The mintage was small — just 59,850 pieces — but extremely well-produced. In particular, the obverse is well-struck on nearly all examples. Some weakness of the eagle's feathers prevents full details throughout both sides. This attractive, yellow-gold representative shows a few tiny marks on the finely granular surfaces. Vibrant cartwheel luster adds immeasurably to the eye appeal. NGC ID# 28GL, PCGS# 8861

1910-D Eagle, MS65
Satiny Red-Gold Surfaces

3259 **1910-D MS65 PCGS.** This ranks among the most plentiful issues in the Indian Head eagle series, with examples being collectible though MS65 condition. Only in MS66 does the 1910-D become scarce. Reddish-gold surfaces are satiny and strongly defined. A cluster of tiny marks between the M in UNUM and the final A in AMERICA likely prevents an even higher grade. This is a lovely example to represent the popular Saint-Gaudens design. NGC ID# 28GS, PCGS# 8866

1911-D Eagle, MS61
Lowest Series Mintage

3260 **1911-D MS61 NGC.** The Denver Mint coined all four denominations of gold coins in 1911, but only the double eagle was minted in substantial numbers. The eagle had a production of 30,100 coins, the lowest mintage of the Indian With Motto series. They produced 72,500 half eagles and 55,680 quarter eagles. This pleasing Mint State piece has scattered surface marks as the grade suggests, yet retains full mint brilliance. NGC ID# 28GU, PCGS# 8869

1913-S Ten Dollar, MS61
Much Better San Francisco Issue

3261 **1913-S MS61 NGC.** The low mintage of 66,000 coins makes the 1913-S one of the semikeys to the Indian eagle series. Mint State examples of this issue are universally elusive, and it is especially difficult to find a lower-end example with pleasing visual appeal. This MS61 coin is an exception. Scattered light marks limit the grade, but original wheat-gold luster and an absence of severe abrasions place it beyond its peers in terms of aesthetics. Census: 74 in 61, 49 finer (10/18). NGC ID# 28GZ, PCGS# 8874

1914 Ten Dollar, Vibrant MS66
A Registry-Grade Condition Rarity

3262 **1914 MS66 PCGS. CAC.** The 1914 Indian eagle is usually available in grades through MS64, but Gems are scarce. This Premium Gem is a major condition rarity, and it is among the finest pieces endorsed by CAC. We have previously handled an MS66 or finer example of this date on only 14 occasions. The most recent was an MS66 PCGS CAC coin in lot 4174 of the ANA Signature (Heritage, 8/2017), which realized more than $34,000. This piece is easily that coin's equal. Vibrant cartwheel luster reveals tinges of orange and peach as it illuminates yellow-gold surfaces, and no distracting abrasions are seen. The obverse border stars are slightly weak, but no other strike softness is noted. Population: 12 in 66 (5 in 66+), 3 finer. CAC: 10 in 66, 0 finer (9/18). NGC ID# 28H2, PCGS# 8875

1914-D Eagle, MS64+
Final Denver Mint Issue

3263 **1914-D MS64+ PCGS. CAC.** The Denver Mint coined their first 10 dollar gold eagles in 1906, and continued production of the denomination with examples coined each year through 1911, and again in 1914. None of those coins are rare, so a complete set of the eight issues, including both types of 1908, is an obtainable collecting goal. This impressive near-Gem is virtually flawless, showing only scattered marks and trivial copper toning spots. PCGS has only certified 49 finer examples of this issue (10/18). NGC ID# 28H3, PCGS# 8876

1915-S Ten Dollar, MS62
Radiantly Lustrous

3264 **1915-S MS62 PCGS.** The 1915-S ten is a better date in the Indian Head eagle series, coming from a mintage of only 59,000 pieces. Uncirculated coins are elusive in all grades. This MS62 representative displays vibrant straw-gold luster and well-struck design elements. Grade-limiting abrasions are light and unobtrusive. Eye appeal exceeds expectations for the MS62 level. Higher-grade coins are decidedly scarce. NGC ID# 28H6, PCGS# 8879

1916-S Ten Dollar, MS64
Scarce in This Grade, Rare Finer

3265 **1916-S MS64 PCGS Secure.** The San Francisco Mint was the only producer of Indian eagles in 1916, and coinage amounted to just 138,500 pieces. Low-grade Uncirculated examples of this issue appear at auction with regularity. Less often seen are coins that qualify for the MS64 designation, and Gems are decidedly rare. This Choice coin displays vibrant yellow-gold luster and a sharp strike. Scattered light marks on each side limit the grade, but to the unaided eye, the surfaces appear almost finer than the MS64 level. Eye appeal is outstanding on this better-date S-mint Indian eagle. Population: 50 in 64 (7 in 64+), 23 finer (9/18). NGC ID# 28H7, PCGS# 8880

LIBERTY DOUBLE EAGLES

1851-O Double Eagle, MS62
Gold Rush Composition

3266 **1851-O MS62 NGC. Variety 1.** Several minor die varieties exist for the 1851 New Orleans double eagles. This example, which ranks in the Condition Census for the issue, has myriad tiny rust lumps on Liberty's bust, especially on the neck and around the eye. A late die state, the obverse exhibits a fine die crack through star 7 to the coronet, tops of LIB, Liberty's hair, and the right field to star 12. A faint die polishing line is noted over the date. The reverse has a microscopic die crack through the denomination, with many die polishing lines.

This is the most plentiful double eagle issued at the New Orleans Mint, with a coinage of 315,000 pieces. That is nearly double the next highest mintage New Orleans double eagle. The original gold deposit records for the Louisiana Mint are preserved at the National Archives branch in Fort Worth, Texas, and show that more than 90% of the deposits from 1850 to 1853 consisted of California Gold Rush-mined gold.

This impressive piece ranks high on the list of surviving examples. NGC and PCGS have each certified a single MS63 submission, followed by six and eight MS62 examples, respectively (10/18). The surfaces are brilliant lemon-yellow with sharp details, bright mint luster, and partially reflective fields. A single mark on Liberty's cheek prevents a higher grade. The MS63 PCGS example that Goldberg Auctions sold in June 2016 is from the same reverse die as this piece. Raised die lines within the constellation that we first thought were planchet rifts appear on the reverse of that coin as well, proving they are die defects. This coin is stunning and destined for a top-quality collection of Liberty double eagles. The present offering is equal to the finest 1851-O double eagles we have offered in any of our auctions, and it is the third appearance of this piece in one of our Signature sales. NGC ID# 268J, PCGS# 8905

1852 Twenty Dollar, MS61
Lustrous and Attractive for the Grade

3267 **1852 MS61 PCGS Secure.** Regardless of the year, early Type One twenties from the Philadelphia Mint are scarce. The 1852 is a bit more obtainable than other issues, some of which are shipwreck recoveries from an original mintage of more than 2 million pieces. The provenance of the present example is unknown. Lustrous, rich-gold color radiates from both sides, with scattered light abrasions concentrated on the obverse of this sharply struck double eagle. The eye appeal is well above average. Population: 53 in 61, 54 finer (9/18). NGC ID# 268K, PCGS# 8906

1852-O Double Eagle, XF45
Deep Reddish-Gold Color

3268 **1852-O XF45 NGC. Variety 1.** This is one of the few collectible New Orleans double eagles, with 190,000 coins struck. Coloration is an attractive deep reddish-gold hue, and the faintest traces of luster remain. The motifs exhibit bold definition for the most part, although the high points display obvious merging. Scattered abrasions are also in-line with the grade, yet none are serious. NGC ID# 268L, PCGS# 8907

1853/'2' Double Eagle, Lustrous AU55
In-Demand *Guide Book* Variety

3269 **1853/2 AU55 NGC.** While the exact nature of the so-called 1853/'2' date anomaly continues to prompt debate, it remains a popular *Guide Book* listing. This moderately abraded example shows many nicks and abrasions plus a few reeding marks, yet it retains nearly full mint luster throughout the bright, yellow-gold surfaces. A curved die line or remnant of a digit is visible within the lower loop of 3 to confirm the *Cherrypickers'* variety. NGC ID# 268M, PCGS# 8909

1857-S Double Eagle, MS63
S.S. Central America
Variety 20E, 'Broken A'

3270 **1857-S MS63 PCGS. Variety 20E.** Ex: *S.S. Central America*, SSCA 0186. The "Broken A" variety, a reference to the hub defect on the crossbar of the A in STATES, which was corrected at the Mint on many working dies but not on Variety 20E. A lovely butter-gold example with vibrant luster and a sharp strike. Housed in a gold label holder. A *Ship of Gold* book with a navy-blue cover accompanies the lot.
Ex: Central States Signature (Heritage, 4/2015), lot 6406, which realized $7,637.50. NGC ID# 2696, PCGS# 8922

1857-S Double Eagle, MS64
Ex: *S.S. Central America*

3271 **1857-S MS64 PCGS. Variety 20A.** Ex: *S.S. Central America*, SSCA 1519. Spiked Shield. More than 5,000 1857-S double eagles were recovered from the *Central America* shipwreck. Survivors typically have luminous, frosty surfaces with rich orange-gold coloration, and this piece fulfills that reputation. Sharp design elements and well-preserved surfaces offer strong eye appeal. There are two distinct schools of thought regarding the visual appeal of *Central America* coins. Many collectors consider these pieces to be remarkably well-preserved with dazzling luster and eye appeal — a true prize for type purposes. However, others prefer the old-time look of AU-level coins from more traditional sources, which typically have a yellowish olive-gold hue and frosty fields. Among coins from the *S.S. Central America*, this piece is visually exceptional.
From The Marcello Collection, Part II. NGC ID# 2696, PCGS# 8922

1859-O Double Eagle, AU55
Partly Lustrous New Orleans Rarity

3272 **1859-O AU55 PCGS. Variety 2.** At the close of the fiscal year ended June 30, 1859, the New Orleans Mint had received just more than $517,000 in gold deposits. Since the opening of the San Francisco Mint in 1854, gold deposits at New Orleans never returned to their Gold Rush-era levels. In fact, most of the domestic gold bullion deposited for coinage at the U.S. Mint and its branches was received in San Francisco and the New York Assay Office, with large quantities also taken in at Philadelphia. The Dahlonega, Charlotte, and New Orleans branch mints received only token quantities of new gold bullion. The bulk of the gold deposited at New Orleans during the fiscal year 1859 was in the form of foreign coin and imported foreign bullion. New Orleans took in more deposits of foreign gold coinage than all of the other mints and assay offices combined.

Gold coinage at New Orleans was also small in 1859. For the calendar year, only 9,100 double eagles were produced, along with 2,300 eagles. No half eagles, quarter eagles, three dollar pieces, or gold dollars were struck. Both the eagles and double eagles circulated extensively and are scarce today. In total, fewer than 100 1859-O twenties are believed to survive, complemented by less than 75 tens.

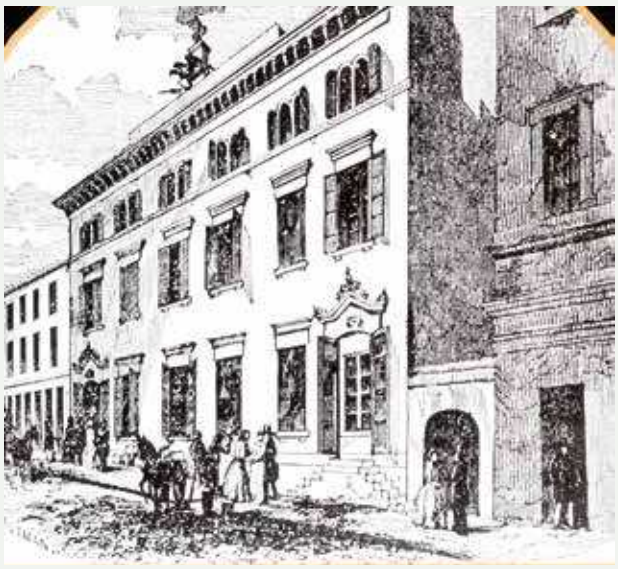

Most surviving '59-O double eagles are heavily abraded and/or well-worn. A handful of Mint State coins grade no finer than MS61. This Choice About Uncirculated coin represents some of the finest quality available to collectors for this issue. The surfaces are remarkably smooth and original luster clings to the protected portions of the fields. Wear is light and detail is sharp. Rich orange-gold and straw-yellow hues adorn each side. We look forward to placing this remarkable Southern gold rarity into an advanced double eagle or New Orleans gold collection. Population: 6 in 55, 6 finer (9/18).

From The Marcello Collection, Part II. NGC ID# 269B, PCGS# 8927

1859-S Twenty Dollar, MS60
Seldom Available in Uncirculated Condition

3273 **1859-S MS60 PCGS Secure.** This 1859-S is considerably less abraded than most lower-end Mint State examples. Satiny-rich, bright yellow-gold mint luster provides substantial eye appeal. The devices are sharply struck throughout. The mintage of 636,445 pieces might indicate otherwise, but few high-grade examples of this issue were set aside at the time of issue. Population: 9 in 60, 42 finer (9/18). NGC ID# 269C, PCGS# 8928

Sketch of the first San Francisco Mint

1860-S Double Eagle, MS61
A Rarity in Uncirculated Condition

3274 **1860-S MS61 PCGS Secure.** Original orange-gold and peach luster illuminates frosty surfaces on this Mint State 1860-S double eagle. The design elements are well-struck and there is no evidence of die lapping in the recesses of the devices. Scattered light abrasions limit the grade but none are individually bothersome. The 1860-S double eagle is plentiful in circulated grades, but it becomes a great rarity in Mint State. Moreover, there are only a couple of coins known finer than MS62, and no Gems are believed to survive. In their gold coin *Encyclopedia,* Garrett and Guth write: "The 1860-S double eagle was struck in ample quantity and was a workhorse of commerce. Most of the coins struck saw heavy circulation. ... Only about two dozen Uncirculated coins are known, including examples found on the wrecks of the *S.S. Brother Jonathan* and *S.S. Republic*." Population: 17 in 61, 12 finer (9/18). NGC ID# 269F, PCGS# 8931

1861 Double Eagle, MS61
Attractively Smooth Surfaces

3275 **1861 MS61 PCGS.** The 1861 is a plentiful Type One double eagle, but Mint State pieces are in high demand. This MS61 coin is remarkably clean for the grade, showing no bothersome abrasions. Only light contact on Liberty's cheek limit the grade. Frosty orange-gold luster cartwheels freely around each side, illuminating well-struck design elements. Eye appeal exceeds all expectations for the grade. NGC ID# 269G, PCGS# 8932

1861-S Twenty, AU58
Lustrous, Original Surfaces

3276 **1861-S AU58 PCGS.** San Francisco double eagle coinage in 1861 was less than one-sixth the production of Philadelphia. The Philadelphia issue is available in many grades and a popular type coin, while the 1861-S is elusive in the upper AU grade levels and it is rare in mint condition. This nearly Uncirculated coin displays partially lustrous fields and original peach-gold coloration. Surface chatter accompanies trivial high-point wear. NGC ID# 269K, PCGS# 8935

1863-S Double Eagle, MS61
Crisp Impression, Few Serious Marks

3277 **1863-S MS61 PCGS.** Medium S. The fields are impressively unabraded for an MS61. The sole distracting marks appear under Liberty's eye. Frosty mint luster glows from the protected areas and is only slightly subdued in the open fields. The star centers and radials are complete, and Liberty's curls and the eagle's feathers display a crisp impression. Light yellow-gold color dominates, with speckled reddish accents on the obverse. NGC ID# 269R, PCGS# 8940

1865 Double Eagle, MS63
S.S. Republic Recovery
Terrific Eye Appeal

3278 **1865 MS63 NGC.** Ex: *S.S. Republic*. Like the 1857-S double eagle, shipwreck recoveries have vastly increased the availability of the 1865 twenty dollar gold piece, which was virtually uncollectible in Mint State grades only two decades ago. This Select example has the terrific eye appeal often found among coins derived from the *S.S. Republic*, which sank in a hurricane off the coast of Georgia in October 1865. Each side displays light yellow-gold surfaces with a rich, frosty texture. The design is fully rendered, including the stars on each side, the hair curls, and the eagle's feathers. There are shallow grazes in the obverse fields and a few small bagmarks on that side, while the reverse is phenomenally clean for the assigned grade. NGC ID# 269U, PCGS# 8943

1866 With Motto Double Eagle, AU58
Lustrous Collector-Grade Coin

3279 **1866 Motto AU58 PCGS Secure.** All double eagles struck at the Philadelphia Mint in 1866 feature the motto IN GOD WE TRUST on the reverse. Nearly 700,000 pieces were produced, but few survive in Mint State. This near-Mint coin is in a collector-favorite grade for Type One and Type Two Liberty twenties. Luster illuminates the fields, and the design elements exhibit only trivial high-point friction. Scattered abrasions accompany the grade. This piece is attractive with rich honey-gold color. NGC ID# 269X, PCGS# 8949

1866 With Motto Twenty, AU58
Rare CAC-Approved Example

3280 **1866 Motto AU58 PCGS Secure. CAC.** There is a hint of reflectivity in the fields on this near-Mint example, although cartwheel luster is the dominant feature. The bright yellow-gold surfaces exhibit expected abrasions but they are light and scattered. This is a sharp coin with only slight high-point friction. The 1866 Motto double eagle is scarce in Mint State. High-end AU coins are occasionally available, but it is rare to find one with a CAC endorsement, as is seen here. CAC: 24 in 58, 17 finer (9/18). NGC ID# 269X, PCGS# 8949

1866-S With Motto Twenty, AU58
Few Finer Pieces Are Known

3281 **1866-S Motto AU58 PCGS Secure.** The 1866-S With Motto double eagle is popular as the first Type Two issue from the San Francisco Mint, but it is also a recognized condition rarity. Uncirculated examples are rarely offered at auction, and some are impaired with cleaning or other surface problems. No Mint State pieces are known finer than MS62. In their gold coin *Encyclopedia*, Garrett and Guth write: "There are probably only about two dozen examples known that qualify as Uncirculated." Such a small survival estimate is likely accurate. In our experience, Mint State examples of the 1866-S With Motto twenty do not appear at auction nearly often enough to support the 58-coin population reported by PCGS and NGC. Since most of the Mint State coins reported by the grading services are MS61s, it is our belief that a significant number of those coins are duplicate submissions.

This near-Mint example comes into the equation as a more affordable alternative to a rare Mint State piece but with much of its luster still intact. Barely a trace of high-point friction is apparent, and no distracting abrasions occur on either side. In the upper AU grade level, this piece has its own degree of scarcity, which is reflected in the small population of AU58 coins at PCGS. Population: 38 in 58, 29 finer (9/18). NGC ID# 26B2, PCGS# 8950

1867 Liberty Head Twenty, MS60
Uncirculated Type Two Representative

3282 **1867 MS60 NGC.** Double eagle coinage at the Philadelphia Mint in 1867 fell below that of the previous two years, totaling little more than 251,000 coins. This issue is among the many conditionally scarce dates that give Type Two double eagles a reputation for scarcity in Uncirculated grades. Scattered abrasions on this coin limit the grade to MS60, but they are light and unobtrusive. Shimmering, frosty mint luster engulfs each side in rich yellow-gold color, and the design elements are well-defined with no evidence of wear. NGC ID# 269Z, PCGS# 8951

1868-S Type Two Twenty, MS60
Always Elusive in Mint State

3283 **1868-S MS60 PCGS Secure.** This eye-catching, Uncirculated 1868-S displays deeply frosted, sharply struck surfaces, with the eye appeal of an even finer grade. Cartwheel mint luster radiates across both sides. Surprisingly few Mint State examples exist given the generous mintage of 837,500 coins, and most of those are European repatriates with numerous bagmarks. While small marks are scattered throughout the obverse of this coin, they are fewer and less severe than normally seen. Currently, only one example exceeds the MS62 grade at either service, adding to the desirability of this attractive, orange-gold MS60 coin. PCGS Population: 16 in 60, 30 finer (9/18). NGC ID# 26A4, PCGS# 8954

1870 Liberty Twenty, AU58
Scarce Date in All Grades

3284 **1870 AU58 PCGS Secure.** From a mintage of 155,150 pieces, the 1870 Type Two Liberty double eagle is a scarce date in all grades today. This brightly lustrous near-Mint example displays just a touch of high-point wear on the well-detailed design elements, with lightly abraded greenish-gold surfaces.
Ex: ANA Signature (Heritage, 10/2012), lot 6209, where it brought $8,225. NGC ID# 26A7, PCGS# 8957

1870 AU58 Double Eagle
A Highly Lustrous Example

3285 **1870 AU58 NGC.** This brilliant and highly lustrous near-Mint example would be right at home amongst a collection of Mint State double eagles. While the surfaces show typical grade-consistent handling marks, the overall eye appeal trumps those marks on this lovely double eagle. Less than 100 finer examples appear in the combined NGC and PCGS population reports (10/18). NGC ID# 26A7, PCGS# 8957

1871-S Double Eagle, MS61 ★
Reflective Fields

3286 **1871-S MS61 ★ NGC.** Micro S. The microscopic mintmark on the reverse of this important double eagle is filled and resembles a raised rectangular lump below the eagle's tail. Most of the nearly 1 million minted 1871-S twenties entered circulation and the average certified grade is about AU53. This example is much finer, exhibiting reflective fields around sharply detailed devices. Scattered marks fail to diminish the eye appeal, which is recognized by the Star designation. NGC ID# 26ND, PCGS# 8962

1874 Liberty Twenty, MS62
Type Two Philadelphia Issue

3287 **1874 MS62 NGC. CAC.** Ex: Granite Lady Hoard. While most of San Francisco burned in 1906 leaving more than half of its 500,000+ population homeless, the United States Mint building survived and earned the nickname "the Old Granite Lady." Monaco Rare Coins availed itself of the moniker, and NGC certified many Liberty Head double eagles with the Granite Lady Hoard pedigree.

This 1874 example is a better Type Two issue and is rare any finer, although as a Philadelphia issue one would think its only association with The Granite Lady is the date (the second San Francisco Mint operated from 1874 to 1937). Khaki-gold surfaces display pleasing mint luster throughout both sides and a relatively sharp strike. Abrasions are grade-consistent with a small scrape noted across the lower loop of the 8 in the date. Nice eye appeal remains, as confirmed by the CAC endorsement. CAC: 7 in 62, 0 finer (10/18). NGC ID# 26AN, PCGS# 8970

1874-CC Double Eagle, AU53
Attractive for the Grade

3288 **1874-CC AU53 PCGS Secure. Variety 3-A.** The usual wide mintmark variety. A small die lump behind Liberty's eye identifies the obverse. This Carson City issue is relatively plentiful, suitable for collectors seeking a single type coin from this mint. The fields of the present coin retain glimpses of reflectivity and show minimal abrasions. The design elements are well-defined. Bright straw-gold coloration warms each side. NGC ID# 26AP, PCGS# 8971

1876-CC Liberty Twenty, Early Die State MS60

3289 **1876-CC MS60 PCGS Secure. Variety 3-A.** This plentiful Carson City issue is popular for type purposes, and this Mint State example is pleasing for the grade. Struck from an early state of the dies, each side shows areas of field reflectivity without evidence of die lapping. Also, the usual die crack along the lower reverse is just beginning to appear. The yellow-gold color is original, and grade-limiting abrasions are light and scattered. NGC ID# 26AW, PCGS# 8977

1882-CC Twenty Dollar, AU55
39,140 Coins Minted

3290 **1882-CC AU55 NGC. Variety 1-B.** The usual obverse with a spiked die line before the eye. The second C in the mintmark is slightly higher than the first. Double eagles were struck to the extent of 39,140 coins at the Carson City Mint in 1882. This is a partly lustrous Choice AU example with luster glowing from the design recesses. Well-struck and showing scattered marks over each side. NGC ID# 26BF, PCGS# 8997

1882-CC Twenty Dollar, MS60
Uncirculated Examples Are Elusive

3291 **1882-CC MS60 PCGS Secure. Variety 1-B.** No double eagles were struck at the Carson City Mint in 1880 or 1881. Production of double eagles resumed in 1882, with a mintage of just 39,140 pieces. The coins were well-produced, but they circulated extensively, and most examples seen today have numerous surface abrasions. The 1882-CC is actually one of the more available CC-mint issues, but Mint State coins are elusive.

The present coin is an impressive Mint State specimen, with well-detailed design elements and an interesting die crack through the bottom of the letters in the denomination. A diagnostic of this variety is the vertical spike present in front of Liberty's eye. The pleasing orange-gold surfaces show the expected number of minor contact marks for the grade. Population: 13 in 60, 75 finer (9/18). NGC ID# 26BF, PCGS# 8997

1883-CC Double Eagle, Elusive MS60

3292 **1883-CC MS60 PCGS Secure. Variety 2-A.** Most Uncirculated examples of the 1883-CC spent time abroad in foreign holdings, only to return to the U.S. numismatic scene within the past two decades. Possibly, this MS60 example is one of those world travelers, with lightly abraded surfaces from handling and counting, but no visible wear from circulation. The strike remains sharp on both sides, and mint luster cascades over greenish-gold surfaces. NGC ID# 26BH, PCGS# 8999

1883-S Twenty Dollar, MS63+
Semiprooflike Fields

3293 **1883-S MS63+ PCGS Secure.** The 1883-S double eagle is plentiful in MS63, but only nine of those coins are Plus-graded at PCGS, and that service lists only 16 finer pieces (9/18). This high-end Select example displays razor-sharp detail and semiprooflike fields with original rose-gold and bright yellow hues. Light, scattered grazes on each side determine the grade but none are individually bothersome. This is a visually impressive coin and it is conditionally rare with the Plus designation. NGC ID# 26BJ, PCGS# 9000

1883-S Twenty Dollar, MS63+
A Rarity Any Finer

3294 **1883-S MS63+ PCGS Secure. CAC.** Ex: The Fairmont Collection. The 1883-S Liberty double eagle is occasionally available in MS63 but it is rare finer. This Plus-graded, CAC-endorsed Select example displays sharp motifs and frosty cartwheel luster. Bright greenish-gold luster warms to peach hues in the centers, complementing a lack of severe abrasions. PCGS lists only 16 finer submissions (9/18). NGC ID# 26BJ, PCGS# 9000

1884-CC Double Eagle, AU55
Variety 1-A, the Only Dies

3295 **1884-CC AU55 NGC. Variety 1-A.** A single die pair has been identified from survivors of the 81,139 double eagles that the Carson City Mint coined in 1884. The mintmark is centered below the eagle's tail, with the second C over the top left serif of the D in DOLLARS. This Choice AU representative has nearly full yellow-gold luster with scattered marks that are expected for the grade. Wisps of olive toning enhance the eye appeal. NGC ID# 26BK, PCGS# 9001

1884-CC Liberty Twenty, AU58
Type Three Branch Mint Issue

3296 **1884-CC AU58 PCGS Secure. Variety 1-A.** The 1884-CC twenty dollar Liberty claims a mintage of 81,139 pieces, making it an available issue and a popular choice with type collectors seeking a Type Three example for their collections. This near-Mint specimen shows little wear on the well-detailed design elements, and the orange-gold surfaces are lightly abraded, aside from a couple of horizontal marks on the portrait. NGC ID# 26BK, PCGS# 9001

1884-CC Double Eagle, Lustrous MS61

3297 **1884-CC MS61 PCGS Secure. Variety 1-A.** The only known die pair for the 1884-CC double eagle, exhibiting a diagnostic intersection of die lines on the lower neck. A large portion of the 81,139-coin mintage was exported overseas for foreign trade payments, and those coins are slowly making their way back to the U.S. for present-day collectors. The dusky high-point color is frequently encountered on these repatriated gold coins. This lovely Mint State piece exhibits luminous yellow-gold surfaces and rose overtones. Far finer than the average certified grade of AU53. NGC ID# 26BK, PCGS# 9001

1889-CC Twenty Dollar, AU58+
Vibrantly Lustrous and Appealing

3298 **1889-CC AU58+ PCGS Secure. Variety 1-A.** This is an early die state piece with no lapping or peripheral cracks. In a later state, a die crack forms along the base of the date. The 1889-CC double eagle comes from a mintage of just 30,945 coins, although it remains collectible in AU grades. In Mint State, this Carson City issue becomes scarce and is difficult to locate with good eye appeal. This Plus-graded near-Mint coin displays sharp motifs and radiantly lustrous yellow-gold surfaces. Scattered light contact marks accompany the grade but none are individually bothersome. NGC ID# 26BV, PCGS# 9011

1890-CC Twenty Dollar, MS61
Remarkably Lustrous Surfaces

3299 **1890-CC MS61 PCGS Secure. Variety 1-A.** The 1890-CC twenty is typically seen with thick mint luster and numerous abrasions from bag-to-bag transfer in Europe over the past 125 years. This piece shows pleasing reddish-gold patina and the mint luster is bright. Many 1890-CC double eagles are not fully struck, but this one displays bold definition over all the design elements on each side. NGC ID# 26BY, PCGS# 9014

1891 Twenty Dollar Liberty, AU58
Low-Mintage Philadelphia Rarity

3300 **1891 AU58 PCGS Secure.** The year 1891 was another for low double eagle coinage at Philadelphia. Only 1,390 pieces were struck, compared to nearly 1.3 million coins at San Francisco. Carson City contributed a token quantity of 5,000 coins. Gold deposits during this period exceeded 3.2 million standard ounces, or more than $59 million — an increase of about $10.3 million over the previous year. Most of what was later manufactured into federal coinage was in the form of double eagles, but once again the San Francisco Mint produced the bulk of the coinage.

Surviving examples of the low-mintage 1891 Philadelphia issue are scarce with only 100 coins believed known. Uncirculated examples are rare, and high-end AU coins are only a trifle more available. This Choice AU piece is sharp and prooflike, showing warm honey-gold color. A few small reed marks on Liberty's cheek and in the upper-left obverse field are the only mentionable abrasions. Population: 11 in 58, 6 finer (9/18). NGC ID# 26C2, PCGS# 9016

1893-CC Double Eagle, MS62
A Great Rarity Any Finer

3301 **1893-CC MS62 NGC. Variety 2-A.** The 1893-CC double eagle comes from a mintage 18,402 pieces. Although this issue is more plentiful than its mintage would suggest, it is scarcer than certified population figures indicate. Pieces graded MS62 are scarce, and higher-grade representatives are decidedly rare. NGC lists 21 finer coins and PCGS 24 (9/18), but we have only handled two of the finer coins in recent years. In the Central States Signature (Heritage, 4/2018), lot 4436, an MS63 PCGS coin garnered $40,800. Previously, in the ANA Signature (Heritage, 8/2014), lot 5739, a CAC-approved coin in the same grade realized $52,875.

It has been more than a year since we offered an MS62 example of this final-year Carson City issue. This piece displays sharp motifs and radiant cartwheel luster with rich orange-gold coloration. Grade-limiting abrasions are light and scattered, none posing significant distraction. NGC ID# 26C9, PCGS# 9023

1893-S Double Eagle, MS64
Only Two Coins Certified Finer

3302 **1893-S MS64 PCGS Secure.** Nearly 1 million double eagles were struck at San Francisco in 1893, although this issue is conditionally scarce today in MS64. PCGS lists two Gems finer, but NGC shows none finer. This Choice example is realistically among the finest pieces that most collectors can hope to acquire. Frosty original luster shimmers beautifully as it illuminates pleasing prairie-gold color on each side. The design elements are well-defined and no distracting abrasions are seen. Population: 65 in 64 (2 in 64+), 2 finer (9/18). NGC ID# 26CA, PCGS# 9024

1906 Double Eagle, MS63+
Rare So Fine With a CAC Label

3303 **1906 MS63+ PCGS Secure. CAC.** Lovely orange-gold mint luster shimmers as it illuminates sharp design elements and relatively clean fields. Abrasions on this Select Mint State example are refreshingly light and unobtrusive for the grade, especially on the reverse. The 1906 is a slightly better 20th century date with a mintage of only 69,596 pieces. PCGS lists just 39 coins finer than the present. CAC: 13 in 63, 10 finer (9/18). NGC ID# 26D4, PCGS# 9049

HIGH RELIEF DOUBLE EAGLES

MCMVII Wire Rim High Relief, MS62
Bright and Satiny Classic Design

3304 **1907 High Relief, Wire Rim MS62 NGC.** One of the great successes of Augustus Saint-Gaudens' classic design for the twenty dollar gold piece was creation of a coin that looked more like a medal than a circulating coin. The combination of striking the coin in high relief and uncluttering the surfaces allowed the viewer to concentrate on the central devices, thus creating a more dynamic design.

Both Saint-Gaudens and President Roosevelt thought it best to not include mention of the deity on the new gold coins, thus removing the traditional motto IN GOD WE TRUST. Moving E PLURIBUS UNUM to the edge freed up more space, but required the use of a tripartite collar. Such a collar had never been used on a regular production coin, but had been used on pattern Morgan dollars in 1885. The success of these design decisions is readily apparent on the bright, satiny surfaces of the present coin. At first glance, this example appears to be much finer than the stated grade. A loupe reveals the yellow-gold surfaces have taken on a number of small, but individually insignificant contact marks on each side. The strike details are fully brought up throughout, and the eye appeal is excellent.

Ex: Chicago Signature (Heritage, 8/2011), lot 7676. NGC ID# 26F2, PCGS# 9135

SAINT-GAUDENS DOUBLE EAGLES

1911 Double Eagle, MS64+
Limited Production Issue

3305 **1911 MS64+ PCGS.** In 1911, the Philadelphia Mint coined just 197,250 double eagles, part of a series of lower mintage Philadelphia issues that continued until 1921. The average output at that mintage from 1909 through 1921 was just 240,000 coins annually. The average was 10 times that quantity from 1922 through the end of the series with an annual production average of 2.54 million coins. This lovely near-Gem, although exhibiting scattered grade-consistent marks, exhibits splendid and fully lustrous orange-gold surfaces and excellent eye appeal. PCGS has only certified 80 finer examples (10/18). NGC ID# 26FK, PCGS# 9157

1911 Double Eagle, MS66
Only One Numerically Finer at PCGS

3306 **1911 MS66 PCGS Secure.** One of the important condition rarities in the Saint-Gaudens double eagle series is the 1911 that is rarely encountered finer than MS65. The same is true of all the Philadelphia Mint issues from 1910 through 1915, the last year of production before the U.S. entered World War I. This highly appealing piece has extraordinary eye appeal with trivial marks of no concern during the grading process. Both sides are fully brilliant and lustrous with lovely yellow-gold surfaces. An extremely important opportunity for the gold coinage aficionado. Population: 18 in 66 (3 in 66+), 1 finer (9/18). NGC ID# 26FK, PCGS# 9157

1911-D/D Twenty Dollar, MS66
Dramatically Repunched Mintmark

3307 **1911-D/D FS-501 MS66 PCGS. CAC.** For a series of which so many millions of coins were originally produced, there are few widely collected error or variety coins in the Saint-Gaudens double eagle series; a situation that the new Roger Burdette reference (published by Heritage) on the series may help to rectify. The 1909/8 overdate and the 1911-D/D are the most widely known. This 1911-D/D in MS66 is tied for second finest certified at PCGS (9/18) with only one piece finer at that service. This is simply a stunning Saint-Gaudens twenty, regardless of the variety. Flashy luster radiates from the reddish-orange surfaces, and the repunching to the east on the mintmark is as bold as the strike is throughout. Carefully preserved and gorgeous. Population: 46 in 66 (2 in 66+), 1 finer. CAC: 22 in 66, 0 finer (9/18).
Ex: Dallas Signature (Heritage, 10/2009), lot 1869; Long Beach Signature (Heritage, 6/2011), lot 5193, which realized $8,337.50.
NGC ID# 26FK, PCGS# 145010 Base PCGS# 9158

1914-S Double Eagle, MS66
Just One Coin Graded Finer

3308 **1914-S MS66 NGC.** This is a widely accessible date through most grades with tens of thousands of coins having been repatriated from overseas throughout the last half-century. Premium Gems remain scarce, and only a single example is graded finer — an NGC-certified MS67 (9/18). This razor-sharp, sun-gold double eagle radiates frosty S-mint luster and showcases marvelously preserved surfaces. NGC ID# 82KA, PCGS# 9166

1920-S Double Eagle, AU58
Elusive in All Grades

3309 **1920-S AU58 NGC.** In Roger Burdette's *Saint-Gaudens Double Eagles*, two distinctive obverse dies are identified. This one, designated HA-2, shows manual recutting of the rays that run through the date. Burdette suggests that coins from this die probably originated in leftover pyx coins in Philadelphia. Leftover Philadelphia pyx coins and the San Francisco Mint Cashier are believed to have been the two primary avenues for payouts of the 1920-S double eagle, which was largely retained in storage and later melted. It is estimated that only about 200 examples of the date survive today in all grades. This near-Mint coin displays satiny yellow-gold surfaces and well-struck devices with little high-point friction. A few scattered marks are not distracting. Census: 14 in 58, 53 finer (9/18). NGC ID# 26FZ, PCGS# 9171

1922-S Double Eagle, MS64
Radiantly Lustrous CAC Coin

3310 **1922-S MS64 PCGS. CAC.** Ex: Hesselgesser. This better-date Saint-Gaudens twenty has radiant luster and a bold strike. The coin is moderately abraded, but the eye appeal is impressive for the grade, as the CAC endorsement confirms. Although more than 2.6 million pieces were struck, all but a couple thousand were eventually melted by the Treasury or lost to foreign trade.
Ex: ANA Signature (Heritage, 3/2008), lot 1806, which realized $5,750; FUN Signature (Heritage, 1/2018), lot 6643, which realized $8,400. NGC ID# 26G4, PCGS# 9174

1923 Twenty Dollar, MS65+
Only Four Coins Graded Higher at PCGS

3311 **1923 MS65+ PCGS Secure. HA-1 Doubled Obverse Die.** In most circumstances, the 1923 double eagle is considered plentiful — a type coin, destined to follow the market price for generic gold. That view is short-sighted and no longer valid among the few high-end Gem coins that exist, when it becomes a bonafide collector coin. This Plus-graded example has a razor-sharp strike most evident on the Capitol building and the eagle's plumage. Frosted mint luster looms from every angle. Double eagle specialists should take note of the obvious die doubling in the date area and the surrounding rays. Population (all varieties): 7 in 65+, 4 finer (9/18). NGC ID# 26G5, PCGS# 9175

1925 Double Eagle, Highly Lustrous MS67
None Certified Finer

3312 **1925 MS67 NGC.** The 1925 Saint-Gaudens double eagle was produced in large quantities, with a mintage of 2.8 million pieces. As the large production figure suggests, the date is readily available today, even in high grades, and enjoys great popularity with type collectors. Of course, the population does thin out at higher Mint State levels, and coins in Superb Gem condition are rare. The issue is unknown above MS67 (9/18).

The present coin is a sharply detailed Superb Gem with pale rose-gold surfaces, and ample frosted mint luster. The fields are free of mentionable contact marks, and the eye appeal is quite strong. Census: 25 in 67, 0 finer (9/18).
Ex: Long Beach Signature (Heritage, 2/2011), lot 4737, where it realized $25,300. NGC ID# 26GA, PCGS# 9180

1925-D Twenty Dollar, MS63
Scarce, Semikey Issue

3313 **1925-D MS63 PCGS.** The 1925-D is a much-scarcer Saint-Gaudens issue with only 1,000 pieces estimated extant out of an original mintage that approached 3 million. This piece displays gorgeous display pink, rose, and olive toning over frosted mint luster on each side. Both sides show bold design motifs. Surface marks are minimal on each side, consistent with the MS63 grade. NGC ID# 26GB, PCGS# 9181

1925-S Saint-Gaudens Twenty, MS62
Seldom-Encountered Mintmarked Issue

3314 **1925-S MS62 NGC.** As with so many Saint-Gaudens twenties, the large mintage exceeding 3.7 million coins belies the rarity of the 1925-S today. Most of the surviving population is divided between high-grade circulated examples and lower-level Mint State coins. The finest example that we have ever offered is an MS67 PCGS example formerly in the Phillip H. Morse Collection.

The 1925-S typically lacks peripheral detail, even though the centers are well-defined. This suggests die preparation related to heat treatment as the cause, rather than weakness of strike. This lack of peripheral detail is most noticeable around the reverse of this piece. The present MS62 NGC example displays consistent reddish-gold color with subdued mint luster. A few marks scattered over each side are consistent with the grade, and we note a curious small green area, perhaps a stain, on the reverse between two rays of the sun, above IN.

Ex: Long Beach Signature (Heritage, 2/2011), lot 4739, where it brought $11,500. NGC ID# 26GC, PCGS# 9182

1927 Saint-Gaudens Twenty, MS67
Among the Finest Certified

3315 **1927 MS67 NGC.** The 1927 Saint-Gaudens double eagle is an available date, from a mintage of nearly 3 million pieces. Of course, the date becomes rare at the Superb Gem level and is unknown in any finer grade (12/10). The present coin is an impressive Superb Gem, with sharply detailed devices, and lustrous surfaces that are enhanced by rich hues of green and orange-gold.

Ex: Long Beach Signature (Heritage, 2/2011), lot 4745, where it realized $9,775. NGC ID# 26GG, PCGS# 9186

COMMEMORATIVE SILVER

1921 Alabama 2x2 Half, MS67
Tied for the Finest Certified

3316 **1921 Alabama 2x2 MS67 PCGS Secure.** The Alabama commemorative issue celebrated the 1919 centennial of Alabama statehood. Just over one-quarter of the net distribution for this issue had 2X2 incused in the right obverse field, identifying Alabama as the 22nd state. The obverse featured the busts of William Wyatt Bibb, the first governor of the state, and Thomas E. Kilby, the current governor at the time these coins were issued. This Superb Gem has spectacular, highly lustrous silver surfaces with mint brilliance beneath splendid rainbow toning. Population: 9 in 67 (2 in 67+), 0 finer (9/18). NGC ID# BYEZ, PCGS# 9225

1935 Hudson Half Dollar, MS67
Among the Finest Pieces Known

3317 **1935 Hudson MS67 NGC. CAC.** This Superb Gem is among the finest Hudson, New York, Sesquicentennial half dollars known, and it is conditionally rare as such. The CAC endorsement further sets it apart from its peers. Satiny luster complements well-struck design elements, while dusky olive-gold and peach-rose toning covers much of each side. Census: 33 in 67 (4 in 67 ★), 0 finer. CAC: 8 in 67, 0 finer (9/18). NGC ID# BYGS, PCGS# 9312

1920 Maine Centennial Half, MS67
Beautifully Toned Type Coin

3318 **1920 Maine MS67 PCGS Secure. CAC.** The Maine Centennial half dollar is one of the earliest classic commemoratives issued after the Pan-Pac Exposition coins of 1915. Distribution totaled 50,028 pieces, including assay coins. The issue is available in most grades but it becomes conditionally scarce in MS67. This CAC-approved coin is among the finest pieces at PCGS. Sharp design elements and frosted luster reveal no bothersome abrasions, and a shimmering cartwheel effect is easily produced. Delicate lilac-silver toning colors the interiors, ceding to vivid multicolor borders. Population: 55 in 67 (8 in 67+), 0 finer. CAC: 29 in 67, 0 finer (9/18). NGC ID# BYGY, PCGS# 9326

1954 Washington-Carver Half Dollar, MS67
Attractively Toned
Tied for Finest Certified

3319 **1954 Washington-Carver MS67 PCGS Secure.** The 1954 is the final Philadelphia issue in the Washington-Carver commemorative half dollar series. It is also the final issue of the entire classic commemorative era. Superb Gems are rare. PCGS and NGC each list only four coins in MS67 and none finer (9/18). This piece displays exceptionally clean surfaces and sharp detail. Satiny luster illuminates near-brilliant centers, while vivid sea-green, burgundy, and lemon-gold toning engulf the margins. NGC ID# BYL9, PCGS# 9442

COMMEMORATIVE GOLD

1915-S Quarter Eagle, MS66
Panama-Pacific Commemorative Issue

3320 **1915-S Panama-Pacific Quarter Eagle MS66 PCGS.** The series of coins that Farran Zerbe suggested went far beyond any other commemorative issue, having a total face value of $104 for the five different coins that included the half dollar, gold dollar, quarter eagle, round $50, and octagonal $50. Collectors had the option of buying individual coins or sets in leather cases or in copper frames that included examples of each coin, all offered at twice face value. For those who wanted the best, a small number of double sets were issues to show the obverse and reverse of each coin. Those sets included 10 coins, and were offered at a little over $400. This impressive Premium Gem had frosty yellow-gold surfaces and trivial grade-consistent marks. NGC ID# BYLP, PCGS# 7450

MODERN BULLION COINS

1987 Half-Ounce Gold Eagle, MS70
Second Year of Issue

3321 **1987 Half-Ounce Gold Eagle MS70 PCGS Secure.** The 1987 half-ounce Gold Eagle compares much more favorably with the challenging issues from the mid-1990s than it does with the plentiful first-year 1986. Glimmering satin mint luster appears over the unmarked, fully struck surfaces. PCGS reports 32 submissions in MS70 (9/18). NGC ID# 26N8, PCGS# 9812

1987 Half-Ounce Gold Eagle, MS70
Flawless Lemon-Gold Surfaces

3322 **1987 Half-Ounce Gold Eagle MS70 NGC.** The availability of the 1987 half-ounce Gold Eagle in no way resembles that of its first-year predecessor. Coins at this level are many times scarcer. Lemon-gold color dominates perfectly preserved surfaces. Uninhibited satin luster glows from each side. Fully struck. NGC ID# 26N8, PCGS# 9812

1999 Silver Eagle, MS70
Perfect Technical Grade

3323 **1999 Silver Eagle MS70 NGC.** Specialists will recognize the 1999 as one of the most difficult American Silver Eagles to locate in flawless MS70 condition. Unsurprisingly, this example features complete strike detail and lacks any contact marks whatsoever. Utterly brilliant silver surfaces are softly frosted and eminently appealing. NGC ID# 26JX, PCGS# 9947

North Carolina mining scene

TERRITORIAL GOLD

(1834-1837) Bechtler Five Dollar, AU58
RUTHERFORD, 140G., 20C.

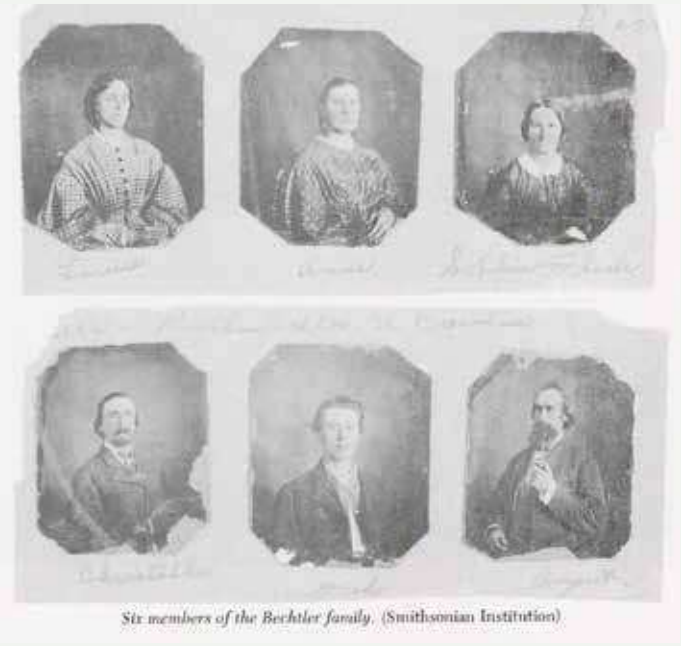

3324 **(1834-1837) C. Bechtler Five Dollar, RUTHERFORD, Plain Edge, 140G., 20C., AU58 NGC. K-17, R.5.** Bechtler coinage was a necessity money, just as later territorial gold pieces were from the California and Colorado gold rushes. In the case of North Carolina, the Bechtler family adapted their jewelry and watchmaking business to an even more in-demand assaying and coinage endeavor. Bechtler's charge for converting locally mined gold dust into coin form was 2 to 2½ percent, a rate that was competitive with the mint. This low rate proved a boon to local miners because it eliminated the need for the long and bandit-ridden overland route from Rutherfordton to Philadelphia. Bechtler's gold dollars remained in the local economy into the Civil War. However, because of their high intrinsic value few five dollar gold pieces have survived. This example still shows significant mint luster surrounding the devices. The strike is generally strong, but the planchet was obviously struck from misaligned dies. This is apparent from the weakness seen over the letters ARO on the obverse and the unstruck striated planchet on the corresponding area of the reverse. Few finer RUTHERFORD fives are known. Listed on page 394 of the 2019 *Guide Book*. Census: 8 in 58 (1 in 58 ★), 11 finer (9/18). NGC ID# 2B9P, PCGS# 10091

A. Bechtler Gold Dollar, MS62
K-24, 27G., 21C.

3325 **(1842-50) A. Bechtler Dollar, 27G. 21C., Plain Edge MS62 PCGS Secure.** Orange-rose shades enrich this lovely and evenly struck Bechtler type coin. Magnified examination fails to locate noticeable contact, but a thin line is present on the denomination side border between 1 and 6 o'clock. The fields are semiprooflike and attractive. The Plain Edge variant is the most often seen for this issue, ideal for type collectors. Listed on page 394 of the 2019 *Guide Book*. Population: 13 in 62, 7 finer (9/18). NGC ID# 2B99, PCGS# 10040

Six members of the Bechtler family. (Smithsonian Institution)

1851 Humbert Fifty Dollar, AU53
K-6, Reeded Edge, 887 Thous.

3326 **1851 Humbert Fifty Dollar, Reeded Edge, 887 Thous. AU53 PCGS. K-6, R.4.** Demand for a federal branch mint in California during the height of the Gold Rush was strong. However, authorization of a branch mint was slow in getting approved by Congress. With the promise that a branch mint would soon be approved, Congress authorized a temporary federal assay office in San Francisco to alleviate the coin shortage and provide a federal assay entity for miners and bankers.

The U.S. Assay Office at San Francisco operated at first under contract with the local private firm Moffat & Co. New York watchmaker Augustus Humbert was appointed assayer. Moffat & Co. was dissolved in February 1852, and reorganized as Curtis, Perry, & Ward, continuing the government coinage contract. The Assay Office was closed in late 1853 to be converted into the new San Francisco branch mint.

During its operation, the U.S. Assay Office in San Francisco produced a variety of gold ingots, but the most widely used and popular were the octagonal fifty dollar pieces. This is a bright yellow-gold example of the later Reeded Edge variety. Detail is strong and scattered abrasions are light. An appealing Gold Rush memento. Listed on page 397 of the 2019 *Guide Book*

From The Marcello Collection, Part II. NGC ID# ANH9, PCGS# 10214

1852 U.S. Assay Office Humbert Ten Dollar, XF40
Rare 'K-10c' Variety, Ex: S.S. *Central America*

3327 **1852 Humbert Ten Dollar XF40 PCGS. "K-10c," R.6.** Ex: *S.S. Central America, SSCA* 7046. This reverse die is not listed in the Kagin reference, although it is mentioned (not pictured) by Walter Breen in his *Encyclopedia* under Variety 7713. This variation of K-10 is decidedly rare. Offered here is a lightly circulated piece from the *S.S. Central America* shipwreck. Bright brass-gold surfaces show pleasing detail and are generally smooth, although some contact marks are present. Typical of *Central America* treasure coins, this piece does not show any significant impairments from saltwater exposure. Listed on page 398 of the 2019 *Guide Book*. NGC ID# ANGG, PCGS# 10187

1852 Wass, Molitor Ten, AU50
K-4, Wide Date

3328 **1852 Wass Molitor Ten Dollar, Large Head, Wide Date AU50 PCGS. K-4, R.5.** Ex: *S.S. Central America, SSCA* 7146. Wass, Molitor & Co. was founded as an assay office in San Francisco in October 1851, and the firm began striking coins in January 1852. Several varieties of the ten dollar issue are known from 1852. K-4 is distinctive for its widely spaced date. It is also one of the more plentiful varieties today. This *S.S. Central America* recovery coin displays bright yellow-gold color and well-detailed design elements consistent with the AU grade. Scattered abrasions are as expected for a private Gold Rush issue in this grade. Listed on page 405 of the 2019 *Guide Book*. NGC ID# 33ZM, PCGS# 10348

1855 K-6 Wass Molitor Ten Dollar, AU55
Ex: *S.S. Central America*

3329 **1855 Wass Molitor Ten Dollar AU55 PCGS. K-6, High R.5.** Ex: *S.S. Central America, SSCA* 7287. At one time, the K-6 variety was considered R.7 with fewer than a dozen pieces known, but after the discovery of the *S.S. Central America* treasure, the rarity dropped to its present High R.5 level. The Wass Molitor firm was well-respected for the quality of their coinage and accuracy of their assays. The 1855 ten dollar gold coins were struck as an emergency measure during a period when a shortage of parting acids caused the San Francisco Mint to temporarily suspend coinage operations. The present coin is softly struck, but textured, lustrous orange-gold surfaces show only light wear. As expected, a number of minor marks and scrapes contribute to the grade. As an AU55 example, it is a higher-end survivor of the rare 1855 Wass Molitor ten. Listed on page 405 of the 2019 *Guide Book*. Population: 5 in 55, 2 finer (9/18). NGC ID# ANJR, PCGS# 10354

1850 Mormon Five Dollar, Fine Details
K-5, Planchet Crack on Rim

3330 **1850 Mormon Five Dollar — Cleaned — NGC Details. Fine. K-5, High R.5.** Bright olive-gold surfaces are finely granular across the interiors due to a light cleaning, although the protected areas near the rims display more traditional, smooth patina. The obverse is evenly worn with complete rims, but the reverse is half worn smooth. Almost the entire date is effaced. Visible design elements and orientation of the border legends differentiate this piece from the 1849 five dollar issue. There is a small planchet flaw on the rim near the E in FIVE. Listed on page 409 of the 2019 *Guide Book*. NGC ID# 2BCF, PCGS# 10265

1860 Clark, Gruber & Co. Quarter Eagle
K-1, Semiprooflike MS63

3331 **1860 Clark, Gruber & Co. Quarter Eagle, MS63 PCGS Secure. CAC. K-1, R.4.** Clark, Gruber & Co. began striking gold coins in July 1860, in a newly constructed brick building on McGaa Street in Denver, Colorado. Already a respected banking firm in the area, Clark, Gruber & Co. produced high-quality gold coinage that was widely respected and accepted in commerce. Gold dust was a large part of the deposits made at the firm early on, and within a month it was not unusual for the firm to take in $2,000 worth of gold dust in a day. In *Private Gold Coins and Patterns of the United States*, Don Kagin writes: "By October, the gold coins of Clark, Gruber & Co. had become the principle currency of the Pike's Peak country. During the first three months of operation, $120,000 in gold coins were produced while their steam-driven machinery was operating day and night."

Mint State 1860 quarter eagles from this firm are rare, and only a few are known finer than the present. This Select coin displays semiprooflike fields and bright straw-gold color. The usual strike softness is noted in the centers, but grade-limiting abrasions are trivial. Eye appeal exceeds expectations for the grade on this high-end collector coin. Listed on page 410 of the 2019 *Guide Book*. NGC ID# ANJX, PCGS# 10135

1849 Massachusetts & California Five Dollar
Copper Die Trial, Kagin-5b, AU50

3332 **1849 Massachusetts & California Five Dollar, Copper Die Trial, AU50 NGC. Kagin-5b, High R.7.** Reeded edge. The Massachusetts & California Company was formed in Northampton, Massachusetts, in 1849. It appears that none of the firm's output was struck in California. The 2019 *Guide Book* (on page 401) lists only the single gold variety, K-1 with an open wreath and starless reverse, but the classic 1981 Kagin reference presents several die trial varieties, including K-5b with a closed wreath and stars. Kagin (page 344) describes K-5b as unique, but at least three pieces are known: the Kagin plate coin, the present lot, and lot 5725 from our 2016 FUN Signature, which was overstruck on a "Kagin-5c" example. This mahogany-brown example displays light wear, most evident on the wreath due to a somewhat convex reverse. Both sides are rotated double struck, and surprisingly free from marks, which suggests that the die trial was briefly carried as a pocket piece. NGC ID# 2BE7, PCGS# 10230

Henry Hentsch Very Large Size Gold Ingot
154.23 Ounces, Ex: S.S. *Central America*

3333 **Henry Hentsch Gold Ingot. 154.23 Ounces.** CABG-215. Henry Hentsch was born in Switzerland on July 23, 1818, the scion of a long-established Swiss banking family. He immigrated to California in 1854 to establish a banking house, arriving in San Francisco on May 31 on board the *S.S. Sonora*. By early 1856, Hentsch was associated with another Swiss emigrant, Francis Berton, and added assaying services to his other financial activities, as attested by this notice in the February 2, 1856 edition of the *Alta California:*

> "ASSAY OFFICE OF HENRY HENTSCH
> Northwest corner of Montgomery and Jackson Streets.
> I have this day annexed to my Banking Establishment an Assay Office, and am prepared to carry on this business in all its branches. All orders confided to my care will be executed with promptness, and I will guarantee all my assays. H. Hentsch San Francisco, Feb, 1st, 1856."

Hentsch further advertised that he would return deposits in 12-24 hours "in Coin or Bars, at the option of the Depositor." A total of 33 Hentsch bars were recovered from the wreck of the *S.S. Central America* in 1988, many of them marketed by Sotheby's in their December 8-9, 1999 offering titled *Treasures of the S.S. Central America*. Unfortunately, the sale was cancelled due to a court injunction. The cataloger noted the Hentsch bars had a unique matte finish, unlike any other bars recovered. Legal matters were resolved after a seven-year court battle, and many of the *S.S. Central America* bars were subsequently marketed by other firms, including Bowers and Merena, Monaco Rare Coins, and Heritage.

Henry Hentsch relocated his business to 120 Montgomery Street in 1858 and invested in many other businesses, owning a theater and acting as the Swiss Consul for several years. He returned to Switzerland in 1868 to manage the family bank there, leaving Berton in charge of affairs in California until his bank became part of the Swiss-American Bank in 1873. Hentsch passed away in Geneva, Switzerland in 1905, aged 87.

This is classed as a Very Large Size Hentsch ingot; in fact, the fifth largest Hentsch ingot recovered from the *S.S. Central America*. The top side is laid out in the usual fashion in vertical format: No 3125 / 893 FINE / Hy HENTSCH / Oz 154.23 / $2847.07. The ingot number is repeated at the top of the back side in the same font and size as seen on the top side. Noticeable incrustation from the ship's rusted hull is seen on the long left side with a lesser presence seen on the top and back sides. The ingot measures 58 x 158 x 31 mm. ***From The Marcello Collection, Part II.***

Kellogg & Humbert Gold Ingot, 46.41 Ounces
Ex: *S.S. Central America*

3334 **Kellogg & Humbert Gold Ingot. 46.41 Ounces.** CABG-528. The good reputation of the several assay offices in San Francisco in the 1850s indicated the acceptability of that firm's coins or ingots. While such a statement should be obvious, it took several years and several less-than-reputable assayers to bring an assayer's good reputation to prominence in Gold Rush California. While there were several firms with a good reputation, none were more highly thought of than John Kellogg and Augustus Humbert. Humbert's importance and reputation was reported in the Alta California on October 23, 1855, where he was designated as "a man who has done more than any single person we know of for the state."

Kellogg & Humbert gold ingots were commonly used as a store of value and regularly transported to New York and London. One such massive transport was on board the *S.S. Central America* in the fall of 1857. A hurricane suddenly arose and the ship and all its precious cargo was lost along with many passengers. It was not until 1988 that the shipwreck was located and salvage operations began.

This is a medium-sized ingot among the 743 gold bars that were recovered. It is 42 x 94 x 21 mm. The top side reads: No 614 / Kellogg & Humbert hallmark / 46.41 Oz / 871 FINE / $835.62. The individual ingot number is repeated at the top of the back side, and in a different font. A few small areas of rust staining are seen on the back side also as well as on the assay cuts on the two opposing corners. The surfaces are otherwise bright yellow-gold with a few tiny voids from gas bubbles from the pour, and a larger indent from the pour seen over the 41 of the weight.

Ex: Central States Signature (Heritage, 4-5/2009), lot 2800, where it brought $103,500.

(1855-57) Kellogg & Humbert 38.67-Ounce Gold Ingot Recovered From the *S.S. Central America*

3335 **Kellogg & Humbert Gold Ingot. 38.67 Ounces.** CAGB-528. The assayers Augustus Humbert and John Glover Kellogg need little introduction to collectors of California gold. They formed their assay business in early 1855 and were among the most active and prolific issuers of coins and ingots during the middle 1850s. Of the 500+ gold ingots recovered from the *S.S. Central America*, more than two-thirds of them bore the stamp of Kellogg & Humbert.

Bowers' seminal *A California Gold Rush History* mentions a notice that appeared along with the "listing of prominent New York financial figures" that read as follows:

> "The undersigned, bankers and bullion dealers in the City of New York, have received large amounts of gold bars bearing the stamp of 'Kellogg and Richter' and 'Kellogg and Humbert,' of San Francisco, Cal., and cheerfully recommend their stamp for correctness, having tested their assays thoroughly, both in the American and European mints."

The *S.S. George Law*, renamed the *S.S. Central America* in June 1857, made 44 trips back and forth from Aspinwall, on the Atlantic side of the Isthmus of Panama, to New York before she met her watery doom in that fateful hurricane in September 1857. The ingots she carried were either used as bank reserves, sold to the Mint for coinage, or shipped overseas. Many of the ingots that were exported likely ended up being coined as British sovereigns or other gold coins at one of the several far-flung mints of the British Empire; the 19th century was, of course, the height of the Empire's political and financial prominence.

This is a bright yellow-gold piece. As with all Kellogg & Humbert ingots, the serial number is repeated on the back, on this piece after a coin turn and in a different font. There are assay cuts at the bottom right and top left. A small gas bubble appears on the top side below and left of the 9, and small, linear dark inclusion, as made, appears on the back side down a bit from the 4 in the serial number. As Bowers notes in *A California Gold Rush History*, the 8 in the value is sharply double-punched.

It is easy to calculate the (1850s) value of one of these gold bars fairly accurately by multiplying the weight in troy ounces (given on the bar) by the fineness stated (with a decimal point preceding, for thousandths), then by the then-current value of an ounce of pure gold, $20.67. In the case of the present bar, such a calculation gives $729.77, only a few cents' difference from the nominal value. Reading from the top downward vertically, No 694 / Kellogg & Humbert hallmark / 38.67 Oz / 913 FINE / $729.83. The ingot measures 93 x 44 x 16 mm.

Ex: Los Angeles Signature (Heritage, 8/2009), lot 1376, where it realized $97,750.

CALIFORNIA FRACTIONAL GOLD

1876 Octagonal Indian Quarter Dollar BG-799GG, MS66 Deep Mirror Prooflike Discovered in 2009

3336 **1876 Indian Octagonal 25 Cents, BG-799GG, High R.7, MS66 Deep Mirror Prooflike PCGS Secure.** BG-799GG pairs the obverse die of BG-799A through BG-799D with a reverse die unique to the variety. BG-799GG was unlisted in both editions of Breen-Gillio. The variety was first reported in 2009 by Heritage cataloger Brian Koller. Today, the leading grading services list four examples, the present lot along with specimens graded PCGS MS65, NGC MS65 Prooflike, and NGC MS66 Deep Prooflike (10/18). The great rarity of BG-799GG may be related to the arrest of the maker, Christopher Ferdinand Mohrig, by the Secret Service on August 10, 1876. This unabraded representative exhibits sun-gold mirrored fields and luminous motifs. The strike is sharp except on occasional portions of the wreath opposite the stars. An important opportunity for the California small denomination gold specialist. PCGS# 683261 Base PCGS# 410508

COINS OF HAWAII

(1871) Wailuku Plantation Token 6 1/4 Cent, XF40 Elusive Hawaiian Issue, M. 2TE-4

3337 **(1871) Wailuku Plantation 6 1/4 Cent, Narrow Starfish, XF40 PCGS.** The Wailuku tokens of 1871 were struck in the plantation's blacksmith shop and circulated as money throughout the islands, although they were never legal tender. All the Wailuku Plantation tokens are scarce and collectors prize examples in all grades. This attractive XF specimen is well-centered and well-struck, with lightly abraded mahogany-brown surfaces. Population: 4 in 40, 2 finer (9/18). NGC ID# 2UBM, PCGS# 600506

PATTERNS

1838 Kneass / Gobrecht Half Dollar in Silver Judd-72, PR62

3338 **1838 Half Dollar, Judd-72, Pollock-75, R.5, PR62 PCGS. CAC.** A large bust of Liberty faces left, with stars and the date at the margins. The reverse features an eagle with spread wings. For many decades, the obverse design was attributed to William Kneass, but Gobrecht was almost certainly the engraver, as the portrait bears close resemblance to the gold eagle also introduced in 1838. Struck in silver with a reeded edge with a medal turn. An estimated 50-60 pieces are known. This is a bright example with untoned centers and lightly toned margins. Lightly hairlined. NGC ID# 3YLW, PCGS# 11282

1854 Hook-Neck Flying Eagle Cent in Bronze
Judd-164 Original, PR65 Brown

3339 **1854 Flying Eagle Cent, Judd-164 Original, Pollock-189, R.5, PR65 Brown NGC.** Flying Eagle design with a hook-neck eagle on the obverse, surrounded by stars and the date below. The reverse closely resembles the regular dies issue for the large cent. Struck in bronze with a plain edge. This relatively common pattern is certainly a popular one and it is the starting point for a collection of Flying Eagle cent patterns. The surfaces are glossy with even brown and olive patina. The reflective fields are abundantly evident beneath the toning.
Accompanied by a small, undated Henry Chapman envelope. NGC ID# 29A9, PCGS# 11678

1863 Indian Cent in Copper-Nickel, PR65
Rare Reeded-Edge Pattern, Judd-300

3340 **1863 One Cent, Judd-300, Pollock-361, Low R.7, PR65 PCGS.** Eagle Eye Photo Seal and Card included. Struck from regular obverse and reverse dies on a standard copper-nickel planchet, but with a reeded edge instead of the usual plain edge. This is the Low Date format. The surfaces display pleasing copper-tan color with a reverse tinge of orange, and considerable cameo contrast on each side. The devices are fully struck and almost no carbon is evident. Only a half-dozen or so examples are known of this curious reeded edge pattern. A similar number of Uncirculated pieces are also known.
Ex: Long Beach Signature (Heritage, 6/2006), lot 2869, where it brought $4,887.50. NGC ID# 29EF, PCGS# 60455

1865 With Motto Half Dollar in Silver
Judd-429, PR65

3341 **1865 Half Dollar, Judd-429, Pollock-502, Low R.7, PR65 PCGS Secure.** The obverse die is the traditional Liberty Seated design adopted for regular coinage in 1865. The reverse features the familiar perched eagle with scroll and motto above that was adopted for regular issues in 1866. Struck in silver with a reeded edge. Unlike previous years when With Motto coinage was produced, some of the 1865 halves may be actual transitional pieces. About a dozen examples are known in silver with a similar number in copper. Much original brilliance remains, especially on the reverse; while each side shows light blue and rose toning as well. Fully struck. NGC ID# 29JF, PCGS# 60614

1869 Standard Silver Quarter in Aluminum
Judd-725, PR64

3342 **1869 Standard Silver Quarter Dollar, Judd-725, Pollock-806, High R.7, PR64 PCGS.** Liberty faces left, and is adorned with a large cap with stars along the lower-front border. IN GOD WE TRUST is featured on a scroll below the portrait. The reverse has a wreath of oak and laurel leaves, with 25 CENTS crowded inside while the date is below and STANDARD SILVER is centered above. Struck in aluminum with a reeded edge. The right obverse field has an area of slightly granular surface, as made, while the reverse has a couple of retained mint-made laminations. A few wisps of charcoal patina are seen on each side. NGC ID# 29S9, PCGS# 60952

1870 Standard Silver Half Dollar in Silver
Judd-969, Richly Toned PR66
Surprisingly Scarce

3343 **1870 Standard Silver Half Dollar, Judd-969, Pollock-1080, High R.7, PR66 PCGS. CAC.** Ex: Denali Collection. William Barber's copy of a design by James Longacre. The magnificently designed obverse depicts Liberty seated facing left, left hand resting on a globe, right hand holding a Liberty Pole with Phrygian cap on top, conjoined flags of the USA and CSA behind. The reverse is plainly laid out with COMMERCIAL DOLLAR 420 Grs 900 FINE in the center, surrounded by an olive wreath with UNITED STATES OF AMERICA at the upper periphery and GOD OUR TRUST on a scroll at the bottom of the wreath. Struck in silver with a plain edge. The Judd-969 is curiously scarce for a Standard Silver issue. Each side is richly toned in gray-blue shades with strong mirrors in the fields, most evident when the coin is tilted beneath a light.
Ex: Chicago Signature (Heritage, 8/2013), lot 5965, where it brought $11,750. PCGS# 61215

1872 Three Dollar Dies Trial in Copper
Judd-1238, PR63 Brown

3344 **1872 Three Dollar, Judd-1238, Pollock-1380, High R.7, PR63 Brown NGC.** A dies trial from the regular-issue 1872 three dollar dies. Struck in copper with a reeded edge. USPatterns.com suggests that fewer than half a dozen examples are known. Only two examples are currently certified (both at NGC). The Bass example was formerly graded by PCGS, but that coin no longer appears in the *Population Report*. This Select three dollar pattern showcases smooth chocolate-brown surfaces and full definition on the hair curls, headdress, and wreath elements. PCGS# 61510

COUNTERSTAMPS

1795 O-102 Half Dollar, VF Details
Dual Countermarks 'B. Brown' and 'C.D. Parks'

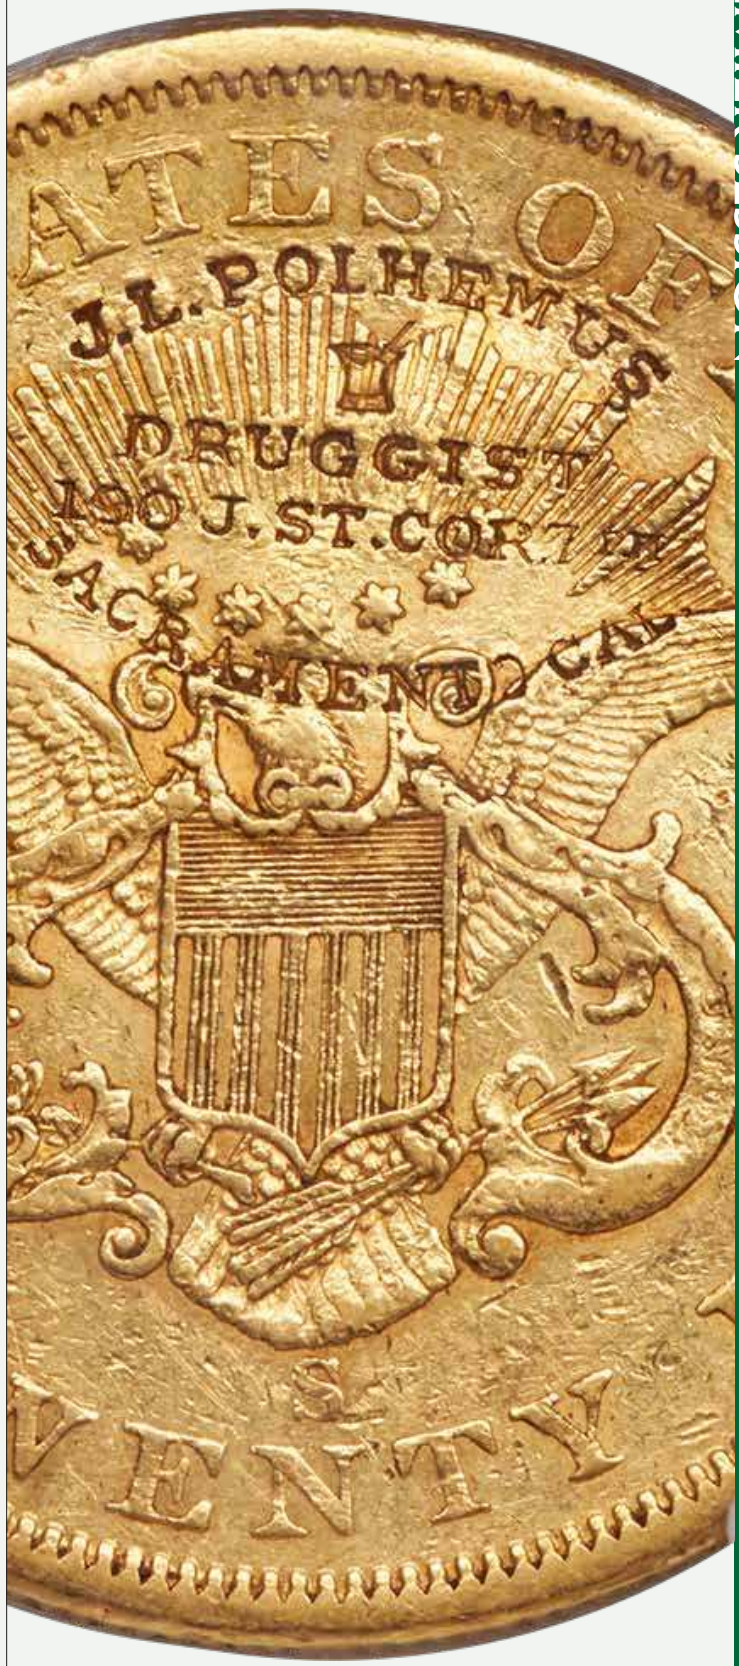

3345 **1795 Flowing Hair Half Dollar, 2 Leaves, O-102, T-26, R.4 — Private Countermarks — NGC Details. VF.** Tompkins Die State 1/1. Original medium-gray fields surround light-gray devices on this attractively counterstamped Flowing Hair half dollar. The dual counterstamps of "B. BROWN." and "C.D. PARKS." are not necessarily related one to the other in business or other purpose, and neither mark is listed in the Brunk or Rulau references. Still, these are well-made marks on an attractive, early type coin and sure to be in demand among counterstamp specialists.
Ex: U.S. Coin Auction (Superior, 9/1997), lot 1612.

1798 Bust Dollar, B-4, BB-92, XF40
Enigmatic S.C. Kingman Counterstamp

3346 **1798 Silver Dollar, Large Eagle, Knob 9, 5 Vertical Lines, B-4, BB-92, R.4, XF40 NGC. S.C. Kingman Counterstamp. Brunk K-221, Rulau HT-458A.** Bowers Die State I. Classified in Rulau as from the Hard Times era based on the presence of this unusual style counterstamp on an 1837 Hard Times token. The tiny, script counterstamp is a letter style seldom seen among counterstamped coins. Dr. Brunk thought it to be a jeweler's mark, while Rulau presents the interesting theory that it may be the mark of an early coin collector, who personalized his coins. All of the S.C. Kingman marks are seen on collector type coins, some of them pre-1800 such as this 1798 dollar. Although today's collectors would be aghast, on occasion early collectors counterstamped coins in their collection as a protective measure against theft or substitution (or simply for vanity). We have not seen this counterstamp before on a Bust dollar, nor is it listed in either reference. The host coin is attractive with sharp definition and pleasing, smooth silver-gray surfaces.

1857-S Twenty Dollar Gold Piece, Original XF45
Historic J.L. Polhemus Counterstamp
The Famous Van Ormer Specimen

3347 **1857-S Double Eagle — Counterstamped J.L. POLHEMUS — XF45 NGC. Brunk P-563, M-CALIF-1M.** James Lozier Polhemus was a New York City and Paterson, New Jersey son of a shoemaker. He arrived in Sacramento in 1849 and set up a pharmacy across from the Magnolia Saloon. Soon, he moved to 190 J. Street, corner of 7th Street, where the pharmacy flourished until his death in 1866. Thereafter until 1874, his wife ran the business. Polhemus was reported to be the "oldest established legitimate druggist in the city."

The pharmacy was open 24 hours a day and advertised all goods usually offered by druggists, plus paints, oils, alcohol, kerosene, and burning fluid, perfumes and cosmetics, fancy articles, and patent medicines. All purchases were done on a cash basis, with Polhemus applying his counterstamp on virtually every silver or gold coin that passed through his till. No copper or nickel pieces were imprinted with his distinctive curved mark, a pictorial mortar and pestle surrounded by curved lettering. (Other Polhemus contemporaries counterstamped a variety of gold denominations and Territorial gold pieces, including the dentist W.W. Light, San Francisco saloon-keeper J.T. Jones, blacksmith N. Talbot from Shaw's Flat, California, and the Syracuse, New York merchants Stone & Ball. But none of those counterstamps are on Liberty twenties.)

When this memorable double eagle crossed the block in the 1985 Van Ormer sale, the counterstamp was thought to be unique on a twenty dollar gold piece and the only Polhemus counterstamp on any gold coin, which proved true until a few counterstamped double eagles with the Polhemus imprint were recovered from the *S.S. Central America*. In December 2000, one of the seawater double eagles with the Polhemus counterstamp brought $48,300 in a Christies auction.

The present coin pre-dates any shipwreck recoveries and it is in original, Choice XF circulated condition from the old West. As are all Polhemus pieces, the counterstamp is carefully applied where it is most prominent on the coin — here, centered above the eagle, its top lettering aligned with the rays. Partially lustrous yellow-gold surfaces show only tiny marks and no major abrasions. This coin remains an exceedingly important counterstamp and the highlight of any specialized collection. The Van Ormer auction ticket and its former custom foil-stamped, screw-type plastic holder measuring 6 in. x 5 in. accompany the lot.

Ex: David Schenkman; Ray Byrne; The Roy H. Van Ormer Collection (Bowers and Merena, 9/1985), lot 2804.

1861 Liberty Double Eagle, MS63
First Defenders Medal Obverse Impression

3348 **1861 Liberty Double Eagle — First Defenders Medal Obverse Impression — MS63 NGC.** Fort Sumter was fired upon for the first time on April 12, 1861. President Lincoln issued a proclamation on April 15, requesting a militia to fight the newly formed Confederate States of America. The first volunteer force of 475 men arrived at Washington, D.C. on April 18. They were the Philadelphia First Defenders, consisting of units from Pottsville, Reading, Lewiston, and Allentown. In 1891, the Pennsylvania Legislature ordered medals for the First Defenders, one for each of the men or his designated heir. The medals were struck by the Philadelphia Mint during the tenure of Superintendent Oliver Bosbyshell, one of the First Defenders. The present lot is an 1861 Liberty twenty bearing a sharp uniface impression from the obverse die for the Philadelphia First Defenders medal of honor. The impression is well-centered between the stars and date, and gives the coin a somewhat concave appearance. The overstruck portrait of Liberty is faint but unmistakable. The double eagle reverse is slightly flattened, reminiscent of the Confederate half dollar Scott restrikes on Federal 1861 halves. Presumably unique, and recently the subject of a September 24, 2018 *Coin World* article.

1898-S Double Eagle, AU Sharpness
Interesting 'SKT' Countermark

3349 **1898-S Double Eagle — Private Countermark — NGC Details. AU.** A small hallmark — "SKT" in raised letters within a rectangular depression — exists on the reverse, punched twice below the eagle's left wing, and boldly punched once below the right wing. The obverse shows a small raised area opposite the deepest punch, with tiny abrasions but no other marks of consequence. Soft luster remains throughout the briefly circulated, yellow-gold surfaces. Any countermark on a gold coin is rare, and this unlisted bar punch may be unique on a twenty dollar gold piece.

End of Session One

SESSION TWO

COLONIALS

3350 **1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays — Planchet Flaw — PCGS Genuine. Unc. Details. N. 13-X, W-6855, R.2.** An approximately rectangular planchet flaw over the W in WE measures 2 x 3 mm. A smaller flan flaw is noted beneath the left point of the sundial blade. Granular areas accompany the 17 in the date and the reverse margin at 11:30. An evenly struck and unabraded lavender-brown Bank of New York example. Listed on page 99 of the 2019 *Guide Book*.

3351 **1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, MS62 Brown NGC. N. 13-X, W-6855, R.2.** This plentiful Bank of New York Hoard variety is identified, in part, by the vertical die crack at 6 o'clock on the reverse. The obverse shows the usual heavy ring clash marks. The strike is slightly uneven, but most details are sharp and each side displays appealing chocolate-brown color. A lovely Uncirculated example of this important type. Listed on page 99 of the 2019 *Guide Book*. NGC ID# AX5E, PCGS# 883

HALF CENTS

1794 C-1a, B-1a Half Cent, VF30
Likely the Large Edge Letters Variant

3352 **1794 Normal Head, C-1a, B-1a, R.3, VF30 PCGS.** The holder precludes edge identification, but more likely the scarce Large Letters Edge than the very rare Small Letters Edge variety. Moderately worn with generally smooth chocolate-brown fields, though several apparent abrasions are present on Liberty's well-defined portrait. Our EAC grade Fine 15.
Ex: FUN Signature (Heritage, 1/2009), lot 140, which realized $2,760. NGC ID# 2223, PCGS# 35018 Base PCGS# 35015

1795 Half Cent, VF25
Lettered Edge, C-1

3353 **1795 Lettered Edge, C-1, B-1, R.2, VF25 PCGS.** Manley Die State 1.0. C-1 attains its own *Guide Book* listing as the Lettered Edge, normal date, With Pole variety. A nicely defined walnut-brown Liberty Cap half cent. The lightly brushed surfaces show only trivial contact, along with minor build-up near the fraction and a hint of field verdigris near the chin. Our EAC grade Fine 15. NGC ID# 2224, PCGS# 35067 Base PCGS# 1009

1809 Half Cent, MS64 Brown
C-3, B-4

3354 **1809 C-3, B-4, R.1, MS64 Brown PCGS.** Manley Die State 2.0. The date is widely spaced with the curl mostly above the 0. Cohen-3 is the most collectible variety for the year in mint condition. Dentilation is uneven on the obverse and mostly gone on the reverse. Central design detail remains strong throughout this coppery-brown near-Gem. Minor carbon spotting occurs on each side. Our EAC grade AU55. NGC ID# 222P, PCGS# 35224 Base PCGS# 1123

3355 **1828 13 Stars, C-3, B-2, R.1, MS64 Red and Brown PCGS. CAC.** Manley Die State 1.0. Closer to Red than Brown, though Liberty's cheek has mellowed to steel-gray. Lustrous and unabraded with a good strike except on the left-side stars. One small spot on the field near the chin. Housed in a first-generation "rattler" holder. Our EAC grade MS63. CAC: 16 in 64, 3 finer (10/18). NGC ID# 222V, PCGS# 35262 Base PCGS# 1148

LARGE CENTS

1793 Chain Cent, Good Details
S-3, B-4, AMERICA

3356 **1793 Chain, AMERICA, S-3, B-4, Low R.3 — Repaired — PCGS Genuine. Good Details.** This Chain cent is heavily pitted. The entire obverse has been reengraved. Close inspection shows where the original straight bust line would be versus the curved alteration. The date and LIBERTY have also been added. This is an affordable survivor from the first year of issue and an important type in American numismatics. Our EAC grade Fair 2.
Ex: ANA Signature (Heritage, 8/2015), lot 7055, where it brought $2,232.50.

1793 Liberty Cap Cent, S-13, Fair 2

3357 1793 Liberty Cap, S-13, B-20, Low R.4, Fair 2 PCGS. Just enough of the reverse remains for positive identification as the die that was used for S-13, S-14, S-16, and NC-6. There is no trace of the bisecting crack that always appears on S-14, and the tops of LIBERTY are complete, eliminating S-16. The spacing of LIBERTY confirms that this piece is S-13. Although well worn and lightly cleaned at one time, this attractive example has no imperfections aside from a few scattered and trivial marks. Our EAC grade Basel State 1. NGC ID# 223L, PCGS# 35489 Base PCGS# 1359

3358 1794 Head of 1794, S-28, B-10, R.2 — Environmental Damage — PCGS Genuine Secure. AU Details. A splendidly detailed mahogany-brown cent. The obverse is granular and the reverse is microgranular. Abrasions are essentially absent. Within the four-year Liberty Cap type, the 1793 is rarest and the 1795 is the most available. Our EAC grade Fine 15.

3359 1794 Head of 1795, S-67, B-59, R.3, VF25 PCGS. Breen Die State IV. Sheldon-67 is often attributed by the "beard" clash mark beneath the jaw. A nicely defined mahogany-brown early cent. Lightly abraded overall, though the portrait shows a few small ticks. Design recesses exhibit moderate build-up, and the obverse has a small spot at 3:30. Our EAC grade Fine 12. NGC ID# 223R, PCGS# 35684 Base PCGS# 1365

3360 1794 Head of 1795, S-70, B-62, R.2, VF30 PCGS. Breen Die State II. The obverse die crack between T and Y continues across the forehead to the back corner of the eye and on to the cheek, and may continue farther, although it is obscured by wear. The pleasing medium olive and steel surfaces display only inconsequential marks. Our EAC grade Fine 15.
Ex: Houston Signature (Heritage, 12/2008), lot 39, which realized $2,731.25. NGC ID# 223R, PCGS# 35693 Base PCGS# 1365

3361 1796 Liberty Cap, S-87, B-8, R.3, Fine 15 PCGS. A deep walnut-brown final-year Liberty Cap cent. The obverse field is buckled near the 6 in the date, but no cracks are apparent. The surfaces are virtually unabraded and evenly microgranular. Liberty's neck curls show ample detail. Our EAC grade VG8. NGC ID# 223V, PCGS# 35768 Base PCGS# 1392

3362 1798 Second Hair Style, S-174, B-35, R.2, XF45 PCGS. A deep brown example with traces of mahogany-red in the recesses of the design. Liberty's hair is well-struck though the lower-obverse and upper-reverse show incompleteness. The unmarked surfaces have small spots on the N in ONE and inside the left ribbon loop. Our EAC grade VF25. NGC ID# 2244, PCGS# 36092 Base PCGS# 1434

3363 1802 S-230, B-8, R.1, XF45 PCGS. Breen Die State VIII. Prominent die cracks on the upper reverse, and die wear on the right obverse field, allow prompt attribution of this available Sheldon variety. The medium brown surfaces are generally pleasing, despite minor granularity near OF and above the N in ONE. Our EAC grade VF25. NGC ID# 224E, PCGS# 36302 Base PCGS# 1470

1803 S-255, B-14 Cent, AU53
Small Date and Fraction

3364 1803 Small Date, Small Fraction, S-255, B-14, R.1, AU53 PCGS Secure. Breen Die State I with no visible clash marks or die cracks on either side. This attractive cent exhibits splendid, semi-glossy olive-brown surfaces and wispy blue overtones. Scattered marks on each side are inconsequential. Our EAC grade VF35. NGC ID# 224G, PCGS# 36380 Base PCGS# 1482

1851/81 Cent, MS65 Brown
N-3, Early Die State

3365 1851/81 N-3, R.1, MS65 Brown PCGS Secure. Grellman Die State a. Horizontal die lines in the field are readily apparent around the date. This obverse features 51 repunched over an erroneous and inverted 18. The surfaces of this Gem are glossy reddish-brown, but the hidden areas retain a pleasing amount of mint red color. Detail on the portrait and wreath is good. Our EAC grade MS63. Population: 12 in 65 Brown, 4 finer in this category (9/18). NGC ID# 226H, PCGS# 400138 Base PCGS# 1895

3366 1852 N-18, R.3, MS64 Red PCGS. Die State a, with the "dash" die line plainly visible at the dentils beneath the 1 in the date. Both sides of this near-Gem display sharp motifs and frosty cartwheel luster. The preservation is superb aside from scattered pepper specks on each side, including a couple of prominent ones between the UN in UNITED and below the first S in STATES. Our EAC grade MS64. Population (all varieties included): 29 in 64 (1 in 64+) Red, 24 finer (9/18). PCGS# 147277 Base PCGS# 1900

3367 1855 Upright 55, N-4, R.1, MS66 Red and Brown NGC. Considerable orange color remains within the design element recesses. This Premium Gem is well-struck, though the upper stars are a trifle soft in the centers. The surfaces are remarkably clean without any mentionable abrasions. A moderate planchet void is apparent above the N in CENT. Our EAC grade MS62.
Ex: Long Beach Signature (Heritage, 2/2005), lot 5167, where it brought $977.50. NGC ID# 226M, PCGS# 46953 Base PCGS# 1908

FLYING EAGLE CENTS

3368 1857 MS64 PCGS Secure. CAC. The eagle, wreath, and legends on each side exhibit crisp definition. Thin streaks of reddish-copper toning appear over lustrous, bronze-gold surfaces. Small ticks, including a couple on 57 and ON, are generally of no consequence. Eye appeal and quality are excellent, garnering the CAC approval sticker. NGC ID# 226P, PCGS# 2016

1858/7 Flying Eagle Cent, AU55
Snow-1, FS-301, *Guide Book* Variety

3369 **1858/7 Large Letters, Snow-1, FS-301, AU55 PCGS.** Die stage A. A raised triangular die flaw above the first 8 in the date is diagnostic. Some specialists believe it to be the remnant of a previously punched 1. The eagle's wing below OF is barely attached, and the top of an errant 7 is clear above the second 8 in the date. Rick Snow, who included an image of the variety on the cover of the second edition of his seminal reference, writes: "This is typically collected as part of the basic set and is under tremendous collector demand." Still lustrous, minimally circulated surfaces show shades of copper and bronze gold. The right sides of the obverse and reverse are incompletely struck. In an old green label holder. NGC ID# 2277, PCGS# 37383 Base PCGS# 2022

INDIAN CENTS

3370 **1859 MS64 PCGS. CAC.** This is a luminous chestnut-brown near-Gem with golden luster in the fields. The design elements are well-struck and eye appeal is outstanding for the grade, as the CAC endorsement affirms. The Laurel Wreath reverse was used only in 1859, the debut year of the Indian cent. NGC ID# 227E, PCGS# 2052

1860 Pointed Bust Cent, MS65
Scarce Transitional Subtype

3371 **1860 Pointed Bust, FS-401, MS65 NGC.** The Pointed Bust is a transitional subtype, as it was in use with the 1859 Laurel Wreath cent. It is scarce relative to its Rounded Bust successor. The present nicely struck Gem exhibits potent luster and consistent peach-gold color. One tiny spot beneath the jaw provides the sole imperfection. Census: 10 in 65 (1 in 65 ★), 2 finer (10/18). NGC ID# 227F, PCGS# 37393 Base PCGS# 2056

3372 **1861 MS66 PCGS Secure. CAC.** This Premium Gem enjoys the eye appeal of a freshly struck coin. Its glowing copper-gold surfaces radiate swirling mint luster and show no mentionable signs of contact. Each side is fully defined, including the ribbon diamonds and feathertips. PCGS has graded 13 finer submissions. CAC: 28 in 66, 4 finer (9/18). NGC ID# 227G, PCGS# 2061

3373 **1863 MS66 PCGS.** A spectacular Premium Gem representative of this popular issue, with sharply detailed design elements and well-preserved copper-red surfaces that are lustrous and appealing. Population: 78 in 66 (16 in 66+), 0 finer (9/18). NGC ID# 229D, PCGS# 2067

3374 **1863 MS66 PCGS Secure.** This attractive Premium Gem offers well-detailed design elements, with just a touch of softness on the feather tips, and well-preserved copper-red surfaces that radiate vibrant mint luster. Population: 78 in 66 (16 in 66+), 0 finer (9/18). NGC ID# 229D, PCGS# 2067

1865 Cent, MS66 Red and Brown
Fancy 5, Beautifully Preserved

3375 **1865 Fancy 5 MS66 Red and Brown PCGS Secure. CAC.** Both the Fancy and Plain 5 types are relatively available, this one being slightly more plentiful. The ribbon diamonds are clear and the other elements well-struck on this Red and Brown Premium Gem cent. Copper-orange color dominates, but shades of golden-brown, blue, and violet are also present. Lustrous and carefully preserved. Population: 9 in 66 Red and Brown, 0 finer (9/18). NGC ID# 227N, PCGS# 2083

3376 **1870 MS65 Red and Brown PCGS. CAC.** This sharp Gem displays mainly golden-orange coloration, but delicate chestnut-brown overtones earn a Red and Brown designation. This satiny CAC coin is sharp and devoid of bothersome abrasions. Population: 88 in 65 (8 in 65+) Red and Brown, 11 finer; 43 in 65 (3 in 65+) Red, 9 finer. CAC: 21 in 65, 4 finer (9/18). NGC ID# 227U, PCGS# 2098

3377 **1873 Closed 3 MS64 Red and Brown PCGS Secure.** The scarcer Closed 3 variety. This near-Gem Red and Brown coin displays mostly bright, copper-orange luster with a radiant cartwheel effect. Splashes of olive-brown toning along the upper obverse and lower reverse border prevent a Red designation. The strike is sharp and no bothersome abrasions are seen. NGC ID# 227X, PCGS# 2110

3378 **1873 Doubled LIBERTY, Snow-1, FS-101, VF20 PCGS.** LIBERTY exhibits prominent doubling, clearest on the L. Liberty's eye, mouth, and feather spines also exhibit doubling. A chocolate-brown example of the famous *Guide Book* Doubled Die Obverse variety. Free from remotely relevant marks, though the reverse exhibits minor verdigris near the arrowheads and the top of the shield. NGC ID# 227X, PCGS# 37504 Base PCGS# 2115

3379 **1880 Doubled Die Obverse, Clashed Reverse, Snow-1, FS-101, MS64 Red PCGS.** LIBERTY is only minutely die doubled, but the misaligned die clash through the E in ONE is dramatic. This sharply struck Choice cent has sea-green borders and rose-red centers. Both sides display a smattering of small russet freckles. PCGS# 37515 Base PCGS# 2138

3380 **1890 MS66 Red and Brown PCGS.** This spectacular Premium Gem displays sharply detailed design elements and well-preserved surfaces that radiate vibrant mint luster. The original red surfaces have mellowed to light brown in selected areas. Population: 5 in 66 Red and Brown, 0 finer (9/18). NGC ID# 228J, PCGS# 2176

3381 **1906 MS66 Red PCGS Secure.** A conditionally scarce Premium Gem Red example of this otherwise plentiful Philadelphia issue, showing satiny golden-orange luster and well-struck design elements. Eye appeal is pleasing. Population: 46 in 66 (2 in 66+) Red, 3 finer (9/18). NGC ID# 2293, PCGS# 2225

3382 **1908 MS66+ Red PCGS Secure.** More than 32 million Indian Head cents were manufactured at the Philadelphia Mint in 1908, yet only two examples are graded higher than this MS66+ at PCGS (9/18). Vibrant luster and eye-catching copper-orange color produce terrific visual appeal, matching the excellent technical quality of this bold Premium Gem. There are merely two tiny ticks on the cheek. NGC ID# 2295, PCGS# 2231

PROOF INDIAN CENTS

3383 **1859 PR64 PCGS.** This impressive Choice proof displays well-detailed design elements, with just a touch of softness on the feather tips. The well-preserved surfaces show a mix of original red and crimson patina, with reflective fields underneath. PCGS has graded 87 numerically finer examples (9/18). NGC ID# 2299, PCGS# 2247

3384 **1862 PR65 PCGS Secure.** A sharp Gem proof with glimmering fields and frosty devices. Tan-gold color shows little contrast but is yet appealing. A few small flecks appear around the date, seen only with a loupe. The proof 1862 Indian cent is seldom offered finer. Population: 86 in 65, 30 finer (9/18). NGC ID# 229C, PCGS# 2259

3385 **1862 PR65 PCGS Secure. CAC.** A sharply detailed Gem proof, from a mintage of 550 pieces, this coin exhibits well-preserved copper-red surfaces, with a few hints of crimson and hazily reflective fields. Population: 86 in 65, 30 finer. CAC: 15 in 65, 14 finer (9/18). NGC ID# 229C, PCGS# 2259

3386 **1872 PR65 Red and Brown PCGS Secure.** The original red surfaces of this spectacular Gem proof have mellowed to crimson and lilac in many areas but no mentionable distractions are evident. The design elements are sharply detailed throughout. Population: 90 in 65 (2 in 65+) Red and Brown, 15 finer (9/18). NGC ID# 229R, PCGS# 2304

3387 **1883 PR66+ Brown PCGS. CAC.** This Plus-graded Premium Gem exhibits razor-sharp definition on all design elements and the impeccably preserved chocolate-brown surfaces show highlights of lilac and crimson, with reflective fields underneath the patina. Population: 81 in 66 (7 in 66+) Brown, 26 finer. CAC: 22 in 66, 8 finer (9/18). NGC ID# 842U, PCGS# 2336

3388 **1903 PR66 Red and Brown PCGS. CAC.** Most of this Premium Gem proof displays bright yellow-gold color that transitions to orange and then cherry-red. Crescents of pine-green and violet toning along the upper obverse and lower reverse rim appear to account for the Brown aspect of the color designation. This modestly contrasted proof is fully struck and has only a few tiny specks. Population: 42 in 66 (4 in 66+) Red and Brown, 5 finer; 42 in 66 (2 in 66+) Red, 13 finer; 2 in 66 Red Cameo, 1 finer. CAC: 11 in 66, 4 finer (9/18). NGC ID# 22AS, PCGS# 2397

LINCOLN CENTS

3389 **1909-S VDB MS63 Red and Brown PCGS Secure.** A few light abrasions limit the numeric grade, but this Select 1909-S VDB cent is still eye-appealing. Most of each side displays satiny copper-orange and golden luster, although small bluish-green overtones on the high points of Lincoln's portrait prevent a full Red designation. NGC ID# 22B2, PCGS# 2427

3390 **1909-S VDB MS64 Red and Brown PCGS.** This Choice Red and Brown coin displays an attractive array of deep copper-red hues and olive-chestnut toning. The strike is sharp and no bothersome abrasions are seen. A few tiny specks are hardly noticeable. NGC ID# 22B2, PCGS# 2427

3391 **1909-S VDB MS65 Red and Brown PCGS.** Original copper-orange hues emerge in the fields from beneath chestnut-brown toning that tends to gravitate toward the centers. This Gem Red and Brown key-date cent is well-struck and shows no mentionable imperfections. NGC ID# 22B2, PCGS# 2427

1909-S VDB Cent, MS65 Red and Brown
Remarkable Mint Red Remains

3392 **1909-S VDB MS65 Red and Brown PCGS. CAC.** Take a close look at this coin at lot viewing. Is it Red and Brown? There is a remarkable amount of original red luster on this piece, which undoubtedly explains the CAC sticker, because it is definitely high-end for the grade. The strike is well brought-up and there are no objectionable abrasions and only the slightest flecks of carbon visible. NGC ID# 22B2, PCGS# 2427

3393 **1909-S VDB MS64 Red PCGS.** There are countless collectors for whom an Uncirculated 1909-S VDB cent with original Red surfaces would represent the pinnacle of collecting. This near-Gem boasts vibrant mint frost amid shades of copper and orange-gold. Every element of the design is well-rendered. Encapsulated in a first-generation "rattler" holder. NGC ID# 22B2, PCGS# 2428

1909-S VDB Cent, MS65
Glowing Mint Red

3394 **1909-S VDB MS65 Red PCGS.** Each side displays a fine woodgrain texture, a trait that is commonly seen on all S-mint 1909 cents, even Indian cents. The surfaces glow with original mint luster that is undiminished by the woodgrain texture. One mark on Lincoln's forehead is all that prevents an even higher grade designation. NGC ID# 22B2, PCGS# 2428

3395 **1909-S MS66+ Red PCGS Secure. CAC.** This sharp, high-end Red Premium Gem is virtually flawless, easily earning a CAC endorsement. Fire-orange and reddish-gold hues adorn each side, with no evident carbon spotting. The 1909-S Lincoln cent is scarce this fine and rare finer. NGC ID# 22B4, PCGS# 2434

3396 **1909-S/S S Over Horizontal S, FS-1502, MS66 Red PCGS Secure.** An early die state with the horizontal nature of the repunched mintmark more apparent than is usual for this popular first-year variety. A crisply struck and thoroughly lustrous high-grade example with smooth wood-grain surfaces. A strong lens shows the infrequent pinpoint fleck. NGC ID# 22B4, PCGS# 37645 Base PCGS# 92434

3397 **1911-S MS65 Red PCGS.** An orange-gold Gem with vibrant luster and an absence of marks. A few pinpoint flecks emerge beneath a loupe. A lower-mintage early San Francisco issue that is seldom encountered in full Red. Population: 67 in 65 (1 in 65+) Red, 17 finer (9/18).
Ex: Orlando FUN (Heritage, 1/2006), lot 156, which realized $2,070; Philadelphia Signature (Heritage, 8/2012), lot 3658, which realized $2,173.75. NGC ID# 22B9, PCGS# 2449

3398 **1914-D AU50 PCGS.** The 1914-D Lincoln cent is a low-mintage series key. This attractive AU specimen shows only light wear on the high points of the strongly impressed design elements and the pleasing olive-brown surfaces are lightly abraded. NGC ID# 84BX, PCGS# 2471

3399 **1917 MS66+ Red PCGS.** Fire-orange satin luster engulfs this carbon-free Premium Gem, while sharp design elements and excellent surface preservation promote strong eye appeal. This is a Registry Set contender. PCGS has Plus-graded only 13 Red Premium Gems and lists 23 Superb Gems finer (9/18). NGC ID# 22BS, PCGS# 2497

3400 **1917-D MS66 Red and Brown PCGS.** Every element of Victor David Brenner's design is fully rendered on this rich Red and Brown Premium Gem. Accents of rose-violet and golden-orange complement deep coppery surfaces. Mint luster is characteristically satiny. Population: 4 in 66 Red and Brown, 0 finer in this category (9/18). NGC ID# 22BT, PCGS# 2499

1917-D Cent, MS65+ Red
Registry Set Contender

3401 **1917-D MS65+ Red PCGS Secure.** Hints of pale rose enliven the central obverse on this otherwise copper-orange Gem. No carbon spotting is seen, which is every bit as important on this coin as the lack of bothersome abrasions. The Plus designation endorses the high quality within the grade. Although die erosion is visible on each side, this piece is well-struck and eye-appealing. Population: 52 in 65 (4 in 65+) Red, 7 finer (9/18). NGC ID# 22BT, PCGS# 2500

1918-D Cent, MS65 Red
Rare Any Finer

3402 **1918-D MS65 Red PCGS.** This is an attractive copper-orange Gem with strong obverse detail and a slightly softer reverse (struck from worn dies, as is often the case). Each side exhibits a couple of small carbon spots and a few scattered flecks that determine the grade. There are merely 10 finer submissions at PCGS and none at NGC — an important consideration for Registry enthusiasts (10/18). NGC ID# 22BW, PCGS# 2509

3403 **1920-D MS65 Red PCGS. CAC.** A lustrous pumpkin-gold Gem of this conditionally challenging early branch issue. The strike is good, and both sides are exceptionally free from marks. Carbon is virtually absent, though the upper reverse displays a hint of russet color. Certified in a first-generation "rattler" holder. CAC: 17 in 65, 3 finer (9/18). NGC ID# 22C4, PCGS# 2527

1920-S Cent, MS64+ Red
Few Red Examples Known This Fine

3404 **1920-S MS64+ Red PCGS.** Although readily available in lesser grades, Choice Uncirculated 1920-S cents are scarce and Gem examples are unarguably rare. This Plus-graded near-Gem representative is suitable for any advanced Lincoln cent collection. Gleaming red-orange surfaces show occasional carbon flecks that suggest originality, although it is the strike that sets this 1920-S apart from most examples. Even the high points of the portrait are sharp. A few tiny marks are the only grade-limiting factors. Population: 2 in 64+ Red, 16 finer (9/18). NGC ID# 22C5, PCGS# 2530

1922 No D Cent, AU50
FS-401, Strong Reverse

3405 **1922 No D, Strong Reverse, FS-401, AU50 PCGS Secure.** The need to coin 1922 Peace dollars in great quantity at Philadelphia precluded production of cents at that facility, granting greater significance to the present mint error. At Denver, an obverse die was lapped, removing the mintmark. TRUST and the final 2 in the date are much sharper than the rest of the obverse legend, characteristic of this desirable *Guide Book* variety. All of the reverse is bold. A smooth mahogany-brown example that shows only inconsequential indications of contact. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

3406 **1930-S MS66+ Red PCGS.** A high-end, Registry-grade example of this San Francisco issue, showing frosted fire-orange luster and bold design elements. This carbon-free coin exhibits no bothersome abrasions and has great eye appeal. Finer 1930-S cents are rarities. Population: 16 in 66+ Red, 8 finer (9/18). NGC ID# 22CZ, PCGS# 2611

3407 **1930-S MS66+ Red PCGS Secure. CAC.** The 1930-S is occasionally available in MS66 Red, but Plus-graded examples and finer pieces are rare. This CAC-endorsed MS66+ Red coin will appeal to Registry Set collectors. Fiery-orange luster is luminous as it showcases well-struck design elements. Population: 16 in 66+ Red, 8 finer. CAC: 23 in 66, 1 finer (9/18). NGC ID# 22CZ, PCGS# 2611

3408 **1931-D MS65 Red PCGS Secure. CAC.** Lost in the shadow the 1931-S is the 1931-D, an issue that proves surprisingly elusive at this level and scarce any finer. PCGS reports 49 higher grading events (9/18). Satiny mint luster glimmers over the coppery surfaces of this well-struck Gem. Minimally marked for the grade. NGC ID# 22D3, PCGS# 2617

1932 Cent, MS67 Red
Top-Grade Registry Candidate

3409 **1932 MS67 Red PCGS.** This shimmering Superb Gem is among the finest 1932 Lincoln cents certified, and its sharp design elements and pristine, frosted luster add to the appeal. Each side displays original copper-orange color and is devoid of carbon spotting. The 1932 is scarce in this grade and highly sought-after by Registry Set collectors. Population: 41 in 67 (3 in 67+) Red, 0 finer (9/18). NGC ID# 85ZB, PCGS# 2623

1935-D Cent, MS67+ Red
Only One Coin Graded Higher

3410 **1935-D MS67+ Red PCGS.** Consider that this MS67+ was one of 47 million Lincoln cents struck at the Denver Mint in 1935. Now consider that only a single 1935-D cent is graded finer at both PCGS and NGC combined (10/18). Vibrant orange-gold surfaces radiate satiny mint luster. The obverse is strong, while the reverse was struck from worn dies and shows softness around the peripheries. NGC ID# 86BY, PCGS# 2644

3411 **1955 Doubled Die Obverse, FS-101, AU58 PCGS Secure.** An olive-brown Borderline Uncirculated key date cent with glimpses of faded red in design recesses. Well struck and only lightly abraded. The celebrated variety with an unprecedented spread across all obverse legends. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

3412 **1955 Doubled Die Obverse, FS-101, MS63 Brown PCGS.** A minimally abraded and attractive chocolate-brown and sea-green example of the most famous of all doubled die varieties. All obverse legends exhibit a broad spread that perplexed collectors during the 1950s, an era when knowledge about the die-making process was closely held. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

3413 **2009-D Presidency MS69 Red NGC.** This coin features the final reverse of the 2009 bicentennial Lincoln cent series. The design elements are razor sharp throughout and the blazing red surfaces are just one tick away from perfection. Vibrant mint luster adds to the terrific eye appeal. NGC ID# 22KK, PCGS# 407878

PROOF LINCOLN CENTS

3414 **1909 PR66 Red NGC.** A spectacular Premium Gem example of this first-year matte proof issue, with lustrous original red surfaces that have mellowed to light brown in a few areas. The design elements are sharply detailed throughout. Census: 9 in 66 (1 in 66+) Red, 1 finer (10/18). NGC ID# 22KS, PCGS# 3305

3415 **1911 PR65 Red NGC.** A delightful Gem representative of the matte proof format, this coin exhibits razor-sharp definition on all design elements and the well-preserved original red surfaces are lustrous and appealing. Census: 5 in 65 Red, 1 finer (10/18). NGC ID# 22KU, PCGS# 3311

3416 **1914 PR64 Red PCGS.** Matte proof Lincoln cents have tiny mintages relative to all other proof dates in the long-running series. This intricately struck specimen displays unabraded apple-green and pumpkin-gold surfaces. A few tiny spots are noted near ONE CENT. Certified in an old green-label holder.
Ex: FUN Signature (Heritage, 1/2017), lot 8469, which realized $1,292.50. NGC ID# 22KX, PCGS# 3320

3417 **1915 PR65 Red and Brown PCGS.** Due to ever decreasing interest in the matte finish of the new proof coins, sales of proof cents continued to gradually decline in 1915, and high-grade survivors that exhibit any amount of red color are elusive. This piece displays full definition on all design elements, with blended orange-gold, lilac, and burgundy-brown hues over each side. Close examination reveals some faint, scattered carbon flecks on the obverse, though the eye appeal remains pleasing. Population: 53 in 65 (1 in 65+) Red and Brown, 33 finer (9/18). NGC ID# 22KY, PCGS# 3322

3418 **1916 PR63 Red and Brown NGC.** Final year of the matte proof finish, only 1,050 pieces were struck for collectors. The strike is intricately detailed, as expected, and there is a significant amount of red mint luster remaining on each side with a speckling of carbon overall. NGC ID# 22KZ, PCGS# 3325

3419 **1936 Type Two — Brilliant Finish PR65 Red PCGS Secure.** The U.S. Mint offered proof sets commercially in 1936 for the first time since 1916. This delightful Gem exhibits razor-sharp definition on all design elements and the well-preserved original red surfaces include deeply mirrored fields. PCGS has graded 65 numerically finer examples (9/18). NGC ID# 22L3, PCGS# 3335

3420 **1936 Type Two — Brilliant Finish PR65 Red NGC. CAC.** Fire-red and lilac-gold hues adorn this Gem Type Two proof, with full depth of mirroring in the fields and sharp definition on the satiny devices. No cameo contrast is apparent, although such is almost never seen on this issue. The year 1936 saw the first coinage of proof cents since 1916, when the matte finish was abandoned by the Mint. NGC ID# 22L3, PCGS# 3335

1936 Lincoln Cent, PR66 Red
Only Two Finer Red Coins at PCGS

3421 **1936 Type Two — Brilliant Finish PR66 Red PCGS Secure.** The Philadelphia Mint resumed its commercial proof set offerings in 1936, after a two decade hiatus. This Delightful Premium Gem exhibits razor-sharp definition on all design elements and deeply reflective fields. The original red surfaces are impeccably preserved and overall eye appeal is terrific. Population: 63 in 66 (5 in 66+) Red, 2 finer (9/18). NGC ID# 22L3, PCGS# 3335

1953 Cent, PR67 Red Deep Cameo
Top-Level PCGS Registry Coin

3422 **1953 PR67 Red Deep Cameo PCGS.** This dramatically contrasted copper-orange Deep Cameo proof showcases a full strike and is essentially free from contact. Deep Cameos are decidedly rare at this level, and none are finer at PCGS. This piece is essential for a high-ranking Registry Set. Population: 10 in 67 (1 in 67+) Red Deep Cameo, 0 finer (9/18). NGC ID# 22LD, PCGS# 93368

1990 No S Cent, FS-101, PR66 Red Deep Cameo
Among the *100 Greatest U.S. Modern Coins*

3423 **1990 No S, FS-101, PR66 Red Deep Cameo PCGS.** The 1990 No S Lincoln cent proof is ranked 13th in Schechter and Garrett's *100 Greatest U.S. Modern Coins* (2011). It is the only missing mintmark variety in the series and highly collectible as such. Textured, deeply reflective fields and thickly frosted motifs showcase light coppery-gold color and produce dramatic contrast. A key date for the specialist. NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

TWO CENT PIECES

3424 **1864 Small Motto, FS-401, MS64 Red and Brown PCGS.** An olive-green, golden-tan, and steel-blue Choice Civil War two cent piece. The short-lived Small Motto subtype, which is much more elusive than its Large Motto counterpart. One minor fingerprint noted near the date. Certified in a first-generation "rattler" holder. NGC ID# 22N8, PCGS# 38233 Base PCGS# 3580

3425 **1871 MS65 Red and Brown PCGS.** This sharply struck and satiny Gem is pumpkin-gold over both sides, and close to a Red designation. A carbon speck is noted at 6:30 on the reverse. A lower-mintage date, and scarce in better Mint State grades. Population: 67 in 65 (2 in 65+) Red and Brown, 6 finer (9/18). NGC ID# 22NF, PCGS# 3610

3426 **1872 Doubled Die Obverse, FS-101 — Altered Color — NGC Details. Unc.** TRUST is die doubled north. The variety is undesignated on the NGC holder. Mintages dropped every year of the two cent piece series, and the 1872 has a business production of just 65,000 pieces. Uncirculated examples are rare. This unworn example is nicely struck and nearly unabraded. The obverse is sea-green and chestnut-gold. The reverse has a brick-red border and a deep lavender center.

PROOF TWO CENT PIECES

1864 Large Motto Two Cent
PR65 Red and Brown Cameo

3427 **1864 Large Motto PR65 Red and Brown Cameo NGC.** The Large Motto is the usual variant for the inaugural-year proof issue. This is a strongly reflective specimen, largely reddish-gold with mottled brown overtones and a distinct Cameo effect. The relief elements are needle-sharp, and there are no mentionable spots or marks. Excellent eye appeal.
Ex: ANA Signature (Heritage, 4/2006), lot 171; Baltimore Signature (Heritage, 3/2009), lot 362, where it realized $2,990.00. NGC ID# 274T, PCGS# 83623

3428 **1865 PR65 Red and Brown Cameo NGC.** Plain 5. This handsome Gem is approximately evenly divided between orange-gold and violet-red, with the latter color most prominent on the lower reverse. Boldly struck and undisturbed by contact or carbon.
Ex: Central States Signature (Heritage, 4-5/2009), lot 1312, where it brought $1,265.

3429 **1868 PR65 Red and Brown NGC.** The well-preserved original red surfaces of this delightful Gem have mellowed to crimson and lilac in some areas. The design elements are sharply detailed and the fields are hazily reflective. From a proof mintage of 600 pieces. Census: 39 in 65 Red and Brown, 29 finer (10/18). NGC ID# 274X, PCGS# 3637

3430 **1871 PR65 Red and Brown PCGS. CAC.** A sharply struck Gem with a beautiful orange-gold obverse. The reverse is equally undisturbed but displays variegated chestnut and lavender toning. TRUST is die doubled counterclockwise, as seen on all proofs for the date. Housed in a first generation "rattler" holder. NGC ID# 22NH, PCGS# 3646

3431 **1871 PR64 Red PCGS. FS-102.** An intricately struck near-Gem without evidence of carbon or contact. The fields display uniform peach-gold color. TRUST is nicely die doubled, characteristic of the proof date. Encased in a first-generation "rattler" holder.
Ex: Central States Signature (Heritage, 4/2013), lot 8544, which realized $1,057.50. NGC ID# 22NH, PCGS# 3647

3432 **1872 PR65 Red and Brown NGC.** The very low commercial mintage of the 1872 increases demand for proofs as a high-grade substitute. This fully struck specimen displays attractive rose-red, orange-gold, and lime-green hues. A small spot is noted near the left fletching. Certified in a former generation holder. NGC ID# 2752, PCGS# 3649

1873 Two Cent, PR64 Red and Brown
Closed 3, Attractive Color

3433 **1873 Closed 3 PR64 Red and Brown NGC.** The reported mintage of 600 proofs struck in 1873 comprises so-called originals with a Closed 3 in the date and alleged restrikes with an Open 3. This flashy near-Gem displays deep copper-orange color with blue, cherry-red, and bronze-gold accents. The fields are flashy and reflective, producing moderate contrast. NGC ID# 2753, PCGS# 3652

1873 Open 3 Two Cent, PR65 Red and Brown
Scarce Restrike of This Final Year Issue

3434 **1873 Open 3 PR65 Red and Brown PCGS.** The Open 3 restrikes had a slightly lower mintage than their original counterparts, and in some grades, the former command a significant premium over the latter. This lovely Gem has slivers of unfaded copper color on the reverse, though much of the piece shows dusky orange or violet hues. Crisply struck with well-preserved surfaces and minimal carbon. Population: 23 in 65 Red and Brown, 19 finer (9/18).
Ex: Central States Signature (Heritage, 5/2007), lot 1355, where it brought $3,737.50. NGC ID# 2754, PCGS# 3655

THREE CENT SILVER

1851-O Three Cent Silver, MS65
Ex: Richmond Collection

3435 **1851-O MS65 NGC.** Ex: Richmond Collection. Three cent silver coins were introduced in 1851. They were sold by the Treasury "in lots of 100 coins for any other United States coins of gold or silver" or for Spanish fractional pieces at the full market rate, according to Carothers. This largely brilliant and satiny trime shows traces of gold and lavender toning mainly on the reverse. Typically struck but void of major flaws.
Ex: Richmond Collection, Part II (David Lawrence Rare Coins, 11/2004), lot 1114. NGC ID# 22YY, PCGS# 3665

3436 **1852 MS66 PCGS Secure.** Some weakness is noted in the recesses of the shield, but this Premium Gem 1852 three cent silver piece is otherwise well-struck. Frosty luster shimmers with a light golden hue, while the borders reveal areas of deeper russet toning. PCGS lists 26 finer submissions (9/18). NGC ID# 22YZ, PCGS# 3666

3437 **1852 MS67 PCGS Secure.** Second year of issue for this diminutive coin, this is a remarkably lustrous example. The surfaces are brilliant throughout with the most remarkable thick mint frost that rolls around each side as it is tilted beneath a light. Heavy metal flow is evident on each side from extensive die usage. Population: 24 in 67 (1 in 67+), 2 finer (9/18). NGC ID# 22YZ, PCGS# 3666

3438 **1853 MS66 PCGS Secure. CAC.** Large quantities of three cent silver coins were manufactured during the denomination's first few years of issue, including 11.4 million coins in 1853. This Premium Gem maintains its original brilliance and soft, shimmering mint luster. The legends, shield lines, and stars are well-struck. Faint clashing appears at the centers. PCGS reports 14 finer submissions (9/18). NGC ID# 22Z2, PCGS# 3667

3439 **1861 MS66+ PCGS. CAC.** Fully struck and free of any obvious clash marks and showing bright, untoned, nearly unmarked surfaces, and a couple of faint handling marks in the upper-left obverse field. CAC: 26 in 66, 15 finer (9/18).
Ex: Central States Signature (Heritage, 5/2004), lot 5905, where it brought $1,523.75. NGC ID# 22ZA, PCGS# 3679

1863 Three Cent Silver, MS66
Condition Rarity in Finer Grades

3440 **1863 MS66 PCGS Secure.** Blended shades of lavender, sea-green, and amber toning blanket the well-preserved surfaces of this impressive Premium Gem, with a mix of satiny mint luster and prooflike reflectivity underneath. The design elements are sharply detailed throughout and overall eye appeal is outstanding. Population: 25 in 66 (2 in 66+), 6 finer (9/18). NGC ID# 22ZD, PCGS# 3682

3441 **1867 AU55 PCGS.** This impressive Choice AU specimen shows only light wear on the high points of the well-detailed design elements and the lightly abraded surfaces radiate satiny mint luster, with highlights of amber and lavender toning. From a mintage of just 4,000 pieces. Population: 12 in 55, 51 finer (9/18). NGC ID# 22ZH, PCGS# 3687

3442 **1871 MS64 NGC.** From a small mintage of 3,400 pieces, this impressive Choice example exhibits well-detailed design elements that show just a trace of softness on the central reverse. The lightly marked surfaces are blanketed in attractive shades of lavender-gray toning. Census: 30 in 64, 71 finer (10/18). NGC ID# 22ZM, PCGS# 3692

3443 **1871 MS66 PCGS Secure.** Hints of gold and bluish toning appear around the outer peripheries, while the interiors show delicate pearl-gray color. Trivial strike weakness is seen in the center of the shield, although the border stars are sharp. Both sides of this conditionally scarce three cent silver piece showcase deep prooflike mirroring in the fields. Population: 29 in 66 (3 in 66+), 13 finer (9/18). NGC ID# 22ZM, PCGS# 3692

PROOF THREE CENT SILVER

1862 Three Cent Silver, PR66
Impressive, Colorfully Toned Type Three Proof

3444 **1862 PR66 PCGS Secure. CAC.** With a mintage of only 550 pieces, the 1862 is a worthy representative of the Type Three design and a desirable Civil War era date. Peach-gold and aquamarine shades are evenly balanced throughout both sides, while the fields have watery-deep mirrors and a hint of contrast with the fully struck devices. There are no distractions of any consequence. PCGS reports just one numerically finer coin. Population: 16 in 66 (2 in 66+), 1 finer. CAC: 11 in 66, 3 finer (9/18). NGC ID# 27C9, PCGS# 3711

3445 **1869 PR66 PCGS Secure.** As business strike three cent silvers became increasingly irrelevant to the needs of commerce, collectors turned more and more to proofs. Yet, only 600 proofs were struck in 1869. This is one of the finer ones. Each side displays rich golden-rose interiors with deep blue scattered around the margins. Brightly mirrored fields flash strongly through the toning. Population: 34 in 66 (1 in 66+), 2 finer (9/18). NGC ID# 22ZR, PCGS# 3719

3446 **1870 PR65 PCGS Secure.** Rose-gold peripheries cede to deep aquamarine interiors on this Gem proof three cent silver. The strike is sharp and no bothersome contact marks are visible. Eye appeal is pleasing for the grade. NGC ID# 27CF, PCGS# 3721

PROOF THREE CENT NICKELS

3447 **1869 PR66 Deep Cameo PCGS. CAC.** Frosty design elements are set against a deeply mirrored backdrop, with only a few tiny strike-throughs (as made) on Liberty's cheek. The coin appears brilliant at first glance, though closer examination reveals a hint of golden color over each side. Population: 21 in 66 (4 in 66+) Deep Cameo, 2 finer. CAC: 19 in 66, 0 finer (9/18). NGC ID# 275P, PCGS# 93765

3448 **1869 PR66 Deep Cameo PCGS Secure. CAC.** This delightful Premium Gem proof exhibits sharply detailed design elements and deeply reflective fields that contrast profoundly with the frosty devices. The well-preserved surfaces are visited by delicate hints of pale jade toning. Population: 21 in 66 (4 in 66+) Deep Cameo, 2 finer. CAC: 19 in 66, 0 finer (9/18). NGC ID# 275P, PCGS# 93765

1877 Three Cent Nickel, PR66
High-End and Overtly Original

3449 **1877 PR66 NGC. CAC.** The proof-only 1877 three cent nickel stands out as the most challenging date in the series, as only 900 pieces were struck. This Premium Gem is overtly original with golden tones over nearly pristine nickel-gray surfaces. Obviously high-end for the grade. Housed in a former generation holder. Census: 62 in 66 (1 in 66+★), 6 finer. CAC: 29 in 66, 1 finer (10/18). NGC ID# 275X, PCGS# 3773

1879 Three Cent Nickel, PR68
Top-Grade Registry Coin

3450 **1879 PR68 PCGS Secure.** Available in lower grades, the 1879 proof three cent nickel is scarce in Superb Gem condition, and only a handful of pieces are known in PR68. This top-grade Registry coin displays fully struck design elements and a hint of cameo contrast. Delicate iridescence adorns the surfaces. Eye appeal is outstanding. Population: 4 in 68, 0 finer; 1 in 68 Cameo, 0 finer (9/18). NGC ID# 275Z, PCGS# 3775

1880 Three Cent Nickel, PR67 Cameo
Important Registry Opportunity

3451 **1880 PR67 Cameo PCGS Secure.** The 1880 is a better date in the series with only 21,000 circulation strikes. Proofs (3,955 pieces struck) are often secured instead by collectors unable to obtain high-grade business strikes. This Superb Gem Cameo specimen boasts glassy fields around frosty, fully struck motifs. Each side remains completely brilliant. Population: 12 in 67 (2 in 67+) Cameo, 0 finer (10/18). NGC ID# 5E5S, PCGS# 83776

SHIELD NICKELS

3452 **1866 Rays MS66 NGC.** The first-year issue in the Shield nickel series is the most popular among collectors for representing the With Rays type, which was struck only in 1866 and 1867. This Premium Gem displays vibrant satin luster with a hint of light champagne color. Some strike weakness is noted on the central shield. No finer examples of this issue are certified. Census: 24 in 66 (3 in 66+), 0 finer (9/18). NGC ID# 22NX, PCGS# 3790

3453 **1867 No Rays MS66 PCGS Secure.** The Rays design in 1866 taught the Mint two lessons: nickel is a hard alloy, and be careful of die opposition. It was this latter point that was responsible for the demise of the rays as they interfered with the complete filling of die details. This is a high-grade example of this second-year type with no reverse rays. It is predictably much sharper than most 1866 nickels. Additionally, it is brilliant and shows bright, satin-like mint luster. NGC ID# 22NZ, PCGS# 3794

3454 **1873 Open 3 MS65 PCGS.** A sharp Open 3 coin with satiny luster and no toning. The Gem-quality surfaces are free of distractions. As usual for the Shield nickel type, this piece displays a number of peripheral die cracks, mostly on the obverse. Finer Open 3 coins are rare. Population: 54 in 65 (10 in 65+), 12 finer (9/18). NGC ID# 22P8, PCGS# 3800

1874 Shield Nickel, MS66
Lustrous Top-Grade Example

3455 **1874 MS66 PCGS Secure. CAC.** Satiny luster glistens beneath light golden toning on this CAC-approved Premium Gem example. Detail is needle-sharp, and a small tick on the lower part of the 5 denomination is the only mentionable imperfection. Vibrant cartwheel luster engulfs each side. Peripheral die cracks are also apparent. The 1874 is a rarity this fine and unknown finer. Population: 23 in 66 (6 in 66+), 0 finer. CAC: 12 in 66, 0 finer (9/18). NGC ID# 22P9, PCGS# 3803

3456 **1879 AU55 PCGS.** From a mintage of just 25,900 pieces, the 1879 Shield nickel is scarce in high grade. This Choice AU representative shows traces of gray and gold toning over partially lustrous fields and sharp design elements, with few signs of surface contact.
Ex: Long Beach Signature (Heritage, 2/2012), lot 3248, which realized $1,610. NGC ID# 5KWK, PCGS# 3808

3457 **1879 MS62 PCGS.** All four numerals in the date are lightly repunched. An attractive late-date nickel with untoned, semireflective surfaces and several tiny planchet flaws, along with die striations that become evident under magnification. From a mintage of 25,900 coins.
Ex: Long Beach Signature (Heritage, 2/2009), lot 671, where it realized $1,840. NGC ID# 5KWK, PCGS# 3808

3458 **1881 MS61 PCGS. CAC.** The 1881 is a very low mintage date. Scattered marks are relatively minor for the grade. Apparently, CAC agreed when it stickered this coin. Faint golden accents appear over surfaces that show hints of semireflectivity. The olive leaves and star radials are crisp. Housed in a green label holder. CAC: 2 in 61, 23 finer (9/18). NGC ID# 276F, PCGS# 3811

3459 **1883/2 FS-301 MS62 NGC. CAC.** The most prominent of the five 1883/2 obverse dies. The underdigit 2 is almost entirely visible, located widely southwest of the 3. This is a well-struck and lustrous MS62 example with delicate golden-gray accents. The dies were moderately worn at the time of striking, showing cracks and flowlines on each side.
Ex: Long Beach Signature (Heritage, 9/2011), lot 3261, where it brought $3,680.00. NGC ID# 22PD, PCGS# 38416 Base PCGS# 3814

PROOF SHIELD NICKELS

1871 Shield Nickel, PR67
Registry Grade Specimen

3460 **1871 PR67 PCGS Secure.** Only 960 proof Shield nickels were struck in 1871 and few survivors can match the quality and eye appeal of the present coin. This delightful Superb Gem offers sharply detailed design elements throughout, with impeccably preserved surfaces that include hazily reflective fields. Both sides are visited by attractive shades of lavender, blue, and pale gold toning. Population: 2 in 67 (1 in 67+), 0 finer (9/18). NGC ID# 276M, PCGS# 3825

3461 **1878 PR66 PCGS. CAC. Fletcher-1.** The second 8 is repunched within the lower loop, as seen on many examples of this proof-only date. Light tan-gold toning visits this lustrous and and intricately struck Premium Gem. Contact is absent, and carbon is limited to a single speck above the N in CENTS. CAC: 66 in 66, 8 finer (10/18). NGC ID# 276V, PCGS# 3832

3462 **1878 PR65 Cameo PCGS. CAC.** This wonderfully preserved Gem proof nickel enjoys untoned surfaces that exhibit flashy mirrored fields and lightly frosted devices, generating obvious contrast. Both sides are free of bothersome hairlines or contact marks. Challenging proof-only issue.
Ex: Dallas Signature (Heritage, 4/2007), lot 370, where it realized $1,782.50. NGC ID# 276V, PCGS# 83832

LIBERTY NICKELS

3463 **1885 AU50 PCGS Secure.** An impressive AU specimen of this lower-mintage series key, with some light wear on the well-detailed design elements. The lightly abraded surfaces exhibit traces of mint luster under shades of lavender-gray and pale gold toning. NGC ID# 2773, PCGS# 3846

3464 **1899 MS66+ PCGS. CAC.** A Plus-graded Premium Gem representative of this turn-of-the-century issue, with sharply detailed design elements and well-preserved lustrous surfaces that show highlights of lavender-gray toning. PCGS has graded seven numerically finer examples (9/18). NGC ID# 22PR, PCGS# 3860

1912-D Nickel, Sharp MS66
Only One Coin Finer at PCGS

3465 **1912-D MS66 PCGS.** The 1912-D Liberty nickel is the first issue of this denomination struck at the Denver Mint, and it is the only D-mint issue of this design type. Examples are readily available through MS65, but Premium Gems are scarce, and only a few finer pieces are known. This Registry-grade coin displays a remarkably sharp strike on the stars and wreath, with softly frosted luster and light golden toning. Population: 71 in 66 (6 in 66+), 1 finer (9/18). NGC ID# 277P, PCGS# 3874

1912-D Liberty Nickel, MS66
One Example Finer at PCGS

3466 **1912-D MS66 PCGS Secure.** The 1912-D and 1912-S represented the first branch mint nickels struck. This issue was coined to a significantly greater extent (nearly 8.5 million coins) but is elusive at this level. PCGS has graded a single coin finer, and NGC counts two Superb Gems on their *Census* (10/18). Delicate iridescence faintly graces the lustrous nickel-gray surfaces of this well-struck Premium Gem. The fields are smooth and satiny. NGC ID# 277P, PCGS# 3874

3467 **1912-S MS62 PCGS.** Satiny luster covers this San Francisco Liberty nickel. The interiors display muted golden-gray patina, surrounded by deep olive-gray borders. No major abrasions are noted. On the reverse, the usual strike weakness is present on the corn ear to the left of the wreath bow. NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

3468 **1886 PR66+ PCGS. CAC.** This Plus-graded Premium Gem exhibits sharply detailed design elements and hazily reflective fields under low-intensity shades of lavender and golden-tan toning. PCGS has graded 34 numerically finer examples (9/18). NGC ID# 277U, PCGS# 3884

3469 **1905 PR67 PCGS.** Glimmering mirrored fields complement satiny, razor-sharp design elements on this Superb Gem 1905 proof. Ice-blue toning accents the interiors, ceding to lemon-gold at the borders. Few finer coins are known. Population: 35 in 67 (5 in 67+), 2 finer (9/18). NGC ID# 278F, PCGS# 3903

3470 **1905 PR67 PCGS. CAC.** Pastel shades of lilac-blue and mint-gold adorn the glimmering fields and satiny devices of this razor-sharp Superb Gem proof. Eye appeal is exceptional and the preservation nearly flawless. Conditionally rare this fine. Population: 35 in 67 (5 in 67+), 2 finer; 5 in 67 Cameo, 0 finer. CAC: 23 in 67, 2 finer (9/18). NGC ID# 278F, PCGS# 3903

BUFFALO NICKELS

3471 **1913-D Type One MS67 PCGS Secure.** This magnificent Superb Gem exhibits impeccably preserved surfaces, with vibrant mint luster and highlights of ice-blue and sea-green toning. The design elements are sharply detailed and eye appeal is terrific. From the first year of the Buffalo design. Population: 87 in 67 (11 in 67+), 2 finer (9/18). NGC ID# 22PX, PCGS# 3916

3472 **1913-S Type One MS66 NGC.** A handsome Premium Gem with strong luster and rugged design definition. Rich champagne and gold shadings dominate the moderate toning. The 1913-S is the most elusive of all Type One Buffalo nickels. Census: 62 in 66 (6 in 66+), 20 finer (10/18).
Ex: Long Beach Signature (Heritage, 2/2009), lot 721, which realized $1,150; Summer FUN Signature (Heritage, 7/2009), lot 239, which realized $920. NGC ID# 22PY, PCGS# 3917

3473 **1913-D Type Two MS66 PCGS.** Subdued golden-brown surfaces mask the underlying luster on this attractive Premium Gem that exhibits splashes of gold toning at the peripheries. Population: 81 in 66 (3 in 66+), 15 finer (9/18). NGC ID# 254M, PCGS# 3922

1913-D Type Two Buffalo Nickel, MS66+
Rarely Offered With a CAC Green Label

3474 **1913-D Type Two MS66+ PCGS Secure. CAC.** The 1913-D Type Two Buffalo nickel is a slightly better date overall. Premium Gem examples are scarce, and they are rare with a CAC endorsement. This Plus-graded CAC coin displays shimmering golden luster and beautifully preserved surfaces. There is trivial strike weakness on the hair above the Indian's braid and on the bison's head and shoulder, although it is barely noticed even under a loupe. Population: 79 in 66 (3 in 66+), 15 finer. CAC: 33 in 66, 6 finer (9/18). NGC ID# 254M, PCGS# 3922

3475 **1915-S MS64 NGC.** Bright satin luster engulfs this near-Gem 1915-S Buffalo nickel and reveals only a trace of light golden color. Trivial strike softness is restricted to the bison's shoulder and the hair above the Indian's braid. The 1915-S is elusive in finer grades. NGC ID# 22R9, PCGS# 3929

3476 **1917-D MS65 PCGS Secure.** Although this Gem was struck from worn dies, design detail on the obverse is incredibly bold. The reverse shows slight softness on the bison's head and shoulder. Pastel shades of blue, green, rose, violet, and gold toning delicately color the satiny surfaces of this clean Denver nickel. NGC ID# 22RE, PCGS# 3935

3477 **1917-S MS63 PCGS.** The mint luster is bright and frosted and each side is lightly covered in shades of lilac and golden-rose. The strike details are a bit soft, as one would expect from the issue. NGC ID# 22RF, PCGS# 3936

1917-S Nickel, CAC-Approved MS65
High-End for the Grade

3478 **1917-S MS65 NGC. CAC.** The 1917-S is scarce in Gem condition and rarely offered finer. This CAC-endorsed MS65 coin is delicately toned in light golden and lilac-blue hues, complementing satiny, unabraded mint luster. The preservation is outstanding for the grade. Strike weakness is limited to trivial softness on the tips of the Indian's feathers and the hair immediately above the braid. The bison's shoulder is also a trifle incomplete. Housed in a prior generation holder. Census: 63 in 65 (3 in 65+), 13 finer. CAC: 11 in 65, 5 finer (9/18). NGC ID# 22RF, PCGS# 3936

3479 **1918 Two Feathers, FS-401, AU55 PCGS Secure.** Although missing foreleg varieties are better known among Buffalo nickel collectors, the series offers an additional (and increasing popular) lapped die error. The low relief of the innermost feather makes it prone to removal via lapping, and it is absent on certain scarce examples of several issues, including the 1918. This example has a silver-gray obverse and a wheat-gold reverse. Contact is minimal, though a few tiny spots are distributed. NGC ID# 22RG, PCGS# 38445 Base PCGS# 3937

3480 **1918/7-D FS-101 Fine 15 NGC.** The tiny die crack above the braid is apparent, as is the thick downstroke of the underdigit 7. Along with the 1916 Doubled Date, the 1918/7-D is key to the Buffalo nickel series, and this unblemished dove-gray representative will please the advanced collector. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

1918/7-D Nickel, VF30
Noted *Guide Book* Overdate

3481 **1918/7-D FS-101 VF30 PCGS.** A stone-gray example of the rare *Guide Book* variety. The flat top and broad downstroke of the underdigit 7 is undeniable. We note a few faint slide marks on the back of the bison, and a small fleck of aqua residue on the bison's lower flank. A later die state with an orange-peel texture across the obverse field. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

1918/7-D Nickel, VF30
Key Wartime Overdate

3482 **1918/7-D FS-101 VF30 NGC.** The date is sharp for the VF30 level, and shows the crossbar, corner notch, and downstroke of the underdigit 7. This pearl-white wartime key date nickel is refreshingly free from marks but shows minor laminations (as made) beneath the TE in STATES and on the obverse rim at 8 o'clock. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

3483 **1919-D MS63 PCGS.** The 1919-D is a well-known strike rarity. This piece displays the usual high-point softness, but the mint luster is outstanding along with the iridescent toning. Exceptional quality and eye appeal for this grade. NGC ID# 22RM, PCGS# 3942

1919-D Nickel, MS64
Scarce Early Strike Rarity

3484 **1919-D MS64 PCGS Secure. CAC.** Dusky orange-gold, powder-blue, and olive-gray toning graces this unmarked and lustrous near-Gem. This issue is normally encountered weakly struck, but on this piece the strike is well above-average, especially on the bison's flank. An early and scarce branch mint issue. NGC ID# 22RM, PCGS# 3942

3485 **1920-D MS63 PCGS Secure.** An impressive Select specimen of this popular branch mint issue, with well-detailed design elements that show just a touch of the usual softness on the bison's head. The lightly marked surfaces are blanketed in shades of lavender-gray and sea-green toning. NGC ID# 22RR, PCGS# 3945

1921 Nickel, MS67
Strongly Struck, Nicely Toned

3486 **1921 MS67 NGC.** Light gold and apricot overtones grace parts of the otherwise nickel-white surfaces. The detail is remarkably strong for a 1920s Buffalo nickel, especially on the fine details of the portrait's braid and the bison's head and body. Swirling mint luster and noteworthy preservation complete the eye appeal. Census: 12 in 67 (1 in 67+, 3 in 67 ★), 0 finer (9/18).
Ex: Long Beach Signature (Heritage, 2/2011), lot 3262, where it brought $3,737.50. NGC ID# 22RT, PCGS# 3947

3487 **1921-S AU55 PCGS. CAC.** Substantial satin luster remains in the fields on this barely circulated 1921-S Buffalo nickel. Detail is sharp and each side displays warm golden-gray patina. Only a few coins are known in this grade with CAC endorsement. NGC ID# 22RU, PCGS# 3948

3488 **1921-S AU58 PCGS.** Satiny original surfaces display hints of golden toning over natural battleship-gray patina. A loupe reveals slight high-point friction responsible for a sub-Mint State grade, but eye appeal is on par with lower-end Uncirculated coins. The 1921-S is a better date overall, commanding a steep premium over common dates even in low circulated grades. NGC ID# 22RU, PCGS# 3948

3489 **1921-S MS62 PCGS. CAC.** Although more available than certain later S-mint Buffalos from the 1920s such as the 1926-S, the '21-S is still a rare issue. This satiny Mint State example has light gray luster with delicate rose and iridescent toning. NGC ID# 22RU, PCGS# 3948

3490 **1923-S MS64 NGC.** From a relatively low mintage of 6.1 million pieces, this attractive Choice example offers well-detailed design elements, with just a touch of softness on the bison's shoulder and head. The well-preserved surfaces radiate satiny mint luster. NGC has graded 45 numerically finer examples (10/18). NGC ID# 22RW, PCGS# 3950

3491 **1923-S MS64 PCGS. CAC.** Unlike most 1923-S nickels, this is a remarkably well-struck example. While not absolutely full, the details are much better brought up than usually seen and also evenly defined on each side (rather than the usually weak reverse). The hard, satiny mint luster shows just a trace of light toning. NGC ID# 22RW, PCGS# 3950

3492 **1924-D MS64 PCGS.** While not an absolute rarity in mint condition, since 5.2 million pieces were struck, the 1924-D is a well-known strike rarity in the series. This example shows above-average definition, and the surfaces display rich frosted mint luster (rather than the expected satin variant) and each side is lightly and attractively toned. NGC ID# 22RY, PCGS# 3952

1925 Nickel, Luminous MS67
Top-Grade Registry Contender

3493 **1925 MS67 NGC.** This Superb Gem 1925 Buffalo nickel is tied for the finest known, and it is conditionally rare as such. Thickly frosted luster appears virtually pristine on each side as it illuminates delicate sky-blue, lilac, and champagne hues. Trivial strike softness on the bison's shoulder and the hair above the Indian's braid is hardly noticed. Eye appeal is captivating on this lustrous Registry coin. Census: 9 in 67, 0 finer (9/18).
Ex: FUN Signature (Heritage, 1/2012), lot 5262, which realized $7,475. NGC ID# 22S2, PCGS# 3954

3494 **1925-D MS64 PCGS.** The 1925-D Buffalo nickel is known as a strike rarity in the series. This well-detailed Choice specimen shows a touch of the usual softness on the central design elements, with lightly marked, lustrous surfaces, under delicate shades of ice-blue and golden-tan toning. NGC ID# 22S3, PCGS# 3955

3495 **1925-S MS63 PCGS.** The reverse die was eroded at the time of striking, as is often the case, and both dies were widely spaced, resulting in incomplete detail on 19, UNITED STATES, and much of the bison's head, shoulder, and tail. Mainly nickel-gray with wisps of gold and soft mint luster. NGC ID# 22S4, PCGS# 3956

3496 **1926 Doubled Die Obverse and Reverse, FS-101/801, MS65 PCGS.** *Cherrypickers'* states that this variety "shows a medium spread on LIBERTY and [a] light spread on E PLURIBUS UNUM." Doubling is strongest on the B in LIBERTY. This high-grade example displays peach-gold toning in design recesses. The lustrous surfaces are unmarked and principally toned cream-gray. Population: 1 in 65, 2 finer (9/18). PCGS# 569448 Base PCGS# 3957

1927 Nickel, Lightly Toned MS67
Tied for the Finest Certified

3497 **1927 MS67 NGC.** Frosty ice-blue hues transition to warm champagne in the margins of this Superb Gem 1927 Buffalo nickel. Although slightly soft in the centers, this coin is well-defined throughout the border details and it shows no obvious abrasions. Eye appeal is outstanding. Among the finest examples certified. Census: 10 in 67 (1 in 67 ★), 0 finer (9/18).
Ex: FUN Signature (Heritage, 1/2012), lot 5268, which realized $2,990. NGC ID# 22S8, PCGS# 3960

1927-D Nickel, MS65
Rarely Seen Finer

3498 **1927-D MS65 PCGS Secure.** Like contemporary branch mint Buffalo nickels, the 1927-D is known for being softly struck, often from eroded dies. This satiny Gem, lightly toned in pale gold hues, exhibits the usual incompleteness on the braid and bison's head. However, LIBERTY and the date are notably strong. Tiny ticks are inconsequential. PCGS lists eight finer submissions (10/18). NGC ID# 22S9, PCGS# 3961

3499 **1928-S MS65 NGC.** Pale blue and violet toning appears on the satiny and lustrous surfaces of this Gem 1928-S nickel. Finer examples of this issue are seldom encountered. Census: 45 in 65 (1 in 65+, 1 in 65 ★), 12 finer (10/18). NGC ID# 22SD, PCGS# 3965

1935 Nickel, MS67+
Two Pieces Finer at PCGS

3500 **1935 MS67+ PCGS Secure.** The Plus designation puts this Superb Gem 1935 nickel in elite company. Only two examples at PCGS and three more at NGC are graded higher (10/18). The impression is complete over surfaces faintly toned in pale blue and gold hues. There are a couple of minute specks on the braid but no other marks to report. NGC ID# 22SN, PCGS# 3974

3501 **1936-D 3 1/2 Legs, FS-901, VF25 PCGS.** The bison's leftmost leg is greatly attenuated above the hoof. This *Guide Book* variety is much scarcer than the more-famous 1937-D Three-Legged issue. This is a silver-gray example with moderate wear and generally smooth surfaces, though we note scattered light marks under a loupe.
Ex: Long Beach Signature (Heritage, 9/2015), lot 3326, which realized $1,292.50. NGC ID# 22ST, PCGS# 38471 Base PCGS# 93978

3502 **1937-D Three-Legged, FS-901, AU58 PCGS. CAC.** A perennial favorite among Buffalo nickel collectors, the Three-Legged nickel was set aside in quantity by the early 1940s, though the variety remains scarce relative to demand. Light to medium rose-red and olive-gray toning embraces this satiny and virtually unmarked Borderline Uncirculated example. One pinpoint fleck beneath the bison's beard is accompanied by minor hairlines. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

3503 **1937-D Three-Legged, FS-901, MS62 NGC.** Satiny slate-gray surfaces yield warm golden toning on this appealing MS62 coin. A few scattered abrasions blend into the die erosion and metal flowlines on each side. Trivial strike weakness is seen on the bison's shoulder and the hair immediately above the Indian's braid. The die pair that created this variety was run into the ground — both dies were heavily worn and eroded at the time the Mint polished off the bison's leg, and they continued in use for some time afterward, as is evidenced by the population of the variety today. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

3504 **1937-D Three-Legged, FS-901, MS62 PCGS Secure.** The bison's front foreleg is absent above the hoof, the result of over-enthusiastic die lapping at the Denver Mint. A celebrated mint error usually encountered in Fine to AU grades. This stone-gray example shimmers with luster and is virtually void of marks. A cluster of minuscule flecks accompany the mintmark and denomination. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

1938-D/S Buffalo Nickel, MS67+
FS-511, Popular *Guide Book* Variety

3505 **1938-D/S FS-511 MS67+ NGC.** Dies produced for the San Francisco Mint were altered as a cost-saving measure toward the end of the Buffalo nickel series, resulting in this popular 1938-D/S *Guide Book* variety. Razor-sharp and virtually mark-free surfaces are satiny and minimally toned. Eye appeal is lovely. NGC ID# 22T3, PCGS# 38476 Base PCGS# 3985

PROOF BUFFALO NICKELS

3506 **1913 Type One PR64 NGC.** Red, gold, and jade-green consume this fully patinated and unmarked matte proof nickel. The strike is razor-sharp, and the sole visible imperfection on this conservatively assessed specimen is a tiny spot concealed within the Indian's hair. The sole year of the Mound Reverse (Type One) subtype.
Ex: Philadelphia Signature (Heritage, 8/2012), lot 3863, where it brought $2,350. NGC ID# 278R, PCGS# 3988

1913 Type One Buffalo Nickel, PR66
Sharp and Faintly Toned

3507 **1913 Type One PR66 PCGS Secure.** Delicate iridescence tints the luminous matte surfaces of this Premium Gem Type One proof, showcasing fully rendered design elements and near-flawless preservation. Although only 1,520 Type One proofs were struck, this issue is remarkably collectible in high grade. Nonetheless, unending demand for high-end matte proofs of the one-year "bison-on-mound" type creates a challenge for collectors seeking to acquire a high-end example of this issue. Offered here is a beautiful coin with few superiors. NGC ID# 278R, PCGS# 3988

3508 **1913 Type Two PR64 PCGS.** The Type Two 1913 is the second scarcest issue in the matte proof series. Only 1,514 pieces were produced. This example has a fine-grain matte surface and each side shows streaks of deep golden-rose toning. Unlike most matte proofs in this grade, there are no apparent carbon spots. NGC ID# 278S, PCGS# 3990

3509 **1914 PR65 PCGS.** The 1914 is one of the more frequently encountered matte proof nickels, as as such is a perfect piece for type purposes. This is a refreshingly clean example with bright, satiny mint luster over the textured matte surfaces. Light golden and lilac toning is evenly distributed over each side. NGC ID# 278T, PCGS# 3991

3510 **1915 PR65 NGC.** One of the scarcer matte proof issues, allegedly unsold proofs were melted at year's end, thus further reducing the number available to collectors. The bright, satiny luster has taken on an even golden-yellow patina, giving the coin the appearance of untampered originality. NGC ID# 278U, PCGS# 3992

3511 **1916 PR64 PCGS.** A crisply struck olive-green and tan-gold near-Gem. The central obverse displays a few pinpoint flecks. The rarest proof issue with a mintage of just 600 pieces. Housed in an old green label holder.
Ex: FUN Signature (Heritage, 1/2015), lot 3679, where it realized $2,232.50. NGC ID# 278V, PCGS# 3993

3512 **1936 Type Two — Brilliant Finish PR65 NGC.** Second of the two finishes employed in 1936, the Brilliant Finish proved more popular with collectors and a higher percentage have survived. This is a radiant, brightly mirrored example that has pinkish-rose toning over each side. Just the slightest flyspecks can be detected with magnification. NGC ID# 278Y, PCGS# 3995

3513 **1937 PR66 PCGS. CAC.** A gleaming Premium Gem proof with pale golden toning over deep mirrors. A wealth of definition appears across the devices. Although the Denver Mint continued to strike Buffalo nickels in 1938, no proofs were struck after 1937. Housed in a green label holder. NGC ID# 278Z, PCGS# 3996

3514 **1937 PR66+ PCGS. CAC.** The Plus designation and CAC approval sticker attest to the quality and appeal of this outstanding Premium Gem nickel. Fully struck devices stand out against the brilliant, reflective fields. Contact is essentially unseen. Good for type. NGC ID# 278Z, PCGS# 3996

3515 **1937 PR67+ PCGS Secure.** To underscore the value present in modern type coins, take a look at this piece and compare it to recent comparable prices. This is essentially a flawless coin. Each side displays multicolored streaks of toning with no loss of the underlying brightness from the mirrored fields. Carbon-free surfaces. NGC ID# 278Z, PCGS# 3996

3516 **1937 PR67 PCGS Secure. CAC.** An array of iridescent tones colors both sides of this Superb Gem proof nickel. Shades include blue, green, magenta, and orange. Each facet of the design is fully defined, as expected of a high-end proof. CAC has endorsed this piece for its quality and eye appeal. NGC ID# 278Z, PCGS# 3996

PROOF JEFFERSON NICKELS

3517 **1956 PR68 Deep Cameo PCGS Secure.** The design elements of this magnificent PR68 specimen are sharply detailed throughout, with a rich coat of mint frost that contrasts profoundly with the deeply mirrored fields. The brilliant surfaces are impeccably preserved. Population: 14 in 68 (2 in 68+) Deep Cameo, 1 finer (9/18). NGC ID# 22YG, PCGS# 94188

1971 No S Nickel, PR68 Deep Cameo
Missing Mintmark Variety

3518 **1971 No S PR68 Deep Cameo PCGS Secure.** It is believed that 1,655 Jefferson nickel proofs were struck in 1971 inadvertently lacking the S mintmark. The severity of the slip-up and the scarcity of the issue explain why the 1971 No S proof nickel holds the 30th position on the list of the *100 Greatest U.S. Modern Coins*. This PR68 Deep Cameo specimen is totally brilliant with depthless mirrors and a thick layer of frost over the devices. Population: 16 in 68 (1 in 68+) Deep Cameo, 18 finer (9/18). NGC ID# 22YN, PCGS# 94204

EARLY HALF DIMES

1795 Flowing Hair Half Dime, VF25
V-5, LM-8, Old Green Holder

3519 **1795 V-5, LM-8, R.3, VF25 PCGS.** The die crack from Liberty's nose through the Y helps identify the Valentine variety. A nicely detailed example with a gunmetal-blue obverse and a charcoal-gray reverse. Flowing Hair half dimes were only struck in 1794 and 1795. Encased in an old green label holder.
Ex: FUN Signature (Heritage, 1/2008), lot 854; Houston Signature (Heritage, 12/2008), lot 1028, where it brought $3,737.50. NGC ID# 22ZV, PCGS# 38592 Base PCGS# 4251

3520 **1797 16 Stars, V-3, LM-3, R.5 — Scratch — PCGS Genuine Secure. VF Details.** Deep gunmetal-gray toning blankets this nicely defined Small Eagle half dime. A thin diagonal scratch between the left ribbon loop and the E in AMERICA accounts for the PCGS designation. Hair-thin lines beneath OF, above the hair ribbon, and on the right obverse field are of lesser consequence.

3521 **1800 V-1, LM-1, R.3, Good 6 PCGS Secure.** Pearl-gray high points contrast with deeper gunmetal and blue-green fields. This Heraldic Eagle half dime has a slightly convex obverse and a somewhat concave reverse, which may explain the sharpness of the shield lines. Portions of STATES and the lower left side obverse stars exhibit uneven wear. Marks are essentially absent save for a obverse tick or two near 9 o'clock. NGC ID# 2326, PCGS# 38601 Base PCGS# 4264

3522 **1800 V-1, LM-1, R.3, Fine 15 NGC.** Deep russet-brown toning blankets this scarce Heraldic Eagle type coin. The rims exhibit marks at 6 o'clock on the obverse and 12 o'clock on the reverse, and the strike shows the usual softness on the reverse stars opposite the bust truncation.
Ex: Long Beach Signature (Heritage, 6/2012), lot 3426, which realized $2,990. NGC ID# 2326, PCGS# 38601 Base PCGS# 4264

BUST HALF DIME

1833 Half Dime, MS65
V-3, LM-4.2, Repunched O in OF

3523 **1833 V-3, LM-4.2, R.2, MS65 PCGS Secure. CAC.** The 33 in the date is widely spaced, and the O in OF is repunched. A crack connects the rim to the cap to the L in LIBERTY in this middle die state. Frosted surfaces show tinges of golden color but remain mostly brilliant. The stars are needle-sharp and the centers show good detail, too. The obverse is clashed. PCGS# 38694 Base PCGS# 4280

SEATED HALF DIMES

1838 Seated Half Dime, Glittering MS66
Large Stars, No Drapery

3524 **1838 Large Stars, No Drapery, MS66 PCGS Secure. CAC.** This is the first year of the Stars Obverse type. It is also one of only four years for which the No Drapery portrait of Liberty was used. This gorgeous, brilliant Premium Gem is completely defined throughout. Mint luster is vibrant and frosty over surfaces that show just a few pale blushes of golden color near the rims, confirming the coin's originality. A few of the stars are repunched. Population: 38 in 66 (10 in 66+), 11 finer (9/18). NGC ID# 2TXX, PCGS# 4317

3525 **1840 No Drapery MS65 PCGS Secure.** The 1840 is a collectible No Drapery issue, although it is scarce in Gem condition. This piece displays deep lavender-gray and olive-green toning over satiny mint luster. The strike is sharp and no bothersome abrasions are seen. Population: 23 in 65, 26 finer (9/18). NGC ID# 232U, PCGS# 4321

1866 Seated Liberty Half Dime, MS66
Rarely Seen This Fine

3526 **1866 MS66 PCGS Secure.** From a minuscule mintage of 10,000 pieces, the 1866 Seated Liberty half dime is a rare issue in higher Mint State grades. This spectacular Premium Gem displays sharply detailed design elements and some dramatic clash marks on both sides. The lustrous, well-preserved surfaces show subtle hints of golden-tan toning. Population: 8 in 66, 5 finer (9/18). NGC ID# 234J, PCGS# 4388

PROOF SEATED HALF DIMES

3527 **1863 PR66 Cameo PCGS. CAC. V-1, Flynn RPD-001.** The 18 in the date is nicely repunched. Medium peach-gold and lavender toning adorns this nicely struck and undisturbed high-grade specimen. Despite the palette of colors, cameo contrast is evident when inspected beneath a lens. A Civil War date with a proof mintage of only 460 pieces. CAC: 4 in 66, 0 finer (10/18). NGC ID# 235Y, PCGS# 84446

3528 **1868 PR65 Cameo PCGS Secure.** This Gem Cameo is sharp and toned a light golden hue. Appreciable field-device contrast is apparent on each side. Cameos are rarely offered this well-preserved, and few are known finer. Population: 11 in 65 Cameo, 13 finer (9/18). NGC ID# 2365, PCGS# 84451

3529 **1869 PR66+ PCGS Secure. CAC.** Deep ocean-blue color combines with vibrant magenta and golden-orange toning throughout this lovely, original Premium Gem proof half dime. Total mintage for the year amounted to 600 specimens. The unmarked fields are flashy beneath the patina. Contrast against the devices is limited. Readily appealing. Population: 13 in 66 (1 in 66+), 3 finer. CAC: 5 in 66, 4 finer (9/18). NGC ID# 2366, PCGS# 4452

3530 **1870 PR66 NGC.** Intense violet and blue toning appears on both sides of this Premium Gem. The surfaces are fully mirrored with modest cameo contrast hidden beneath the toning. Sharp design motifs complete the picture. Census: 24 in 66 (1 in 66+), 10 finer; 7 in 66 (1 in 66+) Cameo, 3 finer (10/18). NGC ID# 2367, PCGS# 4453

3531 **1871 PR66 PCGS Secure.** Half dime production returned to its pre-1862 levels in 1871. Proof output was similarly elevated, with 960 pieces struck. This colorful, exquisitely preserved example displays gold, violet, and turquoise patina throughout. The reverse is noticeably contrasted, featuring frosted motifs and watery fields. Population: 18 in 66 (2 in 66+), 1 finer (9/18). NGC ID# 2368, PCGS# 4454

3532 **1871 PR65 Cameo PCGS Secure. CAC.** A brilliant Gem proof with stark white-on-black contrast and well-struck design elements. Proof 1871 half dimes are plentiful without a Cameo designation, but contrasted coins are rare. This piece boasts the coveted CAC endorsement. Population: 10 in 65 Cameo, 13 finer; 1 in 65 Deep Cameo, 1 finer. CAC: 4 in 65, 15 finer (9/18). NGC ID# 2368, PCGS# 84454

3533 **1873 PR66 PCGS. CAC.** Lovely ocean-blue and rose-gold toning adorns this flashy and undisturbed Premium Gem. The strike is full aside from a few grains on the upper-left portion of the wreath. A scant 600 proofs were issued and few survive this fine. Population: 24 in 66 (2 in 66+), 7 finer. CAC: 10 in 66, 3 finer (9/18). NGC ID# 236A, PCGS# 4456

EARLY DIME

1796 JR-1 Dime, Good 6
Small Eagle, First Year of Issue

3534 **1796 JR-1, R.3, Good 6 ANACS.** The usual cud at star 1 is present on this JR-1 representative. This is the most frequently encountered die marriage for the 1796, a sought-after first-year issue featuring the short-lived Small Eagle reverse. This Good 6 survivor circulated heavily, but the date and legends are bold. Blue, gold, and crimson tones color each side. A pedigree marker occurs right of Liberty's eye. Housed in a small-sized holder. NGC ID# 236B, PCGS# 38742 Base PCGS# 4461

BUST DIMES

3535 **1835 JR-1, R.1, MS62 PCGS.** The strike is sharp throughout the eagle's feathers and the border stars on this Mint State 1835 Capped Bust type coin. Slight incompleteness is noted on a few of the hair curls. Olive and russet toning appears around the peripheries, leaving the interiors with a mainly silver-gray appearance. Grade-limiting abrasions are trivial. NGC ID# 237F, PCGS# 38879 Base PCGS# 4527

1835 Capped Bust Dime, MS64
Popular JR-1 Variety

3536 **1835 JR-1, R.1, MS64 PCGS. CAC.** The JR-1 is among the more accessible die pairs for the date, and a number of high-end examples have survived, making it popular with type collectors. Rich toning lends this warmly lustrous near-Gem particularly strong eye appeal. Gold-orange, reddish-tan, and sage shadings are separated into outer rings and an inner core on the obverse, but the reverse has a more dappled appearance. Population: 77 in 64 (4 in 64+), 17 finer. CAC: 21 in 64, 15 finer (9/18). NGC ID# 237F, PCGS# 38879 Base PCGS# 4527

3537 **1835 JR-5, R.1, MS63 PCGS Secure.** A telltale die marker for the JR-5 marriage is the 5 in the date about 50% left of the curl. This variety also has a Block 8. Splashes of violet patina mingle with areas of brilliance. Strike definition is uniformly sharp, and while small marks define the grade, none detract. NGC ID# 237F, PCGS# 38883 Base PCGS# 4527

SEATED DIMES

3538 **1839-O No Drapery, Large O, F-105, R.3, MS62 PCGS.** A well-struck and unabraded early New Orleans dime. Luster is prevalent, and the surfaces are white aside a hint of microgranular gray toning near the A in STATES and stars 2, 5, and 11. Stars 1 and 12 are lightly repunched, characteristic of the Fortin die pairing. PCGS# 537686 Base PCGS# 4572

1841 Seated Dime, Brilliant MS65

3539 **1841 F-107, R.3, MS65 PCGS. CAC.** In spite of how early in the date is, a considerable number of 1841 dimes were set aside out of the 1.6 million pieces produced. However, high-grade examples are scarce. Only eight other PCGS Gems have been certified with another three in higher grade (9/18). This is an all-brilliant coin that displays undiminished soft, frosted mint luster and the strike details are complete throughout. NGC ID# 2384, PCGS# 537755 Base PCGS# 4579

1843-O Seated Liberty Dime, XF45
Elusive Date in All Grades

3540 **1843-O F-101, R.3, XF45 NGC. CAC.** Only one die variety is currently identified for all 1843-O dimes, and examples appear in the marketplace infrequently, regardless of condition, and most examples that are located grade XF or lower. Although the surfaces have minor imperfections, this piece is highly desirable for its existing detail and its rarity. A long wait may face the collector who seeks a higher grade piece. Census: 4 in 45, 2 finer. CAC: 2 in 45, 4 finer (9/18).
Ex: Long Beach Signature (Heritage, 9/2010), lot 3628; Long Beach Signature (Heritage, 2/2011), lot 3389. NGC ID# 2389, PCGS# 537816 Base PCGS# 4584

3541 **1853 No Arrows, F-101a, R.5, MS64 PCGS Secure.** Multiple sets of clash marks identify FS-101a. Seated dime specialist Gerry Fortin regards FS-101a as a Top 100 Variety. The 1853 Arrows dime is common, but its No Arrows predecessor is very scarce, as foretold by a low *Guide Book* mintage of 95,000 pieces. A brilliant, sharply struck, smooth, and satiny near-Gem. Population: 25 in 64, 30 finer (9/18). NGC ID# 238R, PCGS# 537941 Base PCGS# 4599

3542 **1859 F-107, R.3, MS65 NGC.** Full strikes are elusive on 1859 dimes, but the present piece comes close. Both sides show a partial wire rim, and the wreath and Liberty exhibit exemplary detail. The smooth, satiny surfaces display medium lavender and golden-brown shades. NGC ID# 2394, PCGS# 538139 Base PCGS# 4619

1867 Seated Dime, MS64
Semiprooflike and Cameo-Contrasted

3543 **1867 F-102, R.5, MS64 PCGS Secure. CAC.** Fortin-102 is the only business strike die pair known for the 1867 Seated Liberty dime. This issue boasts a small mintage of just 6,000 coins, and attractive Mint State pieces are scarce. This CAC-approved near-Gem displays a sharp strike with brilliant interiors and russet-olive borders. Parallel die polishing lines in the fields leave each side semiprooflike and modestly contrasted. Abrasions are trivial. Population: 16 in 64, 24 finer. CAC: 7 in 64, 16 finer (9/18). NGC ID# 239U, PCGS# 538218 Base PCGS# 4645

3544 **1873 Arrows, Doubled Die Obverse, F-103, FS-101, R.6 — Cleaned — PCGS Genuine. XF Details.** Liberty's shield displays exceptional die doubling. Breen (1988) credits Kam Ahwash with the discovery of the *Guide Book* variety, though it is absent from the latter's 1977 reference. This moderately circulated example exhibits peripheral navy-blue and magenta toning. The fields and devices are cream-gray. The surfaces are slightly bright but would please many collectors.

1873-CC Dime, Good 6
Carson City Key

3545 **1873-CC Arrows, F-101, R.4, Good 6 NGC.** Among the stoppers to the Liberty Seated dime series, the 1873-CC Arrows has a mintage of just 18,791 pieces. The absence of collectors in the Old West ensured that most survivors are well worn or problematic. The present example has a bold date and mintmark. The BER in LIBERTY is clear, and the gunmetal-gray surfaces display few marks aside from a line across Liberty's lower wrist.
Ex: FUN Signature (Heritage, 7/2014), lot 3285; Houston Signature (Heritage, 12/2014), lot 3350; Chicago ANA Signature (Heritage, 8/2015), lot 3661, which realized $2,820. NGC ID# 23BH, PCGS# 538326 Base PCGS# 4666

3546 **1889-S Small S, F-108, R.3, MS64 PCGS.** The mintmark is entered further right of any '89-S die variety. The obverse border exhibits several faint die cracks unmentioned in the online Fortin reference. A brilliant Choice dime with a semiprooflike obverse and a lustrous reverse. The strike is good, and relevant marks are limited to a hair-thin line near Liberty's left (facing) shoulder. Population: 25 in 64, 10 finer (9/18). PCGS# 538831 Base PCGS# 4703

PROOF SEATED DIMES

3547 **1871 PR64 Deep Cameo PCGS Secure. F-102, R.4.** The reverse die was left over from 1870 proof production and features a crack through the lower part of the wreath. This near-Gem proof dime is as brilliant as brilliant can be. Not a single speck of color is seen, allowing the thickly frosted motifs to stand out boldly against the reflective fields, producing spectacular Deep Cameo contrast. Population: 1 in 64 Deep Cameo, 2 finer (10/18). NGC ID# 23CV, PCGS# 94764

3548 **1887 PR66 Cameo NGC. F-101, R.3.** Frosty legends and devices exhibit blatant contrast with prominently reflective fields. This brilliant high-grade proof Seated type coin is brilliant and undisturbed. The strike is sharp except for softness on the left corner of Liberty's rock, and the small portion of the wreath opposite. NGC ID# 23DC, PCGS# 84784

3549 **1889 PR67 PCGS. CAC. F-101, R.4.** Two minor variants exist of the 1889 dime. This one shows a downward sloping date with a nearly closed 9 (at least more so than F-102). Only 711 proofs were struck and this is clearly one of the finest examples available, as well as one of the finest known. The fields are bright and mirrored with significant frosted contrast evident on each side. The obverse is lightly and evenly toned, while the reverse is mostly brilliant with a light accent of peripheral golden toning present. Exceptional quality and value. Population: 8 in 67 (1 in 67+), 0 finer. CAC: 2 in 67, 0 finer (9/18). NGC ID# 23DE, PCGS# 4786

BARBER DIMES

1892 Dime, MS67
Outstanding Eye Appeal

3550 **1892 MS67 PCGS Secure. CAC.** The 1892 was carefully preserved by collectors as a souvenir from the first issuance of Barber coinage, but seldom are Superb Gems as fine as this offered. Blue and green hues dominate the obverse. Lavender toning appears over the highest points of the portrait. Similar colors progress from the rims toward the centers on the reverse. A tick behind the nose is the only thing that prevents an even higher grade. Population: 27 in 67 (5 in 67+), 1 finer. CAC: 23 in 67, 1 finer (9/18). NGC ID# 23DK, PCGS# 4796

3551 **1892-S MS64 NGC.** The 1892-S is by far the scarcest of the first-year issues in the Barber dime series. This near-Gem displays sharp design elements and satiny luster beneath deep olive-gold and grayish toning. Rarely offered finer. Census: 43 in 64, 5 finer (10/18). NGC ID# 23DM, PCGS# 4798

3552 **1892-S MS64 PCGS.** Unlike the Philadelphia issue of this year, the 1892-S Barber dime is scarce in attractive Mint State condition. This Choice example has few superiors. Satiny luster illuminates needle-sharp design elements and no significant abrasions are visible. Untoned interiors cede to olive and amber-gold borders. Population: 29 in 64, 19 finer (9/18).
From The Gary Verner Collection. NGC ID# 23DM, PCGS# 4798

3553 **1893-S MS65 NGC.** The availability of the 1893-S dime drops off sharply in MS65, and no finer pieces are reported at NGC. This piece is sharp and faintly toned with a light golden hue. Prooflike mirroring characterizes the obverse fields, while the reverse displays softly frosted luster. Census: 16 in 65, 0 finer (9/18).
From The Gary Verner Collection. NGC ID# 23DS, PCGS# 4802

1894 Barber Dime, MS67
Just One Example Graded Finer

3554 **1894 MS67 PCGS. CAC.** Original patina serves as the hallmark of this Superb Gem Barber dime. Toning includes shades of blue-green, lavender, and gold. The devices display complete strike definition on each side. One tick appears on Liberty's cheek, while the fields remain wholly unmarked. An extraordinary Registry-grade dime. Population: 2 in 67, 1 finer. CAC: 3 in 67, 0 finer (9/18). NGC ID# 23DT, PCGS# 4803

3555 **1895 MS64+ PCGS. CAC.** A rare CAC-endorsed, Plus-graded near-Gem example of this moderately plentiful Philadelphia issue, showing vibrant cartwheel luster and sharp design elements. Original sea-green, gold, and amber toning encompasses each side. Population: 38 in 64 (3 in 64+), 56 finer. CAC: 9 in 64, 15 finer (9/18).
From The Gary Verner Collection. NGC ID# 23DV, PCGS# 4806

3556 **1896-S MS62 NGC.** A deeply mirrored, cameo-contrasted example of this better San Francisco issue. Sharp devices complement brilliance across the interiors, while the borders display a light golden glow. Grade-limiting abrasions are remarkably trivial for the grade and eye appeal is strong. Census: 1 in 62, 4 finer (9/18).
Ex: Long Beach Signature (Heritage, 6/2014), lot 3591, which realized $1,410.
From The Gary Verner Collection. NGC ID# 23E2, PCGS# 4811

3557 **1897-S MS66 PCGS.** Ex: Duckor. This semiprooflike Premium Gem currently holds the price record for an 1897-S dime at public auction, from its appearance in the Long Beach Signature (Heritage, 5/2009), where it realized $9,200. Sharp design elements and exceptional preservation complement a hint of light golden toning on each side. The reflectivity in the fields owes its prominence to faint die polishing lines that are visible with a loupe. Population: 7 in 66 (1 in 66+), 1 finer (9/18).
Ex: FUN Signature (Heritage, 1/2006), lot 986, which realized $7,475; Long Beach Signature (Heritage, 5/2009), lot 473, which realized $9,200.
From The Gary Verner Collection. NGC ID# 23E5, PCGS# 4814

1902-O Barber Dime, MS65
Deeply Prooflike

3558 **1902-O MS65 PCGS.** Mint State examples of the 1902-O Barber dime are scarce, and they are rare in Gem or better condition. This MS65 coin is fully prooflike and razor-sharp. Some light clash marks are visible on the reverse, but the appearance is otherwise akin to that of some Philadelphia proof coins. A trace of light champagne toning accents each side. Population: 13 in 65, 2 finer (9/18).
From The Gary Verner Collection. NGC ID# 23EK, PCGS# 4828

3559 **1903-S MS63 NGC.** Dime coinage in San Francisco was limited in 1903, with a production of only 613,300 pieces. This is a semikey date in all grades. Offered here is a satiny Select example with brilliant centers and warm orange-gold borders. The design elements are sharp, but light marks on Liberty's cheek limit the grade. Census: 1 in 63, 18 finer (9/18).
Ex: ANA Signature (Heritage, 8/2014), lot 7448, which realized $2,350.
From The Gary Verner Collection. NGC ID# 23EP, PCGS# 4832

3560 **1905-O MS65 PCGS. CAC.** The normal size mintmark appears on the reverse of this Gem Barber dime. The obverse has blue and iridescent toning while the reverse is essentially brilliant with a dusting of gold. Population: 21 in 65, 28 finer. CAC: 6 in 65, 14 finer (9/18). NGC ID# 23EU, PCGS# 4836

3561 **1906-O MS66+ PCGS Secure.** With a mintage of 2.6 million coins, the 1906-O dime is scarce at the Gem and Premium Gem levels. It becomes rare in higher grades, with just nine better submissions at PCGS (9/18). Olive-green, russet, and lilac patina shrouds this lustrous, fully struck representative. Exceptional quality. Population: 25 in 66 (5 in 66+), 9 finer (9/18). NGC ID# 23EZ, PCGS# 4840

1906-O Dime, Richly Toned MS67

3562 **1906-O MS67 NGC.** The surfaces of this late O-mint Barber dime are remarkably reflective under translucent gold, green, blue, and violet patina. The strike is similarly impressive, particularly on the reverse. Add the high degree of preservation, and this is a Superb Gem to remember. Census: 10 in 67 (1 in 67 ★, 3 in 67+★), 1 finer (9/18).
Ex: Long Beach Signature (Heritage, 2/2012), lot 3398, where it brought $2,990.
From The Gary Verner Collection. NGC ID# 23EZ, PCGS# 4840

1908-O Dime, CAC-Approved MS67
Tied for the Finest Certified

3563 **1908-O MS67 PCGS. CAC.** This conditionally rare Registry Set candidate is among the finest 1908-O Barber dimes known. Concentric multicolor toning includes mainly shades of rose-gold, champagne, and sea-green. The strike is sharp and luster is frosty. This top-grade coin boasts the coveted CAC endorsement for high quality and strong eye appeal. Population: 5 in 67, 0 finer. CAC: 5 in 67, 0 finer (9/18).
From The Gary Verner Collection. NGC ID# 5KXH, PCGS# 4848

3564 **1912 MS66+ PCGS. CAC.** 30th Anniversary Green Label Holder. Pastel straw-gold and ice-blue patina visits this well-struck and incredibly lustrous Premium Gem. A small area of prooflike surface, as made, resides above the E in ONE. Eye appeal is outstanding on this high-end, CAC-approved type coin. Population: 59 in 66 (6 in 66+), 12 finer. CAC: 32 in 66, 8 finer (9/18).
Ex: New York Signature (Heritage, 10-11/2016), lot 3967, which realized $1,774.25.
From The Gary Verner Collection. NGC ID# 23FM, PCGS# 4860

1913-S Dime, MS66
Bright, Evenly Toned Example
Ex: Eliasberg

3565 **1913-S MS66 PCGS.** Ex: Eliasberg. Formerly sold as lot 1310 in the 1996 Eliasberg Sale, and described in part as, "Essentially brilliant surfaces exhibit just the faintest whisper of golden iridescence... The 1913-S is a 'sleeper' and is an issue, which while priced above the 'type' level, is not valued in accordance with its true rarity. In Mint State it is dozens of times rarer than its 1913 Philadelphia counterpart ... " The coin realized $1,705 in that historic sale.
Ex: Central States Signature (Heritage, 4/2001), lot 6196.
From The Gary Verner Collection. NGC ID# 23FS, PCGS# 4864

PROOF BARBER DIME

3566 **1896 PR67 NGC.** Iridescent aquamarine and plum-red patina endows this practically pristine and intricately impressed Superb Gem. Liberty's nose, cheek, and forehead remain untoned. A beautiful, original, and outstanding proof Barber type coin. Certified in a former generation holder. NGC ID# 23G9, PCGS# 4880

MERCURY DIMES

3567 **1916-D Fine 12 ANACS.** This in-demand first-year Mercury dime is well-circulated with deeper toning on the obverse than the reverse. The portrait side features shades of lilac-rose and green, while the other side exhibits lighter orange accents. Myriad marks and considerable blending are entirely expected for the grade. A problem-free key date coin. NGC ID# 23GY, PCGS# 4906

3568 **1917 MS66+ Full Bands PCGS Secure. CAC.** Glowing, frosty mint luster is unabraded on each side of this centrally sharp Premium Gem. The Plus designation and CAC endorsement set it apart from its peers, and finer coins are rare. Trivial strike weakness around the obverse border is hidden by russet and forest-green peripheral toning. The reverse shows equally attractive halo patina. Both sides have brilliant interiors. CAC: 32 in 66, 14 finer (9/18). NGC ID# 23H2, PCGS# 4911

1919-D Mercury Dime, MS64 Full Bands
Remarkably Sharp and Appealing

3569 **1919-D MS64 Full Bands PCGS Secure.** Delicate lilac and golden toning graces satiny luster on this near-Gem Full Bands example. A couple of vertical die cracks extend from the lower obverse rim into IN GOD WE TRUST and Liberty's neck truncation. The strike is sharp and no distracting abrasions are seen. The 1919-D Mercury dime is a challenging issue with Full Bands definition. PCGS lists only 20 such coins finer than the present (9/18). NGC ID# 23H9, PCGS# 4925

3570 **1920-S MS64 Full Bands PCGS Secure.** The 1920-S proves challenging in any grade with Full Bands. To be sure, coins finer than this near-Gem are rare. Mottled golden-russet patina covers the obverse. The reverse shows much brilliance beneath the medium golden toning. Sharply struck from rim to rim and in the centers. This softly frosted dime displays few apparent marks. NGC ID# 23HD, PCGS# 4933

3571 **1921-D MS62 NGC.** An attractive MS62 specimen of this low-mintage series key, with well-detailed design elements that show some weakness on the central bands on the fasces. The lightly marked, lustrous surfaces show highlights of greenish-gold toning. A bisecting die crack is visible through the bust. NGC ID# 23HF, PCGS# 4936

3572 **1924-D MS66 Full Bands PCGS.** The 1924-D is not particularly scarce in mint condition with 6.8 million pieces produced, but it is a notable strike rarity from this decade. This is a bright coin with radiant mint luster and just the slightest streaks of golden toning present. The strike definition is complete, as expected. Population: 47 in 66 (1 in 66+) Full Bands, 9 finer (9/18). NGC ID# 23HK, PCGS# 4945

3573 **1926-D MS65 Full Bands PCGS Secure.** The 1926-D has a modest mintage of 6.8 million coins, far lower than the 1926-P but not quite as small as the semikey 1926-S. The only observable tick appears on the upper cheek. Otherwise, this satiny, untoned Gem is beautifully preserved, and the strike is sharp from the centers to the rims. PCGS reports 39 finer submissions (9/18). NGC ID# 23HS, PCGS# 4957

3574 **1934-D MS67 Full Bands PCGS Secure. CAC.** Splashes of cherry-red, peach-gold, and apple-green toning endow this colorful and lustrous Superb Gem. The fields appear pristine, and the cheek displays only delicate contact. The strike is good although slightly incomplete. CAC: 19 in 67, 0 finer (9/18). NGC ID# 23JB, PCGS# 4991

3575 **1936 Doubled Die Obverse, FS-101, MS67+ Full Bands PCGS.** The date and designer's monogram are lightly die doubled, most apparent on the tail of the 9. Blushes of straw-gold toning adorn the borders of this lustrous, nicely struck, and virtually immaculate Superb Gem. An ideal selection to represent the Great Depression issue. FS-101 Population: 3 in 67 (1 in 67+) Full Bands, 0 finer (9/18).
Ex: Rosemont Signature (Heritage, 8/2013), lot 7575; New York Signature (Heritage, 10/2015), lot 7347, which realized $646.25.
NGC ID# 23JF, PCGS# 145452 Base PCGS# 4999

3576 **1943-D MS68 Full Bands PCGS Secure.** While the 1943-D is certainly not a rarity, any Mercury dime in MS68 Full Bands is a perfect type coin for the collector who just needs one. Of course, for the more ambitious a Short Set in this grade might also be attainable. This is a lightly toned example with strong underlying mint frost, and nearly perfect surfaces. Population: 43 in 68 (3 in 68+) Full Bands, 0 finer (9/18). NGC ID# 23K9, PCGS# 5047

PROOF ROOSEVELT DIME

1983 No S Dime, PR70 Ultra Cameo
A Registry-Grade Condition Rarity

3577 **1983 No S PR70 Ultra Cameo NGC.** A number of 1983 No S proof dimes are known in PR68 and PR69 Ultra or Deep Cameo, but only a handful of pieces are known in PR70 Ultra or Deep Cameo — five at NGC and eight at PCGS (9/18). This piece is fully struck and, as the grade suggests, flawless. The untoned surfaces yield stark white-on-black contrast and strong eye appeal. NGC ID# 28ZN, PCGS# 95265

TWENTY CENT PIECES

3578 **1875-CC MS63 PCGS Secure. BF-4, R.2.** The '75-CC is the sole collectible Carson City issue of the denomination, thus it is requisite for Old West type sets. This satiny piece is bathed in original chestnut-gold and silver-gray toning. No marks are apparent throughout the dusky surfaces. NGC ID# 23R6, PCGS# 5297

3579 **1876 MS62 NGC. BF-2, R.2.** Sharply struck save for the crest of the left (facing) wing. This is a bright, deeply mirrored proof that is mostly brilliant but each side displays a significant presence of deeper russet toning around the margin. NGC ID# 23R8, PCGS# 5299

EARLY QUARTER

1806/5 B-1 Quarter, VF30
Sought-After Overdate

3580 **1806/5 B-1, R.2, VF30 PCGS Secure.** Tompkins Die State 2/3. Clash marks appear on each side and a die crack connects UNI and 2. The obverse die was previously used to strike 1805 B-4 quarters before being annealed and overdated. These coins are highly sought-after, making acquisition more difficult than one might expect given the number of survivors. Richly toned in deep olive and steel-gray, each side displays relatively good detail with softness along the left obverse and reverse borders. NGC ID# 23RE, PCGS# 38938 Base PCGS# 5315

BUST QUARTERS

3581 **1818 B-8, R.3, XF45 NGC.** Tompkins Die State 2/2, heavily clashed on both sides. The strike is sharp and well-centered, and light wear over each side leaves substantial detail on the devices. Original old-time toning in shades of olive-gray, gold, amber, and russet appears on each side, with the more vibrant colors near the borders. Moderate marks are confined to the field beneath the left (facing) wing. NGC ID# 23RH, PCGS# 38949 Base PCGS# 5322

3582 **1821 B-4, R.3, XF40 PCGS. CAC.** Tompkins Die State 1/2. A cream-gray and pearl-white example that retains myriad hints of its initial luster, despite moderate wear on the shoulder curl and forehead. Marks are trivial aside from a thin line below the right (facing) wingtip. CAC: 7 in 40, 23 finer (10/18).
Ex: Rosemont Central States Signature (Heritage, 4/2011), lot 3405, which realized $1,495. NGC ID# 23RM, PCGS# 38966 Base PCGS# 5331

3583 **1821 B-4, R.3, XF45 PCGS Secure.** Tompkins Die State 3/2. Ocean-blue accents are more prominent on the reverse. The obverse also displays cream-gray, powder-blue, and almond-gold toning. A slight obverse rim nick at 7:30, but otherwise without noticeable marks. NGC ID# 23RM, PCGS# 38966 Base PCGS# 5331

3584 **1831 Small Letters, B-4, R.1 — Cleaned — NGC Details. Unc.** Medium wheat-gold toning accompanies this coruscating and unmarked Capped Bust quarter. Thorough evaluation reveals only unimportant hairlines. B-4 has a radial crack through the C in the denomination, but since the reverse is shared with B-3, the location of star 13 provides a secondary diagnostic. NGC ID# 23RW, PCGS# 38983 Base PCGS# 5348

3585 **1834 B-3, R.3, MS61 NGC.** Tompkins Die State 2/1. The clash mark by Liberty's ear and the descending die crack from STA across the field to RIC identifies the B-3 variety. This attractive Mint State example is well-detailed and lightly abraded with lustrous surfaces under shades of peach-gold and bluish-gray toning. NGC ID# 23RZ, PCGS# 38994 Base PCGS# 5353

SEATED QUARTERS

3586 **1850-O AU58 PCGS. Briggs 1-A.** Larry Briggs calls the 1850-O "poorly struck," and continues "many pieces come with no rims below the date, and [a] partial or nearly invisible date." But the present pearl-gray near-Mint example is nicely struck, though the obverse is coined from an evenly rusted die. Minor field marks are noted near the left and right ends of Liberty's rock. Population: 13 in 58, 15 finer (9/18).
Ex: Long Beach Signature (Heritage, 9/2007), lot 1182; Chicago Signature (Heritage, 8/2011), lot 3736, which realized $1,380. NGC ID# 23T5, PCGS# 5416

3587 **1853 Arrows and Rays MS64 PCGS.** The Briggs reference describes the 119 obverse dies and 120 reverse dies needed to accomplish a substantial mintage of more than 15 million pieces — the second-highest mintage of the long series, exceeded only by the 17.8 million quarters produced in 1876. This lustrous example is boldly struck and lightly toned, with silvery surfaces and golden-gray overtones. A great selection for type. PCGS has seen only 33 submissions in higher numeric grades (10/18).
Ex: Long Beach Signature (Heritage, 6/2014), lot 3705; Houston Signature (Heritage, 12/2014), lot 3981. PCGS# 5426

3588 **1854-O Arrows, Huge O, Briggs 1-A, FS-501, Fine 15 PCGS Secure.** Apparently, a reverse die arrived in New Orleans sans mintmark. It was extensively lapped beneath the branch stem, and an abnormally large, crude, and high-relief mintmark was hand-engraved into the die. This well-known *Guide Book* variety is pursued in all grades. A straw-gold and powder-blue example with unblemished microgranular surfaces. NGC ID# 23U7, PCGS# 395933 Base PCGS# 5434

3589 **1860 MS64 PCGS. CAC.** This impressive Choice example is sharply detailed in most areas, but a touch of softness shows on some star centers. The well-preserved surfaces display lustrous silver centers, surrounded by highlights of sea-green, magenta, and golden-brown toning. Population: 21 in 64, 13 finer. CAC: 4 in 64, 6 finer (9/18). NGC ID# 23TP, PCGS# 5451

3590 **1884 MS65 PCGS. CAC. Briggs 1-A.** All 8,000 circulation strikes were produced using this single set of dies. The original toning that covers each side includes shades of lavender, blue, green, and orange. Strike definition is good, though we note a trace of incompleteness over a few of the highest design points. Population: 14 in 65, 34 finer. CAC: 5 in 65, 13 finer (9/18). NGC ID# 23VG, PCGS# 5516

3591 **1887 MS66 PCGS Secure. Briggs 1-A.** Light wheat-gold toning visits the right obverse margin of this otherwise brilliant Premium Gem. Both sides appear pristine. Stars 8 to 13 are softly brought up, but the major devices are intricate. From a mintage of 10,000 pieces, the 1887 was saved to some extent, but few among the approximately 200 Uncirculated examples are comparable in quality with the present lot. Population: 24 in 66 (1 in 66+), 16 finer (9/18). NGC ID# 23VK, PCGS# 5519

3592 **1888-S MS64 PCGS. CAC. Briggs 4-D.** Quarter dollars were struck at San Francisco in 1888 for the first time in a decade. More than 1.2 million pieces were produced. This near-Gem is vibrantly lustrous and brilliant, showing sharp design elements. No distracting abrasions are seen. Population: 32 in 64 (1 in 64+), 17 finer. CAC: 3 in 64, 10 finer (9/18). NGC ID# 23VN, PCGS# 5521

3593 **1889 MS65 PCGS. CAC.** Last of the ultra-low mintage issues, with a business production of only 12,000 pieces. Fortunately for today's collectors, Philadelphia-area dealers apparently set aside approximately 400 Uncirculated pieces. This lustrous and boldly struck Gem is predominantly brilliant but displays a peripheral obverse band of russet-brown, lavender-red, and navy-blue patina. Struck from lightly rusted dies. The reverse is minutely die doubled, most apparent on the vertical shield lines. CAC: 7 in 65, 27 finer (9/18). NGC ID# 23VM, PCGS# 5522

1891 Quarter, Untoned MS67
Rolling Cartwheel Mint Luster

3594 **1891 MS67 NGC.** An almost perfect example of this final-year Seated quarter issue. Both sides exhibit rolling cartwheel mint luster over impeccably preserved and completely untoned surfaces, heightening the appeal of this Superb Gem. Minor strike softness occurs on stars 7 through 13. Census: 13 in 67 (1 in 67 ★), 1 finer (9/18). NGC ID# 23VR, PCGS# 5524

PROOF SEATED QUARTERS

1871 Quarter, PR66 Cameo
Multicolor Patination

3595 **1871 PR66 Cameo PCGS Secure. Briggs 1-A.** Dramatic ocean-blue, autumn-gold, and plum-red toning dominates the obverse, leaving a window of brilliance about Liberty's shield. The reverse is brilliant save for blushes of tan and aquamarine across the margin. The reflective fields are void of detractions, and provide contrast with the frosty motifs. NGC ID# 23X4, PCGS# 85570

3596 **1872 PR66 NGC. Briggs 3-C.** Rich cobalt-blue, cherry-red, and straw-gold toning embraces this intricately impressed Premium Gem. Flashy, unmarked fields contribute further to the eye appeal. Briggs 3-C is the first appearance of the proof reverse die with a die scratch through the left shield border. This readily identified reverse was used intermittently through 1880. NGC ID# 3TWH, PCGS# 5571

3597 **1886 PR66 PCGS Secure. Briggs 2-B.** Total quarter dollar production for the year amounted to 5,000 circulation strikes and 886 proofs, the lowest combined mintage for any Philadelphia issue in the entire Seated Liberty series. Dusky surfaces display iridescent shades of peach-orange, magenta, and blue when held under a lamp. Definition and preservation are phenomenal. PCGS reports 12 non-Cameo submissions finer (9/18). NGC ID# 23XJ, PCGS# 5587

3598 **1888 PR65 Cameo NGC. Briggs 2-B.** A stone-white Gem that boasts icy motifs and glassy fields. The strike is crisp, save for slight blending on the forehead curls. Inspection beneath a lens reveals infrequent faint contact. One of 832 proofs produced. Census: 16 in 65 Cameo, 16 finer (9/18). NGC ID# 23XL, PCGS# 85589

BARBER QUARTERS

3599 **1892 MS66 NGC.** Type Two Reverse. Jade-green peripheries surround the apricot-gold centers of this lustrous high-grade first-year type coin. The strike is full and the preservation is outstanding.
Ex: Central States Signature (Heritage, 4/2013), lot 2037; Orlando Signature (Heritage, 7/2013), lot 4908, which realized $1,233.75.
NGC ID# 23XT, PCGS# 5601

1892 Barber Quarter, MS67 ★ Prooflike
Exceptional Contrast

3600 **1892 MS67 ★ Prooflike NGC.** Type One Reverse. A splendid, fully brilliant coin that, at first glance, could be confused for a proof. Several Barber issues have received a Prooflike designation but the first-year 1892 is by far the most obtainable with a total of 14 pieces certified in grades that range from AU58 through MS67. At the highest grade level, this piece is only equaled by two others, and only one of those has received the Star designation (9/18). An extraordinary coin. This auction presents the specialized collector with a chance to acquire an unprecedented number of Prooflike Barber coins.
Ex: Central States Signature (Heritage, 5/2004), lot 7002, where it brought $4,140; Dallas Signature (Heritage, 11/2006), lot 657, where it realized $6,900.
From The Gary Verner Collection. NGC ID# 23XT, PCGS# 5601

1893 Quarter Dollar, MS66+
Beautifully Toned and Lustrous

3601 **1893 MS66+ PCGS Secure. CAC.** This early Barber quarter issue is relatively plentiful in lower Mint State grades, but it is scarce in Gem condition. This high-end Premium Gem is a rarity, and it is one of only a handful of coins in this grade with a CAC endorsement. Vibrant, frosty luster engulfs each side and the design elements are fully struck. Beautiful forest-green, gold, and amber toning graces each side. Population: 21 in 66 (7 in 66+), 1 finer. CAC: 11 in 66, 1 finer (9/18). NGC ID# 23XW, PCGS# 5604

3602 **1893-O MS65 NGC.** Like many issues in the Barber quarter series — especially branch mint issues — the 1893-O is conditionally rare in MS65. This Gem is vibrantly lustrous and frosty with a light golden hue overall. The eagle's right (facing) talons and the fletchings show the usual New Orleans strike softness. The mintmark is placed far right under the eagle's tailfeathers, above the D in DOLLAR. Census: 20 in 65 (1 in 65 ★), 7 finer (10/18). NGC ID# 23XX, PCGS# 5605

1893-S Quarter, MS64 Prooflike
Considerable Field Reflectivity

3603 **1893-S MS64 Prooflike NGC.** As of (9/18), this is one of only two near-Gem 1893-S quarters to receive a Prooflike designation from NGC. Two other Prooflike pieces have been graded, both are MS63. Prooflikes aside, only 18 MS64 pieces have been graded by NGC along with an additional seven finer — the highest grade given is to a single MS67. The Prooflike designation gives a cachet to this piece lacking from even higher graded examples; as such this is tied for the finest Prooflike certified. The surfaces show just the slightest marginal toning and the devices are lustrous with considerable flash in the fields. The strike is intricate, and the eye appeal obvious and immediately apparent.
From The Gary Verner Collection. NGC ID# 23XY, PCGS# 5606

3604 **1894 MS65 NGC.** At first glance, this remarkable coin has the appearance of a proof, complete with frosty luster on the well-defined portrait and deep mirroring in the fields. Closer examination of the level of detail reveals it to be a business strike, but an extraordinary one. Delicate golden accents grace the rims. The *only* Prooflike example of this issue certified by NGC (9/18).
Ex: Dallas Signature (Heritage, 10/2008), lot 685, which realized $1,610.
From The Gary Verner Collection. NGC ID# 23XZ, PCGS# 5607

3605 **1894-S MS64 ★ Prooflike NGC.** The finer of just two Prooflike coins certified by NGC, this Star-designated near-Gem displays deeply reflective fields and modest cameo contrast, heightened by frosty luster on the devices. This mostly sharp condition rarity is a trifle soft only on the right corner of the shield, and a light golden hue warms each side. Census: 56 in 64 (1 in 64 ★ Prooflike, 1 in 64+), 12 finer (9/18).
From The Gary Verner Collection. NGC ID# 23Y3, PCGS# 5609

3606 **1895 MS66 PCGS. CAC.** The 1895 Barber quarter is a rarity in Premium Gem condition, particularly with a CAC endorsement. This piece is sharp and exceptionally well-preserved with beautiful frosted luster. The obverse is snow white across the center with a peripheral frame of orange-gold. Blended sea-green and yellow-gold hues cover the reverse. Population: 16 in 66 (3 in 66+), 4 finer. CAC: 10 in 66, 2 finer (9/18).
From The Gary Verner Collection. NGC ID# 23Y4, PCGS# 5610

3607 **1895-S MS64 NGC.** Razor-sharp definition is evident on all design elements of this attractive Choice specimen, and the well-preserved surfaces radiate vibrant mint luster, with a few hints of prooflike reflectivity in selected areas. High lights of lavender toning visit the peripheries. Census: 20 in 64, 10 finer (10/18).
From The Gary Verner Collection. NGC ID# 23Y6, PCGS# 5612

3608 **1896-O MS62 NGC.** This impressive MS62 Barber quarter offers sharply detailed design elements and vibrant, satiny mint luster throughout. The well-preserved surfaces show a few hints of lavender and pale gold toning, with outstanding eye appeal. Census: 7 in 62, 36 finer (10/18).
From The Gary Verner Collection. NGC ID# 23Y8, PCGS# 5614

3609 **1897-O MS62★ NGC.** The design elements of this attractive MS62 ★ specimen are sharply struck, but some incomplete detail is noted on the eagle's feathers, due to lapping. The lightly marked, lustrous surfaces are enhanced by shades of magenta and greenish-gold toning. Census: 4 in 62*, 33 finer (10/18).
From The Gary Verner Collection. NGC ID# 23YB, PCGS# 5617

3610 **1897-O MS64 PCGS.** The 1897-O quarter is scarce in all Mint State grades. This near-Gem example displays fully prooflike mirroring in the fields and frosted, untoned devices. Tinges of gold cling to the peripheries. Several obverse stars are weak, but the center is sharp on each side. Population: 15 in 64, 30 finer (9/18).
Ex: FUN Signature (Heritage, 1/2005), lot 6501, which realized $2,300.
From The Gary Verner Collection. NGC ID# 23YB, PCGS# 5617

3611 **1897-S MS62 Prooflike NGC.** The design elements of this attractive MS62 example are strongly impressed, but some detail in the eagle's feathers is incomplete, due to lapping. The lightly marked surfaces include deeply reflective prooflike fields that show a few highlights of pale gold and lavender toning.
From The Gary Verner Collection. NGC ID# C2FN, PCGS# 85618 Base PCGS# 5618

3612 **1899-O MS64 Prooflike NGC.** This impressive Choice example displays sharply detailed design elements throughout, with lightly marked surfaces and deeply reflective prooflike fields. A few hints of violet and pale jade toning add to the overall eye appeal. Census: 1 in 64 Prooflike, 0 finer (10/18).
From The Gary Verner Collection. PCGS# 85623 Base PCGS# 5623

1901-O Quarter, Brilliant MS64
Scarce O-Mint Issue, Frosted Mint Luster

3613 **1901-O MS64 PCGS. CAC.** The 1901-O is one of the scarcer issues in the Barber quarter series, as are many New Orleans dates. Only 1.6 million pieces were produced and examples are seldom encountered finer than MS64 (and when they are, such pieces are pricey). This is an all-brilliant piece with remarkably frosted mint luster, rather than the usually encountered satiny luster common to most O-mint products. The strike is complete on the obverse and the reverse shows just a hint of softness. Population: 14 in 64, 12 finer. CAC: 5 in 64, 4 finer (9/18).
From The Gary Verner Collection. NGC ID# 23YP, PCGS# 5629

1901-S Quarter, Good 4
Unparalleled Series Rarity

3614 **1901-S Good 4 NGC.** No other Barber quarter is as famously difficult to locate as the 1901-S, an elusive issue in all grades that is seldom seen above the VG level. These coins circulated heavily on the West coast. Apparently few collectors paid attention to its low mintage of 72,664 pieces. Detail on the portrait and eagle is worn away on this golden-gray example, though the L in LIBERTY remains. The outlines are bold, and the surfaces are smooth.
From The Gary Verner Collection. NGC ID# 23YR, PCGS# 5630

3615 **1902-S MS64 PCGS.** Watery mirroring ripples in the fields of this near-Gem 1902-S Barber quarter as it is tilted beneath a light. Neither side exhibits mentionable toning and the strike is sharp. Only a few trivial marks on Liberty's neck and cheek prevent Gem classification. Population: 24 in 64 (1 in 64+), 23 finer (9/18).
Ex: Long Beach Signature (Heritage, 9/2013), lot 3713, which realized $1,997.50.
From The Gary Verner Collection. NGC ID# 23YU, PCGS# 5633

3616 **1904-O MS63 NGC.** This attractive Select specimen exhibits sharply detailed design elements and lightly marked surfaces, with vibrant, satiny mint luster on both sides. overall eye appeal is outstanding. Census: 11 in 63, 32 finer (10/18).
From The Gary Verner Collection. NGC ID# 23YZ, PCGS# 5638

3617 **1905 MS66 NGC. CAC.** Regarding this Premium Gem 1905 Barber quarter, Gene Gardner once wrote: "For a common date it took me several tries to find a coin that satisfied my desire for one with good color and eye appeal. ... I must have gone through a half-dozen before settling on this one." Indeed, this is a highly lustrous piece with terrific eye appeal. The satiny surfaces are remarkably clean and problem-free, the strike sharpness is sharp throughout, and each side is mostly brilliant save for a thin ring of russet and cobalt-blue toning around the margins. Census: 5 in 66, 1 finer. CAC: 8 in 66, 0 finer (9/18).
Ex: Central States Signature (Heritage, 5/2005), lot 6936, which realized $2,645; Eugene H. Gardner Collection, Part II (Heritage, 10/2014), lot 98418, which realized $4,124.25.
From The Gary Verner Collection. NGC ID# 23Z2, PCGS# 5639

3618 **1905-O MS64 PCGS. CAC.** Deservedly endorsed by CAC, this near-Gem 1905-O Barber quarter showcases razor-sharp definition across both sides with slight reflectivity in the fields. Sea-green and russet border toning surrounds near-brilliant centers. Finer examples of this issue are rare. Population: 29 in 64 (1 in 64+), 26 finer. CAC: 7 in 64, 16 finer (9/18).
From The Gary Verner Collection. NGC ID# 23Z3, PCGS# 5640

3619 **1908-S MS64 NGC.** Autumn-gold shades yield to bright, silver centers across the unmarked surfaces of this lustrous, Choice Uncirculated quarter. The 1908-S is surprisingly scarce in all Mint State grades from a mintage of 784,000 pieces. The strike is needle-sharp, with eye appeal that easily approaches the Gem level. Census: 25 in 64 (1 in 64+), 24 finer (10/18).
From The Gary Verner Collection. NGC ID# 23ZF, PCGS# 5652

3620 **1909-S MS64+ NGC.** This high-end Choice example displays sharp detail and smooth, satiny mint luster. Warm orange-gold toning around the obverse border lightens as it progresses toward the center, while the reverse is almost entirely consumed by fire-orange patina and glistening luminescence. Census: 25 in 64 (1 in 64+), 24 finer (9/18).
Ex: FUN Signature (Heritage, 1/2013), lot 10007, which realized $1,175.
From The Gary Verner Collection. NGC ID# 23ZK, PCGS# 5656

3621 **1909-S MS65 PCGS. CAC.** Prooflike fields on both sides of this Gem 1909-S Barber quarter heighten its appeal and accentuate the mark-free nature of the surfaces. The lower-right obverse stars are weak, but the strike is otherwise sharp. Hints of golden toning appear in the margins on each side. CAC approved in a green label holder. Population: 26 in 65, 17 finer. CAC: 4 in 65, 7 finer (9/18).
From The Gary Verner Collection. NGC ID# 23ZK, PCGS# 5656

3622 **1911-D MS64 NGC.** The strike on 1911-D quarters varies widely from shallow to nearly full. This heavily frosted, silver-gray near-Gem falls into the latter category, with sharp definition along the right side of the eagle and crisp obverse details. Bright silver luster exists beneath the well-frosted elements.
From The Gary Verner Collection. NGC ID# 23ZP, PCGS# 5660

3623 **1912 MS66+ PCGS. CAC.** Rare in MS66 and prohibitively so any finer, the 1912 Barber quarter is an important condition rarity for the Registry Set collector. This Plus-graded, CAC-approved Premium Gem displays frosty, unblemished mint luster and bold design elements. The slightest trace of blue and champagne toning tints the otherwise silvery surfaces. Population: 33 in 66 (4 in 66+), 2 finer. CAC: 10 in 66, 1 finer (9/18).
From The Gary Verner Collection. NGC ID# 23ZS, PCGS# 5662

3624 **1912-S MS64 PCGS. CAC.** Toned in warm golden hues, this CAC-approved near-Gem displays well-preserved surfaces and softly frosted mint luster. Moderate strike weakness affects the eagle's talons and the right shield corner, although the obverse is well-defined. Higher-grade 1912-S quarters are rare. Population: 32 in 64, 37 finer. CAC: 4 in 64, 10 finer (9/18).
From The Gary Verner Collection. NGC ID# 23ZT, PCGS# 5663

1914-S Quarter, MS64
Scarce at This Grade Level

3625 **1914-S MS64 NGC.** Only 264,000 1914-S Barber quarters were struck, and while many were saved, the issue becomes difficult to find in MS64 condition. This near-Gem is typically defined with incompleteness on the stars and the eagle's talons and tailfeathers. Frosty luster issues from well-preserved, largely brilliant surfaces. Golden border toning occurs around each side. Census: 9 in 64, 14 finer (10/18).
From The Gary Verner Collection. NGC ID# 23ZZ, PCGS# 5669

PROOF BARBER QUARTERS

3626 **1892 PR66 PCGS Secure.** Type Two Reverse. Quarter dollar mintages were elevated in 1892. The Mint anticipated higher demand during the introductory year of the Barber coinage. In all, 1,245 proofs were struck. This Premium Gem features intermingled violet, blue, and gold patina with considerable contrast on the reverse. Remnants of a partial print appear on the obverse. NGC ID# 2427, PCGS# 5678

3627 **1894 PR66 Cameo PCGS.** Vivid shades of cobalt-blue and lavender-gray toning blanket the impeccably preserved surfaces of this delightful Premium Gem. The sharply detailed, frosty design elements contrast boldly with the deeply reflective fields. Population: 19 in 66 (1 in 66+) Cameo, 6 finer (9/18). NGC ID# 2429, PCGS# 85680

1900 Barber Quarter, PR67
Attractive Toning

3628 **1900 PR67 PCGS.** A rare Superb Gem proof example of this popular type coin issue, showing razor-sharp detail and deeply mirrored fields. The obverse toning pattern is intriguing, exhibiting midnight-blue and lavender-gray hues in the center with olive-gold, russet, and amber around the periphery. The reverse displays the same colors but in a more dispersed format. Population: 9 in 67 (1 in 67+), 1 finer; 15 in 67 (1 in 67+) Cameo, 4 finer (9/18). NGC ID# 43VN, PCGS# 5686

3629 **1901 PR65 PCGS.** An impressive Gem proof from a mintage of 813 pieces, this coin exhibits sharply detailed design elements and deeply reflective fields, under shades of lavender-gray and sea-green toning. Population: 27 in 65, 40 finer (9/18). NGC ID# 242G, PCGS# 5687

3630 **1901 PR64 Cameo NGC. CAC.** No Ultra Cameo proof 1901 quarters are reported at NGC, making this Choice Cameo highly appealing. Indeed, its aesthetics surpass expectations. Lovely lilac toning lightens as it nears the borders, leaving the sharp, satiny design elements well-contrasted. Only some faint, almost imperceptible slide lines on Liberty's cheek prevent Gem classification. Census: 5 in 64 Cameo, 43 finer. CAC: 5 in 64, 29 finer (9/18). NGC ID# 242G, PCGS# 85687

3631 **1905 PR65 PCGS. CAC.** Although undesignated as Cameo due to its green-label holder, the present proof Gem exhibits uninterrupted frost throughout the portrait and eagle. The glassy fields ensure exemplary contrast. Brilliant except for a hint of tan toning near WE and the O in DOLLAR. NGC ID# 242L, PCGS# 5691

3632 **1907 PR65 Cameo PCGS Secure.** Just 575 proof quarters were issued in 1907, and few of those qualify for the Cameo designation. This is a brilliant-white Gem proof, with profound white-on-black contrast when viewed at an advantageous angle. Glittering, glassy-mirrored fields surround the sharply struck devices for outstanding eye appeal. A faint, solitary curved line near stars 4 to 6 is the only possible deterrent to a finer grade. NGC ID# 242N, PCGS# 5693

3633 **1912 PR65 Cameo PCGS Secure. CAC.** A faint hint of golden toning resides beneath a dusting of bluish-gray patina that gathers near the fully struck devices of this Gem Cameo proof. Mirrored fields provide bold contrast with the frosted motifs. A moderate mintage of 700 proofs yields relatively few Cameo survivors at Gem or finer levels, and fewer still with CAC endorsement. Population: 11 in 65 Cameo, 18 finer. CAC: 3 in 65, 19 finer (9/18). NGC ID# 242U, PCGS# 85698

STANDING LIBERTY QUARTERS

3634 **1917 Type One MS66 Full Head PCGS Secure.** The 1917 Standing Liberty quarter can often be found with excellent strike definition, as here, and is a perfect choice to represent the two-year Type One design. This bright, frosty Premium Gem offers a complete impression and lacks mentionable contact. Each side is totally brilliant. NGC ID# 242Z, PCGS# 5707

3635 **1917 Type One MS66 Full Head NGC.** A delightful Premium Gem representative of the short-lived Type One design, with sharply detailed design elements and Full Head definition. The brilliant surfaces are well-preserved and l=brightly lustrous throughout. NGC has graded 68 numerically finer examples (10/18). NGC ID# 242Z, PCGS# 5707

3636 **1917 Type One MS66+ Full Head PCGS Secure.** A sharp, high-end Full Head example of this popular type coin issue, showing frosty luster and well-preserved surfaces. Deep fire-orange and amber toning blankets each side, masking a few trivial marks that keep this coin from a full Superb Gem grade. NGC ID# 242Z, PCGS# 5707

3637 **1917 Type One MS67 Full Head PCGS Secure.** A magnificent Superb Gem, from the final year of the Type One design, this coin exhibits sharply detailed design elements, with full definition on Liberty's head. The impeccably preserved, lustrous surfaces show a few hints of pale gold toning. Population: 94 in 67 (8 in 67+) Full Head, 0 finer (9/18). NGC ID# 242Z, PCGS# 5707

3638 **1917-D Type Two MS66 PCGS.** A thoroughly lustrous and well-preserved Premium Gem from the first year with stars below the eagle. The borders display light russet-brown toning. The strike is bold except on Liberty's head, the top of the date, and shield rivet pair near the waist. Certified in a green-label holder.
Ex: Baltimore ANA Signature (Heritage, 7/2008), lot 309, which realized $1,955. NGC ID# 3TWS, PCGS# 5716

1918/7-S Quarter, Fine 12
Problem-Free, Key Date

3639 **1918/7-S FS-101 Fine 12 PCGS. CAC.** The underdigit is evidence as thickness from the crossbar and downstroke within the 8. An unblemished key date quarter with consistent cream-gray color. One has to wonder whether the same mint worker was also responsible for the 1918/7-D nickel, another error created when working hubs of two different dates were used to create a working die. NGC ID# 243A, PCGS# 395949 Base PCGS# 5726

1918/7-S Quarter, Fine 15
Key *Guide Book* Variety, FS-101

3640 **1918/7-S FS-101 Fine 15 PCGS.** The fields are mostly stone-gray, while the devices are often a shade lighter on this high-end-for-the-grade Fine 15 example. Although the finer points of Hermon MacNeil's famous Standing Liberty design are somewhat obscured by blending, the all-important overdate, the result of a hubbing error, remains bold. Housed in a green label holder. NGC ID# 243A, PCGS# 395949 Base PCGS# 5726

1920-S Standing Liberty Quarter, MS63
Elusive Full Head Specimen

3641 **1920-S MS63 Full Head PCGS.** From a mintage of 6.3 million pieces, the 1920-S Standing Liberty quarter is an elusive issue in high grade, with the Full Head designation. This attractive Select specimen offers well-detailed design elements, with full definition on Liberty's head and the usual softness on the shield rivets. The lightly marked, lustrous surfaces are toned in shades of lavender-gray, golden-brown, and amber. Population: 19 in 63 Full Head, 65 finer (9/18). NGC ID# 243G, PCGS# 5739

3642 **1921 MS64 PCGS Secure.** Liberty's temple is slightly weak, preventing a Full Head designation. The date and shield rivets are sharp, however, and the eagle's feathers are well-defined. Barely a trace of light golden border toning warms the otherwise brilliant, satiny surfaces. No major abrasions are seen. NGC ID# 243H, PCGS# 5740

3643 **1923 MS67 PCGS Secure. CAC.** This high-end 1923 Standing Liberty quarter earns high marks for eye appeal. Frosty, radiant luster glistens beneath delicate gold and pale lilac toning on each side, and a loupe fails to reveal a single surface abrasion of note. Some strike weakness affects Liberty's head, the shield rivets, and the date numerals, but the reverse eagle is sharp. A rarity with the CAC endorsement. CAC: 23 in 67, 0 finer (9/18). NGC ID# 243J, PCGS# 5742

3644 **1925 MS66 Full Head PCGS.** The 1925 quarter dollar is not particularly rare overall, but series specialists often spend years searching for a high-end Full Head coin that is "just right," since satiny luster and uneven strikes often lend to unimpressive eye appeal even in high grades. This Premium Gem is sharp on the head, shield rivets, and toes, and the luster is slightly more luminous than usual. A dusting of champagne-gold toning is deepest on the obverse. Population: 88 in 66 (4 in 66+) Full Head, 14 finer (9/18). NGC ID# 243P, PCGS# 5753

3645 **1927-D MS65 Full Head NGC.** The 1927-D is a better date with Full Head detail. This Gem is satiny and almost entirely brilliant, showing only slight yellow-gold toning around the outer peripheries. Liberty's head is sharp but some weakness remains on the shield rivets and Liberty's toes. A few light contact marks are seen only beneath a loupe. Census: 48 in 65 Full Head, 12 finer (10/18). NGC ID# 243V, PCGS# 5763

WASHINGTON QUARTERS

3646 **1932-D MS64 PCGS Secure. CAC.** Pleasing, original shades of lavender-gray, golden-brown, and amber toning visit the lightly marked surfaces of this sharply detailed Select specimen. The 1932-D Washington quarter is an elusive series key.
Ex: Houston Money Show Signature (Heritage, 12/2014), lot 4038, where it realized $1,119.78. NGC ID# 2448, PCGS# 5791

1939-S Quarter, MS67+
Among Finest Certified

3647 **1939-S MS67+ PCGS Secure.** Iridescent arcs of cherry-red, lemon-gold, and powder-blue illuminate portions of the borders. The fields and devices are brilliant. A lustrous, nicely struck, and essentially immaculate Superb Gem. Worthy of the finest collection, since none are certified finer at either leading service. A lower mintage branch issue. Population: 81 in 67 (8 in 67+), 0 finer (9/18). NGC ID# 244T, PCGS# 5810

3648 **1959 MS67 PCGS Secure. CAC.** Dappled toning blankets the obverse in neon-green, pink, magenta, and ice-blue color, yet the reverse remains largely brilliant. Only a few blushes of thin patina appear on that side. The relief elements exhibit pinpoint detail. Marks are virtually unseen. An important Registry Set candidate. Population: 19 in 67 (1 in 67+), 0 finer. CAC: 10 in 67, 0 finer (9/18). NGC ID# 246H, PCGS# 5866

1962-D Quarter, MS67
One of Finest Certified at PCGS

3649 **1962-D MS67 PCGS.** To date, this 1962-D quarter ranks as one of the 10 finest (at maximum) PCGS-graded survivors from a mintage of more than 127.5 million pieces. Surface ticks and/or impaired luster are the usual culprits that keep the vast majority of Mint State coins from reaching such exalted grade levels. The Mint's emphasis was on quantity, not quality, and the coins show it. This is a stunning and flawless coin, untoned save for a faint wash of gold, pristine and boldly struck throughout. Population: 13 in 67 (1 in 67+), 0 finer (9/18). NGC ID# 246R, PCGS# 5873

EARLY HALF DOLLARS

3650 **1795 2 Leaves, O-105a, T-25, R.4, VG8 PCGS Secure.** Tompkins Die State 2/3. A radial die crack to the center of the B in LIBERTY is diagnostic for Overton-105a. This evenly worn Flowing Hair type coin has bold legends save for minor fading on STATES. All stars are sharp, and the dentils are nicely separated across most of the obverse and almost half of the reverse. The neck curls are well defined. The slate-gray surfaces are minimally abraded for the Very Good grade. NGC ID# 24E7, PCGS# 39221 Base PCGS# 6052

3651 **1795 2 Leaves, O-107a, T-31, R.5, VG8 PCGS.** A heavy reverse die break between 2 and 8 o'clock confirms the better Overton variety. Gunmetal-gray fields contrast with stone-white high points. A pair of minor thin marks near the D in UNITED, but attractive overall.
Ex: Houston Signature (Heritage, 12/2008), lot 671, which realized $1,610. NGC ID# 24E7, PCGS# 39224 Base PCGS# 6052

1795 Flowing Hair Half Dollar, VF30
Two Leaves, O-110, T-21

3652 **1795 2 Leaves, O-110, T-21, R.3, VF30 PCGS.** Tompkins Die State 2/1. The obverse is lightly clashed and no die cracks have formed on the reverse. Overton-110 is collectible across a wide range of grades and die stages. This midgrade representative has light silvery interiors that cede to gold and stone-gray hues around the borders. The peripheral elements, including the date, as well as the central curls and feathers are well-detailed with normal blending. NGC ID# 24E7, PCGS# 39228 Base PCGS# 6052

3653 **1801 O-101, T-2, R.3, Fine 15 PCGS.** The 1801 is the first year of issue for the Draped Bust, Heraldic Eagle design, and problem-free survivors are seldom encountered. This unblemished example has cream-gray surfaces that deepen to cobalt-blue and lavender toward the rims.
Ex: Long Beach Signature (Heritage, 9/2016), lot 3984, which realized $2,173.75. NGC ID# 24ED, PCGS# 39267 Base PCGS# 6064

1805/4 O-101 Half Dollar, XF40
Circulated Cameo Appearance

3654 **1805/4 O-101, T-4, R.3, XF40 NGC.** Charcoal-gray borders cede to dove-gray fields and pearl-white high points. A well-defined representative with scattered minor obverse marks and an unabraded reverse. An obvious overdate with the crosslet, diagonal, base, and upright of the 4 all partly visible.
Ex: Long Beach Signature (Heritage, 6/2015), lot 4455, where it brought $2,820. NGC ID# 24EH, PCGS# 39290 Base PCGS# 6070

3655 **1806/5 O-104a, T-1, R.5, VF25 PCGS.** Tompkins Die State 4/5, without a "full cud" over the TE in UNITED. There is a cud over all of the U and half of the N in UNITED, and the obverse has a retained die break over star 11. While the advanced die state commands specialist interest, the coin itself is pleasing. Gunmetal-gray fields contrast with stone-white high points. Evaluation yields only a few unimportant marks. NGC ID# 37BR, PCGS# 39302 Base PCGS# 6077

1806 O-109 Half Dollar, AU50
No Stem, Pointed 6
Exceptional Eye Appeal

3656 **1806 Pointed 6, No Stem, O-109, T-15, R.1, AU50 PCGS Secure.** Generous glimmers of luster emerge from the borders and motifs of this cream-gray Draped Bust type coin. The lightly circulated surfaces are refreshingly unabraded. The die sinker neglected to punch the stem of the eagle's branch into the die, which makes it appear as if the branch is growing from the claw. Both sides exhibit multiple sets of clash marks, as usual for this popular *Guide Book* variety. NGC ID# 24EJ, PCGS# 39310 Base PCGS# 6073

3657 **1806 Pointed 6, Stem, O-113, T-13, High R.5, VF30 PCGS.** Tompkins Die State 1/2 with a radial crack near the D in UNITED. A pearl-white midgrade example of a rare die pairing. The reverse stars are softly impressed where opposite the high relief bust truncation, but no marks are noticeable and hints of luster linger in the curls and plumage. NGC ID# 24EJ, PCGS# 39314 Base PCGS# 6071

1806 O-123', T-23 Draped Bust Half Dollar
Pointed 6, With Stem, XF40

3658 1806 Pointed 6, Stem, O-123', T-23, R.6, XF40 PCGS. Tompkins Die State 1/1. A lightly worn example of this more elusive die pair. Coins from this early state of the dies are scarcer than those with a crack through D STATES. Silver and powder-blue interiors combine with slate-gray margins. The surfaces are surprisingly radiant despite the high-point rub.
Ex: FUN Signature (Heritage, 1/2014), lot 4349, where it brought $2,350.00. NGC ID# 24EJ, PCGS# 39329 Base PCGS# 6071

1806 O-124, T-22 Half Dollar, Fine 12
Rare E Over A in STATES Variety

3659 1806 E Over A in STATES, O-124, T-22, R.6, Fine 12 PCGS. Tompkins Die State 1/1. This dramatic variety features the E in STATES punched over a clear underlying A. It is listed separately in the *Guide Book* and is widely sought-after as such. The finer points of the design are worn away on this Fine 12 example, and half the reverse stars were never struck up to begin with, but the overall impression is good. Olive-gray toning covers the surfaces. A couple of pinscratches are noted on Liberty's bust. NGC ID# 24EJ, PCGS# 39330 Base PCGS# 6071

1806 O-127a Half Dollar, VG10
Pointed 6, Stem, About 20 Coins Known

3660 1806 Pointed 6, Stem, O-127a, T-9, High R.6, VG10 PCGS. Tompkins Die State 2/1. Like nearly all known examples of the rare O-127 die marriage, this VG10 offering is in a late die state (O-127a) with a crack through the lower points of star 6. The variety was discovered in 1974 by Don Frederick. Current estimates peg the total number of survivors at 19 or 20 coins, many of which display various surface problems. This piece does not appear to match any of the 19 coins listed by Steve Tompkins (2015) and is entirely problem-free. Smooth surfaces are toned in gold and lavender-gray patina. Detail is strong for the VG grade level. PCGS# 39335 Base PCGS# 6071

1807 Draped Bust Half, AU50
O-103, Scarce in About Uncirculated

3661 1807 Draped Bust, O-103, T-11, R.3, AU50 PCGS. Tompkins Die State 2/2. The obverse has a fine die crack from star 7 to LI and the top of the head. No reverse die cracks are evident. A delightful example, this scarce 1807 Draped Bust half dollar has bright, untoned silver surfaces that retain hints of luster. The devices are slightly subdued, and both sides show multiple die clashing. NGC ID# 24EM, PCGS# 39340 Base PCGS# 6079

3662 1807 Draped Bust, O-105, T-4, R.1, XF40 PCGS Secure. Tompkins Die State 2/2, strongly clashed above the date and cracked above STATES. The reverse is clashed near the base of the shield. Powder-blue, cherry-red, and sun-gold toning illuminate the peripheries. The fields and motifs are dove-gray. A beautiful final-year Draped Bust half dollar without any reportable abrasions. NGC ID# 24EM, PCGS# 39343 Base PCGS# 6079

BUST HALF DOLLARS

1807 Capped Bust Half, Choice XF
Small Stars, O-113

3663 1807 Capped Bust, Small Stars, O-113, R.2, XF45 PCGS. Boldly double-clashed, but without a crack across OF AMER. This die marriage achieves its own *Guide Book* listing, since the other 1807 Capped Bust half varieties have large stars. O-113 is also interesting for its ribbed lettering within LIBERTY and E PLURIBUS UNUM. This Choice XF example displays lavender and slate toning, with the former more prevalent on the obverse. No marks are readily apparent. NGC ID# 24EN, PCGS# 39359 Base PCGS# 6087

3664 1817 O-112a, R.2, AU58 PCGS. A lengthy die crack across the right reverse periphery attributes this multiply-clashed and minimally marked Borderline Uncirculated half dollar. The fields and devices are lightly toned, but the borders exhibit iridescent navy-blue, golden-brown, and lavender-red patina. The strike is crisp except on the right-side stars. NGC ID# 24F6, PCGS# 39507 Base PCGS# 6109

3665 1817 O-113, R.2, AU58 NGC. A die line beneath the eagle's beak is Dr. Glenn Peterson's pick-up point for Overton-113. A diagonal die line between the TA in STATES is also diagnostic. This lustrous representative displays deep sea-green, straw-gold, and plum-red toning. Smooth aside from a few tiny ticks on the portrait. NGC ID# 24F6, PCGS# 39508 Base PCGS# 6109

3666 **1818 O-106a, R.3, AU58 PCGS. CAC.** The triple dentil above the upright of the R in AMERICA identifies the reverse die. The radial crack through star 12 confirms the marriage. This golden-brown and steel-gray representative is remarkably devoid of marks. The centers exhibit a hint of granularity. CAC: 25 in 58, 25 finer (9/18). NGC ID# 24F9, PCGS# 39522 Base PCGS# 6113

3667 **1818 O-109, R.1, AU58 PCGS. CAC.** A stone-gray near-Mint Bust type coin that deepens to golden-brown and apple-green near the rims. The lightly abraded surfaces display ample luster and exhibit a bold strike. Dr. Peterson calls O-109 and O-110 the "Jumping 1's" variety, but it is the first 8 in the date that is out of alignment, entered low and too distant from the first 1.
Ex: Long Beach Signature (Heritage, 9/2009), lot 742, which realized $977.50. NGC ID# 24F9, PCGS# 39525 Base PCGS# 6113

1819/8 Capped Bust Half Dollar, AU58
O-106, Large 9, Scarcely Seen This Nice

3668 **1819/8 Large 9, O-106, R.4, AU58 PCGS.** Aside from the Large 9 being struck over an 8, this variety is identified by the diagonal die line above the 1 and the first T in STATES in line with the I in PLURIBUS. This AU58 represents one of the better O-106 offerings in recent years. Thin antique patina accents otherwise bright silver surfaces. Minimal friction appears over strong relief elements. Only the 0 in the denomination is soft. NGC ID# 24FC, PCGS# 39562 Base PCGS# 6119

1820 O-105a Half Dollar, Near-Mint
Large Date, Knob, Square Base 2

3669 **1820 Square Base 2, Large Date, Knob, O-105a, R.3, AU58 PCGS.** The late die state with several peripheral obverse cracks. Chestnut-gold fields and devices are bounded by aquamarine and plum-red borders. A sharply struck representative with superior luster for the near-Mint level. Abrasions are confined to a few thin lines near the beak and wingtips. PCGS# 39568 Base PCGS# 6122

3670 **1821 O-104a, R.2, AU58 PCGS.** This sharply detailed near-Mint specimen represents the less available die state with the die crack across the top of UNITED STATES. Gold-to-orange patina forms a light layer across much of the still-lustrous, moderately textured surfaces.
Ex: FUN Signature (Heritage, 1/2011), lot 3661, realized $1,782.50. NGC ID# 24FF, PCGS# 39581 Base PCGS# 6128

3671 **1823 O-105, R.1, MS62 PCGS Secure.** The centering dot on the reverse is in a space on its own. Overton-105 is a collectible variety that can be found in high grades, making it a perfect die marriage to represent the 1823 date. This bright MS62 half dollar is almost fully brilliant, the only interruption being a band of golden-russet color along the upper reverse. Both sides are well-struck with light marks. NGC ID# 24FJ, PCGS# 39608 Base PCGS# 6131

3672 **1825 O-112, R.3, MS63+ PCGS Secure.** The outer curve of the 2 is slightly recut, and AME are solidly joined together at their base. The central devices are boldly struck. Blended shades of blue-green, violet, and gold color adorn each side, allowing soft mint luster to emanate through the original patina. Small marks on Liberty's cheek barely stand in the way of a higher grade. NGC ID# 24FL, PCGS# 39659 Base PCGS# 6142

3673 **1827 Square Base 2, O-141, R.3, AU58 PCGS. CAC.** Steel-gray and walnut-brown toning accompanies this relatively unabraded Capped Bust half. A late die state without any reverse dentils. The high points exhibit light wear, but luster glimmers from protected areas.
Ex: FUN Signature (Heritage, 1/2011), lot 10849, which realized $747.50. NGC ID# 24FN, PCGS# 39741 Base PCGS# 6144

3674 **1828 Curl Base 2, Knob, O-107, R.2, AU58 PCGS.** Rich autumn-brown, cobalt-blue, olive-green, and fire-red toning embraces this partly lustrous and essentially unabraded example. A whisper of wear on the shoulder curl and other high points confirms a momentary stint in commerce many generations ago.
Ex: FUN Signature (Heritage, 1/2011), lot 3723, which realized $2,185. NGC ID# 24FR, PCGS# 39760 Base PCGS# 6149

3675 **1828 Square Base 2, Small 8s, Large Letters, O-118, R.3, AU58 PCGS. CAC.** A hint of wear on the curl beneath the Y in LIBERTY denies a Mint State assessment, but this olive-green, cream-gray, and golden-brown early half dollar lacks noticeable marks. Luster fills the margins and motifs. Dr. Peterson identifies O-118 by the very close spacing between the D in UNITED and the first S in STATES. NGC ID# 24FR, PCGS# 39773 Base PCGS# 6151

1830 Half Dollar, MS64
Overton-101, Small 0

3676 **1830 Small 0, O-101, R.1, MS64 PCGS Secure.** The A in STATES is recut and partially filled, diagnostic for Overton-101. A splendidly toned example that has sea-green, straw-gold, russet-brown, and steel-gray shades throughout both sides. The fields are uncommonly smooth, and the cheek shows only unobtrusive marks. A quality addition to an early silver type set. NGC ID# 24FU, PCGS# 39810 Base PCGS# 6156

1830 Small 0 Half Dollar, MS64
O-111, Second on the Condition Census

3677 **1830 Small 0, O-111, R.2, MS64 PCGS. CAC.** IBE in LIBERTY is recut, and the I in PLURIBUS is centered under the right side of the T in UNITED. Herrman lists a single Gem finer than this MS64 coin on his Fall 2018 *Auction & Mail Bid Prices Realized* list. This attractive Choice Uncirculated offering remains entirely brilliant and highly lustrous. The centers are strong, while the marginal elements are drawn to the rims. A few small abrasions appear on the neck. However, the fields are exceptionally clean. NGC ID# 24FU, PCGS# 39822 Base PCGS# 6156

3678 **1830 Large 0, O-123, R.1, AU58 PCGS. CAC.** Deep russet-brown, ruby-red, and gunmetal-gray toning blankets this unmarked, attractive, and original Borderline Uncirculated Capped Bust type coin. Wear is minimal and there are no detractions. O-123 Population: 6 in 58, 9 finer (9/18). NGC ID# 24FU, PCGS# 39834 Base PCGS# 6157

1831 O-101 Half Dollar, MS64
Medium Original Toning

3679 **1831 O-101, R.2, MS64 PCGS Secure.** An attractively toned near-Gem that exhibits tan-brown centers and broad aquamarine borders. Lustrous and unblemished with superior eye appeal. The strike shows moderate incompleteness on the stars and the curl above the ear. The usual O-101 die state with UNITED drawn toward the rim and an absence of the dentils on the lower reverse. Condition Census quality for the marriage. NGC ID# 24FV, PCGS# 39837 Base PCGS# 6159

3680 **1832 Small Letters, O-112, R.2, MS62 PCGS Secure.** A "dash" to the left of the 1 in the date aids in confirming this plentiful die variety. Luster illuminates the fields on this piece, each side showing dusky olive-gold patina. Several obverse stars and the upper edge of the eagle's right (facing) wing are weak, but the remainder of the coin is well-defined. Grade-limiting abrasions are unobtrusive. NGC ID# 24FW, PCGS# 39870 Base PCGS# 6160

1832 Half Dollar, Near-Gem
Small Letters, O-115
Rich Multicolor Patina

3681 **1832 Small Letters, O-115, R.1, MS64 PCGS Secure.** Iridescent blue-green, autumn-brown, and dove-gray toning encompasses this satiny high-grade Capped Bust type coin. The fields are well preserved, and the cheek shows only a single light thin mark. The left-side borders show occasional incompleteness of strike. A Condition Census example worthy of the finest specialized holding. NGC ID# 24FW, PCGS# 39874 Base PCGS# 6160

1833 O-108 Half Dollar, MS64+
Unmarked and Lustrous

3682 **1833 O-108, R.1, MS64+ PCGS Secure.** The pick-up point for Overton-108 is the extension of the lowest horizontal shield line deep into the eagle's right (facing) wing. The present lustrous representative displays medium sea-green and chestnut-gold toning. The surfaces are exceptionally smooth, and the strike shows only slight high-point incompleteness. NGC ID# 24FX, PCGS# 39896 Base PCGS# 6163

1833 O-110 Half Dollar, MS64
Condition Census Quality

3683 **1833 O-110, R.1, MS64 PCGS Secure.** The diagonal die line within the C in 50 C is Dr. Peterson's identifier for Overton-110. The present example ranks within the Condition Census for the variety, and exhibits lush cream-gray, forest-green, and caramel-gold toning. No marks are remotely worthy of mention. The strike is crisp at the centers, though a few peripheral elements are incompletely brought up, such as the C in AMERICA. NGC ID# 24FX, PCGS# 39898 Base PCGS# 6163

3684 **1834 Large Date, Large Letters, O-101, R.1, AU58 PCGS. CAC.** Lime-green and straw-gold toning adorns this lustrous and unblemished example. The strike shows softness on most stars, but actual circulation wear is inconsequential. A fairly early die state with repunching on the upright of the 5 in 50 C, and a spur from the lower serif of the E in AMERICA. These features are absent on later die states of the variety, due to a lapped reverse die.
Ex: FUN Signature (Heritage, 1/2011), lot 10946, which realized $977.50. NGC ID# 24FY, PCGS# 39905 Base PCGS# 6164

3685 **1834 Large Date, Small Letters, O-105, R.1, MS62 PCGS. CAC.** The 4 in the date is repunched along the bottom of the crossbar, and the ATES in STATES is also doubled. A thin die line between the final S in STATES and the O in OF confirms the Overton-105 die marriage. This CAC-endorsed Mint State coin displays vibrant cartwheel luster and sharp design elements. Grade-limiting abrasions are surprisingly unobtrusive, hidden beneath original gold, russet, olive, and amber toning on each side. NGC ID# 24FY, PCGS# 39909 Base PCGS# 6165

3686 **1834 Large Date, Small Letters, O-106, R.1, MS63 PCGS Secure.** The M in AMERICA has a defective left upright, diagnostic for Overton-106. This lustrous and lightly toned Select example is refreshingly unmarked. The stars are softly brought up, as is the eagle's wing near the left shield border. The legends are sharply impressed. NGC ID# 24FY, PCGS# 39910 Base PCGS# 6165

REEDED EDGE HALF DOLLARS

1836 Reeded Edge Half Dollar, VF30
GR-1, Historic Steam Press Issue

3687 **1836 Reeded Edge, GR-1, R.2, VF30 PCGS.** Although millions of lettered edge half dollars were coined in 1836, the first reeded edge half issue had a very low mintage, traditionally regarded as 1,200 pieces. This midgrade representative displays moderate wear on the curls and wings. The slate-gray surfaces are generally smooth, though we note a cluster of field marks near Liberty's neck curls. Housed in an old green label holder. NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

3688 **1836 Reeded Edge, GR-1, R.2 — Cleaned — NGC Details. Unc.** Franklin Peale's tour of world mints resulted in the installation of a steam press at the Philadelphia Mint in 1836. A small number (traditionally regarded as 1,200 pieces) of reeded edge halves were struck that year on the new steam press. The issue is much scarcer than the 1836 lettered edge halves coined on screw presses. The present reeded edge half has a subdued stone-gray appearance. The surfaces are faintly hairlined but devoid of consequential bagmarks. NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

SEATED HALF DOLLARS

3689 **1858-O WB-101, Die Pair 14, R.3, MS64 PCGS. CAC.** Golden-brown and steel-gray toning enrich this satiny and well-preserved near-Gem. Only the eagle's left ankle lacks a full impression. A high mintage issue, the 1858-O is readily available in XF-AU grades but is very scarce in Mint State. CAC: 2 in 64, 6 finer (10/18). NGC ID# 24HW, PCGS# 572116 Base PCGS# 6294

3690 **1864 WB-101 MS63 NGC.** A crisply struck and coruscating Civil War half dollar. Light sea-green and lilac toning visit pleasing surfaces. A rim die break is present on the reverse near 10:30. Certified in a circa-2000 holder.
Ex: Long Beach Signature (Heritage, 9/2008), lot 2212; Pittsburgh Signature (Heritage, 10/2011), lot 3745, which realized $1,380. PCGS# 572158 Base PCGS# 6311

3691 **1866 Motto, WB-101, MS63 NGC.** All circulation-strike 1866 half dollars from Philadelphia are of the later With Motto type. These coins are popular as type pieces due to being the first year of issue, but Mint State examples are scarce. This coin displays prooflike fields with russet and lilac border toning that surrounds light golden interiors. Moderate strike softness is noted on the right-hand stars and the left side of the eagle and shield. Census: 8 in 63, 24 finer (9/18).
Ex: Long Beach Signature (Heritage, 6/2006), lot 1678, which realized $1,150. PCGS# 572171 Base PCGS# 6319

3692 **1868-S WB-101, Die Pair 4, R.3, MS63 PCGS Secure.** The 1868-S has a respectable mintage, but most of the production entered West Coast commerce, where the half dollar was the principal silver denomination. Mint State survivors are rare. A smooth and satiny example with peripheral gunmetal-blue toning. A die crack descends through the T in UNITED to confirm the late die state. The drapery beneath the elbow is mostly lapped away. PCGS# 572184 Base PCGS# 6324

3693 **1872-CC WB-101, Die Pair 2, R.4, XF40 PCGS. CAC.** The third-year Carson City issue has a reasonable mintage of 257,000 pieces but is nonetheless scarce in Fine and better grades. This is a problem-free deep dove-gray example with well-defined motifs and only cursory contact. The reverse die was earlier used to strike 1870-CC (WB-2, WB-3) and 1871-CC (WB-2) half dollars. NGC ID# 64EJ, PCGS# 572203 Base PCGS# 6334

3694 **1872-CC WB-101, Die Pair 6, R.4, XF40 PCGS. CAC.** Although 257,000 half dollars were struck at Carson City in 1872, the issue circulated extensively and is elusive today, carrying a premium even in well-worn grades. This collector-grade XF coin displays strong detail and pleasing lilac-gray patina. The CAC endorsement is an added appeal. NGC ID# 64EJ, PCGS# 572203 Base PCGS# 6334

3695 **1873-CC No Arrows, Small CC, WB-101, Die Pair 1, R.3, VF25 PCGS.** One of two known die pairs for the No Arrows variety, showing a small mintmark and the Closed 3 logotype. This midgrade coin displays lovely battleship-gray patina and smooth surfaces. The design elements retain most major details, although the E in LIBERTY is weak. An outstanding coin for the grade. NGC ID# 24KC, PCGS# 572214 Base PCGS# 6338

3696 **1873-CC Arrows, Small CC, WB-102, Die Pair 3, R.4, VF35 PCGS Secure. CAC.** The shaft of the right arrowhead points to the center of the 3. These two-year Carson City type coins are always sought-after, especially the slightly more accessible 1873-CC, which claims a mintage of 214,560 pieces. The original surfaces are exactly as they should be, evenly toned in golden-olive and deep-gray patina with light rub over bold devices. Choice for the grade. PCGS# 572215 Base PCGS# 6344

3697 **1875-CC WB-101, Die Pair 4, R.4, AU50 PCGS.** A couple of vertical die lines in the space below Liberty's chin aid in identifying this die variety, which shows the mintmark widely spaced. The present coin has satiny fields and only lightly worn design elements. A hint of champagne toning graces the slate-gray surfaces and distracting contact marks are seen. PCGS# 572227 Base PCGS# 6350

1877 Seated Half Dollar, MS65
Beautifully Toned

3698 **1877 Closed Bud, WB-103, MS65 PCGS. CAC.** Vibrant blue toning appears along the outer edges of both sides of this Gem. Closer examination reveals additional colors, including fuchsia and violet, with the remaining surfaces exhibiting rich gold hues. The strike is sharp, with only a few minor areas of incompleteness. Population: 24 in 65 (3 in 65+), 32 finer. CAC: 7 in 65, 15 finer (9/18).
Ex: Long Beach Signature (Heritage, 6/2014), lot 3950, where it brought $2,937.50. NGC ID# 24KK, PCGS# 572246 Base PCGS# 6355

PROOF SEATED HALF DOLLARS

3699 **1858 PR63 NGC.** A deeply reflective Select proof with original amber-orange, olive-gray, violet, and russet toning overall. Strike weakness on the eagle's left (facing) talons and Liberty's temple is not bothersome. This proof issue is scarce in all grades. Census: 15 in 63, 25 finer; 2 in 63 Cameo, 2 finer (9/18). NGC ID# 27TH, PCGS# 6412

3700 **1860 PR64 PCGS.** The well-preserved surfaces of this attractive Choice proof are blanketed in shades of cerulean-blue, lavender, and emerald-green toning, with deeply reflective fields underneath. The design elements are sharply detailed, aside from some slight softness on the upper stars. Population: 43 in 64 (2 in 64+), 26 finer (9/18). NGC ID# 27TK, PCGS# 6414

1863 Half Dollar, Toned PR65
Scarce, Low-Mintage Issue

3701 **1863 PR65 PCGS.** Gem proof half dollars stuck during the Civil War are scarce, especially with the rich original toning seen on the present specimen. Autumn-gold, lilac, and blue-green dominate the obverse. Caramel-gold drapes the reverse. A proof mintage of 460 pieces ensures a paucity of high-grade survivors. Population: 14 in 65, 3 finer (9/18).
Ex: Houston Signature (Heritage, 11-12/2012), lot 3685, where it brought $4,825. NGC ID# 27TP, PCGS# 6417

3702 **1865 PR64 PCGS.** This is a sharp near-Gem proof with deeply reflective fields and softly frosted devices. Russet, olive, and light golden toning covers each side in irregular patterns, masking some stray hairlines that limit the grade. Pleasing for the PR64 level. NGC ID# 27TS, PCGS# 6419

1874 Arrows Half Dollar, PR64
Toned Proof Type Coin

3703 **1874 Arrows PR64 PCGS Secure.** Ocean-blue, violet, and amber toning covers both sides of this Choice proof example. Nonetheless, the fields are deeply reflective and complement sharp design elements. Any grade-limiting hairlines are hidden beneath the patina. The 1874 is one of only two proof issues in the short-lived With Motto, Arrows at Date type. This piece is highly appealing for the grade. NGC ID# 27UV, PCGS# 6435

3704 **1879 PR64 PCGS Secure. CAC.** Well-struck and modestly contrasted on both sides, although not designated as a Cameo. Vivid blue and violet border toning surrounds orange-gold and champagne interiors, complementing well-struck design elements. Highly appealing for the grade, as recognized by CAC. CAC: 8 in 64, 19 finer (9/18). NGC ID# 27UE, PCGS# 6440

3705 **1881 PR64 Cameo NGC.** NGC reports no Ultra Cameo examples of the 1881 proof half dollar, making this Choice Cameo coin highly appealing. Strong contrast is apparent on each side, as rings of blue, gold, and lilac toning are constrained to the borders. A light golden hue graces the interiors. A fully struck coin with outstanding eye appeal. Census: 32 in 64 Cameo (1 in 64+, 1 in 64 ★), 40 finer (9/18). NGC ID# 27UG, PCGS# 86442

1885 Half Dollar, PR64 Cameo
Starkly Contrasted

3706 **1885 PR64 Cameo PCGS Secure. CAC.** Seated Liberty half dollars from the 1880s are popular in both circulation-strike and proof format. In the case of the 1885, which claims 5,200 examples of the former and 930 of the later, proofs tend to be the more accessible in high grades. This contrasted near-Gem is light golden and fully struck. Reflective mirrors surround frosty devices, generating CAC-approved eye appeal. NGC ID# 27UL, PCGS# 86446

3707 **1890 PR63 Cameo PCGS. CAC.** This attractive Select proof exhibits sharply detailed, frosty design elements that contrast boldly with the deeply reflective fields. The lightly marked surfaces show highlights of greenish-gold toning in peripheral areas. Population: 10 in 63 Cameo, 33 finer. CAC: 5 in 63, 11 finer (9/18). NGC ID# 27US, PCGS# 86451

1891 Half Dollar, PR65 Cameo
Attractively Toned and Contrasted

3708 **1891 PR65 Cameo NGC.** NGC lists no proof 1891 half dollars with Ultra Cameo contrast, and even Cameo coins are rare. This Gem is modestly contrasted through original gold, lavender, and sky-blue toning. Liberty's temple is slightly soft, but the strike is otherwise sharp and eye appeal surpasses expectations for the grade. Census: 8 in 65 Cameo, 10 finer (9/18). NGC ID# 27UT, PCGS# 86452

BARBER HALF DOLLARS

3709 **1892 MS65 PCGS. CAC.** A well-struck, frosty Gem example of this first-year type coin issue, showing beautiful multicolor toning. Concentric shades of ocean-blue, mint-green, rose-gold, violet, and amber paint each side. No distracting abrasions are seen. CAC: 34 in 65, 41 finer (9/18).
From The Gary Verner Collection. NGC ID# 24LF, PCGS# 6461 Base PCGS# 6461

3710 **1892-S MS64 PCGS.** Dappled shades of magenta and golden-brown toning visit the lightly marked surfaces of this impressive Choice example, with most of the color on the obverse. The design elements are well-detailed and both sides display vibrant mint luster. Population: 35 in 64 (1 in 64+), 20 finer (9/18). NGC ID# 24LJ, PCGS# 6464

3711 **1893 MS65 PCGS.** The 1893 Barber half dollar was not nearly as well saved as the previous issue, as the novelty of the new design had passed and collectors failed to form enthusiasm for Charles Barber's artistry. Gem survivors are scarce. This piece displays sharp design elements and original, frosty mint luster. Delicate olive-gold hues appear on each side. Population: 19 in 65 (1 in 65+), 14 finer (9/18). NGC ID# 24LK, PCGS# 6465

3712 **1893-O MS64 NGC.** The obverse of this attractive Choice specimen is blanketed in vivid shades of steel-gray and magenta toning, while the reverse shows only some peripheral sea-green highlights. Both sides are well-detailed and lustrous. Census: 38 in 64, 7 finer (10/18). NGC ID# 24LL, PCGS# 6466

3713 **1896-S MS62 NGC.** Vivid shades of magenta and sea-green toning blanket the lightly marked surfaces of this attractive MS62 specimen, with sharply detailed design elements and terrific eye appeal. Vibrant mint luster shines through the patina. Census: 6 in 62, 34 finer (10/18). NGC ID# 24LX, PCGS# 6476

3714 **1897 MS65 PCGS.** As with most of the series, the 1897 Barber half dollar circulated extensively, and few high-end Mint State pieces were set aside for numismatic purposes. Gem examples are scarce and finer coins are rare. This MS65 representative displays frosty, shimmering mint luster and a sharp strike with no distracting abrasions. Each side displays delicate toning that ranges from pale champagne to deeper olive-gold. Population: 26 in 65 (1 in 65+), 16 finer (9/18). NGC ID# 24LY, PCGS# 6477

3715 **1898 MS65 PCGS.** This remarkable Gem business strike is fully detailed and fully prooflike, with modest cameo contrast on each side. Golden toning lightens to near-brilliance in the centers, and the preservation is outstanding. The 1898 half dollar is rare this well-preserved, and prooflike fields of this degree are virtually unheard of. Population: 17 in 65 (2 in 65+), 22 finer (9/18).
Ex: Long Beach Signature (Heritage, 9/2009), lot 802, which realized $8,061.50.
From The Gary Verner Collection. NGC ID# 24M3, PCGS# 6480

3716 **1898 MS65 PCGS Secure.** Rainbow iridescence glows beneath gunmetal-blue overtones on this dramatically toned Gem 1898. While nearly 3 million pieces were struck, only a few true Gems exist and finer pieces are equally rare. A full strike adds to the outstanding eye appeal. Population: 18 in 65 (2 in 65+), 22 finer (9/18). NGC ID# 24M3, PCGS# 6480

1899 Half Dollar, MS65 Prooflike
Strong Field / Device Contrast

3717 **1899 MS65 Prooflike NGC.** As first glance this coin could easily pass for a true proof, so deep and well-mirrored is the reflectivity. The centers are uniformly silver-white on both sides, but the color melds into pleasing cherry-red hues around the rims on both sides. This fully struck piece certainly appears high-end for the assigned grade. NGC has only certified three 1899 half dollars as Prooflike, one in MS62 and one other as MS65, placing this piece as tied for finest (9/18).
Ex: Central States Signature (Heritage, 4-5/2009), lot 801, where it brought $6,325.
From The Gary Verner Collection. NGC ID# 24M6, PCGS# 6483

3718 **1899 MS65 PCGS Secure. CAC.** This delightful Gem exhibits sharply detailed design elements and well-preserved surfaces that display highlights of lavender-gray and pale gold toning. Vibrant mint luster adds to the outstanding eye appeal. Population: 26 in 65 (1 in 65+), 17 finer. CAC: 9 in 65, 6 finer (9/18). NGC ID# 24M6, PCGS# 6483

1899-O Barber Half, MS65
Bright Prooflike Fields

3719 **1899-O MS65 PCGS.** David Lawrence, in his *The Complete Guide to Barber Halves*, writes that this date "Sometimes comes P/L." There is no denying that this is the case for the present example. Moreover, a cameo-like effect results when the coin is rotated under a light source. The design features are nicely brought up, except for minor softness in the upper-right corner of the shield and the adjacent feathers. The essentially untoned centers gently transition into delicate orange-rust and aqua-green patina along the peripheries. Nicely preserved surfaces characterize each side, though a couple of minuscule ticks on the shield and some wispy slide marks on Liberty's cheek are noted for accuracy. Population: 11 in 65, 9 finer (9/18).
Ex: Central States Signature (Heritage, 4/2006), lot 2052, where it brought $8,625.
From The Gary Verner Collection. NGC ID# 24M7, PCGS# 6484

3720 **1900-S MS63 NGC.** Sharply detailed in most areas, this attractive Select specimen shows just a touch of the usual softness on the eagle's claw and arrow fletching. The lightly marked, brilliant surfaces radiate satiny mint luster on both sides. Census: 9 in 63, 17 finer (10/18).
From The Gary Verner Collection. NGC ID# 57PC, PCGS# 6488

3721 **1901-S — Obverse Damage — NGC Details. Unc.** Upon first glance, this lightly toned and lustrous half dollar appears problem-free, but careful rotation reveals a patch of horizontal slide marks on Liberty's cheek and neck. The strike is good, though inexact on the right shield corner and right claw. The 1901-S is common in average circulated grades but rare in Mint State.
From The Gary Verner Collection.

3722 **1902 MS65 NGC.** Despite a mintage of over 4.9 million pieces, the 1902 half dollar is a rarity in Gem and better grades, since it was little-saved at the time of release. This example has strong and satiny luster beneath colorful toning, gold and silver-gray at the central obverse with blue-green and violet shadings elsewhere. Census: 9 in 65, 7 finer (9/18).
Ex: Summer FUN Signature (Heritage, 7/2009), lot 663, which realized $2,760; Summer FUN Signature (Heritage, 7/2012), lot 3781, which realized $2,760.
From The Gary Verner Collection. NGC ID# 24MF, PCGS# 6492

1903-S Barber Half Dollar, Bold MS64

3723 **1903-S MS64 NGC.** David Lawrence described the 1903-S half dollar in his *Complete Guide to Barber Halves:* "comes well struck with nice luster." That certainly applies to this Choice Uncirculated representative, showing full detail on the obverse and nearly as strong definition on the reverse. Frosty mint luster glistens across the mostly brilliant surfaces. Golden tones color the rims. There are a few wispy lines on Liberty's portrait, but they pose no distraction.
From The Gary Verner Collection. NGC ID# 24ML, PCGS# 6497

1903-S Half Dollar, MS65
Rare So Fine

3724 **1903-S MS65 PCGS.** Blushes of golden patina blend with areas of brilliance. The surfaces on each side of this conditionally rare Gem Barber half dollar are thickly frosted and beautifully preserved. The obverse is essentially fully defined, while roller marks appear over the central portion of the eagle, where detail is slightly soft on the right shield corner and the neck feathers. Population: 8 in 65, 8 finer (9/18). NGC ID# 24ML, PCGS# 6497

3725 **1904-O — Cleaned — NGC Details. Unc.** A lustrous representative that shows few marks and an above average strike. The obverse periphery displays golden-brown and ruby-red toning. The reverse displays pastel lilac and aqua shades. The faint obverse hairlines require patience to locate.
From The Gary Verner Collection. NGC ID# 5EPG, PCGS# 6499

3726 **1904-S — Cleaned — NGC Details. AU.** Glimmers of luster fill protected areas, and no marks are consequential. Faint butter-gold toning is uniform across subdued surfaces. The 1904-S is available in AG to VG grades, but emerges as a conditional rarity in VF.
From The Gary Verner Collection. NGC ID# 24MP, PCGS# 6500

3727 **1905-S MS62 NGC.** Sharply detailed in most areas, this impressive MS62 specimen exhibits a touch of the usual softness on the shield point. The lightly marked surfaces radiate vibrant mint luster, with a few hints of lavender-gray toning. Census: 5 in 62, 38 finer (10/18).
From The Gary Verner Collection. NGC ID# 24MT, PCGS# 6503

1905-S Half Dollar, Sharply Struck MS64
Scarce in High Grades

3728 **1905-S MS64 NGC.** Even though 2.94 million pieces were produced of the 1905-S half dollar, very few have survived, especially in high grades. When both of the major services' population figures are combined only 33 MS64s have been graded (minus an uncertain number of duplications), with another 19 coins in finer conditions (9/18). That is a small number of Choice halves of this issue for the much-larger population of collectors of this popular series. Additionally, this half shows it was carefully selected by a specialist. Most 1905-S halves are weakly struck on the usual places on the reverse, but this example shows almost none of the usual softness. The centers are nearly brilliant with irregular russet toning surrounding the margins. Census: 15 in 64, 7 finer (9/18).
From The Gary Verner Collection. NGC ID# 24MT, PCGS# 6503

3729 **1906-D MS65 PCGS. CAC.** Ex: Price/Duckor/Friend. Half dollars were one of several different denominations that were coined in the opening year of operations at the Denver Mint. The facility also produced dimes, quarters, half eagles, eagles, and double eagles during the year. This bold Gem has satiny luster that shines through delicate gold and heather toning, with deeper blue-green and gold at the borders. Duckor and Friend traded 1906-D half dollars in September 2002; this is the coin that was offered as part of Dale Friend's #2 All-Time Finest PCGS Registry set. Population: 16 in 65, 11 finer. CAC: 5 in 65, 8 finer (9/18).
Ex: Dr. Thaine B. Price Collection (David Akers, 5/1998), lot 167; Dr. Steven Duckor Collection; FUN Signature (Heritage, 1/2009), lot 2946, which realized $3,737.50; ANA Signature (Heritage, 8/2010), lot 5043, which realized $3,220; Central States Signature (Heritage, 4/2017), lot 3354, which realized $1,997.50.
From The Gary Verner Collection. NGC ID# 24MV, PCGS# 6505

1906-O Half Dollar, MS64
Nearly Fully Struck

3730 **1906-O MS64 NGC.** The 1906-O is much scarcer in Mint State than most collectors realize, especially considering its mintage of nearly 2.5 million coins. The motifs on each side display full design detail, except where the right (facing) wing joins the shield. Bright, satiny surfaces are mostly brilliant with blushes of rose-violet at the edges. A handful of tiny slide marks are noted on the cheek but the fields are beautifully preserved. Census: 11 in 64 (1 in 64+), 11 finer (10/18).
From The Gary Verner Collection. NGC ID# 24MW, PCGS# 6506

3731 **1906-S MS63 NGC.** The design elements of this impressive Select specimen are sharply detailed throughout and the lightly marked, brilliant surfaces radiate satiny mint luster with outstanding eye appeal. Census: 11 in 63, 35 finer (10/18).
From The Gary Verner Collection. NGC ID# 24MX, PCGS# 6507

3732 **1907-S AU58 NGC.** Just the slightest trace of high-point wear is evident on the sharply detailed design elements of this attractive near-Mint specimen, and the lightly abraded surfaces retain much of their original mint luster. Census: 7 in 58, 32 finer (10/18).
From The Gary Verner Collection. NGC ID# 3KVJ, PCGS# 6511

3733 **1908 MS65 PCGS.** Ex: Friend. All four operating mints produced half dollars in 1908, although the smallest coinage was accomplished at Philadelphia (just more than 1.3 million coins). Gem examples of this issue are rarely offered. This MS65 coin is well-struck on the obverse but slightly weak on the reverse eagle's right (facing) shoulder and talons. Dusky lilac and golden toning graces each side, and no distracting abrasions are seen. Population: 14 in 65 (1 in 65+), 11 finer (9/18).
Ex: Larry Shepherd; FUN Signature (Heritage, 1/2009), lot 2949, which realized $2,875; FUN Signature (Heritage, 1/2016), lot 4136, which realized $1,762.50.
From The Gary Verner Collection. NGC ID# 24N4, PCGS# 6512

3734 **1908-D MS65 NGC. CAC.** Bright satin luster illuminates brilliant interiors, while vivid sun-gold, orange, teal-blue, and rose ribbons circumnavigate the borders. Several stars and the eagle's right (facing) talons show the only mentionable strike weakness. No bothersome abrasions are seen. Housed in a prior generation holder with CAC approval. Census: 18 in 65, 7 finer. CAC: 6 in 65, 17 finer (9/18).
From The Gary Verner Collection. NGC ID# 24N5, PCGS# 6513

3735 **1908-O MS65 NGC.** A gorgeous and highly desirable Gem with exceptional strike sharpness for a New Orleans issue. Light golden border toning surrounds frost-white interiors, and no distracting abrasions are seen. Luster shimmers when rotated beneath a light. Census: 41 in 65 (1 in 65+), 15 finer (9/18).
Ex: Houston Signature (Heritage, 11/2007), lot 60697, which realized $2,990.
From The Gary Verner Collection. NGC ID# 24N6, PCGS# 6514

3736 **1908-S AU58 PCGS.** The lightly abraded surfaces of this attractive near-Mint specimen are blanketed in pleasing shades of lavender-gray toning, with much original mint luster underneath. Only a trace of wear shows on the well-detailed design elements. Population: 15 in 58, 62 finer (9/18). NGC ID# 24N7, PCGS# 6515

3737 **1908-S MS62 NGC.** A sharply detailed MS62 representative of this popular branch mint issue, with vibrant, satiny mint luster on both sides. The lightly marked surfaces display highlights of pink and pale gold toning. Census: 10 in 62, 27 finer (10/18).
From The Gary Verner Collection. NGC ID# 24N7, PCGS# 6515

3738 **1909-O MS62 NGC.** From a small mintage of 925,400 pieces, this attractive MS62 specimen offers sharply detailed design elements and vibrant mint luster throughout. The minimally marked surfaces show a few hints of lavender and pale gold toning. Census: 2 in 62, 51 finer (10/18).
From The Gary Verner Collection. NGC ID# 24N9, PCGS# 6517

3739 **1910 MS64 NGC.** This attractive Choice specimen exhibits well-detailed design elements, with just a touch of the usual softness on star 3 and the eagle's claw. The lightly marked surfaces show a mix of satiny mint luster and prooflike reflectivity in the fields. Census: 33 in 64 (1 in 64+), 9 finer (10/18).
From The Gary Verner Collection. NGC ID# 24NB, PCGS# 6519

3740 **1910-S MS62 NGC.** This attractive MS62 specimen exhibits lustrous, brilliant surfaces that show the minimum number of minor contact marks for the grade. The design elements are sharply detailed and eye appeal is outstanding. Census: 10 in 62, 30 finer (10/18).
From The Gary Verner Collection. NGC ID# 24NC, PCGS# 6520

3741 **1911-S MS62 NGC.** This impressive MS62 Barber half dollar exhibits minimally marked, lustrous surfaces, suggestive of a higher grade. The design elements are sharply detailed throughout and overall eye appeal is quite strong. Census: 10 in 62, 31 finer (10/18).
From The Gary Verner Collection. NGC ID# 24NF, PCGS# 6523 Base PCGS# 6523

3742 **1912-D MS64 NGC.** One of just two Prooflike examples graded by NGC, each certified MS64 (9/18). The silver-gray fields are surprisingly reflective, and the subtly frosty, well-defined devices supply pleasing contrast. Delicate golden-tan tints visit the rims.
Ex: Long Beach Signature (Heritage, 5/2008), lot 765, which realized $2,990.
From The Gary Verner Collection. NGC ID# 24NH, PCGS# 6525

1912-D Half Dollar, Lustrous MS66

3743 **1912-D MS66 PCGS Secure.** With a mintage exceeding 2.3 million pieces, the 1912-D is readily available in lower grades but it is scarce in Gem Uncirculated or finer conditions. A faint speckling of olive-gray patina exists over intensely lustrous, frosted-silver surfaces. The strike, while mostly sharp, shows brief weakness from stars 11 to 13 and along the eagle's right (facing) shield edge, leg, and talons. Few pieces are certified finer. Population: 18 in 66 (4 in 66+), 1 finer (9/18). NGC ID# 24NH, PCGS# 6525

3744 **1912-S MS64+ PCGS. CAC.** Sharp on the headband, hair curls, and wing feathers, this high-end Choice 1912-S Barber half dollar is both eye-appealing and technically excellent. Luster glistens over champagne-tinted surfaces, while tiny flecks of russet toning appear around the outer peripheries. The surfaces are remarkably clean for the grade. Population: 69 in 64 (6 in 64+), 35 finer. CAC: 12 in 64, 19 finer (9/18).
Ex: Central States Signature (Heritage, 4/2015), lot 4593, which realized $2,350.
From The Gary Verner Collection. NGC ID# 24NJ, PCGS# 6526

3745 **1913 MS63 NGC.** The Barber half series concludes with a trio of challenging, low-mintage Philadelphia issues. The 1913 lacks the reputation for scarcity of the 1914 and 1915 halves, but series specialists know it to be a tough find in Select Uncirculated and higher grades. Pale-gold toning at the margins embraces silver centers of this lustrous and attractive representative. Only slight weakness at the shield corner and talon argue against a full strike. Census: 8 in 63, 26 finer (10/18).
From The Gary Verner Collection. NGC ID# 24NK, PCGS# 6527

3746 **1913-S MS62 NGC.** The 1913-S Barber ha;lf dollar claims a small mintage of 604,000 pieces. This impressive MS62 specimen is sharply detailed in most areas, with just s touch of softness on the shield point and arrow fletching. The lightly marked surfaces radiate vibrant mint luster, with outstanding eye appeal. Census: 13 in 62, 66 finer (10/18).
From The Gary Verner Collection. NGC ID# 24NM, PCGS# 6529

3747 **1914 MS62 NGC.** An attractive MS62 Barber half dollar, with sharply detailed design elements and vibrant mint luster on both sides. The brilliant surfaces are minimally marked for the grade. Census: 19 in 62, 67 finer (10/18).
From The Gary Verner Collection. NGC ID# 24NN, PCGS# 6530

3748 **1915 MS62 NGC.** This attractive MS62 Barber half dollar is minimally marked for the grade and the brilliant surfaces radiate vibrant mint luster from both sides. The design elements are sharply detailed and overall eye appeal is outstanding. Census: 13 in 62, 24 finer (10/18).
From The Gary Verner Collection. NGC ID# 24NR, PCGS# 6532

1915-D Half Dollar, MS66
None Finer at PCGS or CAC

3749 **1915-D MS66 PCGS. CAC.** A conditionally rare example of this late-series Denver issue and among the finest at PCGS and CAC. A sharp obverse strike contrasts with minor weakness on the reverse eagle's right (facing) wing junction. Softly frosted mint luster displays champagne toning with flecks of russet. We find no mentionable abrasions. Population: 27 in 66 (4 in 66+), 0 finer. CAC: 15 in 66, 0 finer (9/18). NGC ID# 24NS, PCGS# 6533

PROOF BARBER HALF DOLLARS

1892 Half Dollar, Toned PR66
Vivid Coloration

3750 **1892 PR66 PCGS Secure.** Sharp, frosty design elements seem to float atop liquidlike fields on this Premium Gem proof, even while both sides feature vivid amber, sea-green, violet, and silvery toning. Modest cameo contrast is apparent despite the patina. The 1892 proof was well-saved as the first of the new Barber type. It is one of the most popular proof type coins in the series. NGC ID# 24NU, PCGS# 6539

3751 **1894 PR65 Cameo NGC.** The proof 1894 Barber half dollar is the second most available proof date of the series, but examples in PR65 Cameo are scarce. The present coin features bright surfaces, with just the faintest bit of golden color around the margins. The modest, but definitely noticeable contrast has earned the coveted Cameo designation. Census: 17 in 65 Cameo, 28 finer (10/18). NGC ID# 24NW, PCGS# 86541

3752 **1896 PR64 PCGS.** Strongly mirrored under vivid shades of greenish-gold, blue, and violet toning, with additional golden-tan elements on the reverse. Sharply struck with small, scattered hairlines. Population: 69 in 64, 58 finer (9/18).
Ex: Sacramento Signature (Heritage, 3/2011), lot 3693, realized $1,955. NGC ID# 24NY, PCGS# 6543

3753 **1907 PR65 NGC.** Brilliant throughout and deeply mirrored in the fields with just the slightest frosting on the devices that give a hint of contrast. A solid Gem example of this popular proof issue, one of only 575 pieces produced. Census: 35 in 65, 35 finer (10/18).
Ex: Dallas Signature (Heritage, 12/2005), lot 895, realized $2,760. NGC ID# 24PB, PCGS# 6554

WALKING LIBERTY HALF DOLLARS

3754 **1916 MS65 PCGS. CAC.** The 1916 Walker is in high demand at the Gem grade level, and CAC-approved coins are seldom found this nice. Offered here is a frosty, well-struck example with a trace of champagne color. One small reed mark in the right obverse field appears to prevent the consideration of a finer grade. Eye appeal is outstanding. NGC ID# 24PL, PCGS# 6566

3755 **1916-D MS65 PCGS Secure.** This sharp Gem displays luminous mattelike mint luster with a delicate golden tint. No abrasions distract from the eye appeal. The 1916-D Walking Liberty half dollar is available in MS65 for a price but is scarce finer. This piece is outstanding for the grade. NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

3756 **1916-D MS65 PCGS. CAC.** This impressive Gem offers sharply detailed design elements, aside from the slightest softness on the eagle's leg, and vibrant mint luster on both sides. Hints of pale gold toning add to the outstanding eye appeal and only the most insignificant signs of contact are evident.
Ex: Long Beach Signature (Heritage, 9/2015), lot 4415, which realized $2,350. NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

3757 **1916-S MS63 NGC.** Vivid shades of sea-green and magenta toning highlight the obverse of this well-preserved Select specimen, while the reverse remains mostly brilliant. The design elements are well-detailed and vibrant mint luster radiates from both sides.
From The Gary Verner Collection. NGC ID# 24PN, PCGS# 6568

1916-S Walking Liberty Half, MS64
Low-Mintage, First-Year Issue

3758 **1916-S MS64 PCGS Secure.** The Walking Liberty design was introduced on the half dollar in 1916 and the San Francisco Mint struck a small total of 508,000 pieces that year. This impressive Choice example exhibits well-detailed design elements, with just a touch of softness on the eagle's leg. The well-preserved lustrous surfaces radiate satiny mint luster and show highlights of pale gold and lavender toning. NGC ID# 24PN, PCGS# 6568

3759 **1917-D Obverse MS63 NGC.** An attractive Select specimen of this important issue, the last date to feature the prominent mintmark on the obverse. The lightly marked centers are surrounded by shades of lavender and golden-brown toning, with satiny mint luster throughout. The well-detailed design elements show a touch of the usual softness on the central obverse.
From The Gary Verner Collection. NGC ID# 24PR, PCGS# 6570

3760 **1917-D Reverse MS63 NGC.** Like most examples seen, this attractive Select specimen shows some softness on the central design elements. The surfaces are lightly marked, with satiny mint luster under shades of lavender-gray and golden-brown toning. From the first year with the mintmark on the reverse.
From The Gary Verner Collection. NGC ID# 24PS, PCGS# 6571

3761 **1917-S Reverse MS63 NGC.** The design of the Walking Liberty half dollar was modified slightly in 1917 to move the mintmark to the reverse. This well-detailed Select example shows just a touch of the usual softness on liberty's head and wreath hand. The lightly marked surfaces show highlights of golden-brown and lavender toning, with satiny mint luster underneath.
From The Gary Verner Collection. NGC ID# 24PU, PCGS# 6573

3762 **1917-S Reverse MS63 PCGS.** The mintmark was moved to the reverse on the Walking Liberty half dollar part way through the year in 1917. This attractive Select specimen exhibits just a touch of the usual softness on Liberty's head and the eagle's leg and the lightly marked surfaces radiate satiny mint luster. NGC ID# 24PU, PCGS# 6573

3763 **1917-S Reverse MS64 PCGS. CAC.** The 1917-S half dollar with the mintmark on the reverse is an elusive issue in Mint State, indeed more so than its mintage of 5.5 million pieces would suggest. Moreover, weak strikes in the central areas plague this issue. The present near-Gem exhibits sharper detail than ordinarily seen, and its frosty ivory surfaces are fully lustrous with splashes of subtle blue toning around the peripheries. PCGS has seen only 65 numerically finer pieces (9/18).
Ex: Long Beach Signature (Heritage, 5-6/2012), lot 4033, where it brought $2,530. NGC ID# 24PU, PCGS# 6573

3764 **1918 MS64 NGC.** Highlights of sea-green and magenta toning visit the well-preserved surfaces of this attractive Choice example, with most of the color on the obverse. The design elements are sharply detailed and vibrant mint luster adds to the outstanding eye appeal.
From The Gary Verner Collection. NGC ID# 24PX, PCGS# 6574

1918 Walker, Frosted MS65
Rare in Finer Grades

3765 **1918 MS65 PCGS. CAC.** Available in lower grades, the 1918 Walking Liberty half dollar is conditionally scarce in Gem condition and is rarely seen finer. This piece shows smooth, untoned mint luster without distracting abrasions. Liberty's branch hand and the eagle's trailing leg are slightly soft, but partial thumb separation is present, and Liberty's head shows excellent detail. PCGS lists nine MS66 coins finer (9/18). NGC ID# 24PX, PCGS# 6574

3766 **1918-D MS63 NGC.** The design elements of this attractive Select specimen are unusually sharply detailed and the lightly marked surfaces radiate vibrant mint luster, with highlights of lavender-gray and sea-green toning.
From The Gary Verner Collection. NGC ID# 24PW, PCGS# 6575

3767 **1918-S MS63 PCGS Secure.** This impressive Select specimen exhibits a touch of the usual softness on the central design elements, but the well-preserved surfaces radiate soft, satiny mint luster, with a few hints of lavender and sea-green toning. NGC ID# 24PX, PCGS# 6576

3768 **1918-S MS64 NGC.** Luminous shades of sea-green and lavender-gray toning enliven the well-preserved surfaces of this attractive Choice example, with well-detailed design elements and vibrant mint luster underneath. NGC has graded 39 numerically finer examples (10/18).
From The Gary Verner Collection. NGC ID# 24PX, PCGS# 6576

1919 Walking Liberty Half, MS63
Scarce, Low-Mintage P-Mint

3769 **1919 MS63 PCGS.** Among Philadelphia issues, only the 1921 and 1916 have lower mintages than the 1919. This explains the scarcity of the 1919 in VF or better. Blazing luster illuminates this slate-gray and almond-gold representative. A thin line on the eagle's back leg was likely on the flan prior to the strike.
Ex: Long Beach Signature (Heritage, 9/2009), lot 837, where it brought $2,760. NGC ID# 24PY, PCGS# 6577

1919 Half Dollar, MS64
Lustrous and Lightly Toned

3770 **1919 MS64 NGC.** This near-Gem is at the high end of what would normally find when searching for a Mint State 1919 Walking Liberty half dollar. Finer coins are scarce and command multiples of an MS64. Blue, violet, and gold toning blankets most of the obverse, leaving an area of brilliance at the center. The reverse displays just a few blushes of color but is otherwise untoned. Strongly detailed.
From The Gary Verner Collection. NGC ID# 24PY, PCGS# 6577

3771 **1920 MS65 PCGS.** This attractive Gem exhibits well-preserved surfaces, with vibrant mint luster under shades of lavender-gray, golden-brown, and amber toning. Some softness shows on the centers, but the peripheral devices are sharply detailed. PCGS has graded 23 numerically finer examples (9/18). NGC ID# 24R3, PCGS# 6580

1920 Half Dollar, MS65
Underrated P-Mint Issue

3772 **1920 MS65 PCGS.** An elusive issue among the early Walking Liberty half dollars, this piece displays bright silver luster and excellent eye appeal with strong skirt lines and an outlined thumb on Liberty's branch hand. Wisps of champagne toning are barely noticeable on this lovely Gem. NGC ID# 24R3, PCGS# 6580

1920-S Half Dollar, MS63
Attractive Color and Mint Luster

3773 **1920-S MS63 NGC.** A crescent of ice-blue and crimson patina transitions to lighter golden-orange color from left to right across the obverse. The other side is almost entirely brilliant, except for an arc of thin toning at the left margin. The colorful patina and lively mint frost deliver terrific eye appeal. Well-struck with minor softness from Liberty's head down to the upper date digits.
From The Gary Verner Collection. NGC ID# 24R5, PCGS# 6582

1921 Half Dollar, AU53
Bright Key Date

3774 **1921 AU53 PCGS Secure.** Bright surfaces are partly lustrous, especially around the devices. Even friction softens detail on Liberty's head, branch hand, and skirt, and the eagle's breast and leg. However, definition remains good and there are no major abrasions on either side, though tiny hairlines are noted. Half dollar production at the Philadelphia Mint was limited to 246,000 coins in 1921 during the depths of a post-war recession. This is one of the formidable condition rarities in the series. NGC ID# 24R6, PCGS# 6583

1921 Half Dollar, Unc Details
Strong Strike

3775 **1921 — Cleaned — NGC Details. Unc.** This is certainly one of the more challenging Walking Liberty half dollars to obtain in high grades. Only 246,000 pieces were struck, and the average certified grade for the issue falls one point shy of VF20. Luster is impaired as a result of cleaning, but the obverse has since retoned with blue, violet, and orange patina around brilliant centers. Blushes of gold complement the otherwise untoned reverse. Sharply struck with minimal abrasions.
From The Gary Verner Collection.

1923-S Half Dollar, Near-Gem
In-Demand San Francisco Issue

3776 **1923-S MS64 NGC.** With a mintage of 2.1 million coins, the 1923-S proves more elusive in high grades than either the 1927-S or the 1928-S. Strike definition is often problematic, as it is here on Liberty's head and branch hand. Brilliant interiors shine with frosty mint luster, turning to translucent shades of gold, blue, and red-violet around the rims. NGC reports 31 finer submissions (10/18).
From The Gary Verner Collection. NGC ID# 24R9, PCGS# 6586

1927-S Half Dollar, MS64
Clean and Eye-Appealing

3777 **1927-S MS64 NGC.** Half dollar output resumed exclusively at the San Francisco Mint in 1927 after a four-year hiatus. This near-Gem is lightly toned in shades of blue, violet, and orange around the margins, leaving the centers brilliant and softly frosted. Thumb separation is clear, though Liberty's head and skirt lines are a trifle incomplete. A clean and eye-appealing example.
From The Gary Verner Collection. NGC ID# 24RA, PCGS# 6587

1928-S Half Dollar, Near-Gem Strike and Condition Rarity

3778 **1928-S MS64 NGC.** The 1928-S is best known for being the only Walking Liberty half dollar issue for the year. It is also a notable strike and condition rarity. This Choice example is well-struck over the centers. There are a few marks on and around Liberty's drapery, preventing a higher grade. Frosty interiors to turn colorful shades of violet, russet, and golden-orange around the rims.
From The Gary Verner Collection. NGC ID# 24RB, PCGS# 6588

1928-S Half Dollar, MS64 Bright Mint Luster

3779 **1928-S MS64 PCGS.** A brilliant borderline-Gem with a bright, satiny sheen and strong definition for this conditionally scarce and strike-challenged S-mint. There are a few wispy contact marks down the center of the portrait, but the only notable one is a scrape on Liberty's head. NGC ID# 24RB, PCGS# 6588

3780 **1929-S MS63 PCGS Secure.** A sharp example of this slightly better San Francisco issue, showing bright, satiny luster. Scattered abrasions limit the grade, but they are not particularly bothersome to the unaided eye. Visual appeal is pleasing for the grade. NGC ID# 24RD, PCGS# 6590

3781 **1929-S MS64 NGC.** This attractive Choice example shows some of the typical softness on the centers, but the peripheral devices are much sharper. The lightly marked surfaces are lustrous and lightly toned, with highlights of lavender and golden-brown.
From The Gary Verner Collection. NGC ID# 24RD, PCGS# 6590

3782 **1933-S MS64 PCGS.** This attractive Choice specimen displays sharp definition on all design elements, with clear separation between Liberty's finger and thumb on the wreath hand. The well-preserved, lustrous surfaces show a few hints of greenish-gold toning and overall eye appeal is outstanding. NGC ID# 24RE, PCGS# 6591

1933-S Half Dollar, MS65 Brilliant With Thick Mint Frost

3783 **1933-S MS65 PCGS Secure. CAC.** It is difficult to conceive of a more impressive example of the 1933-S half dollar for those who desire a brilliant, thickly frosted, and strongly struck example. Softness is confined to Liberty's head. Smooth surfaces display a handful of luster grazes but nothing more. This Gem is undeniably appealing for the grade. NGC ID# 24RE, PCGS# 6591

1934-S Walking Liberty Half, Frosty Gem

3784 **1934-S MS65 PCGS Secure. CAC.** The San Francisco Mint engaged in the production of 3.6 million Walking Liberty half dollars in 1934 as the United States economy continued to stumble through the depths of the Great Depression. This CAC-approved Gem was obviously carefully set aside during that dark time and preserved for posterity, whether on purpose or by chance. It displays a needle-sharp impression, bright mint frost, and near-complete brilliance, save for blushes of crimson-gold color at the lower obverse border. NGC ID# 24RH, PCGS# 6594

1934-S Half Dollar, MS65+ Complete Strike Definition

3785 **1934-S MS65+ NGC. CAC.** Examples of the 1934-S half dollar can be more difficult to find in high grades, certainly at this level. Strike definition is astoundingly bold on each side, particularly on Liberty's head, branch hand, and skirt lines, and on the eagle's legs and talons. Brilliant surfaces are thickly frosted and show the most delicate hints of gold around the obverse border. NGC ID# 24RH, PCGS# 6594

1934-S Half Dollar, MS66
Well-Preserved

3786 **1934-S MS66 PCGS Secure.** The 1934-S is elusive but accessible in MS66. However, finer coins are decidedly rare and are out of reach for most collectors of this popular series. Offered here is a well-struck, frosty Premium Gem with original aquamarine and gold toning over each side. PCGS lists only nine finer pieces and NGC seven (9/18). NGC ID# 24RH, PCGS# 6594

1934-S Half Dollar, MS66
Beautifully Toned on Both Sides

3787 **1934-S MS66 PCGS.** Both sides of this frosted Premium Gem are attractively toned with concentric rainbow hues in the margins and warm golden interiors. The strike is sharp in the centers and no distracting abrasions are seen. The 1934-S half dollar is elusive in such fine condition. Moreover, PCGS has seen just nine higher-grade representatives (9/18). Eye appeal on this piece is unsurpassed for the grade.
From The Gary Verner Collection. NGC ID# 24RH, PCGS# 6594

3788 **1935-S MS65 PCGS Secure.** Golden toning appears over frosty luster on this Gem 1935-S half dollar. The "skin" is particularly fresh, likely contributing to the grade. Under a loupe, a horizontal line that bisects the obverse from 9 to 3 o'clock is the only mentionable imperfection. Liberty's branch hand and the eagle's trailing leg exhibit strike weakness. NGC ID# 24RL, PCGS# 6597

3789 **1938-D MS65 PCGS.** This spectacular Gem 1938-D Walking Liberty half dollar is housed in a PCGS Regency holder, and the label is marked Proof-Like, one of the few instances that PCGS gave that designation to a coin other than a Morgan dollar. Lovely silver surfaces and mirrored fields showcase delicate gold toning with additional overlays of lilac near the rims. Well-struck with minimal abrasions.
Ex: Central States Signature (Heritage, 4/2014), lot 3601, which realized $6,462.50.
From The Gary Verner Collection. NGC ID# 24RV, PCGS# 6605

3790 **1938-D MS66 PCGS.** Both sides of this gorgeous Premium Gem have well-preserved surfaces with satiny luster. The fields, especially on the obverse, have a suggestion of reflectivity created by prominent die polish lines. This date has a limited mintage of just 491,600 coins, the lowest production of any issue after 1921. PCGS has certified 50 numerically finer examples (10/18).
Ex: Long Beach Signature (Heritage, 6/2006), lot 1859, realized $2,760; The Joseph C. Thomas Collection (Heritage, 4/2009), lot 2874, realized $2,185. NGC ID# 24RV, PCGS# 6605

1938-D Half Dollar, MS66+
Glittering Silver Surfaces

3791 **1938-D MS66+ PCGS. CAC.** Fewer than a half-million 1938-D half dollars were minted, but many high-grade examples were saved by speculators, explaining the issue's relative availability through MS66. Glittering silver surfaces shimmer with satin luster. The faintest traces of rose-gold adorn each carefully preserved side. The PCGS *Population Report* shows 50 higher grading events (10/18). NGC ID# 24RV, PCGS# 6605

3792 **1939-D MS67 PCGS. CAC.** The preservation of this Superb Gem Walker is virtually flawless, and the shimmering, luminous luster benefits from delicate lilac-gold toning. Strike weakness on Liberty's branch hand is an after thought amid the outstanding eye appeal generated by this magnificent 1939 half dollar. PCGS lists only two numerically finer representatives. CAC: 71 in 67, 0 finer (9/18). NGC ID# 24RX, PCGS# 6607 Base PCGS# 6607

3793 **1939-S MS67 PCGS Secure. CAC.** Just a touch of the usual softness shows on Liberty's head, but this delightful Superb Gem is sharply detailed in other areas. The impeccably preserved, brilliant surfaces radiate vibrant mint luster, with terrific eye appeal. Although the 1939-S is collectible at the MS67 level, PCGS has graded only one numerically finer example (9/18). NGC ID# 24RY, PCGS# 6608

3794 **1942-D MS67 PCGS. CAC.** Available in lower grades, the 1942-D half dollar is moderately elusive in MS67, especially with a CAC endorsement. PCGS lists only five MS68 pieces finer. This Registry candidate displays blazing, frosty luster with only the faintest trace of light golden toning. Some lilac overtones appear occasionally on the high points of Liberty's figure. The usual strike weakness affects the eagle's trailing leg. NGC ID# 24S7, PCGS# 6615

3795 **1946-S MS67 PCGS. CAC.** Trumpet tail S. Arcs of jade-green and tobacco-brown endow the borders of this lustrous and magnificently preserved Superb Gem. The strike is uncommonly sharp for a 1940s S-mint issue though the cheek and branch hand show slight incompleteness. CAC: 35 in 67, 0 finer (10/18).
Ex: Houston Signature (Heritage, 12/2012), lot 4086; New York Signature (Heritage, 10/2016), lot 4238, which realized $1,997.50.
NGC ID# 24SL, PCGS# 6629

PROOF WALKING LIBERTY HALF DOLLARS

1936 Half Dollar, PR65
First-Year Proof Type Coin

3796 **1936 PR65 PCGS.** A needle-sharp Gem example of the first proof Walking Liberty half dollar. Proof coinage amounted to only 3,901 pieces in 1936, and this issue is the scarcest proof Walker in high grade. This Gem is deeply mirrored and has a light champagne hue on each side. Modest cameo contrast is apparent on the obverse. NGC ID# 27V4, PCGS# 6636

1936 Half Dollar, PR65
Uniform Ice-Blue Toning

3797 **1936 PR65 NGC.** Surfaces toned entirely in ice-blue patina show a few streaks of complementary crimson and gold color. The underlying surfaces remain flashy, though field-device contrast is typically limited, as the Mint employed an all-brilliant finish for Walking Liberty half dollar proof production in 1936.
From The Gary Verner Collection. NGC ID# 27V4, PCGS# 6636

1936 Half Dollar, PR65
Green Label Holder

3798 **1936 PR65 PCGS.** "First" and "most challenging" are two titles that describe the position held by the 1936 proof half dollar in the Walking Liberty series. Glassy fields and fully struck motifs exhibit an overlay of dusky blue, lavender, and gold patina. Among 3,901 proofs struck in 1936. Housed in a green label holder. NGC ID# 27V4, PCGS# 6636

1936 Half Dollar, Fully Struck PR65+

3799 **1936 PR65+ PCGS. CAC.** Just a few spots of toning are seen on the otherwise brilliant surfaces of this high-end Gem proof Walker. All of the design elements are completely brought up, and both sides have been well cared for. This is the first year of proof production for collectors.
Ex: Long Beach Signature (Heritage, 2/2012), lot 4118, where it realized $4,600. NGC ID# 27V4, PCGS# 6636

1936 Walking Liberty Half Dollar, PR66
First Proof Issue in the Series

3800 **1936 PR66 PCGS. CAC.** The 1936 is the first and most difficult proof issue to acquire in the Walking Liberty half dollar series. In all, 3,901 pieces were struck. Premium Gem condition is the highest readily collectible grade level for the date. Generally brilliant surfaces almost entirely devoid of contact feature complementary accents of powder-blue color, attesting to the coin's originality. NGC ID# 27V4, PCGS# 6636

1939 Half Dollar, PR68
Exceptional Quality, Great Eye Appeal

3801 **1939 PR68 PCGS.** A nearly brilliant and immaculately preserved Superb Gem proof, with glimpses of clear-gold toning over the glassy-mirrored, silver surfaces. The strike is fully detailed on the raised elements, with faint mint frost on the eagle and portions of Liberty's gown. This coin ranks among the finest graded at PCGS. Population: 46 in 68 (1 in 68+), 0 finer (9/18). NGC ID# 5ESU, PCGS# 6639

FRANKLIN HALF DOLLARS

3802 **1949-D MS66 Full Bell Lines PCGS Secure. CAC.** An impressive Premium Gem, with sharply defined design elements and full definition on the bell lines, this coin offers well-preserved, lustrous surfaces, under shades of lavender-gray and golden-brown toning. Population: 94 in 66 (10 in 66+) Full Bell Lines, 0 finer. CAC: 25 in 66, 0 finer (9/18). NGC ID# 5HWE, PCGS# 86654

3803 **1949-S MS66+ Full Bell Lines PCGS Secure. CAC.** This second-year San Francisco issue is significantly more difficult to locate with Full Bell Lines than without. Delicate blue, green, lavender, peach-gold, and crimson toning permits frosty luster to shine through. Definition is bold, softening slightly on the date. Only 12 Full Bell Lines examples are graded higher at PCGS (9/18). NGC ID# 24SV, PCGS# 86655 Base PCGS# 86655

PROOF FRANKLIN HALF DOLLARS

3804 **1950 PR67 NGC.** The 1950, the first year of issue for proofs, is the most elusive proof Franklin half dollar in Superb Gem condition. This non-Cameo example is sharp a deeply mirrored with no toning. The devices are satiny, producing little contrast. NGC lists seven finer non-Cameos (10/18). NGC ID# 27VA, PCGS# 6691

1950 Franklin Half, PR67+
Border-Toned Registry Coin

3805 **1950 PR67+ PCGS Secure.** Franklin half dollars were struck for circulation beginning in 1948. Proofs were first struck in 1950. This first-year proof issue is the scarcest in the series in Superb Gem condition. PCGS lists only a single coin finer than the present (9/18). One of just seven Plus-graded PR67s, this Registry-grade example displays razor-sharp detail and remarkably deep mirroring in the fields. Russet and olive-green border toning surrounds each side, leaving the interiors mainly brilliant. NGC ID# 27VA, PCGS# 6691

1953 Franklin Half, PR68 Cameo
CAC-Endorsed Registry Contender

3806 **1953 PR68 Cameo PCGS Secure. CAC.** The 1953 proof Franklin half dollar is scarce in PR68 with or without a Cameo designation. This CAC-endorsed Cameo is brilliant and starkly contrasted, as well as almost flawlessly preserved. It is a prime Registry Set candidate. PCGS lists a lone PR69 non-Cameo coin numerically finer, but there are no higher-grade Cameo or Deep Cameo pieces at that service. Population: 28 in 68 Cameo, 0 finer; 1 in 68 Deep Cameo, 0 finer. CAC: 27 in 68, 0 finer (9/18). NGC ID# 6L9P, PCGS# 86694

SMS KENNEDY HALF DOLLAR

3807 **1965 SMS MS66 Deep Cameo PCGS.** While Special Mint Sets were made to lesser standards than actual proofs were in previous years, one would never know it from the look of this magnificent specimen. The fields are deeply mirrored, just like a proof, and the devices are heavily frosted, just like a first-strike proof from a new pair of dies. Brilliant throughout and rare in this grade. Population: 16 in 66 (1 in 66+) Deep Cameo, 14 finer (9/18).
Ex: Long Beach Signature (Heritage, 2/2005), lot 8354, realized $2,300. NGC ID# 34CB, PCGS# 96845

PROOF KENNEDY HALF DOLLARS

3808 **1964 PR69 Deep Cameo PCGS.** Type Two Reverse. A sharply struck and completely untoned specimen with outstanding contrast between the snow-white devices and the deeply mirrored fields. Seemingly pristine and unimprovable. PCGS has not certified any finer examples with the Deep Cameo designation (9/18).
Ex: Long Beach Signature (Heritage, 6/2006), lot 2009, realized $3,622.50. NGC ID# 24WF, PCGS# 96800

3809 **1971-S PR69 Deep Cameo PCGS.** The design elements of this spectacular proof example are sharply defined, with a rich coat of mint frost that creates intense cameo contrast with the deeply reflective fields. The brilliant surfaces are just one tick away from perfection. Population: 80 in 69 Deep Cameo, 0 finer (9/18). NGC ID# 24WM, PCGS# 96807

EARLY DOLLARS

3810 **1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Cleaned — PCGS Genuine Secure. VF Details.** An attractive cream-gray and chestnut-gold early silver type coin. Unimportant adjustment marks (as made) are present near Liberty's ear and the lower obverse margin. Mentionable marks are limited to a minor rim knock near the R in AMERICA and a hair-thin field line near Liberty's chin.

3811 **1795 Draped Bust, Off-Center, B-14, BB-51, R.2 — Cleaned — NGC Details. VF.** The Liberty bust was entered into the die off-center toward the left. This unusual variety is widely popular with type and *Guide Book* set collectors, being essential for pretty much anyone looking to collect early dollars. Offered here is a well-detailed coin for the VF level. No adjustment marks are visible and the strike is well-centered. Each side is cleaned but has since retoned deep blue-gray, lilac, and amber-gold hues. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

1797 10x6 Stars Dollar, VF20
B-3, BB-71, Large Letters

3812 **1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, VF20 PCGS.** Bowers Die State III. The right-side palm leaves have lapped edges, as usual. As the only silver dollar die variety with the obverse stars arranged in a 10x6 pattern, the BB-71 variety is easily recognizable. This attractive VF20 specimen exhibits evenly worn devices and a few light adjustment marks on the obverse stars at 10 o'clock. Smooth surfaces display pleasing dove-gray and blue-steel patina. A small reverse rim bruise is evident at 3 o'clock.
Ex: Long Beach Signature (Heritage, 6/2011), lot 3831, where it realized $5,175.00. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

3813 **1798 Large Eagle, Pointed 9, 10 Arrows, B-13, BB-108, R.2, VF25 NGC.** Breen Die State IV. Deep cobalt-blue and lavender toning bathes this inoffensively abraded early silver dollar. The high points are stone-white. Most of PLURIBUS is worn, but the shield lines are fully separated.
Ex: Long Beach Signature (Heritage, 5/2009), lot 924, which realized $1,858. NGC ID# 24X6, PCGS# 40025 Base PCGS# 40018

3814 **1798 Large Eagle, Pointed 9, Wide Date, B-15, BB-112, R.3, VF30 PCGS.** Bowers Die State III. Deep autumn-brown and forest-green toning blankets this midgrade early dollar. The portrait high points are pearl-gray. A few of the right-side reverse stars are softly brought up, but wing detail is substantial, and the only mark of import is near the 8 in the date.
Ex: Baltimore Signature (Heritage, 3/2009), lot 2328, which realized $2,185. NGC ID# 24X6, PCGS# 40029 Base PCGS# 40018

1798 Large Eagle Dollar, Wide Date, XF40
B-15, BB-112, Pointed 9

3815 **1798 Large Eagle, Pointed 9, Wide Date, B-15, BB-112, R.3, XF40 NGC. CAC.** Bowers Die State III. Star 13 is lapped. This is a slightly more elusive variety to obtain for the year. Bowers' *Silver Dollar Encyclopedia* (2013) suggests 250 to 450 pieces may survive, mostly in VF to XF condition. The centers are incompletely defined, as struck, but blending is minor and detail strong on the right-hand stars, shield, wings, and lower olive leaves. Antique gray patina dominates each side, although occasional blue and gold accents are present. NGC ID# 24X6, PCGS# 40029 Base PCGS# 40018

3816 **1798 Large Eagle, Pointed 9, Close Date, B-29, BB-119, R.4, Fine 15 PCGS.** "Bowers Die State III," an unlisted late die state with a large retained die break surrounding the 8 in the date. A nearly vertical crack is east of the 8. A powder-blue, stone-gray, and tan-gold example with soft definition on the stars above the eagle, likely due to metal flow into the obverse break during the strike. No marks are remotely relevant. NGC ID# 24X6, PCGS# 40036 Base PCGS# 40018

3817 **1798 Large Eagle, Pointed 9, Four Berries, B-8, BB-125, R.2 — Cleaning — PCGS Genuine. VF Details.** Bowers Die State V with a clashed obverse and a crack on the left (facing) wing not described in the Bowers early dollar reference, worthy of study by the devoted specialist. A slate-gray early type representative. The portrait displays a few wispy marks, and the left obverse field exhibits a vertical patch of hairlines.

3818 **1798 Large Eagle, Pointed 9, Four Berries, B-8, BB-125, R.2, VF20 PCGS.** Bowers Die State II without a crack through the C in AMERICA, through the crack through the M associated with Bowers Die State IV is present. An evenly worn dove-gray Heraldic Eagle type coin. All letters in E PLURIBUS UNUM are at least partially present. We note a linear streak between 1:30 and 7:30 on the reverse. NGC ID# 24X6, PCGS# 40042 Base PCGS# 40018

1798 Heraldic Eagle Dollar, XF40
B-8, BB-125, Pointed 9, Four Berries

3819 **1798 Large Eagle, Pointed 9, Four Berries, B-8, BB-125, R.2, XF40 ANACS.** Bowers Die State V with the diagonal crack on the left (facing) wing undescribed in the Bowers early dollar reference. Weakness on obverse star 5 and the N in E in UNITED are characteristic of the late die state. Peach-gold and powder-blue accents adorn the steel-gray surfaces. A narrow flan flaw after the E in AMERICA is of mint origin. Marks are trivial save for a small rim knock over the ED in UNITED. NGC ID# 24X6, PCGS# 40042 Base PCGS# 40018

1799 Dollar, B-13, BB-151, XF40
Irregular Date, 13 Stars Reverse

3820 **1799 Irregular Date, 13 Stars Reverse, B-13, BB-151, R.5, XF40 ANACS.** Bowers Die State II. Die lumps occur inside the E in STATES. The 13 Stars Irregular Date variety (B-13, BB-151) is, according to Bowers, the rarest die marriage for the year. He estimated as recently as 2013 that only 40 to 75 pieces survive. Stone-gray toning includes traces of olive and gold. It covers the entirety of this 18th-century dollar. Both sides are smooth with minor field marks and light blending over the well-struck devices. NGC ID# 24X7, PCGS# 40044 Base PCGS# 6880

1799 7x6 Stars Dollar, XF40
B-5, BB-157, Attractive Toning

3821 **1799 7x6 Stars, B-5, BB-157, R.2, XF40 PCGS.** Bowers Die State III. A die crack rises through AMER. This collectible Draped Bust dollar variety is missing the upper-left serif on the U in UNITED. The second T in STATES is nearly centered over the cloud. According to Bowers, examples grading higher than XF are "few and far between." This representative showcases silver-gray and gunmetal-blue toning over each side. Light friction on the high points fails to obscure the strong impression. NGC ID# 24X7, PCGS# 40049 Base PCGS# 6878

3822 **1799 7x6 Stars, B-12, BB-160, R.3, VF25 PCGS.** Bowers Die State III. Golden-brown, apple-green, and steel-gray toning embraces both sides. Sharper than expected for the designated grade, though we note a mark on the cleavage and another on the dentils between the 99 in the date. NGC ID# 24X7, PCGS# 40051 Base PCGS# 6878

1799 7x6 Stars Dollar, Choice XF
B-11, BB-161, Late Die State

3823 **1799 7x6 Stars, B-11, BB-161, R.3, XF45 PCGS Secure.** "Bowers Die State IV," showing a shattered reverse. A small die chip under the eagle's beak separates this coin from Bowers Die State III. Both sides of this Choice XF coin display a sharp, even strike. The only adjustment marks visible reside along the lower reverse border, although the dentils are complete around both sides. Hints of blue toning appear at the rims, leaving the interiors with orange-gold and olive-yellow patina. Luster remains in the protected areas, complementing sharp detail on the devices. This is an outstanding Heraldic Eagle type coin. NGC ID# 24X7, PCGS# 40052 Base PCGS# 6878

3824 **1799 7x6 Stars, B-17, BB-164, R.2, VF30 ANACS.** Bowers Die State IV. Rich gunmetal-gray toning encompasses this refreshingly mark-free early silver dollar. The surfaces show only a hint of granularity. About half of E PLURIBUS UNUM is present, and the wingtips are well defined. NGC ID# 24X7, PCGS# 40055 Base PCGS# 6878

1799 Draped Bust Dollar, XF40
B-14, BB-167, 7x6 Stars

3825 **1799 7x6 Stars, B-14, BB-167, R.3, XF40 PCGS Secure.** Bowers Die State III. The reverse features a die flaw under AM. This die was later used to strike BB-169 dollars. Bowers calls this variety "in the middle range ... of this year so far as availability is concerned," estimating 400 to 700 pieces extant. Each side exhibits deep olive-gray patina, uniform in nature, with reddish-violet accents over the high points. Liberty's curls and the eagle's wing feathers show good definition. Thorough evaluation reveals a couple of faded thin obverse field marks. NGC ID# 24X7, PCGS# 40058 Base PCGS# 6878

3826 **1799 7x6 Stars, B-22, BB-168, R.4, VF30 NGC.** Bowers Die State III. A very scarce variety, undoubtedly because of the heavy horizontal die break across the central reverse. Deep olive-green, lavender, and steel-blue toning blankets this unblemished Bust dollar. The reverse is especially well detailed.
Ex: Houston Signature (Heritage, 12/2008), lot 830, which realized $2,185. NGC ID# 24X7, PCGS# 40059 Base PCGS# 6878

3827 **1800 B-12, BB-184, R.3 — Cleaned — NGC Details. VF.** "Bowers Die State III" with an unlisted clash of UNITED throughout the left-side obverse stars. This stone-gray early silver dollar has been dipped, and the shield exhibits a hint of granularity, but mentionable marks are limited to a hair-thin diagonal line through the chin. NGC ID# 24X9, PCGS# 40070 Base PCGS# 6887

3828 **1800 AMERICAI, B-19, BB-192, R.2 — Cleaned — NGC Details. Fine.** Bowers Die State II, clashed. A heavy die line after AMERICA identifies the two die marriages that make up the AMERICAI *Guide Book* variety. This BB-192 coin is harshly cleaned with bright silvery surfaces despite moderate wear. No adjustment marks are seen and the strike is evenly executed. Much detail remains in Liberty's eye and hair curls.

3829 **1801 B-2, BB-212, R.3 — Altered Surfaces — PCGS Genuine Secure. Fine Details.** Bowers Die State III. The obverse field has a textured surface, caused by a painstaking application of myriad minute marks. Autumn-brown and lavender toning embraces this early silver dollar, which is well-defined for its Fine third-party designation.

3830 **1802/1 Wide Date, B-3, BB-234, R.3, Fine 12 ANACS.** Bowers Die State II. The die lump beneath obverse star 8 is characteristic of B-3. Snow-white high points contrast with charcoal-gray fields. This overdated Heraldic Eagle dollar has a cluster of thin field marks near obverse star 12 and a few small rim knocks. NGC ID# 24XC, PCGS# 40094 Base PCGS# 6899

1802/1 Wide Date Dollar, Choice VF
B-3, BB-234, Original Toning

3831 **1802/1 Wide Date, B-3, BB-234, R.3, VF35 PCGS.** Bowers Die State II. The globular die lump is visible in the field below star 8, but the dies have not yet clashed in this marriage. Hints of luster cling to the most protected portions of the peripheral fields, while most of each side has deep olive-green and golden-gray patina. No adjustment marks are noted and wear is light on the devices. A few stray abrasions hardly detract. NGC ID# 24XC, PCGS# 40094 Base PCGS# 6899

3832 **1802 Narrow Date, B-6, BB-241, R.1, VF25 NGC.** Bowers Die State III, lapped obverse. This Narrow Date variety, the most plentiful of all die marriages for the year, has the leaf tip pointing under the left foot of the I in AMERICA. Gold and lavender-gray patina blankets smooth, well-worn surfaces, yet partial hair and feather detail remains. There are no distracting marks or other issues. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

1802 B-6, BB-241 Dollar, Choice VF
Narrow Date, Heraldic Eagle Type Coin

3833 **1802 Narrow Date, B-6, BB-241, R.1, VF35 NGC.** Bowers Die State III. The right foot of the T in LIBERTY is missing on all BB-241 dollars, serving as a popular pickup point along with the Narrow Date. As usual, Liberty's lower curls are lapped. This Choice VF representative exhibits a normal amount of high-point rub on the obverse, while the reverse is comparably strong. Olive-gold, steel-gray, and gunmetal-blue patina paints the smooth surfaces. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

3834 **1803 Small 3, B-5, BB-252, R.3 — Bent, Cleaned — NGC Details. XF.** The bend is subtle, but apparent as a bulge on the right obverse field near the ribbon. Untoned aside from hints of blue-green and autumn-brown toning along the obverse periphery. Although slightly bright, this Heraldic Eagle dollar exhibits extensively luster and will please many collectors. NGC ID# 24XD, PCGS# 40097 Base PCGS# 6900

SEATED DOLLARS

3835 **1859 AU58 NGC. OC-4, Low R.4.** The 1859 mintage was high for a No Motto issue, with more than a quarter-million pieces issued. Nonetheless, the issue is surprisingly scarce. According to Osburn-Cushing, "most of the coins minted were exported to the Orient and subsequently melted." This is a moderately marked silver-gray example that shows luster throughout the borders and devices. Census: 10 in 58, 34 finer (9/18). NGC ID# 24YZ, PCGS# 6946

3836 **1859-O AU58 PCGS. CAC. OC-1, R.1.** Osburn-Cushing Die State d/f. Deep magenta and blue-green toning encompasses this briefly circulated New Orleans type coin. Marks are few, though we note field ticks beneath the cap and near the E in UNITED. As of (9/18), NGC and PCGS have certified a combined 143 pieces as AU58, but CAC has only affirmed six in that grade. NGC ID# 24YY, PCGS# 6947

1859-O Seated Liberty Dollar, MS62+
Ideal New Orleans Type Coin

3837 **1859-O MS62+ PCGS Secure. CAC. OC-1, R.1.** From a mintage of 360,000 pieces, the 1859-O Seated Liberty dollar is relatively available in grades up to the MS62 level, but finer examples are scarce. This high-end MS62 coin is a good balance of quality and value. The design elements are sharp in most areas, but some of the star radials are a little weak. The lustrous surfaces show the expected number of minor contact marks for the grade. NGC ID# 24YY, PCGS# 6947

3838 **1860-O MS62 PCGS Secure. OC-2, R.1.** Osburn-Cushing Die State b/c. The radial crack through the first T in STATES helps attribute this lustrous New Orleans No Motto type coin. Glimpses of golden-brown toning visit the borders. A smattering of minor field marks is consistent with the numerical grade. NGC ID# 24Z3, PCGS# 6950

3839 **1871 AU58 PCGS. OC-11, R.2.** The 1871 was the first of two Seated dollars with mintages that surpassed 1 million pieces. Nonetheless, near-Mint examples are scarce relative to demand from type collectors. This well-defined and partly lustrous representative is mostly untoned but shows areas of silver-gray patina. Scattered abrasions include a rim depression near 1:30 on the reverse. NGC ID# 5DNV, PCGS# 6966

TRADE DOLLARS

3840 **1873-CC XF40 PCGS. CAC.** Wide CC. Breen (1988) stated "I have not seen the wide CC variety" but Bowers (1993) confirmed its existence and called it "rare." Within the Trade dollar series, the first and last Carson City issues are the most challenging. The present XF representative has lightly marked chestnut-gold and dove-gray surfaces. The strike is incomplete on Liberty's waist, and opposite on the eagle's right (facing) leg. CAC: 2 in 40, 19 finer (10/18). NGC ID# 252X, PCGS# 7032

1874-CC Trade Dollar, MS62
Lustrous and Peripherally Toned

3841 **1874-CC MS62 PCGS. Breen-5786.** Micro CC. Period after FINE. Light golden-brown borders frames brilliant centers. Sharply struck and attractive with a smooth reverse and only minor obverse marks. A die line through the D in DOLLAR may be of specialist interest. The 1874-CC is moderately scarcer than the 1875-CC, and lustrous examples are always in demand. NGC ID# 2532, PCGS# 7035

1875-S Trade Dollar, MS64+
Impressive Silver Type Coin

3842 **1875-S Type One Reverse MS64+ PCGS Secure.** Large S. Light to medium khaki-green toning endows the obverse. The reverse displays pumpkin-gold and aquamarine accents. This thoroughly lustrous near-Gem displays minor softness on the mintmark and the eagle's right (facing) claw, but most design elements are bold. Careful inspection yields occasional minor field marks. The 1875-S is an available issue, though rarely encountered any finer. NGC ID# 2536, PCGS# 510101 Base PCGS# 7039

3843 **1876-CC Type Two Reverse AU58 NGC.** Tall CC. Peach-gold patina graces much of this partly lustrous and sharply struck Carson City Trade dollar. A few small marks near the stem of Liberty's branch are of only minor consequence. The 1876-CC is much scarcer in high grade than the 1874-CC, 1875-CC, and 1877-CC issues. Census: 32 in 58, 56 finer (9/18).
Ex: ANA Signature (Heritage, 10/2012), lot 4667, which realized $2,937.50. NGC ID# 4EML, PCGS# 40113 Base PCGS# 7042

1876-CC Trade Dollar, AU58
FS-801, Doubled Die Reverse

3844 **1876-CC Doubled Die Reverse, FS-801, AU58 PCGS Secure.** Type One Obverse and Reverse. Slight high-point friction leaves satiny luster in the fields on this near-Mint coin, with no mentionable toning on either side. Strike weakness affects the eagle's right (facing) leg and the corresponding portion of Liberty's torso. FS-801 is a popular *Guide Book* variety, showing wide die doubling on the reverse eagle, arrows, and olive branch. NGC ID# 253A, PCGS# 145815 Base PCGS# 97042

3845 **1878-CC — Cleaned — ANACS. XF Details, Net VF30.** The 1878-CC is key to a complete Carson City collection. Only 97,000 pieces were struck, and many were reportedly melted by the Treasury on July 19, 1878. This moderately circulated representative has powder-blue peripheries and straw-gold fields. The obverse exhibits vertical hairlines, and a field mark is noted at 4:30 on the reverse. Housed in a small-sized holder. NGC ID# 253M, PCGS# 7047

PROOF TRADE DOLLARS

1875 Trade Dollar, PR63 Cameo
Low Mintage, Type Two Reverse

3846 **1875 Trade PR63 Cameo NGC.** Type Two Reverse. Period after FINE. The borders display traces of rose-red toning, most apparent on the reverse exergue. Icy devices rise in intricate definition above glassy fields. Hairlines are minimal, though a drop of translucent residue forms a small circle above the D in DOLLAR, and is accompanied by a mint-made flan imperfection. Only 700 proofs were issued. NGC ID# 27YL, PCGS# 87055 1634 STD

End of Session Two

SESSION THREE

MORGAN DOLLARS

3847 **1878-CC MS65 PCGS Secure.** This is a frosty Gem with radiant, untoned cartwheel luster and razor-sharp definition on the eagle's breast and the hair above Liberty's ear. The eagle's talons are considerably weak. A well-preserved, eye-appealing example of the first Carson City Morgan dollar. NGC ID# 253M, PCGS# 7080

3848 **1878-CC MS65+ PCGS.** A thin band of golden-orange toning creeps onto the obverse margins of this otherwise brilliant and thickly frosted 1878-CC dollar. Bold cartwheel luster illuminates the sharply struck and minimally marked surfaces of this high-end Gem. Strong, original eye appeal confirms the PCGS Plus designation. NGC ID# 253M, PCGS# 7080

3849 **1878-CC MS65 PCGS. CAC.** An essentially brilliant introductory year Carson City Gem with vibrant luster and good strike. A few faint grazes on the cheekbone, but the obverse is otherwise pristine.
Ex: Long Beach Signature (Heritage, 2/2011), lot 3867, realized $1,840. NGC ID# 253M, PCGS# 7080

1878-CC VAM-9 Dollar, MS66
Brilliant and Smooth

3850 **1878-CC MS66 PCGS Secure. VAM-9.** The star near the shoulder curl has a broken point, and a lengthy die line passes through the O in ONE. A snow-white Premium Gem that boasts dynamic luster and an exceptionally smooth cheek. The strike is sharp except on the claws and wreath stems. This first-year Carson City Morgan issue is rarely encountered any finer. NGC ID# 253M, PCGS# 7080

3851 **1878-CC Lines in Wing, VAM-11, MS65 NGC.** A Top 100 Variety. Numerous die lines are embedded in the eagle's wings. The variety is undesignated on the NGC insert. This well struck and brilliant Gem has booming luster and impressively unabraded surfaces. An outstanding representative of the introductory Carson City Morgan issue. NGC ID# 253P, PCGS# 133843 Base PCGS# 7080

3852 **1878-CC Lines in Wing, VAM-11, Top 100, MS65 NGC.** Heavy, crisscrossing die lines network throughout the eagle's wings on this Top 100 VAM variety. Frosty original luster engulfs this Gem example in a radiant cartwheel effect, illuminating sharp design elements and brilliant interiors. Gold, lavender, and navy-blue toning surrounds the borders. A few light surface grazes are visible. NGC ID# 253P, PCGS# 133843 Base PCGS# 7080

3853 **1878-S MS66+ PCGS Secure. CAC.** The San Francisco Mint devoted most of its resources to the production of nearly 10 million Morgan dollars during the series' first year of issue. The 1878-S survives to a healthy extent in MS66 but is scarce in MS67. A full strike and blazing mint frost define this totally brilliant Premium Gem, which nearly qualifies for an even higher grade. NGC ID# 253R, PCGS# 7082

3854 **1879 MS66 PCGS Secure.** A well-struck, frosty Premium Gem with original surfaces. Amber toning covers much of the obverse and about half of the reverse. The balance of the coin displays vivid violet and ocean-blue color. Rarely offered finer. NGC ID# 253S, PCGS# 7084

3855 **1879 MS66 PCGS.** This attractive Premium Gem exhibits well-detailed design elements, with just a trace of the usual softness on the hair above the ear. The well-preserved, brilliant surfaces are lustrous and appealing. PCGS has graded only six numerically finer examples (9/18). NGC ID# 253S, PCGS# 7084

1879-CC Morgan Dollar, XF45
Low-Mintage Carson City Key

3856 **1879-CC XF45 PCGS Secure.** From a small mintage of 756,000 pieces, the 1879-CC Morgan dollar is one of the most challenging issues of the Carson City series. This Choice XF specimen shows light wear on the high points of the design elements, like the eagle's breast and wing tips, but the lightly abraded surfaces retain traces of original mint luster. A few highlights of beige and pink toning add to the attractive presentation. NGC ID# 253U, PCGS# 7086

3857 **1879-O MS65 PCGS.** This attractive Gem offers unusually sharp definition on the design elements and the lustrous surfaces are free of mentionable distractions. Delicate highlights of lavender and golden-tan patina enhance the outstanding eye appeal. PCGS has graded 31 numerically finer examples (9/18). NGC ID# 253X, PCGS# 7090

3858 **1879-O MS65 PCGS.** The 1879-O Morgan dollar is still collectible at the MS65 grade level, but finer coins are rare. This impressive Gem offers sharply detailed design elements and well-preserved, brilliant surfaces, with vibrant mint luster throughout. PCGS has graded 31 numerically finer examples (9/18). NGC ID# 253X, PCGS# 7090

3859 **1879-S Reverse of 1878, VAM-39, MS64 PCGS.** A Top 100 Variety. The Second Reverse, with a parallel uppermost arrow feather, appears on certain 1878 Philadelphia, 1879 San Francisco, and 1880 Carson City dollars. The '79-S Reverse of '78 is scarce, and demand is increased by specialist attention to VAM varieties. This lustrous near-Gem has a bold strike and a hint of wheat-gold toning. Exceptionally smooth for the designated grade. NGC ID# 253W, PCGS# 133862 Base PCGS# 7094

3860 **1880-CC 8 Over High 7, VAM-5, MS65 PCGS. CAC.** A Top 100 Variety. The ears, crossbar, downstroke, and dash of the underdigit 7 are all apparent. Beautiful ocean-blue, orange-gold, and fire-red toning adorns the right borders of this otherwise untoned Gem. The strike is sharp, and the reverse is well preserved.
Ex: Long Beach Signature (Heritage, 9/2011), lot 3579, which realized $1,840. NGC ID# 2542, PCGS# 133877 Base PCGS# 7102

3861 **1880-CC MS66 NGC. VAM-8.** A splendid Carson City dollar. A trace of silver-gray toning visits lustrous and smooth surfaces. The centers show softness, but most design elements are bold. VAM-8 has diagonal die lines within the M in AMERICA and the base of the left wing, along with other interesting characteristics.
Ex: Sacramento ANA Signature (Heritage, 3/2011), lot 3859, which realized $2,127.50. NGC ID# 2542, PCGS# 7100

1880-CC Silver Dollar, MS66+
Lightly Toned, Highly Lustrous

3862 **1880-CC MS66+ PCGS. CAC. VAM-8.** A lightly toned, well struck, and lustrous high-grade silver dollar. A popular Carson City issue that emerged from the GSA issues in quantity, but becomes conditionally rare so fine as the present lot. Contact is minimal, and relegated to the cheek near the mouth, and the field above the arrowheads. NGC ID# 2542, PCGS# 7100

3863 **1880-O MS64 NGC.** An attractive Choice example of this popular branch mint issue, with unusually sharp definition on the design elements and well-preserved surfaces that radiate vibrant mint luster on both sides. The mostly brilliant surfaces show a few hints of lavender and golden-tan toning. NGC ID# 2543, PCGS# 7114

3864 **1880-O MS63 Prooflike PCGS. CAC.** Small or Micro O. A snow-white Select New Orleans dollar. The strike is above average, and the reverse is well-preserved. Delicate distributed obverse marks do not challenge the designated grade. The '80-O is readily available in lustrous Mint State, but Prooflike pieces are very scarce. CAC: 6 in 63, 1 finer (10/18). NGC ID# 2543, PCGS# 7115

3865 **1880-O 80/79 Crossbar, VAM-4, MS63 Prooflike PCGS Secure. CAC.** A Top 100 Variety. The Small or Micro O mintmark distinguishes VAM-4 from the similar VAM-5, which has an Oval O mintmark. These two varieties constitute the 1880-O 80/79 *Guide Book* listing. This thoroughly lustrous snow-white Select Morgan dollar has an exceptionally smooth obverse, though moderate grazes on the reverse field deny a Choice assessment. NGC ID# 356H, PCGS# 41287 Base PCGS# 7117

3866 **1881-CC MS66 PCGS. VAM-2.** A frosty white Premium Gem of the always popular issue, which boasts the second-lowest mintage among Carson City Morgans. A good strike, potent luster, and clean fields confirm the quality. Liberty's cheek exhibits wispy grazes. NGC ID# 2549, PCGS# 7126

3867 **1881-CC MS66 PCGS. VAM-2.** About half the mintage of the 1881-CC silver dollar emerged from the GSA sales. A majority of those pieces are in lower Mint State grades and were never submitted to the grading services. Among those in third-party holders, the median grade is MS64. Premium Gems are comparatively scarce. This lustrous and lightly toned high-grade example has smooth fields and minor portrait grazes. NGC ID# 2549, PCGS# 7126

3868 **1881-CC MS66+ PCGS. CAC. VAM-2.** The upper loops of the 8s in the date exhibit small die chips on VAM-2. A nearly brilliant representative of this low-mintage and popular Carson City issue, this 1881-CC Morgan displays lustrous, well-struck surfaces with only minor marks on Liberty's cheek. NGC ID# 2549, PCGS# 7126

1881-CC Dollar, All-Brilliant MS67
Perennially Popular

3869 **1881-CC MS67 NGC.** This brilliant and semiprooflike Superb Gem is well-struck and devoid of significant marks. The 1881-CC is a perennial favorite among collectors for several reasons: its Carson City origin, its mintage below 300,000 pieces, and its availability in attractive Mint State grades, courtesy of the GSA hoard. Rare any finer.
Ex: New York Signature (Heritage, 6/2005), lot 5987. NGC ID# 2549, PCGS# 7126

1881-CC Morgan Dollar, MS67
Rarely Seen Finer

3870 **1881-CC MS67 PCGS Secure. VAM-2.** The 1881-CC Morgan dollar claims a small mintage of 296,000 pieces, but the issue was heavily represented in the GSA sales of the 1970s. Still, the 1881-CC is somewhat scarce in MS67 condition, and finer coins are rare. This delightful Superb Gem is sharply detailed, impeccably preserved, and brightly lustrous, with terrific eye appeal. PCGS has graded four numerically finer examples (9/18). NGC ID# 2549, PCGS# 7126

3871 **1881-CC MS65 Prooflike PCGS Secure. VAM-2.** Sharply struck and frosty devices exhibit moderate contrast with flashy fields. A brilliant Gem of this low mintage and popular Carson City emission. Smooth overall, though a graze above the AR in DOLLAR merits passing mention. NGC ID# 2547, PCGS# 7127

3872 **1881-CC MS65 Prooflike PCGS. CAC. VAM-3.** Dazzling luster and a bold strike attest to the quality of this carefully preserved and essentially brilliant Carson City dollar. A low mintage issue made available by the GSA auctions of the 1970s. VAM-3 is distinguished by die gouges within the lower portion of the wreath. NGC ID# 2547, PCGS# 7127

3873 **1881-O MS65 NGC. CAC.** Light, original powder-blue and almond-gold toning adorns this nicely struck and lustrous New Orleans Gem. Refreshingly free from grazes, and superior in quality for the designated grade. Encapsulated in a former-generation holder. NGC ID# 2548, PCGS# 7128

1882-O Dollar, Lightly Toned MS66
Finest Collectible Grade for the Issue

3874 **1882-O MS66 PCGS.** Seldom is the 1882-O dollar found in this high grade, and most collectors can forget about trying to acquire a finer example in MS67. Those only come on the market once every four or five years. This Premium Gem is remarkably clean, showing a couple of microscopic ticks on the cheek and a small handful of shallow, undistracting grazes in the right obverse field — all in line with the grade. Although satiny and largely brilliant, traces of gold and lavender-gray patina appear over each side. Population: 83 in 66 (7 in 66+), 7 finer (9/18). NGC ID# 254C, PCGS# 7136

3875 **1882-O/S Strong, Recessed, VAM-4, MS64 PCGS Secure. VAM-4.** A Top 100 Variety. Booming cartwheel luster sweeps this untoned and nicely struck and well-preserved Choice silver dollar. The devices exhibit die rust, as made. Three 1882-O/S varieties are recognized, the "Strong" VAM-3 and VAM-4, and the "Weak" VAM-5, each with a different placement or appearance of the undermintmark. NGC ID# 254D, PCGS# 133891 Base PCGS# 7138

3876 **1883 MS67 PCGS Secure.** The 1883 Morgan dollar is a condition rarity in grades above the MS67 level. This delightful Superb Gem is well-detailed and impeccably preserved, with vibrant mint luster that shines through shades of lavender and sea-green toning. PCGS has graded four numerically finer examples (9/18). NGC ID# 254G, PCGS# 7142

1883-CC Morgan Dollar, MS67
Only Five Coins Finer at PCGS

3877 **1883-CC MS67 PCGS. CAC.** Delicately toned in pearl-gray and apricot hues, this boldly struck and lustrous Superb Gem has immaculate fields and only the faintest grazes on the portrait. Thousands of Mint State survivors are known due to the GSA hoard, but most of these are scuffy when contrasted to this piece. PCGS has certified only five coins in higher numeric grades (9/18).
Ex: Central States Signature (Heritage, 5/2005), lot 9550, where it brought $3,737.50; Long Beach Signature (Heritage, 6/2011), lot 3962, where it realized $4,025. NGC ID# 254J, PCGS# 7144

3878 **1883-S MS62 NGC.** The 1883-S is a better date in Uncirculated condition. This example displays well-struck design elements and brilliant mint luster. The fields have a hint of reflectivity that is revealed when tilted beneath a light. Scattered light abrasions on the obverse determine the numeric grade. NGC ID# 254K, PCGS# 7148

1883-S Morgan Dollar, MS64
A Rarity Any Finer

3879 **1883-S MS64 PCGS Secure. CAC.** A brilliant, radiantly lustrous near-Gem example of this conditionally scarce San Francisco issue. The strike is sharp and remarkably few abrasions are present. The 1883-S is occasionally available in MS64, but seldom with a CAC green label. Finer coins are rare. PCGS lists only 23 higher-grade non-Prooflike submissions. CAC: 87 in 64, 5 finer (9/18). NGC ID# 254K, PCGS# 7148

3880 **1884-S AU58 NGC.** Luster remains in the fields of this near-Mint 1884-S dollar, complementing smooth, problem-free surfaces. The strike is sharp and wear is trivial. Some reflectivity emerges when tilted beneath a light. Each side of this collector-grade 1884-S Morgan displays warm golden toning and has good eye appeal. NGC ID# 254P, PCGS# 7156

3881 **1884-S AU58 PCGS.** A pleasing near-Mint Morgan dollar, with well-detailed design elements that show just a trace of wear. The lightly abraded brilliant surfaces radiate vibrant mint luster from both sides, enhancing the considerable eye appeal. NGC ID# 254P, PCGS# 7156

3882 **1884-S AU58+ NGC.** A Plus-graded near-Mint example of this popular issue, with just a trace of wear on the well-detailed design elements. The lightly marked brilliant surfaces radiate satiny mint luster, with a few hints of prooflike reflectivity. NGC ID# 254P, PCGS# 7156

3883 **1885 MS67 PCGS.** Fully struck with lavish cartwheel luster on both sides and dazzling snow-white surfaces that are nearly immaculate. A beautiful Superb Gem example of this readily available Philadelphia Mint issue.
Ex: Long Beach Signature (Heritage, 6/2006), lot 2360, realized $2,305.75. NGC ID# 254R, PCGS# 7158

3884 **1885 MS67 NGC. CAC.** This CAC-endorsed Superb Gem is well-struck, brilliant, and vibrantly lustrous. The 1885 is plentiful in most grades and usually available even in MS67, but CAC-approved coins are scarce this fine. The only numerically finer pieces at NGC are seven non-Prooflike MS68 coins. CAC: 95 in 67, 2 finer (10/18). NGC ID# 254R, PCGS# 7158

3885 **1885 MS67 NGC. CAC. VAM-3.** The top of the 5 is repunched, and a small dash lurks below the second 8 in the date. A lustrous and brilliant Superb Gem. Minor diagonal roller marks (as coined) cross the eagle's breast. The 1885 is common in Mint State, but examples of the present quality are undeniably scarce. CAC: 95 in 67, 2 finer (10/18). NGC ID# 254R, PCGS# 7158

3886 **1885-CC MS66 PCGS Secure.** The 1885-CC Morgan dollar is popular as the final issue struck at the Carson City Mint before coinage was suspended for four years. This Premium Gem displays radiant cartwheel luster and frosty surfaces. A hint of reflectivity is evident in the reverse fields. NGC ID# 254S, PCGS# 7160

3887 **1885-CC MS66 NGC. VAM-2.** The 1885-CC Morgan dollar boasts a small mintage of 228,000 pieces, though the date was well represented in the government releases of the 1960s. The present coin is a sharply struck Premium Gem, with bold mint luster and just a few wisps of gold toning.
Ex: Sacramento ANA Signature (Heritage, 3/2011), lot 3953, which realized $1,495. NGC ID# 254S, PCGS# 7160

3888 **1885-O MS67 NGC. CAC.** This incredible Superb Gem Morgan dollar features needle-sharp definition on the design elements and creamy, pristine fields, with vibrant mint luster on both sides. The technical and visual attributes are especially remarkable for a New Orleans issue. NGC has graded only 11 coins in higher numeric grades (10/18).
Ex: Summer FUN Signature (Heritage, 7/2010), lot 8600; Central States Signature (Heritage, 4/2012), lot 5566. NGC ID# 254T, PCGS# 7162

3889 **1885-S MS65 PCGS. VAM-2.** The crossbar of the 5 is repunched north. Dappled forest-green borders frame golden-brown and stone-white centers. Lustrous and impressively unabraded. The strike is sharp and the eye appeal is excellent, even for the lofty MS65 grade. NGC ID# 254U, PCGS# 7164

3890 **1885-S MS65 PCGS.** Razor-sharp definition is evident on all design elements and this attractive Gem displays brilliant surfaces, with no mentionable distractions. Vibrant mint luster adds to the outstanding eye appeal. PCGS has graded 84 numerically finer examples (9/18). NGC ID# 254U, PCGS# 7164

3891 **1885-S MS65 PCGS.** This delightful Gem exhibits sharply detailed design elements throughout and the well-preserved, brilliant surfaces display a mix of satiny mint luster and prooflike reflectivity on both sides. Overall eye appeal is terrific. NGC ID# 254U, PCGS# 7164

3892 **1885-S MS65+ PCGS Secure.** The availability of the 1885-S is nothing like that of its predecessor, the conditionally rare 1884-S. Examples are collectible through MS65. Brilliant surfaces glisten with swirling mint frost and exhibit razor-sharp definition over the centers. Scarce any finer. NGC ID# 254U, PCGS# 7164

1885-S Dollar, MS66
Frosty Original Luster

3893 **1885-S MS66 PCGS Secure.** Frosty luster glistens on each side of this Premium Gem, showcasing sharp design elements and exceptional surface preservation. Delicate gold and greenish toning surrounds the outer peripheries, leaving the interiors mostly brilliant. Only a few faint grazes are visible on Liberty's cheek, preventing an even finer grade from PCGS. Population: 79 in 66 (3 in 66+), 2 finer; 1 in 66 Prooflike, 0 finer (9/18). NGC ID# 254U, PCGS# 7164

3894 **1885-S Doubled 5, VAM-2, MS65 PCGS.** The VAM-2 variety shows the 5 in the date repunched and remnants of a secondary 5 visible just above the flag of the primary digit. Regardless of variety, the 1885-S is scarce in Gem condition or finer. This brilliant, silver-white example displays flashy cartwheel luster throughout smooth and attractive surfaces that show only a few minor field abrasions. Some light, parallel planchet striations angle downward across Liberty's cheek — not fully eliminated by strike, since this 1885-S is (as usual) a bit weak over the high points of Liberty's portrait. The Gem surfaces and strong eye appeal more than compensate for the light strike. PCGS# 42660 Base PCGS# 7164

3895 **1885-S/S VAM-6 MS65 PCGS Secure.** A Top 100 Variety. Undesignated as such on the holder, but the repunched mintmark becomes obvious upon inspection beneath a glass. Each side exhibits three blushes of golden-brown toning across the periphery, but this crisply struck and lustrous example is predominantly brilliant. NGC ID# 254U, PCGS# 133901 Base PCGS# 7164

1886-O Morgan Dollar, MS63
Popular VAM-1A

3896 **1886-O Clashed E, VAM-1A, MS63 PCGS.** A Top 100 Variety. The reverse of this impressive Select specimen shows the clash mark from the E in LIBERTY below the eagle's tail feathers, identifying the popular VAM-1A. Double clashed and intermediate between VAM-1A1 (single clash) and VAM-1A2 (multiple clashes). The design elements are sharply detailed throughout and the lightly marked, lustrous surfaces exhibit delicate highlights of pale gold toning. Population: 5 in 63, 0 finer (9/18). NGC ID# 254W, PCGS# 133905 Base PCGS# 7168

3897 **1887/6 VAM-2 MS65 NGC.** A Top 100 Variety. The bottom sliver of an underdigit 6 bookends the base of the 7. This *Guide Book* overdate is typically encountered in MS61 to MS64 grades. The present brilliant and lustrous Gem is practically pristine aside from a vertical line in the field east of the left portion of the wreath. NGC ID# 2552, PCGS# 133908 Base PCGS# 7174

3898 **1887 MS67 NGC.** A spectacular Superb Gem example with intensely lustrous and frosty silver surfaces. There is no evidence of toning on either side. Although the grading services have certified quite a few 1887 Morgan dollars at this grade level, PCGS and NGC combined have graded just three numerically finer coins (10/18).
Ex: Long Beach Signature (Heritage, 6/2006), lot 2414, which realized $1,840; Central States Signature (Heritage, 4/2012), lot 5579, which realized $1,840. NGC ID# 27Y3, PCGS# 7172

3899 **1887 MS67 PCGS. CAC.** The 1887 is among the most common pre-1921 Morgan dollars in Mint State, but the vast majority of coins display enough abrasions to preclude a grade above the MS65 level. Each side presents an original appearance with a thin coating of golden-tan color. The luster is simply extraordinary, being both full and warmly frosted. The strike is well above-average for the series. The sheen is smooth and free of distracting bagmarks.
Ex: Long Beach Signature (Heritage, 2/2005), lot 7243, where it realized $2,300. NGC ID# 27Y3, PCGS# 7172

3900 **1887 MS67 PCGS Secure. CAC. VAM-3.** A repunched date variety, most apparent above the 7. A brilliant high-grade Morgan type coin. Virtually immaculate surfaces display dynamic luster and outstanding eye appeal. The centers show minor incompleteness. CAC: 67 in 67, 0 finer (10/18). NGC ID# 27Y3, PCGS# 7172

3901 **1887/6-O VAM-3 MS62 PCGS. CAC.** A Top 100 Variety. This scarce variety was discovered not long after its Philadelphia counterpart was identified. Lustrous and essentially brilliant with smooth fields, a typical strike, and faint grazes on the portrait.
Ex: Central States Signature (Heritage, 4/2013), lot 4827, which realized $1,175. NGC ID# 2552, PCGS# 133912 Base PCGS# 7178

3902 **1887/6-O VAM-3 MS63+ PCGS Secure. CAC.** A Top 100 Variety. This *Guide Book* entry features the underdigit 6 clearly under the primary 7 in the date. The centers are incomplete, but the rest of this New Orleans dollar is well-defined with vibrant mint luster and original mint brilliance. Tiny bagmarks barely prevent a near-Gem assessment. NGC ID# 2552, PCGS# 133912 Base PCGS# 7178

3903 **1887-O MS65 PCGS. CAC.** The general availability of the 1887-O through MS64 falls off considerably at this esteemed level, where the issue becomes elusive. The surfaces are satiny and untoned. Abrasions are minimal, and eye appeal is as good as one could hope to find. Housed in an old green label holder. PCGS reports 14 higher grading events. CAC: 46 in 65, 0 finer (9/18). NGC ID# 2547, PCGS# 7176

3904 **1889-CC XF40 PCGS Secure. VAM-2.** Double-clashed as on VAM-2A, but there is no indication of a clashed letter N. This cream-gray key date Carson City dollar shows a few tiny ticks on the center of the cheek, but the remainder of the coin is refreshingly unabraded. Pockets of luster outline the letters and stars. NGC ID# 2559, PCGS# 7190

3905 **1889-S MS65 PCGS.** A well-struck, frosty, and brilliant example of this conditionally elusive San Francisco issue. This Gem 1889-S dollar shows clean fields, and only a few minor ticks behind Liberty's eye limit the grade. Finer examples are scarcely seen.
Ex: Long Beach Signature (Heritage, 6/2016), lot 5034, which realized $1,410. NGC ID# 255B, PCGS# 7194

1889-S Morgan Dollar, MS66
Multicolored Obverse Toning

3906 **1889-S MS66 PCGS Secure.** Pleasing shades of sea-green and lavender toning visit the obverse of this spectacular Premium Gem, while the reverse remains essentially brilliant. The design elements are sharply detailed throughout and vibrant mint luster radiates from both sides. Overall eye appeal is terrific. PCGS has graded one numerically finer example (9/18). NGC ID# 255B, PCGS# 7194

3907 **1890 MS65+ PCGS Secure. CAC.** The 1890 Morgan dollar is usually available in MS65, but PCGS lists just six numerically finer examples, one of which is Prooflike (9/18). This Plus-graded Gem is above its peers in quality and eye appeal. Sharp design elements and frosty, brilliant luster reveal no bothersome abrasions. NGC ID# 255C, PCGS# 7196

3908 **1890-CC MS64 PCGS Secure. VAM-7.** The first C in the mintmark is clearly repunched, but specialists disagree whether the curved line in the dentils below the 0 represents a misplaced date digit. Hints of orange-gold toning accompany the margins of this lustrous and well struck Choice Carson City dollar. Minor grazes on left obverse decide the grade. NGC ID# 255D, PCGS# 7198

3909 **1890-CC MS64 PCGS. CAC. VAM-7.** A better Carson City issue, the 1890-CC appeared in the GSA auctions but in much smaller numbers than the 1880-CC through 1885-CC dollars. The present lustrous and boldly struck near-Gem shows only a trace of gold patina. We note only two hair-thin marks near the bust tip and arrowheads. In a green label holder.
Ex: New York Signature (Heritage, 3/2012), lot 3669, which realized $1,995. NGC ID# 255D, PCGS# 7198

3910 **1890-CC Tail Bar, VAM-4, MS63 PCGS.** A Top 100 Variety. Light caramel-gold toning graces the peripheries of this lustrous and nicely struck scarcer date Morgan dollar. The fields are smooth and the cheek displays minor marks. The well-known "Tail Bar" VAM, which can be identified at arm's length by the broad die scratch beneath the fletchings. The variety constitutes between 5% and 10% of Uncirculated survivors. NGC ID# 255D, PCGS# 133934 Base PCGS# 87198

3911 **1891 MS65 PCGS.** From a mintage of more than 8.6 million pieces, the 1891 Morgan dollar is not too difficult to locate in Gem condition, but the date is a prime condition rarity in finer grades. This well-detailed Gem displays spectacular shades of cerulean-blue, silver-gray, and golden-brown toning, with vibrant mint luster underneath. PCGS has graded three numerically finer examples (10/18).
Ex: Long Beach Signature (Heritage, 6/2014), lot 4683, which realized $3,818.75. NGC ID# 255G, PCGS# 7204

3912 **1891-CC MS64 PCGS. CAC.** Mostly prooflike throughout both sides, this near-Gem Carson City dollar has a few minor grazes and tiny marks, but no major abrasions. The 1891-CC is surprisingly scarce in Gem or finer grades, making any high-quality near-Gem coin with CAC endorsement an optimal bidding opportunity. The prooflikeness of the present sharply struck coin adds an extra measure of appeal. NGC ID# 255H, PCGS# 7206

3913 **1891-CC MS64 PCGS. CAC.** An attractive Choice Morgan dollar from the famous Carson City Mint, this coin offers sharply detailed design elements and well-preserved lustrous surfaces, with a few highlights of lavender-gray toning. NGC ID# 255H, PCGS# 7206

1891-CC Silver Dollar, MS65
Seldom Seen Finer

3914 **1891-CC MS65 PCGS Secure.** The 1891-CC Morgan dollar is one of the more available issues from the Carson City Mint, with a mintage of more than 1.6 million pieces. The issue becomes elusive in grades above the MS65 level, however. This attractive Gem offers well-detailed design elements and well-preserved, lustrous surfaces that show some peripheral highlights of emerald-green toning. PCGS has graded 39 numerically finer examples (10/18). NGC ID# 255H, PCGS# 7206

1891-CC Morgan Dollar, MS65
Popular Branch Mint Issue

3915 **1891-CC MS65 PCGS Secure.** Vivid shades of violet and pale gold toning visit the well-preserved surfaces of this delightful Gem, with vibrant mint luster underneath. The design elements are well-detailed, with just a touch of blending on the hair strands above Liberty's ear. Overall eye appeal is outstanding. PCGS has graded 39 numerically finer examples (9/18). NGC ID# 255H, PCGS# 7206

3916 **1891-CC Spitting Eagle, VAM-3, MS65 PCGS.** A Top 100 Variety. A small die lump in the field near the opening of the eagle's beak earns this popular variety the "Spitting Eagle" moniker, although recutting on the first C in the mintmark is arguably a more interesting feature. This piece is frosty and well-struck with a clean cheek on Liberty. Aquamarine and orange-gold toning appears in design recesses amid otherwise cream-gray coloration. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

1892 Morgan Dollar, MS65
Scarce P-Mint Issue

3917 **1892 MS65 PCGS.** Ex: Ray George. Savvy collectors do not let the P-mint origin of this issue fool them. True Gems are scarce and elusive. This lovely MS65 piece boasts brilliant, coruscating luster. Minimal abrasions, a fair strike, and pristine fields with no singular distractions complete the attractive package. PCGS has graded only nine pieces finer (9/18).
Ex: FUN Signature (Heritage, 1/2007), lot 7221, where it realized $2,875. NGC ID# 255L, PCGS# 7212

3918 **1892-CC MS62 PCGS Secure. VAM-8.** Most Mint State 1892-CC dollars were released during the 1940s and 1950s. This MS62 representative displays frosty and well-struck central devices against lustrous fields that show blushes of thin toning around the peripheral elements. Minor bagmarks are scattered over each side. NGC ID# 255M, PCGS# 7214

3919 **1892-CC MS63 PCGS. CAC. VAM-4A.** The mintmark is lightly repunched, and the fields exhibit at least three sets of clash marks. The 1892-CC is a better Carson City issue, noteworthy for its absence from the 1970s GSA auctions. This lustrous and lightly toned Select example has a smooth reverse and shows central incompleteness of strike. NGC ID# 255M, PCGS# 7214

1892-CC Dollar, Frosty Near-Gem

3920 **1892-CC MS64 PCGS Secure. VAM-4B.** Mint luster is characteristically frosty throughout this 1892 Carson City Morgan dollar. Both sides are essentially brilliant, showing only a few traces of superficial golden color. Strike incompleteness is confined to the centers. Faint clashing occurs under the chin and inside the top of the right wreath leaves. NGC ID# 255M, PCGS# 7214

3921 **1892-CC MS63 Prooflike PCGS Secure. VAM-4.** The second C in the mintmark is repunched. A scarcer date Carson City dollar that boasts a sharp strike, well-preserved fields, and dazzling luster. A dash of struck-in grease on the right (facing) wing is of mint origin. NGC ID# 255M, PCGS# 7215

3922 **1892-O MS65 PCGS. VAM-2.** Russet-brown and forest-green toning grace the margins, though the fields and motifs are nearly white. The lustrous surfaces are smooth save for thin marks above the eagle's head and near the D in UNITED. Similar to the '86-O and '96-O, the '92-O is plentiful in circulated grades but is unexpectedly difficult in quality Mint State. NGC ID# 255N, PCGS# 7216

3923 **1892-O MS65 PCGS Secure. VAM-2.** The 2 is lightly repunched north. Dynamic luster and remarkably smooth surfaces distinguish the present Gem from the typically encountered 1892-O dollar. The centers are incompletely impressed, but the eye appeal is nonetheless outstanding. NGC ID# 255N, PCGS# 7216

3924 **1892-S AU50 NGC.** Remnants of luster emerge from the protected areas when this About Uncirculated 1892-S dollar is rotated beneath a light. Little wear is present and the surfaces have a pleasing slate-gray hue with tints of light gold. The 1892-S is the second-rarest Morgan dollar in Mint State, making attractive AU coins highly sought-after as a more affordable alternative. NGC ID# 255P, PCGS# 7218

3925 **1892-S AU50 PCGS.** The 1892-S is among the scarcest Morgan dollar issues in AU and better grades. This impressively unmarked representative exhibits considerable bright luster throughout the legends and devices. The centers exhibit light wear, and the fields display hints of wheat-gold toning. Encapsulated in an old green label holder. NGC ID# 255P, PCGS# 7218

3926 **1892-S AU53 PCGS Secure.** The challenge posed by the 1892-S is a product of its relatively low mintage of 1.2 million coins and its scarcity in high grades. Traces of mint luster remain on this bright AU53 survivor. Each side shows faint hairlines and small marks but retains good detail despite modest circulation. NGC ID# 255P, PCGS# 7218

3927 **1892-S AU53 PCGS.** Luster remains in the protected portions of the fields on this About Uncirculated 1892-S dollar, and detail is strong throughout. Most of each side is brilliant, although orange-gold border toning is visible around the outer rims. The 1892-S is the second-rarest date in the series in Mint State, placing AU coins under intense collector demand. NGC ID# 255P, PCGS# 7218

3928 **1893 MS63 NGC. VAM-2.** Orange-gold toning visits the borders of this lustrous and low mintage Philadelphia Mint Morgan. Uncommonly unabraded for the Select level, with a higher classification denied only by a field graze near the M in AMERICA. The centers lack a full impression, usual for the VAM-2 repunched date variety. NGC ID# 255R, PCGS# 7220

3929 **1893 MS64 PCGS Secure. VAM-3.** The peak of the 3 in the date is repunched, and UNITED is lightly die doubled. A lustrous and nicely struck Choice example of this low-mintage Philadelphia issue. No marks are conspicuous, and the eye appeal is impressive. NGC ID# 255R, PCGS# 7220

3930 **1893 MS64 PCGS.** The 1893 Philadelphia dollar is a semikey date in the Morgan series, coming from a minimal production of 378,000 coins. This near-Gem example displays dusky orange-gold and grayish toning over each side with brighter sky-blue peripheries. The usual strike weakness is noted on the eagle's breast and the hair above Liberty's ear. NGC ID# 255R, PCGS# 7220

3931 **1893 MS64 PCGS. VAM-2.** The peak of the 3 is repunched. Butter-gold toning adorns the margins of this highly lustrous and impressively unabraded near-Gem. The centers are incompletely brought up, but the rest of the coin is sharp. Mintages at Philadelphia dropped every year from 1889 to 1895. Certified in a green-label holder. NGC ID# 255R, PCGS# 7220

1893-CC Dollar, Bright AU55

3932 **1893-CC AU55 PCGS Secure.** The obverse and reverse are equally bright and untoned with moderate hairlines. Light friction over Liberty's middle curls and brow, and the eagle's feathers explain the Choice AU assessment. Partial luster issues from the protected areas of the design. The Carson City Mint was shut down in 1893 after striking 677,000 dollars. Final-year coins are always popular with collectors. NGC ID# 255S, PCGS# 7222

3933 **1893-O AU58 NGC.** The 1893-O is a low-mintage issue (300,000 coins) that never saw widespread distribution during the 20th century. This near-Mint representative clearly avoided circulation. It still maintains luster around the device recesses, shows few significant marks aside from a handful of tiny hairlines, and friction is trivial. Characteristically defined for the New Orleans Mint. NGC ID# 255T, PCGS# 7224

3934 **1893-S VG8 PCGS.** This is an essentially problem-free circulated example of the key San Francisco Morgan, showing stone-gray surfaces and moderate wear. Much detail remains in the eagle's wings and the Liberty portrait, and eye appeal is pleasing for the grade. Only 100,000 silver dollars were struck at San Francisco in 1893, the same year that the Sherman Silver Purchase Act was repealed. NGC ID# 255U, PCGS# 7226

3935 **1893-S VG8 NGC.** Deep olive-gray and tan patina covers this collector-grade 1893-S dollar, with the darker hues clinging to the fields around the relief elements. Wear is consistent with the grade and no bothersome abrasions are seen. The 1893-S is the most challenging acquisition in the Morgan dollar series among circulation strikes, coming from a mintage of only 100,000 coins. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, VG10
Potential Collection Highlight

3936 **1893-S VG10 PCGS.** An appealing, problem-free example from a series-low mintage of 100,000 coins. The surfaces are smooth, and the finer details on Liberty's portrait and the eagle have largely been worn away. However, each side exhibits attractive battleship-gray patina with daubs of olive-gold color within the device recesses. This could easily serve as a highlight in a collection of Morgan dollars. NGC ID# 255U, PCGS# 7226

1893-S Silver Dollar, Fine 12
Collector-Grade Key Date

3937 **1893-S Fine 12 PCGS.** A collector-grade example of this famous key date. Most of the coin is cream-gray, though areas of deep gunmetal toning accompany portions of the borders. The wings display considerable plumage detail, and the inner hair detail is also prevalent. Relatively unabraded, and a worthy addition to an advanced holding of the series. NGC ID# 255U, PCGS# 7226

1893-S Dollar, Fine 12
100,000 Coins Struck

3938 **1893-S Fine 12 PCGS.** The 1893-S is one of the most recognizable and in-demand issues in the series across all grade levels. Here is an example that served its intended role in the channels of commerce for a number of years before being set aside. It displays the effects thereof, including peppered abrasions and blending over the devices. Colorful toning encircles the obverse border, leaving the rest of the coin untoned. NGC ID# 255U, PCGS# 7226

3939 **1894 AU58 PCGS.** Hints of lavender and amber-gold toning visit the lightly abraded surfaces of this attractive near-Mint 1894 Morgan dollar. The sharply detailed design elements show a trace of high-point friction but retain much of their original mint luster and a strong cartwheel effect. NGC ID# 255V, PCGS# 7228

1894 Morgan Dollar, MS61
Lowest Philadelphia Mintage

3940 **1894 MS61 PCGS. CAC.** The low-mintage 1894 Morgan dollar is a scarce and popular issue that enjoys considerable demand in all grades. Only 110,000 pieces were coined, the lowest business strike mintage of the Philadelphia series. This brilliant Mint State piece displays frosty silver luster with a trace of champagne toning along part of the reverse border. Slight strike weakness is evident over the ear, as usual, but surface marks are minimal for the grade.
Ex: Sacramento Signature (Heritage, 3/2011), lot 4113, where it realized $3,220. NGC ID# 255V, PCGS# 7228

1894 Morgan Dollar, MS62
Limited-Production Semikey

3941 **1894 MS62 PCGS Secure.** This Philadelphia issue claims the lowest mintage in the Morgan dollar series after the 1893-S. Of the 110,000 coins that were struck, most survive in circulated condition. This brilliant MS62 dollar is lustrous and well-defined. Grazes and bagmarks are unsurprising given the grade. Accents of gold appear around the rims. NGC ID# 255V, PCGS# 7228

1894 Dollar, AU58 Prooflike
Rarely Seen With Reflective Surfaces

3942 **1894 AU58 Prooflike NGC.** Rarely available in prooflike format, this near-Mint 1894 retains nearly all of its mirroring despite a brief stint in circulation. The 1894 is a notorious "stopper" for collectors attempting a collection of Prooflike or Deep Mirror Prooflike Morgans. Silver-mirrored fields surround lightly frosted motifs, with faint golden toning at the centers, and marks are minimal for the assigned grade. This sharply struck coin is ideal for either a circulated or Uncirculated set. Census: 8 in 58 Prooflike, 6 finer (10/18). NGC ID# 255V, PCGS# 7229

3943 **1894-O MS61 PCGS Secure. VAM-4.** The date was initially entered with an upward slant, then corrected. The flag of the 1 and the peak of the 4 retain remnants of the first logotype impression. A lustrous better date New Orleans dollar with light peripheral golden toning. The cheek displays marks consistent with the third-party grade. NGC ID# 255W, PCGS# 7230

3944 **1894-O MS62 PCGS.** This attractive MS62 specimen offers well-detailed design elements, with just a trace of the usual softness on the hair above the ear and eagle's breast. The lustrous surfaces show the expected number of minor contact marks for the grade. NGC ID# 255W, PCGS# 7230

1894-S Morgan Dollar, MS64+
Prooflike Obverse

3945 **1894-S MS64+ PCGS Secure. CAC.** The obverse of this Plus-graded, CAC-approved Choice coin is decidedly prooflike, although the reverse is less well mirrored, preventing a Prooflike designation from PCGS. The devices are well-struck and vibrant cartwheel luster engulfs each side. A few light grazes on Liberty's cheek and in the field prevent Gem classification but are not overly bothersome. Eye appeal is outstanding for the grade. NGC ID# 255X, PCGS# 7232

3946 **1896-O MS61 NGC.** A satiny, brilliant Mint State example of this better New Orleans issue, showing only minor abrasions for the grade. The usual strike softness is visible on the eagle's breast and the hair above Liberty's ear. The New Orleans Mint had particular difficulty producing sharp strikes during the mid-1890s. NGC ID# 27ZU, PCGS# 7242

3947 **1896-O MS62 PCGS Secure.** Frosty luster is original and untoned on this lower-end Mint State 1896-O dollar. Abrasions are minimal for the grade and eye appeal is pleasing as a result. The usual strike softness affects the centers. The 1896-O is a better date in Uncirculated condition, heavily sought-after in collectible grades such as the present. NGC ID# 27ZU, PCGS# 7242

3948 **1896-O MS62 PCGS Secure.** An impressive MS62 example of this popular New Orleans issue, with well-detailed design elements that show just a trace of softness on the hair above the ear. The pleasing surfaces are blanketed in shades of lavender and sea-green toning, with satiny mint luster underneath. NGC ID# 27ZU, PCGS# 7242

3949 **1896-O MS62 PCGS. CAC. VAM-11.** The base of the 1 in the date is repunched south. The 1896-O has a mintage approaching 5,000,000 pieces, but like the 1886-O, the issue is scarce in Mint State and very rare as a Gem. Lustrous and lightly toned with distributed incidental grazes and an incomplete impression at the centers. CAC: 36 in 62, 23 finer (9/18). NGC ID# 27ZU, PCGS# 7242

1896-S Dollar, MS63
Glistening Mint Frost

3950 **1896-S MS63 NGC. VAM-2.** The 6 is repunched north. From a mintage of 5 million coins, the 1896-S poses a moderate challenge at the MS63 grade level or higher. The hallmark of this example is clearly its radiant, frosty mint luster, which glistens across the mostly untoned, lightly abraded surfaces. There are just a few specks of color near the lower obverse border. The eagle's breast feathers are fairly crisp. Faint roller marks appear over Liberty's ear, where detail is incomplete. NGC ID# 2564, PCGS# 7244

3951 **1897-O MS62 PCGS Secure.** Frosty cartwheel luster engulfs each side of this Mint State example. Barely a trace of light golden toning tints the interiors, ceding to deeper orange-gold border color. Slight strike weakness appears on the eagle's breast and the hair above Liberty's ear, but abrasions are pleasantly minimal for the grade. NGC ID# 2565, PCGS# 7248

1897-O Dollar, Untoned MS63
Conditionally Scarce Southern Issue

3952 **1897-O MS63 NGC.** This conditionally scarce New Orleans Morgan dollar is plentiful in circulated and lower Mint State grades but it becomes challenging in Select Uncirculated condition. The average certified grade is AU55, but that reflects only higher-value coins being sent in for certification. This Select Mint State example is brilliant with shimmering mint luster and minimally scattered marks. Finer pieces are elusive. NGC ID# 2565, PCGS# 7248

3953 **1897-S MS66 PCGS. CAC. VAM-4.** The flag of the 1 is repunched. Dappled golden-brown and steel-blue toning embraces this lustrous and nicely struck representative. The colorful surfaces are refreshingly free from distracting marks. Despite its high mintage, the 1897-S becomes scarce in the present quality. CAC: 83 in 66, 5 finer (10/18). NGC ID# 2567, PCGS# 7250

3954 **1898-O MS67 NGC.** Ex: Lincoln Highway Hoard. Found in a quaint house in Pennsylvania Amish country near the famed Lincoln Highway, the hoard of more than 8,000 Morgan silver dollars was reportedly secured directly from the release of the U.S. Treasury hoard in the early 1960s. This Superb Gem 1898-O is a brilliant and frosted example, sharply struck with only a few tiny ticks across the smooth, lustrous surfaces. NGC has certified just one numerically finer 1898-O (10/18). NGC ID# 2569, PCGS# 7254

3955 **1898-S MS65 PCGS Secure.** The 1898-S Morgan dollar claims an adequate mintage of 4.1 million pieces, and the issue is still collectible at the MS65 grade level, but finer coins are scarce. This delightful Gem exhibits well-detailed design elements, with just a trace of blending on the hair above the ear. The well-preserved surfaces radiate vibrant mint luster and eye appeal is outstanding. NGC ID# 256A, PCGS# 7256

3956 **1899 MS66 PCGS. CAC.** This delightful Premium Gem displays complete strike definition throughout and bright, vibrant mint luster over both sides. The virtually pristine surfaces are completely brilliant throughout. Always popular because of its low mintage. NGC ID# 256C, PCGS# 7258

3957 **1899-S MS65 PCGS.** Radiant cartwheel luster illuminates light golden toning on this Gem 1899-S dollar, which lightens even further in the central obverse. Strike sharpness is pleasing. A few trivial grazes are noted, but this attractive dollar is otherwise well-preserved and appealing. Finer 1899-S examples are scarce. NGC ID# 256D, PCGS# 7262

3958 **1900-O/CC VAM-8 MS65 PCGS. CAC.** A Top 100 Variety. Light wheat-gold toning visits this lustrous and sharply struck Gem. The cheek is well preserved, and the minor field grazes fail to challenge the grade. The Carson City Mint ceased coinage in 1893, and leftover reverse dies were eventually overmintmarked and sent to New Orleans as a cost-saving measure. Certified in an old green label holder. NGC ID# 256G, PCGS# 133960 Base PCGS# 7268

1900-O/CC VAM-8 Dollar, MS66
Peripheral Patina, Vibrant Luster

3959 **1900-O/CC VAM-8 MS66 PCGS Secure.** A Top 100 Variety. Splendid peach-gold, ocean-blue, and lavender-red toning endows the fields of this lustrous and impeccably preserved Premium Gem. A faint fingerprint fragment east of the arrowheads provides an identifier. VAMworld.com shows four listings for the die pair: VAM-8 (normal), VAM-8A (die rust), VAM-8B (clashed), and VAM-8C (lapped). NGC ID# 256G, PCGS# 133960 Base PCGS# 7268

3960 **1900-O/CC VAM-11 MS65 PCGS Secure.** A Top 100 Variety. Per VAMWorld.com: "The CC mint mark remains are set high and shifted to the left. The arch of the first C is visible on the left. The second C shows as a spike on O to the lower right." Minor chatter on the cheek and softness over the centers are the only imperfections. The fields are clean, and each side remains brilliant and satiny. NGC ID# 256J, PCGS# 133963 Base PCGS# 7268

3961 **1900-S MS65 PCGS. VAM-7.** VAMworld.com describes VAM-7 as "Second 0 doubled on top. Seventh left star has two short spikes. ... Mint mark doubled slightly on upper right of top serif and set slightly high and right." This satiny better-date dollar displays light tan-gold borders. Tiny gunmetal-gray freckles are distributed. Smooth aside from a diagonal mark affecting the AT in STATES and the rim above. NGC ID# 256H, PCGS# 7270

3962 **1900-S MS65 PCGS Secure.** A hint of pale champagne toning graces the softly frosted surfaces of this Gem 1900-S Morgan dollar. The strike is sharp, and grade-limiting abrasions are limited to unobtrusive grazes that appear under a loupe. The 1900-S is occasionally available in this grade but is scarce finer. NGC ID# 256H, PCGS# 7270

3963 **1900-S MS65 NGC.** Just a few faint surface grazes limit the grade, and they disappear from view at certain angles. This Gem 1900-S dollar displays brilliant mint luster and sharp design elements. Eye appeal is outstanding. Finer examples are scarce. NGC ID# 256H, PCGS# 7270

3964 **1901 MS61 NGC.** This Philadelphia issue is best known for its scarcity in high grades. Mint luster is typically satiny on this well above-average survivor. The surfaces maintain much of their original brilliance and show additional accents of speckled gold patina. Strike detail is characteristic for the issue. Marks near the chin, star 4, and under the corner of the eye are partly responsible for the grade. NGC ID# 256J, PCGS# 7272

1901 Dollar, MS62
Conditionally Rare

3965 1901 MS62 NGC. The vast majority of 1901 Morgan dollars were struck prior to October, when the new Philadelphia Mint began coining operations. The issue is a notable condition rarity. Most coins were either distributed during the early part of the century or melted under the terms of the Pittman Act of 1918. This bright MS62 dollar exhibits faint golden border toning and mostly brilliant interiors. The centers are sharp, and bagmarks are minimal on the reverse. NGC ID# 256J, PCGS# 7272

1902 Morgan Dollar, MS67
Registry Grade Example

3966 1902 MS67 PCGS Secure. Nearly 8 million Morgan dollars were struck at the Philadelphia Mint in 1902, but the issue is still scarce at the MS67 grade level today, and no coins have been certified in higher numeric grades (9/18). This delightful Superb Gem exhibits impeccably preserved surfaces that radiate vibrant mint luster and show delicate hints of pale gold and lavender toning. The design elements are well-detailed and eye appeal is terrific. Population: 36 in 67 (2 in 67+), 0 finer (9/18). NGC ID# 256M, PCGS# 7278

3967 1902-S MS65 PCGS. A luminous Gem example of this better San Francisco issue, showing frosty, untoned interiors surrounded by amber and blue-green borders. The usual strike weakness is visible on the central high points, but abrasions are minimal. NGC ID# 256P, PCGS# 7282

3968 1902-S MS65 PCGS. CAC. Largely brilliant with touches of gold and violet at the margins. Though the high points show a touch of softness, the strike generally is above-average. The handful of marks that determine the Gem grade are small and unobtrusive. CAC: 43 in 65, 17 finer (9/18).
Ex: Rosemont Signature (Heritage, 8/2013), lot 4561, which realized $3,085.55. NGC ID# 256P, PCGS# 7282

1903 Dollar, MS67
None Certified Finer at PCGS

3969 1903 MS67 PCGS Secure. This boldly struck Superb Gem has the hard, satiny luster one would expect from this issue. Only the slightest hints of golden-brown color can be seen on the otherwise brilliant surfaces. The fields and cheek are beautifully preserved, and only a well-concealed contact mark on the eagle's breast prevents this Superb example from an even higher grade. NGC ID# 256R, PCGS# 7284

3970 1903-S AU55 NGC. Hints of luster remain in the protected areas of the fields on this Choice AU 1903-S dollar. Light champagne-tinted slate-gray color covers each side. Scattered abrasions hardly detract and wear is light. The 1903-S Morgan is a better date among 20th century issues, highly sought-after in collectible grades such as this AU55 coin. NGC ID# 256T, PCGS# 7288

1904-S Morgan, Semiprooflike MS62
Appealing for the Grade

3971 1904-S MS62 NGC. Semiprooflike fields are a hallmark of this lower-end Uncirculated coin, although abrasions are also minimal for the grade which boosts the eye appeal. This 1904-S dollar is well-struck and satiny. Brilliant interiors cede to deep orange-gold border toning. The 1904-S is a better date among 20th century Morgan dollars. NGC ID# 256W, PCGS# 7294

3972 1921 MS66+ PCGS Secure. CAC. The 1921 is plentiful in all grades through MS66 but it becomes scarce at the MS67 level, making this CAC-approved MS66+ coin ideal for those looking to balance quality and affordability. The surfaces remain wholly untoned and awash in thick mint frost. Fully struck. PCGS reports 16 finer submissions (9/18). NGC ID# 256X, PCGS# 7296

PROOF MORGAN DOLLARS

1884 Morgan Dollar, PR64 Cameo
Mintage of 875 Proofs

3973 **1884 PR64 Cameo PCGS Secure.** Proof Morgan dollar production amounted to 875 coins in 1884 — a fairly typical total for the series. This near-Gem Cameo specimen is brilliant with reflective fields. The fully struck motifs are partly frosted, delivering a pleasing white-on-black effect. A few faint lines are present, but there are no major signs of contact. NGC ID# 27ZB, PCGS# 87319

1891 Silver Dollar, PR64 Cameo
Warm Golden Toning

3974 **1891 PR64 Cameo PCGS.** The 1891 proof Morgan dollar is a rarity with Deep Cameo contrast, and Cameo coins are only moderately available. This Choice example displays golden toning over appreciably contrasted devices. Strike weakness on the eagle's breast and the hair above Liberty's ear is a typical characteristic of this issue. Population: 25 in 64 (1 in 64+) Cameo, 33 finer; 0 in 64 Deep Cameo, 4 finer (9/18). NGC ID# 27ZL, PCGS# 87326

3975 **1900 PR64 PCGS.** This Choice proof is sharp on the eagle's breast and talons but slightly weak on the hair above Liberty's ear. Both sides display deep reflectivity in the fields and have orange-gold and russet toning across the interiors with violet and blue border hues. The patina masks any small, unobtrusive contact marks. Population: 71 in 64 (1 in 64+), 37 finer (9/18). NGC ID# 3KYV, PCGS# 7335

PEACE DOLLARS

3976 **1921 MS65 PCGS.** Frosty original luster glistens like snow across the silvery, untoned surfaces of this Gem High Relief Peace dollar. Only a few small marks are visible, and eye appeal is outstanding despite the usual strike weakness on the central high points. A beautiful example of this one-year type. PCGS# 7356

3977 **1921 MS65 PCGS Secure.** A hint of light golden toning graces the Gem surfaces of this High Relief type coin. Only a few light, scattered abrasions are visible beneath a loupe. Typical of the 1921 Peace dollar, this piece displays minor strike weakness in the centers, although it is not detracting. PCGS# 7356

3978 **1921 MS65 PCGS Secure.** Luminous satin luster showcases mainly brilliant color on this Gem 1921 Peace dollar, although hints of light gold appear when tilted beneath a light. Remarkably few abrasions are present, and the central sharpness is above average for the High Relief issue. PCGS# 7356

1921 Peace Dollar, MS66
Single-Year High Relief Type

3979 **1921 MS66 NGC.** This popular single-year type coin is faintly toned in wisps of gold, but the surfaces maintain near-complete brilliance and showcase vibrant, satiny mint luster. Definition is bold throughout the reverse and most of the obverse, although Liberty's hair is not quite fully rendered. Grazes and other disturbances are trivial. NGC has only seen seven finer submissions (10/18). PCGS# 7356

1922-S Peace Dollar, MS65+
Elusive CAC-Approved Coin

3980 **1922-S MS65+ PCGS Secure. CAC.** The 1922-S Peace dollar is available in MS65, but PCGS lists only a dozen Premium Gems finer (9/18). The Plus designation and CAC green label set this Gem apart from its peers. Both sides are frosty and brilliant, showing exceptional preservation and well-struck design elements. Some vertical die polishing lines are visible in the left obverse field. NGC ID# 257E, PCGS# 7359

3981 **1923-D MS65+ PCGS Secure. CAC.** This Plus-graded Gem exhibits sharply detailed design elements in most areas, with just a touch of softness on the reverse legend. A dramatic die break crosses the truncation of Liberty's neck and arcs through the field and the letters LI in LIBERTY. Smaller die cracks are evident on the upper obverse, as well. The lustrous surfaces show no mentionable distractions. NGC ID# 257G, PCGS# 7361

3982 **1926 MS66 PCGS Secure.** Pastel rainbow toning provides rose-red, powder-blue, lemon-gold, and lime-green across the reverse. The obverse exhibits more conventional caramel-gold patina, although glimpses of multiple colors are visible near the left rim. In addition to its memorable toning, the present high grade dollar is virtually immaculate aside from small marks on the eagle.
Ex: Color Collection / Pittsburgh Signature (Heritage, 10/2011), lot 4358, which realized $2,070. NGC ID# 257N, PCGS# 7367

1926-S Dollar, MS66
Registry Quality Strike and Eye Appeal

3983 **1926-S MS66 PCGS Secure.** Smooth, problem-free surfaces and a sharp strike place this brilliant Premium Gem 1926-S in the upper echelon of the conditionally challenged issue. Liberty's hair strands are knife-sharp, while the reverse legend and central motifs are well brought up. Vibrant mint luster beams from both sides. PCGS reports just two finer pieces (10/18). NGC ID# 257R, PCGS# 7369

3984 **1927 MS65 PCGS Secure.** The 1927 Peace dollar is a slightly better date, and examples are rare finer than MS65. This collectible Gem displays well-struck motifs and softly frosted mint luster. A dusting of olive-gold toning graces each side. PCGS reports just 16 numerically finer submissions (9/18). NGC ID# 257S, PCGS# 7370

3985 **1927 MS65 PCGS Secure. CAC.** Delicate shades of pale gold toning blanket the well-preserved surfaces of this delightful Gem, with vibrant mint luster shining through the patina. The design elements are sharply detailed and eye appeal is terrific. PCGS has graded 16 numerically finer examples (9/18). NGC ID# 257S, PCGS# 7370

3986 **1928-S MS64 PCGS. CAC.** A brilliant and lustrous Choice silver dollar, held back in grade only by minor grazes on the left reverse field. The 1928-S is famously costly to acquire as a full Gem, but MS64 examples are much more affordable. Only a small percentage of the certified population boasts a CAC seal. Hub-doubled on the designer's monogram and the TR in TRVST, characteristic of the issue. NGC ID# 257W, PCGS# 7374

3987 **1928-S MS64+ PCGS Secure. CAC.** Peace dollar collectors quickly learn the formidable rarity of the 1928-S in the MS65 grade. The present brilliant and lustrous piece comes very close to attaining that level, held back by a narrow tick beneath the Y in LIBERTY. A working hub is apparently the source of the die doubling seen on WE TR and the monogram, since similar doubling is present on most if not all Uncirculated '28-S dollars. NGC ID# 257W, PCGS# 7374

3988 **1928-S MS64+ PCGS Secure. CAC.** Attaining a Gem 1928-S dollar is a major accomplishment for the Peace dollar collector. The present coin is just shy of Gem status, since it has both a Plus designation and a green CAC seal. This lustrous stone-gray and autumn-brown example shows only a field graze near the E in E PLURIBUS UNUM. D WE TR is clearly die doubled, as is the designer's monogram, as often seen for the issue. NGC ID# 257W, PCGS# 7374

3989 **1934 MS66 NGC.** The 1934 Peace dollar is a low-mintage issue that becomes conditionally rare in grades above the MS66 level. This sharply detailed Premium Gem is well-preserved and lustrous, with a few hints of pale gold toning. NGC has graded six numerically finer examples (10/18). NGC ID# 257Y, PCGS# 7375

3990 **1934 MS66 PCGS Secure.** The 1934 Peace dollar is a better date in the series, from a mintage of 954,057 pieces. This sharply detailed Premium Gem displays vibrant mint luster under shades of light gold toning. Unlike most examples seen, this coin shows only a few minor contact marks on the smooth surfaces. PCGS has graded only six coins in higher numeric grades (10/18). *Ex: Central States Signature (Heritage, 4/2012), lot 5867, realized $2,185.* NGC ID# 257Y, PCGS# 7375

3991 **1934-D MS65+ PCGS Secure.** Micro D. Collectors should be able to locate examples of the 1934-D through lower Uncirculated grade levels without issue, but the date serves up a challenge in Gem condition and is elusive any finer than this MS65+. Powder-blue patina complements brilliant, satiny surfaces. Obverse detail is above-average, and abrasions are scant. NGC ID# 257Y, PCGS# 7376

3992 **1934-S AU58 PCGS Secure. CAC.** Hints of iridescence accent light golden toning across this lustrous and satiny near-Mint example. Barely a trace of friction is evident on the devices, and the coin well-earns the CAC endorsement. A small reed mark above the eagle's wing on the reverse is the only obvious abrasion. Little more than 1 million Peace dollars were struck at San Francisco in 1934, and this issue is the most challenging to acquire in Uncirculated condition. High-end AU coins are widely popular with collectors. NGC ID# 257Z, PCGS# 7377

1934-S Peace Dollar, Frosty MS63
Eye-Appealing for the Grade

3993 **1934-S MS63 PCGS.** The San Francisco Mint struck slightly more than 1 million silver dollars in 1934, which is among the smaller production totals of the series. This issue is elusive in the higher Mint State grades but it is usually available in this collector grade of MS63. The present coin displays a hint of light golden toning over thickly frosted surfaces. A few scattered grazes are visible on each side, but eye appeal exceeds expectations for the grade. Housed in a green label holder. NGC ID# 257Z, PCGS# 7377

3994 **1935 MS66 PCGS Secure. CAC.** The lower obverse and upper reverse show blushes of multicolor toning, including blue, green, rose, and russet, while the rest of this Premium Gem is more uniformly golden-gray with soft, shimmering mint luster. Both sides show slight incompleteness over the usual areas, although the obverse is decidedly stronger than the reverse. None graded finer at PCGS or CAC (9/18). NGC ID# 2582, PCGS# 7378

3995 **1935-S MS66 PCGS Secure.** Four rays beneath ONE. This new four-rays die was used only in 1935 at the San Francisco Mint (David Bowers, 1993). Whispers of ivory and violet, along with occasional light brown freckles, run over lustrous surfaces that are devoid of significant contact marks. The design features are sharply struck. PCGS has graded three numerically finer examples (10/18). *Ex: Long Beach Signature (Heritage, 6/2006), lot 2857, realized $3,450; Central States Signature (Heritage, 4/2009), lot 3316, realized $2,530; Central States Signature (Heritage, 4/2012), lot 5881, realized $2,990.* NGC ID# 2583, PCGS# 7379

GOLD DOLLARS

3996 **1849 Open Wreath, D-4, Close Stars, MS64 PCGS.** Repunched E in UNITED. Thin date numerals. The inaugural-year 1849 Open Wreath gold dollar remains a perennially popular issue for type purposes despite higher-graded examples being scarce. This near-Gem is razor-sharp with profound orange-gold color and swirling mint luster. There are a few ticks and grazes but close examination is required to bring them into view. NGC ID# 25B9, PCGS# 521671 Base PCGS# 7502

3997 **1849-D AU53 NGC. Variety 1-A.** A caramel-gold representative with substantial peripheral luster and moderate wear on the curls near the ear. Marks are essentially limited to a roundish impression above the D in DOLLAR. The sole Open Wreath Dahlonega issue, and scarce since only 21,588 pieces were produced. NGC ID# 25BD, PCGS# 7507

3998 **1853 MS65 PCGS Secure.** The 1853 gold dollar becomes scarce in grades above the MS65 level. This attractive Gem displays sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster throughout. NGC ID# 25BU, PCGS# 7521

3999 **1853-O MS63 PCGS. Variety 1.** The high date variant of this New Orleans type issue. Lime-green and orange-gold tints accompany original and lustrous surfaces. The strike is sharp in the centers though the dentils show blending. No marks are noticeable, and the eye appeal is superior for the designated grade. NGC ID# 25BX, PCGS# 7524

4000 **1853-O MS63 NGC. Variety 1.** The High Date variant of this popular New Orleans issue. A Select apricot-gold example that exhibits a good strike and vibrant cartwheel sheen. Careful inspection beneath a loupe shows only unimportant contact. NGC ID# 25BX, PCGS# 7524

4001 **1853-O MS64 PCGS Secure. Variety 1.** A lustrous green-gold New Orleans type coin. The strike is sharp on the portrait and wreath, though the dentils show incompleteness. The fields exhibit only delicate grazes. Die lines near the ITE in UNITED are diagnostic for Variety 1, the more available of the two '53-O marriages. NGC ID# 25BX, PCGS# 7524

1853-O Gold Dollar, MS65
Conditionally Rare, Few Known Finer

4002 **1853-O MS65 NGC. Variety 1.** Bold die lines above IT in UNITED and a high date confirm the attribution. With 290,000 pieces struck, this is the most collectible of the six New Orleans gold dollar issues. It becomes scarce only at the MS64 grade level, while comparable Gems are conditionally rare. Shades of yellow-gold vary from light to dark over well-preserved surfaces. Strike definition is complete, and mint luster is wonderfully vibrant. Census: 9 in 65, 2 finer (9/18). NGC ID# 25BX, PCGS# 7524

1854-S Gold Dollar, MS62
Only Type One S-Mint Issue

4003 **1854-S MS62 PCGS Secure.** The San Francisco Mint opened for coinage operations in 1854 and a small mintage of 14,632 gold dollars was accomplished. The 1854 is always in demand as the only Type One gold dollar from the popular West Coast facility. This attractive MS62 example is sharply struck, lightly marked, and lustrous, with strong eye appeal. Population: 20 in 62 (1 in 62+), 21 finer (9/18). NGC ID# 25C2, PCGS# 7527

4004 **1855-O XF45 PCGS. Variety 2.** The reverse is lapped, as usual. The New Orleans Mint struck Type Two gold dollars only in 1855, producing 55,000 coins. This issue is scarce in Mint State but collectible in XF grades. This Choice XF coin displays bright yellow-gold surfaces with hints of luster in the protected portions of the fields. Wear is trivial. NGC ID# 25C7, PCGS# 7535

4005 **1856-S/S FS-501 AU53 PCGS.** The 1856-S is the sole San Francisco Type Two issue, struck while other mints had begun production of the Type Three design. Despite a mintage of only 24,600 pieces, two reverse dies are known, including the present widely repunched mintmark variety. An original caramel-gold example with minimal wear and pleasing surfaces. NGC ID# 25C8, PCGS# 145703 Base PCGS# 7536

4006 **1862 MS65 PCGS Secure.** This impressive Gem is sharply detailed in most areas, with just a touch of softness on the upper wreath. The well-preserved orange-gold surfaces radiate vibrant mint luster with outstanding eye appeal. PCGS has graded 44 numerically finer examples (9/18). NGC ID# 25CW, PCGS# 7560

1864 Gold Dollar, MS66
5,900 Pieces Struck

4007 **1864 MS66 PCGS.** The population totals at PCGS and NGC suggest probably no more than 150 examples of the elusive 1864 gold dollar survive from a mintage of 5,900 pieces. Mintages for gold and silver coinage plummeted after specie payments were abolished during the Civil War. The reverse exhibits the usual clash marks, and the lower part of 18 is a touch soft, but the rest of this Premium Gem displays needle-sharp detail. Luminous yellow-gold surfaces are aglow in vibrant mint luster. Population: 3 in 66, 11 finer (9/18). NGC ID# 25CY, PCGS# 7563

4008 **1866 MS63 PCGS Secure.** Not only had gold dollars fallen out of favor by the time 7,100 pieces were struck in 1866, virtually no gold or silver coins circulated on the East coast during or after the Civil War. This semiprooflike yellow-gold example enjoys full strike detail. Minimal chatter explains the grade. NGC ID# 25D2, PCGS# 7565

4009 **1874 MS66 PCGS Secure. Breen-6094. CAC.** A sharply struck and lustrous tan-gold representative. Minor field grazes are all that limit the grade. LIBERTY is absent except for the initial letter, apparently lapped from the obverse die prior to use. Clashed within the wreath and near the profile. CAC: 27 in 66, 20 finer (10/18). NGC ID# 25DC, PCGS# 7575

4010 **1878 MS63 PCGS.** From a small mintage of 3,000 pieces, this impressive Select specimen offers sharply detailed design elements and lightly marked orange-gold surfaces that show a mix of satiny mint luster and prooflike reflectivity in the fields. Population: 30 in 63 (1 in 63+), 47 finer (9/18). NGC ID# 25DG, PCGS# 7579

4011 **1882 MS65 NGC.** While the mintage is a mere 5,000 pieces, the 1882 gold dollar can be found in mint condition. This is a highly lustrous example that is sharply struck and shows medium reddish-gold patina. NGC ID# 25DL, PCGS# 7583

1889 Gold Dollar, MS67+
Final Year of Denomination

4012 **1889 MS67+ PCGS.** From a final-year mintage of 29,00 pieces, the 1889 gold dollar is somewhat scarce at the MS67 graded level, and finer coins are rare. This Plus-graded Superb Gem exhibits sharply detailed design elements throughout, and the impeccably preserved orange-gold surfaces radiate satiny mint luster on both sides. PCGS has graded 10 numerically finer examples (9/18). NGC ID# 25DU, PCGS# 7590

CLASSIC QUARTER EAGLES

4013 **1834 AU55 NGC. Breen-6140, Variety 2, R.3.** The Wide AM variety, a reference to the spacing of the first letters in AMERICA. The reverse was used again in both 1835 and 1836. The obverse is notable for its repunching on stars 2 and 3. This green-gold Choice AU example is boldly defined and displays ample luster. The surfaces are slightly glossy, the rim has a tick near star 4, and a thin mark is west of Liberty's mouth. NGC ID# 25FS, PCGS# 7692

4014 **1834 AU58+ PCGS. Breen-6138, Variety 1, R.1.** The Small Head variety, likely the first Classic quarter eagle die pair. The orange-gold surfaces are nicely struck and semiprooflike. The open fields display the expected number of minor marks, but none merit singular mention. NGC ID# 25FS, PCGS# 7692

4015 **1836 Block 8 AU53 NGC. Breen-6144, Variety 15, R.2.** Elements of luster remain in the peripheral fields, protected by the stars and legends. The devices have light wear, but much of the central weakness is due to a poor strike, not circulation. The bright straw-gold surfaces are only lightly marked. NGC ID# 25FU, PCGS# 97694

4016 **1836 Block 8 AU58 NGC. Breen-6144, Variety 15, R.2.** Second Head of 1837. This near-Mint Classic Head type coin displays partially lustrous fields and bright, lightly marked yellow-gold surfaces. The usual strike weakness at the centers gives the illusion of more advanced wear than the coin actually has. NGC ID# 25FU, PCGS# 97694

1836 Classic Two and a Half, MS61
Block 8, Pleasing Surfaces

4017 **1836 Block 8 MS61 NGC. Breen-6144, Variety 15, R.2.** A charming butter-gold representative without consequential contact. The strike is slightly incomplete in the centers, but the remainder of the coin is well-defined. Block 8 two-and-a-halves were coined only in 1835 and 1836. The *Guide Book* separately lists Script 8 and Block 8 varieties for the 1836 quarter eagle, but ignores the distinction on 1835, 1836, and 1837 half eagles. NGC ID# 25FU, PCGS# 97694

4018 **1837 AU50 NGC. Breen-6145, Variety 16, R.2.** The usually encountered die marriage of this lower mintage date. An unmarked and original green-gold example with customary inexactness of strike on the curls and shield. The curls and wingtips display moderate wear. NGC ID# 25FX, PCGS# 7695

4019 **1839-C — Rim Damage — PCGS Genuine. XF Details. Breen-6150, Winter-2, Variety 22, R.4.** Despite a meager mintage of 18,140 pieces, three die varieties exist for the 1839-C two and a half. The present marriage is interesting for a widely repunched 3 in the date, and lengthy die cracks through the chin and beak. This sea-green and peach-gold example has a rim blemish near OF, but no other detractions are present.

4020 **1839-O Medallic Alignment — Cleaned — NGC Details. XF. Breen-6153, Variety 28, R.4.** The dies are aligned with a medal turn. The reverse also has several heavy die cracks. Detail is only lightly worn away and the surfaces are smooth. Although lightly cleaned in the past, each side has since acquired pleasing olive-gold patina that deepens toward the borders.

1839-O Two and a Half, AU50
Low-Mintage Southern Gold Issue

4021 **1839-O AU50 PCGS. Breen-6153, Variety 28, R.4.** Four lengthy die cracks on the reverse are characteristic of Variety 28, also known as the Close Fraction variant. The 1839-O is the sole New Orleans issue of the series, and has a mintage of just 17,781 pieces. This medal-turn example has bold definition and noticeable luster. The pale butter-gold surfaces show a few hair-thin lines on the left obverse. NGC ID# 25G7, PCGS# 7701

LIBERTY QUARTER EAGLES

4022 **1842-C — Cleaned — NGC Details. AU. Variety 1.** A challenging Charlotte issue with a minimal mintage of 6,729 pieces. This moderately luminous almond-gold representative lacks hairlines and shows only incidental marks. A narrow lamination (as made) passes through MERICA to the rim below. NGC ID# 25GH, PCGS# 7724

4023 **1843-C Large Date, Plain 4, XF45 NGC. Variety 1.** Some strike weakness is noted in the centers, but light wear overall reduces its noticeability. This Choice XF 1843-C Large Date quarter eagle displays original olive-gold patina with large areas of fire-orange luster in the protected portions of the fields. Eye appeal is outstanding for the issue and grade. NGC ID# 7HLG, PCGS# 7728

4024 **1847 MS60 NGC.** From a mintage of 29,800 pieces, this attractive Mint State specimen exhibits lemon-yellow surfaces that retain most of their original mint luster and show fewer minor contact marks than expected for the grade. The design elements are sharply detailed throughout. Census: 8 in 60, 17 finer (10/18). NGC ID# 25H5, PCGS# 7744

4025 **1851 Repunched Date, FS-301, MS64 PCGS Secure.** The base of the 51 is repunched. A well struck caramel-gold Choice Liberty type coin. Minor field grazes determine the grade. Mintages of quarter eagles peaked between 1851 and 1853, an era when West Coast gold was shipped east, and silver coins were extensively melted. NGC ID# 3H2W, PCGS# 145705 Base PCGS# 7759

4026 **1861 New Reverse, Type Two, MS63 NGC.** The arrowheads of the Type Two reverse are narrow and separated. This type accounts for the majority of the surviving 1861 quarter eagle population and is ideal for date collectors. Frosty yellow-gold luster shows minimal abrasions on this Select example, which has good eye appeal. Strike weakness is noted on the lower portion of the eagle and around Liberty's brow. NGC ID# 25JX, PCGS# 7794

4027 **1861 New Reverse, Type Two, MS63 PCGS Secure.** The thin, separated arrow heads identify the New Reverse. This attractive Select specimen exhibits well-detailed design elements, with some of the usual softness on the eagle's leg and stars. The lustrous yellow and rose-gold surfaces are lightly marked and appealing. NGC ID# 25JX, PCGS# 7794

4028 **1868-S AU58 NGC.** The San Francisco Mint struck only 34,000 quarter eagles in 1868. This issue is scarce in AU58 and rare in Uncirculated condition. Near-Mint detail and partial luster characterize the present piece, complementing bright yellow-gold patina. Scattered abrasions accompany the grade. Census: 79 in 58 (1 in 58+), 18 finer (9/18). NGC ID# 25KC, PCGS# 7808

4029 **1869 AU58 NGC.** Just a trace of wear shows on the strongly impressed design elements of this attractive near-Mint specimen and the lightly abraded surfaces retain much of their original mint luster. Some faint die breaks and clash marks are evident on the reverse. From a small mintage of 4,300 pieces. Census: 59 in 58, 31 finer (10/18). NGC ID# 25KD, PCGS# 7809

1869 Two and a Half, MS62 Prooflike
Rare in Mint State

4030 **1869 MS62 Prooflike NGC.** The 1869 quarter eagle is rare in Mint State, and only a few such pieces are designated Prooflike by NGC. This reflective example displays bright yellow-gold color and modest cameo contrast. The strike is razor-sharp. Scattered contact marks limit the grade but none are individually bothersome. Census: 2 in 62 Prooflike, 1 finer (9/18). NGC ID# 25KD, PCGS# 77809

4031 **1871 MS61 NGC.** This attractive Mint State specimen exhibits sharply detailed design elements and lustrous orange-gold surfaces that are lightly marked for the grade. From a small mintage of 5,350 pieces. Census: 16 in 61, 10 finer (10/18). NGC ID# 25KH, PCGS# 7813

4032 **1873 Closed 3 MS64 PCGS.** The Closed 3 variant is slightly scarce in high grade than the Open 3 1873 quarter eagle, but not by much. This near-Gem is well-struck and frosty with original wheat-gold mint luster. No significant abrasions are visible. Population: 62 in 64 (4 in 64+), 17 finer (9/18). NGC ID# 25KN, PCGS# 7818

1876-S Quarter Eagle, MS61
Low 5,000-Coin Mintage

4033 **1876-S MS61 PCGS.** The California branch mint mustered a small production of 5,000 quarter eagles in 1876, making this the lowest-mintage San Francisco issue since the inaugural and extremely rare 1854-S. It is estimated that only 20 or so examples survive in Mint condition. This lustrous two and half dollar has lightly marked, semiprooflike surfaces. The peripheries are bold, though the portrait and eagle display the usual high-point incompleteness. Population: 7 in 61, 19 finer (9/18). NGC ID# 7JS6, PCGS# 7825

4034 **1889 MS64 PCGS.** Radiant peach-gold surfaces shimmer with frosty luster when rotated. The strike is short of full but still bold with only trivial softness on the left (facing) leg feathers. A handful of bagmarks and a pedigree identifier on the cheek prevent a Gem grade. Population: 73 in 64 (5 in 64+), 15 finer (9/18). NGC ID# 7JTT, PCGS# 7841

4035 **1897 MS61 Prooflike NGC.** An intricately struck butter-gold two-and-a-half. Marks are minimal, though a tiny speck of aqua residue rests above the eagle's left (facing) shoulder. The 1897 is a lower mintage date with a production of less than 30,000 pieces. NGC has certified 12 examples as Prooflike in all grades (10/18). NGC ID# 25LM, PCGS# 77849

4036 **1900 MS66 PCGS Secure.** A spectacular Premium Gem representative of this popular issue, with sharply detailed design elements and well-preserved orange-gold surfaces that emit waves of satiny mint luster. Eye appeal is outstanding. Population: 89 in 66 (4 in 66+), 20 finer (9/18). NGC ID# 25LR, PCGS# 7852

4037 **1904 MS63 Prooflike NGC.** An attractive Select specimen, with sharply detailed design elements and lightly marked orange-gold surfaces that show prooflike reflectivity in the fields. Overall eye appeal is outstanding. Census: 4 in 63 Prooflike, 4 finer (10/18). NGC ID# 25LV, PCGS# 77856

4038 **1905 MS66 PCGS Secure.** Razor-sharp definition is evident on all design elements of this spectacular Premium Gem and the impeccably preserved orange-gold surfaces radiate vibrant mint luster. Eye appeal is terrific. NGC ID# 267S, PCGS# 7857

INDIAN QUARTER EAGLES

4039 **1908 MS63 PCGS,** an attractive and well-struck wheat-gold representative; and a **1929 MS63 PCGS,** lightly abraded apricot-gold surfaces, a typical strike. Both coins (representing the first and last years of the series) are housed in the same PCGS holder, which bears a double facsimile autograph of designer Bela Lyon Pratt. (Total: 2 coins)

4040 **1908 MS64+ PCGS Secure. CAC.** This Plus-graded Choice example represents the first year of the Indian design. The design elements are well-detailed, with just a trace of softness on the eagle's shoulder, and the well-preserved orange-gold surfaces radiate vibrant mint luster, with outstanding eye appeal. NGC ID# 288Y, PCGS# 7939

4041 **1908 MS65 NGC.** An attractive Gem representative from the first year of the Indian design, this coin is sharply detailed in most areas, with just a trace of softness on the eagle's shoulder. The pleasing orange-gold surfaces are lustrous on both sides. NGC has certified 71 numerically finer examples (10/18). NGC ID# 288Y, PCGS# 7939

4042 **1909 MS64 PCGS.** An attractive Choice representative of this early series issue, with sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster on both sides. Eye appeal is outstanding. NGC ID# 288Z, PCGS# 7940

4043 **1909 MS64+ PCGS Secure. CAC.** The Plus designation sets this piece apart from its peers, and the CAC endorsement is well-earned. Sharp design elements and satiny greenish-gold luster show no distracting abrasions. Eye appeal is pleasing. NGC ID# 288Z, PCGS# 7940

4044 **1910 MS65 PCGS Secure.** The 1910 Indian quarter eagle is rare in grades above the MS65 level. This spectacular Gem offers sharply detailed design elements throughout, with lustrous, orange-gold surfaces that are free of mentionable distractions. PCGS had graded 11 numerically finer examples (9/18). NGC ID# 2892, PCGS# 7941

4045 **1911-D Weak D AU55 NGC.** The mintmark is weak, but the interior of the D is faintly visible with a magnifier. Light high-point wear is evident on this Choice AU coin, but the orange-gold patina appears original. The surfaces are smooth and appealing. The diagnostic wire rim is plain along the upper-right obverse border. NGC ID# 2895, PCGS# 7954

4046 **1911-D Weak D AU55 NGC.** The faint silhouette of a D mintmark is visible at a certain angle on this Choice AU Weak D coin, and the diagnostic wire rim along the upper-right obverse border is sharp. Little wear is present on this satiny orange-gold coin. Eye appeal is pleasing for the grade. NGC ID# 2895, PCGS# 7954

4047 **1911-D — Cleaned — PCGS Secure. AU Details.** Strong D. The 1911-D has less than one-fourth the mintage of any other Indian quarter eagle issue. Since that classic gold series can be collected by date and mint, the '11-D is the subject of significant demand. This nicely detailed example exhibits unblemished microgranular straw-gold surfaces. The lower headdress feathers have a slightly blurry appearance.

1911-D Strong D Two and a Half, AU50
Original, Colorfully Toned Surfaces

4048 **1911-D AU50 PCGS.** Ruby-red accents embellish khaki-gold surfaces of this sharply defined Strong D quarter eagle. Traces of luster remain, and the coin seems remarkably sharp for a reported 10 points of wear. The 1911-D has unending appeal as the lowest mintage of the series by a wide margin. This modestly circulated example offers exceptional quality and eye appeal for the assigned grade. NGC ID# 7KR7, PCGS# 7943

1911-D Strong D Two and a Half, AU55
Original Surfaces

4049 **1911-D AU55 PCGS.** Strong D. The 1911-D quarter eagle is a perennial favorite of collectors as it is the key to this popular, short-lived series. Each side shows attractive, light, original color with a few as-expected small abrasions. The mintmark is sharply impressed and easily visible, a trait not always encountered on this issue. NGC ID# 7KR7, PCGS# 7943

1911-D Quarter Eagle, AU55
Strong D Mintmark

4050 **1911-D AU55 PCGS Secure.** Strong D. The Indian's headdress and the eagle's shoulder display bold definition, even in light of moderate high-point rub. The D mintmark, often difficult to distinguish, is clear on this Choice AU representative. Both sides retain glints of luster over light orange-gold surfaces. No other Pratt quarter eagle issue challenges the supremacy of the 1911-D, with its mintage of 55,680 coins. NGC ID# 7KR7, PCGS# 7943

4051 **1912 MS63 PCGS. CAC.** This attractive Select representative offers sharply detailed design elements in most areas, but just a touch of softness shows on the lower headdress feathers. The pleasing orange-gold surfaces are lustrous and colorful. NGC ID# 7KR8, PCGS# 7944

4052 **1912 MS64 PCGS.** Pumpkin-gold and apple-green alternate across this coruscating and carefully preserved Choice Indian two-and-a-half type coin. The lower headdress feathers lack a full impression, but the strike is generally good. A costly acquisition any finer. NGC ID# 7KR8, PCGS# 7944

4053 **1914 MS63+ PCGS Secure. CAC.** CAC-endorsed and Plus-graded, this Select 1914 quarter eagle displays bold detail and satiny peach-gold mint luster. Light field grazes are all that limit the grade. The 1914 is a condition key in MS65, and it is highly sought-after in MS63 and MS64 among a great many collectors. NGC ID# 7KRA, PCGS# 7946

1914 Quarter Eagle, MS64
A Rarity One Grade Finer

4054 **1914 MS64 PCGS.** In MS65, the 1914 is one of the condition keys to the Indian quarter eagle series. This near-Gem is nearly as eye-appealing as the higher-grade pieces but is much more accessible for the average collector. The strike is sharp, and bright yellow-gold luster shows only the most trivial surface grazes under a loupe. An appealing example of this better Philadelphia issue. NGC ID# 7KRA, PCGS# 7946

4055 **1914-D MS64 NGC.** In Gem grade the 1914-D is the key to the Indian Head series, although the 1911-D is the key overall in *any* grade. This near-Gem 1914-D boasts lovely golden-yellow color and lacks mentionable marks. An inner rim runs through portions of the reverse, a common trait among Indian Head mintmarked coins of this era. Seldom offered in better condition. NGC has graded 48 numerically finer examples (10/18). NGC ID# 2899, PCGS# 7947

THREE DOLLAR GOLD PIECES

1854-O Three Dollar, AU50
Sole O-Mint Three Dollar

4056 **1854-O AU50 PCGS. Variety 2.** The 1854-O is one of our favorite issues in the three dollar series as it is the only one produced in the New Orleans mint. Invariably seen with a die crack through the mintmark, this feature is especially pronounced on this particular coin. Slight friction is seen over the high points, and there are a number of small to medium-sized abrasions scattered over each side of this light green-gold example.
Ex: Dallas Signature (Heritage, 11/2005), lot 4054, where it brought $4,600. NGC ID# 25M5, PCGS# 7971

4057 **1866 AU55 PCGS.** Areas of original orange-gold luster cling to the protected fields, although much of each side displays light friction and surface chatter. Detail is strong for the grade. The 1866 three dollar gold piece comes from an enticingly low mintage of 4,000 coins. NGC ID# 25MM, PCGS# 7987

1868 Three Dollar Gold, AU58
Classic Low-Mintage Issue

4058 **1868 AU58 NGC.** Only 4,850 business-strike three dollar gold pieces were struck at the Philadelphia Mint in 1868, making the issue elusive in high grade today. This attractive near-Mint specimen exhibits just a trace of wear on the sharply detailed design elements, and the lightly abraded lemon-yellow surfaces show a mix of satiny mint luster and prooflike reflectivity in the fields.. NGC ID# 25MP, PCGS# 7989

1878 Three Dollar, MS63
Frosty CAC-Approved Example

4059 **1878 MS63 NGC. CAC.** The most collectible date in the three dollar gold series claims a mintage of 82,304 coins, many of which were never distributed for circulation. Bright mint frost and light yellow-gold color are characteristic for the issue. Pale rose-gold accents also appear throughout. The curls and wreath are well-detailed. Each side displays a number of small marks that are minimal for the grade. The upper right portion of the wreath is lightly die doubled. Certified in a prior generation holder. NGC ID# 25MZ, PCGS# 8000

1883 Three Dollar Gold, AU58
Only 900 Pieces Struck

4060 **1883 AU58 NGC.** The 1883 boasts an enticingly low mintage of only 900 coins, making high-level survivors immensely popular with collectors. This near-Mint coin is sharp and semiprooflike, showing rich orange-gold coloration and minimal abrasions. Eye appeal is outstanding. Although numerous examples of the date were saved in the 19th century, the low mintage ensures that high-grade 1883 three dollar gold pieces are elusive today. Census: 22 in 58, 62 finer (9/18). NGC ID# 25N6, PCGS# 8005

4061 **1889 AU55 PCGS.** Hints of lilac-gold color appear in the protected areas of the fields amid remnants of luster, while the worn areas of this Choice AU example display deeper orange-gold coloration. The strike is sharp and only light high-point wear is present. A pleasing collector-grade type coin from the final year of the series. NGC ID# 7KDU, PCGS# 8011

CLASSIC HALF EAGLES

4062 **1834 Plain 4 AU55 PCGS Secure. Breen-6502, McCloskey 4-C, R.2.** 5 D is repunched, and a delicate vertical crack descends from 12 o'clock through the BE in LIBERTY. This partly lustrous honey-gold example is free from mentionable marks. The curls near the ear show softness of strike but most of the design is bold. NGC ID# 25RR, PCGS# 8171

4063 **1836 AU53 PCGS. Breen-6509, McCloskey 6-E, R.4.** A nearly bisecting die crack stretches vertically from the rim between the 83 in the date to the L in LIBERTY. Hints of luster and reflectivity remain in the protected portions of the fields, complementing strong detail and original orange-gold coloration. Scattered abrasions accompany the grade. NGC ID# 25RY, PCGS# 8174

LIBERTY HALF EAGLES

4064 **1839 AU55 PCGS.** Mint State examples of the first-year Liberty Head half eagle are rare, but attractive AU coins are relatively collectible. This AU55 piece displays sharp central motifs and bright yellow-gold surfaces with luster in the protected regions. Scattered, light abrasions are apparent on each side. Population: 20 in 55, 43 finer (9/18). NGC ID# 25S7, PCGS# 8191

4065 **1843-D Medium D XF40 PCGS. Variety 10-G.** Lemon-gold luster fills the plumage and reverse legends of this Dahlonega type coin. Liberty's curls show incompleteness of strike. The olive-green surfaces display distributed minor to moderate marks, though only a small dig near the E in UNITED merits description. NGC ID# 25T4, PCGS# 8215

4066 **1844-O AU58 NGC. Variety 1.** Eight die marriages are known for the 1844-O, which ranks among the more available New Orleans No Motto half eagle issues. This nicely struck example has a few thin parallel lines on the chin but shows few abrasions overall. The aquamarine surfaces are slightly subdued. NGC ID# 25TA, PCGS# 8222

1849-C Liberty Half Eagle, AU55
Popular Branch Mint Type Issue

4067 **1849-C AU55 NGC. Variety 1.** The 1849-C Liberty half eagle claims a mintage of 64,823 pieces, making it a reasonably available issue and a popular choice of branch mint type collectors. This attractive Choice AU specimen exhibits some light wear on the well-detailed design elements, with a touch of the usual softness evident on the eagle's leg. An interesting die crack travels from the reverse rim by U in UNITED to the lower leaves. The lightly abraded orange-gold surfaces retain traces of original mint luster. Census: 40 in 55, 45 finer (10/18). NGC ID# C5XD, PCGS# 8241

4068 **1850-C Weak C XF40 PCGS. Variety 4.** Doug Winter estimates that as many as 350 examples of this issue survive in all grades, making the 1850-C one of the most plentiful half eagles from the Charlotte Mint and an excellent type candidate. This XF coin displays a sharp strike and only light wear. Moderately abraded surfaces show original olive-gold patina. The reverse is rotated approximately 60 degrees clockwise, which is a rare occurrence for the variety. Housed in an old green label holder. NGC ID# 25U2, PCGS# 98244 Base PCGS# 8244

1851-D Half Eagle, AU55
Attractive CAC-Endorsed Example

4069 **1851-D AU55 PCGS. CAC. Variety 30-V.** The Strong D mintmark touches the stem, and the date is positioned far left. This Dahlonega issue is more elusive than collectors give it credit for. Of the 62,710 pieces struck, Winter estimates only 135 to 185 examples survive — mostly in VF to XF condition. The peripheral elements are bold on each side, while the centers are typically soft. Partial luster glows from attractive medium orange-gold surfaces. Population: 20 in 55, 10 finer. CAC: 7 in 55, 2 finer (9/18). NGC ID# 25U8, PCGS# 8248

1855-C Five Dollar, Choice AU
Original Patina, Sharp Detail

4070 **1855-C AU55 NGC. Variety 1.** The 1855-C half eagle is relatively scarce with fewer than 225 pieces believed known in all grades. This Choice AU example displays sharp detail and trivial wear. Hints of luster remain in the protected areas of the olive-gold surfaces. Scattered abrasions are as normal for the issue. Census: 23 in 55 (1 in 55+★), 37 finer (9/18). NGC ID# 25UR, PCGS# 8262

4071 **1860 AU50 PCGS.** The lustrous orange-gold surfaces of this impressive AU specimen are lightly abraded, aside from some roller marks through star 2 and some chatter in the left obverse field. Light wear shows on the design elements. Population: 12 in 50, 35 finer (9/18). NGC ID# 25VF, PCGS# 8284

4072 **1873 Open 3 MS62 NGC.** The 1873 half eagle is only moderately available in Mint State, regardless of the Open 3 or Closed 3 date type. This Open 3 coin is sharp and satiny with original honey-gold luster. Scattered abrasions limit the grade but they are light and unobtrusive. Census: 22 in 62, 11 finer (10/18). NGC ID# 25WK, PCGS# 8328

1875-CC Five Dollar, VF30
Original Example of This Low-Mintage Issue

4073 **1875-CC VF30 ANACS. Variety 2-C.** Only 11,828 pieces were produced of the 1875-CC five, and it remains scarce in spite of recent discoveries of mid-grade examples. Only 85-95 coins are believed extant in all grades. This piece shows even wear over the high points as well as in the fields. In spite of the even friction, there is just the slightest hint of mint luster that can still be seen surrounding the devices. Original surfaces with slight russet patina visible around the stars and dentils. NGC ID# CFHH, PCGS# 8337

4074 **1878 MS63 PCGS Secure.** The 1878 half eagle is scarce in MS63 and finer grades. This piece yields natural wheat-gold and peach-yellow hues with satiny luminance. Strike weakness on the hair curls around Liberty's face and the fletchings on the reverse is noted and is not unusual for the issue. Population: 34 in 63 (2 in 63+), 27 finer (9/18). NGC ID# 25X4, PCGS# 8345

4075 **1891-CC MS61 NGC. Variety 1-A.** The faint die crack through the left-side stars is an identifier for the Variety 1-A, one of only two marriages for this Carson City type issue. This well-struck yellow-gold example shows a dull line above the jaw but is otherwise only lightly abraded. Luster dominates the borders and devices. NGC ID# 25Y5, PCGS# 8378

1892-CC Five Dollar, MS62
Better Carson City Emission

4076 **1892-CC MS62 PCGS Secure. CAC.** The 1892-CC is the scarcest Carson City issue from its decade. PCGS has certified only one example in grades above MS63. The present orange-gold half eagle is well struck and displays the expected quantity of distributed small abrasions. Bright luster dominates the margins and motifs. Population: 44 in 62 (3 in 62+), 19 finer. CAC: 8 in 62, 6 finer (9/18). NGC ID# 25Y7, PCGS# 8380

4077 **1893-CC XF45 NGC. Variety 1-A.** The final Carson City five dollar issue is from a mintage of only 60,000 pieces. Three die pairs are known; 1-A and 2-A appear regularly while 1-B is an overlooked rarity. This Variety 1-A example is well defined and displays many pockets of bright luster. The straw-gold surfaces are smooth aside from unobtrusive vertical lines on the left portion of the portrait. NGC ID# 25YB, PCGS# 8384

1893-S Five Dollar, MS64+
Frosty Original Luster
Few Finer Pieces Are Known

4078 **1893-S MS64+ PCGS Secure. CAC.** The 1893-S half eagle is scarce in Choice condition, and finer representatives are decidedly rare. This Plus-graded, CAC-endorsed near-Gem displays sharp motifs and frosty original luster. Greenish-gold borders cede to warmer orange-gold interiors, and only the most trivial surface marks are visible on each side. Population: 44 in 64 (11 in 64+), 4 finer. CAC: 9 in 64, 2 finer (9/18). NGC ID# 25YD, PCGS# 8386

4079 **1894 MS64+ PCGS Secure. CAC.** Sharply detailed in most areas, this Plus-graded Choice specimen shows just a touch of softness on some of the stars. The pleasing orange-gold surfaces radiate vibrant mint luster, with outstanding eye appeal. Population: 75 in 64 (7 in 64+), 7 finer. CAC: 13 in 64, 3 finer (9/18). NGC ID# 25YE, PCGS# 8387

4080 **1899 MS65 NGC.** The 1899 Liberty half eagle is plentiful in MS65, but finer examples are scarce. This Gem displays a sharp strike and frosty orange-gold mint luster. A small coppery discoloration is visible near star 13. Housed in a prior generation holder. NGC ID# 25YS, PCGS# 8398

4081 **1903-S MS65 PCGS. CAC.** The 1903-S Liberty half eagle becomes elusive in grades above the MS65 level. This attractive Gem is sharply detailed in most areas, but some softness is evident on some star centers. The well-preserved antique-gold surfaces are lustrous and appealing. PCGS has graded 31 numerically finer examples (9/18). NGC ID# 25Z3, PCGS# 8408

INDIAN HALF EAGLES

1908 Indian Head Five, MS64+
Elusive CAC-Approved Coin

4082 **1908 MS64+ PCGS Secure. CAC.** The 1908 Indian half eagle was well-saved at the time of issue and is plentiful in Choice condition. However, Plus-graded and CAC-endorsed coins are scarce. This piece displays a bold strike and softly frosted luster. Original yellow-gold coloration is especially rich, promoting strong eye appeal for the grade. NGC ID# 28DE, PCGS# 8510

4083 **1908-D MS64 PCGS Secure.** The innovative Indian design was introduced in 1908. This impressive Choice example displays sharply detailed design elements and well-preserved orange and rose-gold surfaces with vibrant mint luster throughout. NGC ID# 93KW, PCGS# 8511

4084 **1910-D MS63 NGC.** Attractive, medium-gold color has a greenish tinge and the devices are sharply struck throughout this Select Uncirculated Indian five. A few small abrasions exist — one across the eyebrow, and a pair of short scrapes above the olive leaves and behind the eagle's neck — yet all other marks are minor. Bright golden luster glows throughout both sides with traces of "bag grime" confirming the original coloration. The D mintmark is open and sharp. NGC reports just 33 numerically finer coins (10/18). NGC ID# 28DL, PCGS# 8518

4085 **1911-S MS62 PCGS Secure.** Despite the large mintage of 1.4 million pieces, the 1911-S is a challenging issue in high grade. This attractive MS62 specimen offers lightly marked orange-gold surfaces, with sharply detailed design elements and vibrant mint luster throughout. NGC ID# 25ZM, PCGS# 8522

1912-S Half Eagle, MS62
Scarce in Mint Condition

4086 **1912-S MS62 NGC.** The 1912-S Indian half eagle comes from a moderate mintage of 392,000 pieces, but it is conditionally scarce. Mint State coins are elusive overall, and pieces grading finer than MS62 are borderline rare. This coin displays original wheat-gold luster with mottled olive toning on each side. Minor strike weakness on the lower headdress feathers is not immediately apparent. Census: 57 in 62, 22 finer (10/18). NGC ID# 65KD, PCGS# 8524

4087 **1914 MS63 NGC.** This is a well-struck example of the 1914 Indian half eagle, showing original honey-gold and peach-yellow coloration. Scattered abrasions define the MS63 grade but none are individually bothersome. NGC ID# 28DU, PCGS# 8527

4088 **1914 MS64 PCGS.** A deep orange-gold hue provides color to this near-Gem half eagle. Both sides show near-complete design detail. Frosted mint luster and minimal surface abrasions round out the appeal. The 1914 Indian half eagle becomes scarce any finer than MS64, putting greater demand on coins of this quality. PCGS shows 34 numerically higher submissions (10/18). NGC ID# 28DU, PCGS# 8527

4089 **1914-D MS63 PCGS.** An impressive Select specimen of this lower-mintage issue, with sharply detailed design elements and lightly marked orange-gold surfaces that radiate vibrant mint luster. Overall eye appeal is quite strong. NGC ID# 28DV, PCGS# 8528

4090 **1914-D MS63 NGC.** The 1914-D is the final half eagle struck at the Denver Mint, an important consideration for type purposes. This orange and rose-gold Select specimen offers well-detailed design elements and lustrous surfaces that show the expected number of minor scuffs and contact marks. NGC ID# 28DV, PCGS# 8528

1914-D Indian Five, MS64
Final D-Mint Half Eagle

4091 **1914-D MS64 NGC.** No half eagles were struck at the Denver Mint after 1914, making the 1914-D a popular choice of branch mint type collectors. This well-preserved Choice specimen displays pleasing yellow and rose-gold surfaces that radiate vibrant mint luster, with outstanding eye appeal. The design elements are sharply detailed throughout. NGC has graded 14 numerically finer examples (10/18). NGC ID# 28DV, PCGS# 8528

1914-S Half Eagle, MS61
CAC Endorsed, Nice Appeal

4092 **1914-S MS61 NGC. CAC.** Softly lustrous, well-defined surfaces display even shades of medium-gold color, delivering top-quality eye appeal for this conditionally scarce San Francisco half eagle. Although the grade suggests otherwise, the only apparent flaws are two ticks in front of the chin and a scrape between T and Y of LIBERTY, plus another through T and R of TRUST. CAC endorsement seldom accompanies the issue at this grade level. CAC: 15 in 61, 42 finer (10/18). NGC ID# 28DW, PCGS# 8529

4093 **1915 MS63 PCGS Secure. CAC.** Mint officials struck 588,000 half eagles in 1915, making this one of the most collectible issues in the series. Visual appeal for this Select Uncirculated example is terrific, with deep orange-gold color, vibrant mint luster, and strong definition all contributing. Marks are unobtrusive. NGC ID# 28DX, PCGS# 8530

1915 Half Eagle, MS64+
Scarce CAC-Approved Example

4094 **1915 MS64+ PCGS Secure. CAC.** Delicate rose and lilac hues are scattered throughout otherwise orange-gold surfaces on this high-end Choice 1915 half eagle. A small fraction of the pieces certified in MS64 are CAC endorsed, and higher-grade CAC coins are genuinely rare. This piece displays a sharp strike and remarkably clean surfaces. Eye appeal rivals that of many Gem examples. NGC ID# 28DX, PCGS# 8530

4095 **1915-S AU58 NGC. CAC.** From a mintage of 164,000 pieces, the 1915-S Indian half eagle is seldom encountered in high grade. This attractive near-Mint specimen shows just the slightest trace of wear on the well-detailed design elements and the pleasing yellow and orange-gold surfaces are lightly abraded throughout. A few hints of amber are evident in selected areas. NGC ID# 25ZR, PCGS# 8531

4096 **1916-S MS61 NGC.** The 1916-S is the final half eagle struck at San Francisco, and it is also the only issue produced this year of that denomination. The current Mint State example shows moderate abrasions and original straw-gold color with some olive overtones. Minor strike weakness occurs on the lower headdress feathers. NGC ID# 28DY, PCGS# 8532

4097 **1916-S MS61 PCGS Secure.** An impressive Mint State example of the last pre-war half eagle, with sharply detailed design elements and lustrous yellow-gold surfaces that are lightly marked for the grade. From a mintage of 240,000 pieces. NGC ID# 28DY, PCGS# 8532

4098 **1916-S MS62 NGC.** The 1916-S is the only issue struck in the three mints this year. It is moderately available in lower Uncirculated grades. The mint frost is remarkably thick and frosted, even though interrupted by a number of small to medium-sized abrasions. Well struck, except for the usual softness on the bottom feather of the headdress. NGC ID# 28DY, PCGS# 8532

LIBERTY EAGLES

1839/8 Ten Dollar
Large Letters, Head of 1838

4099 **1839/8 Large Letters PCGS Genuine.** The PCGS number ending in .95 suggests Scratched as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been scratched. Liberty's nose has an unobtrusive scrape, and a couple of straight hair-thin marks are noted near the left-side stars. A slightly granular ring outlines the portrait. The butter-gold surfaces are slightly subdued. The "covered ear" subtype with a curved neck truncation, in use only in 1838 and 1839.

4100 **1840 AU53 PCGS.** This early Liberty Head issue is a rarity in Mint State and scarce in the upper circulated grades. This About Uncirculated piece displays sharp detail and only light high-point wear. The bright brass-gold patina includes partial field luster, and no singular abrasions are visible. Population: 8 in 53, 20 finer (9/18). NGC ID# 262G, PCGS# 8581

4101 **1841 AU53 NGC.** The scarcity of the 1841 ten dollar in Mint State places increased demand on the scattered AU representatives. This piece displays medium yellow-gold patina, with hints of semiprooflike mirroring in the recesses. Well-struck with only trivial high-point wear. Census: 28 in 53, 70 finer (10/18). NGC ID# 262H, PCGS# 8582

4102 **1842 Large Date XF45 NGC.** This impressive Choice XF specimen shows light wear on the design elements and the lustrous orange-gold surfaces exhibit the expected number of minor contact marks and chatter for the grade. From a mintage of 81,507 pieces. NGC ID# 262M, PCGS# 8584

4103 **1843 AU50 NGC.** Some light wear shows on the high points of the well-detailed design elements of this impressive AU specimen and the pleasing orange-gold surfaces retain most of their original mint luster. Census: 20 in 50, 71 finer (10/18). NGC ID# 262P, PCGS# 8588

1843 Ten Dollar, AU55
A Rarity in Finer Condition

4104 **1843 AU55 NGC.** The 1843 Liberty eagle circulated extensively. Only a few Mint State pieces are known to survive and they are heavily abraded. Attractive AU coins are scarce. This Choice About Uncirculated example displays well-detailed devices and bright straw-gold coloration. Hints of luster remain in the protected areas. Both sides are heavily abraded, as expected for the issue and grade. Census: 32 in 55, 19 finer (9/18). NGC ID# 262P, PCGS# 8588

4105 **1846-O XF40 NGC. Variety 1.** The '46-O has a mintage of only 81,780 pieces, but four die marriages are known. Most survivors are Variety 3. The rare Variety 1 has a low date, and the mintmark is entered far right, over the space between TEN and D. This moderately circulated example exhibits original golden-red and apple-green surfaces. Abrasions are exceptionally minor for the XF40 level. NGC ID# 554J, PCGS# 8595

1851-O Ten Dollar, AU58
Glowing Luster, Bold Strike

4106 **1851-O AU58 NGC. Variety 2.** The date is positioned relatively close to the dentils. If not for incomplete star centers, this near-Mint New Orleans dollar would be considered fully struck. Detail on the portrait, eagle, and reverse legend is exceptionally strong for the facility, showing only a trace of friction. Mint luster glows from the design recesses, illuminating rich orange-gold surfaces that display fine hairlines on each side. NGC has graded 18 higher submissions (10/18). NGC ID# 263B, PCGS# 8607

4107 **1854-O Large Date — Rotated Dies — XF45 NGC. Variety 3.** The 1854-O Liberty ten is prohibitively rare in Mint State, but attractive XF coins such as the present are often available to collectors. This Choice XF coin displays smooth surfaces and olive-gold patina. The reverse is rotated about 45 degrees counterclockwise.

4108 **1854-S — Filed Rims — PCGS Genuine. AU Details.** A first-year San Francisco ten that shows light wear on the hair above the ear. Luster beckons from the borders. The straw-gold surfaces are subdued but lack distracting marks. The obverse rim is lightly filed between 9 and 5 o'clock.

1854-S Ten Dollar, AU55
CAC Approval, Inaugural California Issue

4109 1854-S AU55 PCGS. CAC. The San Francisco Mint opened in 1854 to satisfy the needs of the Gold Rush economy in California. The facility coined 123,826 ten dollar gold pieces that year. Most of them circulated heavily and few survive in high grades. This Choice AU eagle is partly lustrous with rich orange-gold color. Strike detail is good. Small marks do not distract, and the only abrasion of note appears in the upper obverse field. Population: 30 in 55, 31 finer. CAC: 11 in 55, 11 finer (10/18). NGC ID# 263K, PCGS# 8615

4110 1855 AU58 NGC. The 1855 eagle is scarce in Uncirculated grades, but this near-Mint coin remains accessible for collectors. Luster shimmers in the protected areas of the fields, and the central devices are sharp. Some weakness is visible on the border stars as usual. Only light surface chatter is apparent. NGC ID# 263L, PCGS# 8616

4111 1856 AU55 PCGS. The 1856 Liberty ten is a rarity in Uncirculated condition but occasionally available in AU grades. This Choice About Uncirculated example displays sharp devices and bright yellow-gold surfaces. The border stars are weakly struck, but little wear is present. Population: 32 in 55, 52 finer (9/18). NGC ID# 263P, PCGS# 8619

4112 1856-S AU55 NGC. Medium S mintmark. Frequent small abrasions accompany the straw-gold surfaces, but bright mint luster remains at the margins. A small obverse rim nick is noted at 4 o'clock. The mintage of 68,000 pieces makes this issue scarce yet collectible. NGC has only certified four examples as Mint State, the finest as MS61+. NGC ID# 263S, PCGS# 8621

4113 1859 XF40 PCGS. The stars are flatly struck, but the central devices have pleasing detail. The surfaces have many trivial abrasions, none of which merit an individual mention. Ample reddish-gold luster resides in protected areas, with the worn areas showing natural olive patina. Only 16,013 pieces were struck. Population: 21 in 40, 69 finer (9/18). NGC ID# 263Z, PCGS# 8628

4114 1860-O — Countermarked, Cleaned — ANACS. AU Details, Net XF40. As the final O-mint eagle delivery before the Civil War, the 1860-O is a low-mintage issue (just 11,100 pieces struck) with an extant population of only a few hundred coins. This example presents well despite a light cleaning. Both sides are medium orange-gold in color, and the devices retain AU sharpness over the central features. The reverse field above the eagle's head shows a tiny "W", making this coin one of the rare gold pieces of any denomination to display a countermark. The issuer or purpose of this exact mark are unknown.
Ex: FUN Signature (Heritage, 1/2001), lot 8279.

4115 1870-S — Cleaned — PCGS Genuine. XF Details. Like most other ten dollar issues struck at the first San Francisco Mint, the 1870-S is rare. PCGS estimates that only 80 to 100 survivors remain from the low mintage of 8,000 pieces. This lightly worn pumpkin-gold example is made affordable by an ill-advised cleaning. The surfaces are moderately bright and glossy, and the reverse field is hairlined near the eagle's neck.

1874-S Ten Dollar, XF45
Choice Original Color

4116 1874-S XF45 PCGS. A Choice XF representative, this coin displays rich, green-gold toning, some traces of luster, and no detracting marks. Like other San Francisco eagle issues between 1857 and 1878, the 1874-S is a low-mintage date and usually encountered with substantial wear. None have been certified as Mint State by either leading service. Only 10,000 pieces were struck. Population: 25 in 45, 27 finer (9/18).
Ex: FUN Signature (Heritage, 1/2009), lot 5565. NGC ID# 2659, PCGS# 8671

4117 1877-S AU50 NGC. From a small mintage of 17,000 pieces, this impressive AU specimen exhibits some light wear on the design elements and the pumpkin gold surfaces are lightly abraded. Census: 17 in 50, 75 finer (10/18). NGC ID# 265H, PCGS# 8679

4118 1879-S MS62 ★ NGC. High mintmark. The (10/18) NGC Census records only two 1879-S tens with a star designation. The present butter-gold example earns its star with semiprooflike fields, an intricate strike, and fewer marks than is customary for the MS62 level. NGC ID# 265R, PCGS# 8686

4119 1880-S MS63 PCGS. Breen-7000. Tall S. The 1880-S can be found without difficulty in AU55 to MS62, but MS63 examples are very scarce, and none are certified by PCGS above MS64. This crisply struck and lustrous almond-gold Liberty ten offers uncommonly unmarked fields, though minor facial abrasions determine the grade. NGC ID# 265V, PCGS# 8690

4120 1881 MS64 PCGS. A lovely Choice Mint State example, this 1881 eagle has light yellow-gold surfaces and minimal marks. Vibrant mint luster adds to the considerable eye appeal. A condition rarity at this grade level. Population: 39 in 64 (6 in 64+), 1 finer (9/18). NGC ID# 265W, PCGS# 8691

4121 1883 MS63 PCGS. CAC. The 1883 Liberty eagle is scarce in MS63 condition, and finer coins are rare. This attractive Select specimen exhibits sharply detailed design elements and the lustrous orange-gold surfaces show the expected number of minor contact marks for the grade. PCGS has graded four numerically finer examples (9/18). NGC ID# 2666, PCGS# 8699

4122 1888 MS62 NGC. An impressive MS62 Liberty eagle, from a mintage of 132,996 pieces, this coin exhibits well-detailed design elements and lustrous orange and rose-gold surfaces that show the expected number of minor contact marks for the grade. Census: 47 in 62, 4 finer (10/18). NGC ID# 266V, PCGS# 8712

4123 1890 MS61 Prooflike NGC. The 1890 ten dollar gold mintage was sparse, with just 57,900 pieces struck for circulation. Prooflike examples are rare, and those that exist are always heavily abraded. This piece shows moderate field chatter but the requisite prooflike surface remains intact. Gleaming orange-gold color adds to the appeal. Census: 3 in 61 Prooflike, 0 finer (10/18). NGC ID# 266R, PCGS# 78717

1891-CC Ten Dollar, MS62
Popular Type Coin

4124 **1891-CC MS62 PCGS Secure. Variety 1-A.** The second C in the mintmark is under the feathertip. Production of eagles (and half eagles) at the Carson City Mint ramped up significantly in 1891, resulting in a mintage of 103,732 ten dollar gold pieces. This lovely type coin has deep orange-gold surfaces that retain vibrant mint frost around the peripheries. Strongly struck throughout. NGC ID# 266U, PCGS# 8720

4125 **1891-CC/CC FS-501 MS61 PCGS. Variety 4-C.** Douglas Winter is credited as discoverer of the repunched mintmark 1891-CC ten, while cataloging lot 1731 of Steve Ivy's June 1982 Phoenix Sale. The present lemon and orange-gold Carson City type coin is sharply struck and exhibits bright luster. The obverse field exhibits the expected number of moderate marks. NGC ID# 266U, PCGS# 145728 Base PCGS# 8720

1892-CC Ten Dollar, Near-Mint
Scarce Carson City Issue

4126 **1892-CC Tripled Die Reverse, FS-801, AU58 NGC. Variety 1-A.** Luster brightens the borders of this Borderline Uncirculated Carson City ten. The apricot-gold surfaces display clash marks but the only mentionable abrasions are near the bottom of the hairbun. From a mintage of just 40,000 pieces, the '92-CC is scarcer than its '91-CC predecessor. As always for the issue, IN GOD WE TRUST is die tripled, and STATES OF is nicely doubled. NGC ID# 266W, PCGS# 511600 Base PCGS# 8722

4127 **1893 MS64+ PCGS Secure. CAC.** Ex: Fairmont Collection. This Plus-graded Choice specimen is sharply struck on the centers, but a touch of softness is evident on the stars. The lightly marked orange-gold surfaces radiate vibrant mint luster and overall eye appeal is quite strong. PCGS has graded only seven numerically finer examples (9/18). NGC ID# 266Z, PCGS# 8725

4128 **1893 MS62 Prooflike NGC. CAC.** The 1.8 million-piece mintage of ten dollar gold pieces makes the 1893 issue one of the readily available eagles from the 1890s. Prooflike examples form only a tiny cadre among the overall Mint State population. This sharply struck example is minimally abraded for a Prooflike Liberty ten. Much of the mirrored finish survives. CAC endorsement is an important indication of the coin's quality. Census: 80 in 62 (1 in 62+ Prooflike, 1 in 62 ★), 30 finer (10/18). NGC ID# 266Z, PCGS# 78725

4129 **1894 MS64+ PCGS Secure.** With a single Gem finer at PCGS and only 14 comparable coins at the MS64+ level, this high-end Choice representative has a strong claim to being one of the finest 1894 eagles extant (9/18). Orange-gold surfaces are thickly frosted and show a handful of thin grazes but not much else. Well-struck from heavily cracked dies. NGC ID# 2675, PCGS# 8729

4130 **1895 MS61 Prooflike NGC.** Rarely is the 1895 Liberty eagle offered with such dramatic Prooflike contrast. This reflective orange-gold representative was surely one of the first examples struck from a fresh set of dies. As such, the devices are unsurprisingly sharp. Myriad marks scattered over each side hinder the technical grade. A significant lint mark occurs near (STATE)S. Census: 15 in 61 Prooflike, 11 finer (9/18). NGC ID# 2678, PCGS# 78732

4131 **1895-O MS62 PCGS Secure. CAC. Variety 1.** From a mintage of only 98,000 pieces, the 1895-O is collectible in Mint State but Select examples are rare, likely due to indifferent storage as bullion reserves in foreign banks. But the present coin has surprisingly few abrasions, and the caramel-gold surfaces teem with luster. CAC: 24 in 62, 6 finer (9/18). NGC ID# 2679, PCGS# 8733

4132 **1901-S MS65+ PCGS Secure.** Like it's half eagle cousin, the 1901-S Liberty Head ten dollar proves widely collectible through Gem condition. Finer coins are scarce. The devices are strongly rendered over scintillating peach-gold surfaces. A planchet flake right of star 6 and a tick below star 8 identify this frosty type coin. NGC ID# 267S, PCGS# 8749

1901-S Liberty Eagle, MS66
Exceptional Type Coin

4133 **1901-S MS66 PCGS.** From a substantial mintage of 2.8 million pieces, the 1901-S ten dollar Liberty can be located in MS66 condition with a little patience, but finer coins are condition rarities. This sharply detailed Premium Gem offers well-preserved orange-gold surfaces that radiate vibrant mint luster on both sides. The eye appeal is terrific. PCGS has graded only two numerically finer examples (9/18). NGC ID# 267S, PCGS# 8749

4134 **1902-S MS64+ PCGS Secure.** The 1902-S is usually available in mint condition, but most examples lack the extraordinary eye appeal seen on this piece. What sets this coin apart are the untampered, original surfaces. This is most easily seen by the subtle gradations of color, light reddish-gold in the centers surrounded by pale lime-green around the margins. Fully struck throughout. Radiant mint luster. NGC ID# 267U, PCGS# 8751

4135 **1903 MS64+ PCGS Secure. CAC.** A Plus-graded Choice example of this popular issue, with sharply detailed design elements and vibrant mint luster on both sides. The pleasing orange-gold surfaces are well-preserved and appealing. Population: 53 in 64 (5 in 64+), 10 finer. CAC: 7 in 64, 3 finer (9/18). NGC ID# 267V, PCGS# 8752

4136 **1904 MS63 NGC.** A pleasing Select Mint State Liberty ten, this example has scattered grade-consistent marks with above average design definition on its straw-gold surfaces. NGC has certified only 42 numerically finer examples (10/18). NGC ID# 267Y, PCGS# 8755

4137 **1906-O MS61 NGC. Variety 1.** The final New Orleans ten dollar issue has a fairly low mintage of 86,895 pieces. Most survivors are repatriated from foreign bank holdings, and in AU55 to MS63 grades. This sun-gold example is well struck and has minimally marked fields. A scuff on Liberty's jaw denies a higher assessment. NGC ID# 53FB, PCGS# 8761

4138 **1907 MS64+ PCGS Secure. CAC.** A Plus-graded Choice specimen from the final year of the Liberty design, this coin exhibits sharply detailed design elements and well-preserved orange-gold surfaces with vibrant mint luster throughout. PCGS has graded 40 numerically finer examples (9/18). NGC ID# 2688, PCGS# 8763

INDIAN EAGLES

4139 **1907 No Motto MS63 NGC.** Strike definition tends to plague the first-year No Motto eagle, designed by acclaimed sculptor Augustus Saint-Gaudens. This Select orange and khaki-gold representative is typically struck. Softly frosted mint luster and small abrasions are apparent on each side. NGC ID# 28GF, PCGS# 8852

4140 **1908 No Motto MS62 PCGS.** Softly frosted straw-gold luster is original on this Uncirculated No Motto type coin, illuminating well-struck design elements. Scattered abrasions limit the grade but none are individually bothersome. The 1908 No Motto issue comes from a low mintage of 33,500 coins, one of the smallest production totals in the series. NGC ID# 28GG, PCGS# 8853

4141 **1908-D No Motto MS62 NGC.** From a mintage of 210,000 pieces, this 1908-D Indian eagle represents the final year of the short-lived No Motto design. This attractive MS62 specimen exhibits well-detailed design elements, with just a touch of the usual softness on Liberty's hair. The lustrous orange-gold surfaces are lightly marked for the grade. NGC ID# 28GH, PCGS# 8854

4142 **1908 Motto MS64 PCGS Secure. CAC.** An attractive Choice specimen from the first year of the Motto design, this coin exhibits sharply detailed design elements and well-preserved orange-gold surfaces with vibrant mint luster on both sides. Overall eye appeal is outstanding. NGC ID# 28GJ, PCGS# 8859

4143 **1908-D Motto MS62 PCGS Secure.** Frosty original luster engulfs this Mint State 1908-D With Motto ten in warm honey-gold hues. The strike is sharp, and grade-limiting abrasions are light and unobtrusive. Eye appeal exceeds expectations for the grade. NGC ID# 28GK, PCGS# 8860

1909 Indian Eagle, MS64
Elusive Issue in High Grade

4144 **1909 MS64 PCGS Secure.** From a mintage of 184,700 pieces, the 1909 Indian eagle is a scarce issue in MS64 condition, and finer coins are rare. This attractive Choice specimen exhibits sharply detailed design elements and lustrous orange-gold surfaces, with vibrant mint luster on both sides. Eye appeal is outstanding. PCGS has graded 31 numerically finer examples (9/18). NGC ID# 28GM, PCGS# 8862

4145 **1909-D MS62 PCGS.** An attractive MS62 example from a mintage of 121,540 pieces, this coin exhibits well-detailed design elements, with just a touch of softness on the hair at the brow and the eagle's shoulder. The lightly marked orange-gold surfaces are lustrous and appealing. NGC ID# 28GN, PCGS# 8863

4146 **1909-S MS61 PCGS.** Dark patina appears on the high points of this pinkish-gold Indian eagle. Both sides are highly lustrous with scattered marks that are expected at this grade level. NGC ID# 28GP, PCGS# 8864

4147 **1909-S MS62 PCGS.** The mintmark is lightly repunched, a different variety than Breen-7108. A lustrous green-gold representative. The strike is good, and although minor marks are distributed, none are singularly significant. The 1909-S emerges as a better date in Mint State grades. NGC ID# 28GP, PCGS# 8864

4148 **1910 MS64 PCGS Secure.** Radiant cartwheel luster engulfs this near-Gem with rich orange-gold and greenish hues, producing impressive eye appeal. Abrasions are trivial at best, and the design elements are sharp. NGC ID# 28GR, PCGS# 8865

4149 **1910-S MS62 PCGS. Breen-7114.** The mintmark is repunched, with a narrow curve from a former punch evident near the upper left portion of the S. Breen called the variety "extremely rare," but a number have since been identified. This lustrous peach-gold representative shows inexactness of strike on the date, but marks are incidental for the third-party grade. NGC ID# 268D, PCGS# 8867

4150 **1911 MS64 PCGS.** A pleasing ten dollar Indian, this Choice Mint State example has frosty and brightly lustrous yellow-gold surfaces with the trivial marks that are expected for the grade. NGC ID# 28GT, PCGS# 8868

4151 **1911 MS64 PCGS.** Fine-grained surfaces are characteristic of 1911 tens, and function as a useful means of capturing and intensifying the mint luster as it encounters the many microscopic facets that occupy the fields. This is a Choice orange-gold example, with sharply struck stars and central motifs. A few light grazes and tiny marks do not inhibit the strong eye appeal. NGC ID# 28GT, PCGS# 8868

4152 **1911 MS64+ NGC.** The strike is needle-sharp on this high-end, near-Gem 1911 ten. The upper bonnet seems to have an extra dimension and the eagle's shoulder is sharply defined, amplified by lively mint luster that radiates from the central elements. Rose and lilac accents embellish medium-gold coloration that flows across finely granular surfaces so typical of the 1911. An extremely Choice coin for the grade with no marks to mention and outstanding visual impact. NGC ID# 28GT, PCGS# 8868

4153 **1913-S AU58 NGC.** A lustrous near-Mint example of this better San Francisco issue, coming from a mintage of only 66,000 pieces. The strike is sharp and just a brush of friction is evident over the high points of the devices. No significant abrasions are seen. NGC ID# 28GZ, PCGS# 8874

4154 **1914 MS63 PCGS.** A sharp strike and vibrant yellow-gold mint luster characterize this Select Uncirculated 1914 eagle. Scattered light abrasions are not out of line for the grade. This is a better date in finer grades. NGC ID# 28H2, PCGS# 8875

4155 **1914 MS63 PCGS.** This impressive Select specimen exhibits a number of scattered, grade-consistent contact marks on the bright, lustrous orange-gold surfaces. The design elements are well-detailed and the eye appeal is quite strong for the grade. NGC ID# 28H2, PCGS# 8875

1914-S Ten Dollar, MS63
Better San Francisco Issue

4156 **1914-S MS63 PCGS Secure.** The 1914-S is a better date in Uncirculated condition, and it is especially scarce finer than MS63. This collectible Select example displays satiny yellow-gold luster and sharp design elements. Scattered abrasions limit the grade, but a vibrant cartwheel effect is the chief visual attribute. Eye appeal is pleasing for the MS63 level. NGC ID# 28H4, PCGS# 8877

4157 **1932 MS64 PCGS.** The 1932 Indian eagle is popular for type purposes, being plentiful and often eye-appealing. This near-Gem is indeed frosty and well-struck. Original honey-gold surfaces have minimal abrasions. The right-hand margin on each side exhibits deep, coppery discoloration. NGC ID# 28HB, PCGS# 8884

4158 **1932 MS64 PCGS.** Delicate rose and greenish tints appear in the centers of this otherwise yellow-gold near-Gem. The strike is sharp and only light surface grazes are seen. The lower and right-hand border on each side displays amber-red discolorations, which attest to the originality of the surfaces. NGC ID# 28HB, PCGS# 8884

4159 **1932 MS64 NGC. CAC.** A pumpkin-gold beauty with exceptional eye appeal for its conservatively assessed third-party grade. The strike is bold, and careful inspection reveals only incidental contact. Certified in a prior-generation holder. NGC ID# 28HB, PCGS# 8884

1932 Ten Dollar, Gleaming Gem

4160 **1932 MS65 NGC.** With a production total approaching 4.5 million coins, the 1932 is the premier type coin issue in Augustus Saint-Gaudens' ten dollar gold series. Gleaming mint frost rolls over the well-preserved and strongly detailed yellow-gold surfaces of this Gem. Trivial field grazes are unimportant. Elusive any finer. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

1850 Double Eagle, AU53
First Year of the Denomination

4161 **1850 AU53 NGC.** The first double eagles issued for circulation were struck at Philadelphia and New Orleans in 1850. The denomination was created as a direct response to the massive quantities of gold mined in California. This example has scattered marks, but none that stand out, and it exhibits a trace of luster over the greenish-gold surfaces. NGC ID# 268F, PCGS# 8902

4162 **1851 — Cleaned — PCGS Genuine. UNC Details.** Careful rotation beneath a light reveals faint hairlines, but this almond-gold double eagle is without any mentionable marks. Luster illuminates the stars, eagle, rays, legends, and curls. The reverse shows heavy cracks between MERIC and beneath the D in the denomination.

1852 Liberty Twenty, AU58
Lustrous, Colorful Example

4163 **1852 AU58 NGC.** Despite the large mintage of more than 2 million pieces, the 1852 Liberty double eagle is a scarce issue in all Mint State grades. This attractive near-Mint specimen exhibits just a trace of wear on the strongly impressed design elements and the lightly abraded greenish-gold surfaces retain much of their original mint luster. NGC ID# 268K, PCGS# 8906

1852-O Liberty Double Eagle, XF40
Popular Branch Mint Type Issue

4164 **1852-O XF40 PCGS. Variety 1.** The 1852-O Liberty double eagle is among the few readily collectible New Orleans Mint twenties, thanks to its substantial mintage of 190,000 pieces. This attractive XF specimen shows only light wear on the design elements, with a bold LIBERTY still evident. The pleasing yellow and orange-gold surfaces are lightly abraded, and show a few traces of original mint luster. NGC ID# 268L, PCGS# 8907

4165 **1855 XF45 PCGS Secure.** Original olive-gold surfaces show hints of orange-gold luster in the protected regions. The coin is well-detailed and relatively smooth, exhibiting no distracting marks. The reverse is rotated a trifle counterclockwise. Some deep coppery color is seen in the recesses of the portrait. NGC ID# 268V, PCGS# 8914

4166 **1856-S XF40 NGC.** Some light-to-moderate wear shows on the design elements of this impressive Type One double eagle, and a number of minor abrasions are evident on the lustrous orange-gold surfaces. The overall presentation is most acceptable. NGC ID# 2692, PCGS# 8919

1856-S Double Eagle, AU55
Variety-17L, CAC Endorsed

4167 **1856-S AU55 PCGS. CAC. Variety-17L.** Ex: *S.S. Central America*, SSCA 5839. No Serif, Tilted S. Vibrant yellow-gold luster adorns this Choice AU *S.S. Central America* coin, illuminating bold design elements that show only trivial high-point friction. Light scuffs on the obverse accompany the grade, but no significant abrasions are visible. Eye appeal is outstanding. Includes certificate of authenticity and faux-book case. NGC ID# 2692, PCGS# 8919

1856-S Double Eagle, AU58
Significant Luster Remains

4168 **1856-S AU58 PCGS Secure.** A brush of high-point friction on the devices prevents a Mint State designation, but this high-end AU coin is nonetheless vibrantly lustrous and sharply detailed. Each side has bright yellow-gold color. The 1856-S was well-represented among the coins recovered from the *S.S. Central America* — more than 1,000 pieces were discovered. The new availability of this issue makes it a popular No Motto type coin. NGC ID# 2692, PCGS# 8919

4169 **1858 XF45 NGC.** This 1858 double eagle displays uncommonly sharp detail for the XF grade level, and satiny luster remains in the fields. Both sides are bright yellow-gold with scattered abrasions. This is a slightly better date among Philadelphia Type One issues, rarely offered in Mint State but collectible in XF45. NGC ID# 2697, PCGS# 8923

1858 Double Eagle, AU53
Hint of Semiprooflikeness

4170 **1858 AU53 NGC.** The 1858 is elusive in About Uncirculated condition and becomes scarce-to-rare in Mint State. Slight softness on the curls is normal for the issue and especially for a coin that has seen moderate circulation. The rest of the design is well brought-up. Red-gold surfaces exhibit a trace of semiprooflikeness in the fields. Myriad abrasions are scattered over each side. NGC ID# 2697, PCGS# 8923

1859-S Twenty Dollar Liberty, AU55
Choice Type One Example

4171 **1859-S AU55 NGC.** Both the 1859 Philadelphia and 1859-O double eagle mintages were low, making the 1859-S the logical selection for date collectors. Remaining mint luster forms a wide band around each individual obverse star, and bathes the recesses of the devices. This is a lightly circulated but problem-free example of this conditionally scarce issue, which saw fewer than 70 recoveries from the *S.S. Republic* shipwreck.
Ex: Long Beach Signature (Heritage, 2/2007), lot 4902. NGC ID# 269C, PCGS# 8928

4172 **1860 XF45 NGC.** This Choice XF Type One double eagle exhibits some light wear on the high points of the design elements, like the coronet and hair above the brow. The orange-gold surfaces are lightly abraded and retain traces of original mint luster. NGC ID# 269D, PCGS# 8929

1860 Liberty Double Eagle, AU58
Elusive Issue Any Finer

4173 **1860 AU58 NGC.** From a relatively small Philadelphia mintage of 577,670 pieces, the 1860 Liberty double eagle is a scarce issue in Mint State condition. This attractive near-Mint specimen displays lightly abraded yellow and orange-gold surfaces that retain traces of original mint luster on both sides. The design elements exhibit just a trace of high-point wear. NGC has graded 58 numerically finer examples (10/18). NGC ID# 269D, PCGS# 8929

4174 **1861 XF40 PCGS.** Rich pumpkin-gold and lime-green toning aids the eye appeal of this moderately worn Civil War double eagle. The surfaces are much less marked than anticipated for the grade and denomination. Certified in a green-label holder. NGC ID# 269G, PCGS# 8932

4175 **1861 AU55 NGC.** The 1861 Liberty double eagle is an available Type One issue that enjoys great popularity with type collectors. This Choice AU example shows a touch of wear on the coronet, and other high points of the design, but the lightly abraded orange-gold surfaces retain a few traces of original mint luster. NGC ID# 269G, PCGS# 8932

4176 **1861-S VF35 NGC.** A Choice VF specimen of this popular Type One double eagle issue, with moderate wear on the design elements, but LIBERTY still bold, and pleasing orange-gold surfaces that are lightly abraded for the grade. NGC ID# 269K, PCGS# 8935

4177 **1861-S XF40 NGC.** Medium S. Large quantities of double eagles were struck on both coasts in 1861. The San Francisco Mint accomplished a production of 768,000 twenty dollar gold coins that year. This partly lustrous yellow-gold example spent some time in circulation, but it maintains good detail. High-point rub and scattered marks are expected. NGC ID# 269K, PCGS# 8935

4178 **1861-S XF45 NGC.** While the 1861 Philadelphia issue is a common date, the 1861-S double eagle is conditionally rare in Mint State. This collector-grade Choice XF example retains some luster in the fields and has only light wear. The natural olive- and orange-gold surfaces exhibit some distracting abrasions, although such are expected on circulated Type One double eagles. NGC ID# 269K, PCGS# 8935

4179 **1862-S XF40 PCGS. Gold CAC.** A dusky and original peach-gold example of the Civil War San Francisco issue. A few moderate marks emerge upon thorough evaluation, but protected regions teem with luster. CAC has awarded a gold seal to only two 1862-S double eagles, both certified as XF40 (10/18). NGC ID# 269N, PCGS# 8938

4180 **1862-S — Cleaned — NGC Details. AU.** A slightly glossy but nonetheless attractive butter-gold example of the conditionally challenging Type Two Civil War issue. The Breen-7214 repunched date variety, though in the present late die state repunching is only faintly evident inside the upper portion of the upper loop of the 8. The fields near the rims exhibit an orange-peel texture, as coined from long-in-use dies. NGC ID# 269N, PCGS# 8938

4181 **1863-S VF35 NGC. CAC. Breen-7216.** Medium S. An orange-gold Choice VF Type One twenty. Luster emerges from the wings near the shield. Lightly abraded given its West Coast circulation, aside from ticks near obverse star 7 and a slender mark above the D in the denomination. NGC ID# 269R, PCGS# 8940

1865 Liberty Twenty, AU55
Final P-Mint Type One Issue

4182 **1865 AU55 PCGS.** Bowers Variety 2 with misplaced date digits in the dentils. From a mintage of 351,200 pieces, the 1865 Liberty twenty is always in demand as the final Type One double eagle from the Philadelphia Mint. This attractive Choice AU specimen exhibits just a trace of wear on the coronet and Liberty's hair, and the lightly abraded orange-gold surfaces retain most of their original mint luster. NGC ID# 269U, PCGS# 8943

1867 Liberty Twenty, AU55
Rich Color, Abundant Luster Remains

4183 **1867 AU55 NGC.** Striking sun-gold color and uncommonly vibrant luster are exceptional for an About Uncirculated coin. Modest abrasions at and around the portrait contribute to the grade, yet this is a supremely attractive and well-struck Choice representative of a Type Two twenty.
Ex: FUN Signature (Heritage, 1/2009), lot 5715. NGC ID# 269Z, PCGS# 8951

4184 **1868-S AU53 PCGS.** This attractive AU53 specimen exhibits some light wear on the design elements, which are sharply struck in most areas, but show a little weakness on the obverse stars. The lustrous orange-gold surfaces are lightly abraded. NGC ID# 26A4, PCGS# 8954

4185 **1869-S AU50 NGC.** The olive-gold surfaces of this About Uncirculated coin display excellent detail and relatively few noticeable abrasions. Studying the luster under a loupe, it is noted that the margins have a faintly granular texture. Wear is light and eye appeal is pleasing. NGC ID# 26A6, PCGS# 8956

4186 **1869-S AU53 PCGS.** From a mintage of 686,750 pieces, this attractive AU53 specimen displays lightly abraded orange-gold surfaces that retain much of their original mint luster. The well-detailed design elements show only light wear. NGC ID# 26A6, PCGS# 8956

4187 **1869-S AU53 PCGS.** An attractive AU53 specimen that shows just a touch of wear on the well-detailed design elements, which were sharply struck in most areas but exhibit some flatness on the obverse stars. The lightly abraded orange-gold surfaces are still lustrous and appealing. NGC ID# 26A6, PCGS# 8956

4188 **1869-S AU53 PCGS.** An impressive AU53 example of this popular branch mint issue, with some light wear on the high points of the design elements and still-lustrous orange-gold surfaces that show the expected amount of chatter and minor abrasions for the grade. NGC ID# 26A6, PCGS# 8956

4189 **1869-S AU55 PCGS.** An impressive Choice AU representative of this popular Type Two issue, with well-detailed design elements that show some light wear on the high points. The lustrous orange-gold surfaces exhibit some minor chatter in the fields and a few abrasions on Liberty's cheek. NGC ID# 26A6, PCGS# 8956

4190 **1869-S AU55 PCGS.** A Choice AU Type Two double eagle with lightly abraded orange-gold surfaces, suggestive of a higher grade. The well-detailed design elements show just a touch of wear on the high points and much original mint luster remains intact. NGC ID# 26A6, PCGS# 8956

4191 **1869-S AU55 PCGS.** Only light wear shows on the well-detailed design elements of this impressive Choice AU specimen, with lustrous orange-gold surfaces that show the expected number of minor abrasions for the grade. NGC ID# 26A6, PCGS# 8956

1869-S Twenty Dollar, AU58+
Elusive CAC Coin

4192 **1869-S AU58+ PCGS Secure. CAC.** Frosty yellow-gold luster remains in the fields on this Plus-graded near-Mint coin, showing eye appeal worthy of a CAC endorsement. The strike is sharp and scattered abrasions are light and unobtrusive. This San Francisco issue is relatively plentiful in AU grades, but Mint State coins are scarce. CAC-approved coins are rare in AU58 and even rarer in higher grades. CAC: 54 in 58, 15 finer (9/18). NGC ID# 26A6, PCGS# 8956

4193 **1870-S AU55 NGC.** Small Squat S. The mintage for the 1870-S double eagle approaches 1 million coins, but survivors are relatively scarce in high grades. Most of the star radials are clear and the feathers are well-defined, although Liberty's portrait is soft. Reddish-gold surfaces are original and show myriad tiny abrasions. NGC ID# 26A9, PCGS# 8959

1873-CC Twenty Dollar, VF30
Elusive Carson City Issue

4194 **1873-CC VF30 PCGS. Variety 2-B.** A misplaced digit appears in the dentils below 73, and the second C in the mintmark is halfway over the T in TWENTY. The 1873-CC double eagle is more elusive than later Carson City issues from 1874 through 1877. Only 22,410 coins were struck. This circulated orange-gold survivor maintains full star radials. Detail is relatively strong on the curls and feathers. Minimally marked. NGC ID# 26AJ, PCGS# 8968

4195 **1873-S Open 3 AU58 PCGS.** While the Open 3 1873-S twenty is slightly more available than its Close 3 counterpart in better grades, each variety is elusive in its own right. This shining near-Mint coin is rich reddish-gold with just a touch of friction across the well-struck devices. Light, scattered abrasions and a few more significant marks are noted on each side.
Ex: ANA Signature (Heritage, 7-8/2008), lot 3317, where it realized $3,220. NGC ID# 26AM, PCGS# 8979

1874 Twenty Dollar, MS61+
One of Two Plus-Graded Coins at NGC

4196 **1874 MS61+ NGC.** A number of Uncirculated 1874 double eagles are known, but few grade finer than MS61. This is one of two Plus-graded coins at NGC in this grade (10/18). A hint of reflectivity in the fields and sharp design elements contribute to the high-end appeal, and the straw-gold coloration is original. Moderate abrasions are mainly on the obverse, including a singular mark on Liberty's cheek beneath the eye. NGC lists 24 higher-grade representatives (10/18). NGC ID# 26AN, PCGS# 8970

4197 **1874-S MS61 NGC.** This Uncirculated Type Two Liberty twenty showcases radiant cartwheel luster and original honey-gold coloration. The strike is sharp and the dies are not lapped. Scattered abrasions on the obverse limit the grade but are surprisingly unobtrusive amid the radiant luster. NGC ID# 26AR, PCGS# 8972

4198 **1875 MS61 PCGS.** An attractive coin, with substantial luster and well struck. A touch of rose toning is seen in the fields, and scattered handling marks are consistent with the grade. NGC ID# 2547, PCGS# 8973

4199 **1875 MS62+ PCGS Secure. CAC.** An impressive Plus-graded MS62 specimen of this popular Type Two issue, with sharply detailed design elements and lustrous orange-gold surfaces that show the minimum number of minor contact marks for the grade. NGC ID# 2547, PCGS# 8973

1875-CC Twenty, AU53
Partial Mint Luster Still Present

4200 **1875-CC AU53 PCGS Secure. Variety 5-A.** This popular Type Two Carson City twenty shows bright surfaces overall with significant luster still visible around the devices. A hefty mintage (by CC standards) of 111,151 pieces were produced and today numerous examples of the 1875-CC are available, even in AU and Uncirculated grades. NGC ID# 26AT, PCGS# 8974

4201 **1875-S MS61 NGC.** Shimmering rose-gold luster is frosty and luminous on this Mint State 1875-S double eagle. The coin is sharp and its eye appeal exceeds expectations for the grade. A good balance of quality and price for the type collector seeking a Mint State Type Two double eagle. NGC ID# 26AU, PCGS# 8975

4202 **1876 MS61 NGC.** Scattered abrasions prevent a finer numeric grade on this Uncirculated 1876 double eagle, although the blazing cartwheel luster and its lovely rose-gold hues are overpowering. The strike is sharp and the dies are unlapped. From the final year of the Type Two design, showing the denomination abbreviated TWENTY D. NGC ID# 26AV, PCGS# 8976

1876-CC Twenty Dollar, XF40
Partly Reflective Carson City Type Coin

4203 **1876-CC XF40 NGC. Variety 4-A.** A network of die lines in the recesses of Liberty's lower hair curls helps to identify this variety. As a date, the 1876-CC double eagle is available among Carson City issues, ideal for collectors seeking a single type coin from this mint. There is a small rim nick on the obverse at 7 o'clock, but other abrasions are trivial. Prooflike mirroring remains in the fields despite light wear and chatter on each side. Eye appeal is outstanding. NGC ID# 26AW, PCGS# 8977

1876-CC Double Eagle, XF45
Popular Type Two Issue

4204 **1876-CC XF45 PCGS. Variety 3-A.** An original orange-gold Choice XF Carson City type coin. A generous amount of luster beckons from the borders. Consequential marks are limited to a scuff is near obverse star 3 and a field line near the forehead. Mintages of CC-mint twenties surpassed 100,000 pieces only between 1874 and 1876, while the San Francisco Mint attained seven-figure productions each of those years. NGC ID# 26AW, PCGS# 8977

4205 **1876-S MS61 NGC.** The final San Francisco issue of the Type Two design is often available in Mint State, but this piece is particularly appealing for the grade. Although heavily abraded, radiant cartwheel luster and sharp design elements offer tremendous visual interest. NGC ID# 26AX, PCGS# 8978

4206 **1877-S MS61 NGC.** An attractive Mint State example of the popular Type Three design, this coin exhibits well-detailed design elements, with just a touch of softness on Liberty's hair and some star centers. The lustrous orange-gold surfaces are lightly marked for the grade. NGC ID# 254B, PCGS# 8984

1883-CC Double Eagle, Choice XF
Smooth Surfaces

4207 **1883-CC XF45 NGC. Variety 2-A.** This bronze-gold Carson City double eagle shows smoother surfaces than typical for an XF-level gold piece from the Nevada branch mint. Details are only lightly worn by circulation, and hints of luster remain in the protected peripheral fields. A pleasing Carson City type coin. NGC ID# 26BH, PCGS# 8999

1883-CC Twenty Dollar, XF45
Popular, Lower-Mintage Issue

4208 **1883-CC XF45 PCGS Secure. Variety 2-A.** The 1883-CC is a lower-mintage CC twenty with only 59,962 pieces produced. Its popularity is based on the collectibility and popularity of all coins from the Carson City mint. The surfaces are a bit bright with traces of mint luster still apparent surrounding the devices. Yellow-gold color with significant amounts of deep russet color surrounding the margin of the reverse. NGC ID# 26BH, PCGS# 8999

1883-CC Twenty, XF45
Smooth and Partially Lustrous

4209 **1883-CC XF45 PCGS. Variety 2-A,** as usual for this plentiful Carson City issue. The Nevada branch mint struck 59,962 double eagles in 1883, many of which were later shipped overseas for foreign trade. This Choice XF survivor displays relatively smooth honey-gold surfaces and well-detailed motifs. Hints of luster remain in the protected portions of the fields. NGC ID# 26BH, PCGS# 8999

1883-S Double Eagle, MS63
Rare With CAC Seal

4210 **1883-S MS63 PCGS Secure. CAC.** Tall S. A lovely olive-gold example whose booming luster and bold strike ensure the eye appeal. The obverse shows fewer marks than is customary for the Select level, and the reverse is minimally abraded. The 1883-S was apparently exported in quantity to foreign bank holdings, yet the issue is rare any finer. CAC: 11 in 63, 1 finer (9/18). NGC ID# 26BJ, PCGS# 9000

1885-S Liberty Head Twenty, MS63+
Rarely Offered CAC Example

4211 **1885-S MS63+ PCGS. CAC.** Beautiful orange-gold and yellowish hues adorn the frosty surfaces of this Plus-graded coin, the warmer colors gravitating toward the centers. Sharp design elements show only trivial signs of contact and eye appeal is outstanding for the grade. The 1885-S double eagle is occasionally available in MS63, but there are remarkably few pieces that have earned CAC endorsement. CAC: 15 in 63, 3 finer (9/18). NGC ID# 26BP, PCGS# 9005

1889 Twenty Dollar, MS62
Rare CAC-Approved Example

4212 **1889 MS62 PCGS Secure. CAC.** The 1889 Liberty Head twenty is moderately plentiful in MS62, but few such coins have a CAC green label as seen here. Higher-grade pieces at PCGS and NGC are rare. Sharp design elements complement frosty yellow-gold luster that produces a vibrant cartwheel effect around each side. Light grazes on Liberty's cheek limit the grade but none are individually bothersome. PCGS lists 32 finer submissions (9/18). NGC ID# 2695, PCGS# 9010

1890-CC Double Eagle, XF45
Strong Detail Remains

4213 **1890-CC XF45 PCGS. Variety 1-A.** Centered mintmark, lapped tailfeathers, as often found on the 1890-CC double eagle (91,209 coins struck). This Choice XF representative is abraded but minimally worn. The stars, curls, and feathers remain strong. Yellow-gold surfaces are original and appealing for the grade. Certified in a green-label holder. NGC ID# 26BY, PCGS# 9014

4214 **1892-CC — Cleaned — PCGS Genuine. XF Details.** The penultimate Carson City double eagle issue is more available than the 1891-CC, but nonetheless very scarce relative to the plentiful 1892-S. An apricot-gold example with noticeable luster and a narrow mark near Liberty's eye. Thorough perusal beneath a lens reveals hairlines, though the coin is attractive to the unaided eye.

4215 **1892-CC — Cleaned — PCGS Genuine. AU Details. Variety 1-A.** The 1892-CC has a mintage of only 27,265 pieces, about one-fifth the production of its 1876-CC predecessor. This lightly circulated orange-gold Carson City twenty displays hairlines upon close scrutiny, and a pair of thin vertical field marks near the nose also merit mention.

4216 **1894-S MS61 Prooflike NGC.** The pleasing lemon-yellow surfaces of this attractive Mint State specimen include deeply reflective, prooflike fields with the expected number of minor contact marks and hairlines for the grade. The design elements are sharply detailed. Census: 12 in 61 Prooflike, 16 finer (10/18). NGC ID# 26CC, PCGS# 79026

1896-S Liberty Twenty, MS64
Condition Rarity in Finer Grades

4217 **1896-S MS64 NGC. CAC.** From a mintage of 1.4 million pieces, the 1896-S Liberty double eagle is somewhat scarce in MS 64 condition, but finer coins are major condition rarities. This attractive Choice specimen offers well-detailed design elements and well-preserved peach-gold surfaces that radiate vibrant mint luster. NGC has graded only three numerically finer examples (10/18). NGC ID# 26CG, PCGS# 9030

1896-S Twenty Dollar Liberty, MS64
Outstanding Visual Appeal

4218 **1896-S MS64 PCGS. CAC.** More than 1.4 million Liberty double eagles were produced in 1896 at the San Francisco Mint, but the issue is scarce in MS64, and examples in finer grades are virtually unobtainable. This attractive Choice specimen features sharply detailed devices with smooth surfaces and vibrant mint luster. Only three coins have been certified in higher numeric grades at PCGS (10/18).
Ex: Summer FUN Signature (Heritage, 7/2011), lot 5136. where it brought $4,887.50. NGC ID# 26CG, PCGS# 9030

4219 **1898-S MS64+ PCGS Secure. CAC.** The 1898-S Liberty double eagle becomes scarce in grades above the MS64 level. This Plus-graded Choice example offers sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster. NGC ID# 26CL, PCGS# 9034

4220 **1899 MS64+ PCGS.** A Plus-graded Choice representative of this popular turn-of-the-century issue, with sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster and outstanding eye appeal. PCGS has graded 69 numerically finer examples (9/18). NGC ID# 26CM, PCGS# 9035

4221 **1900 MS64+ PCGS Secure. CAC.** A Plus-graded Choice example of this popular type issue, with sharply defined design elements and vivid orange-gold surfaces that show only minor signs of contact. Both sides radiate vibrant mint luster and overall eye appeal is terrific. NGC ID# 26CP, PCGS# 9037

4222 **1900 MS64+ PCGS. CAC.** A Plus-graded Choice example of this perennially popular Type Three issue, with sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster on both sides. NGC ID# 26CP, PCGS# 9037

4223 **1902-S MS63 PCGS.** Orange-gold and sea-green alternate across this lightly abraded and attractive Select Liberty type coin. The strike is bold except on the left-side obverse stars. Despite a sizeable mintage, the 1902-S is unexpectedly scarce any finer. Housed in a green-label holder. NGC ID# 26CV, PCGS# 9042

1903 Twenty Dollar, MS65
Exceptionally Clean Surfaces

4224 **1903 MS65 PCGS Secure.** A beautiful Liberty Head type coin, this Gem 1903 double eagle showcases remarkably clean, luminous surfaces and frosty cartwheel luster. The coin shimmers beneath a light and is virtually unabraded, just missing a higher grade from PCGS. Sharp design elements and natural sun-gold coloration add to the eye appeal. PCGS lists only five numerically finer submissions (9/18). NGC ID# 26CW, PCGS# 9043

4225 **1903-S MS63+ PCGS. CAC.** A Plus-graded Select specimen, from a substantial mintage of 954,000 pieces, this coin displays well-detailed design elements, with just a touch of softness on the coronet and eagle's claws. The lightly marked orange-gold surfaces radiate vibrant mint luster. NGC ID# 26CX, PCGS# 9044

1904-S Double Eagle, MS65+
Beautifully Lustrous, Few Known Finer

4226 **1904-S MS65+ PCGS Secure.** A luminous, frosty Gem example of this plentiful San Francisco issue, showing unabraded wheat-gold luster and sharp design elements. PCGS has Plus-graded only 14 other Gem 1904-S twenties, and there are only eight finer pieces reported at that service (9/18). This is a conditionally scarce, nearly Condition Census example of the issue. NGC ID# 26CZ, PCGS# 9046

4227 **1907 Liberty MS64 NGC.** The 1907 is the final issue in the Liberty double eagle series. This near-Gem example is an excellent type coin candidate. Detail is sharp and the frosty yellow-gold surfaces yield a radiant cartwheel effect. Light marks on Liberty's cheek prevent Gem classification. NGC lists just 28 finer submissions (10/18). NGC ID# 26D7, PCGS# 9052

4228 **1907 Liberty MS64 NGC.** Bright yellow-gold interiors cede to deeper orange-gold margins on this Choice 1907 Liberty twenty. The coin is sharp and displays only light surface grazes on the obverse that limit the grade. Luster shimmers in the fields when rotated beneath a light. NGC ID# 26D7, PCGS# 9052

4229 **1907 Liberty MS64 PCGS.** Frosty orange-gold luster lightens in hue slightly in the centers of this near-Gem, complementing sharp devices and luminous, frosty surfaces. Scattered abrasions on the obverse are outweighed by the eye appeal of the luster and sharp strike. PCGS lists only 23 finer representatives (10/18). NGC ID# 26D7, PCGS# 9052

SAINT-GAUDENS DOUBLE EAGLES

4230 **1907 MS64 PCGS. CAC.** Sweeping luster and a bold strike characterize this original orange-gold example. A hint of struck-in grease separates the RS in DOLLARS, but no marks merit singular mention. Only a small percent of MS64-graded examples exhibit the CAC seal of approval. Housed in a green-label holder. NGC ID# 26F5, PCGS# 9141

4231 **1908 No Motto MS65 PCGS.** Ex: Rough Rider Hoard. A lovely No Motto Gem with frosty luster and pleasing prairie-gold coloration. The design elements are well-struck and show only light contact marks. A small bean-shaped strike-through is noted on Liberty's right (facing) arm. NGC ID# 26F6, PCGS# 9142

4232 **1908 No Motto MS65+ PCGS.** Ex: Rough Rider Hoard. Frosty, lustrous surfaces yield original wheat-gold hues and well-struck design elements on this Plus-designated Gem No Motto type coin. Neither side exhibits bothersome abrasions and eye appeal is excellent. NGC ID# 26F6, PCGS# 9142

4233 **1908 No Motto, Wells Fargo Nevada, MS66 PCGS.** Short Rays Obverse. An exemplary example of this high quality No Motto holding, distributed in 2000. The apricot-gold surfaces teem with luster and display minimal indications of contact. Blushes of deeper orange patina are noted above the Capitol building and on the rim near the eagle's tail. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

4234 **1908 No Motto, Wells Fargo Nevada, MS66 PCGS.** The Wells Fargo holding is known for its high quality, and the present lustrous peach-gold Premium Gem provides no exception. The strike is bold except on the upper leg feathers of the eagle. Smooth save for minor contact near the base of Liberty's branch. Certified in a green label holder. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

4235 **1908 No Motto, Wells Fargo Nevada, MS66 PCGS.** Rich orange patina graces portions of this lustrous and exceptionally well-preserved No Motto type coin. The strike is uncommonly sharp on Liberty's nose and mouth, though the eagle's leg is incompletely impressed. Encapsulated in a green label holder. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

1908-S Twenty Dollar, XF45
Only 22,000 Coins Struck

4236 **1908-S XF45 NGC.** This semikey enjoys the lowest mintage among the regular issues in the Saint-Gaudens double eagle series — 22,000 coins. Blending occurs over the high points of Liberty and the eagle. Red-gold surfaces are generally smooth and partly lustrous, with two small scrapes in the obverse field and a tiny rim ding above UN in UNITED. NGC ID# 26FA, PCGS# 9149

4237 **1910-S MS64+ PCGS.** A Plus-graded Choice example of this popular early series issue, with well-detailed design elements that show just a touch of flatness on the torch. The pleasing orange-gold surfaces are lightly marked, with vibrant mint luster on both sides. NGC ID# 26FH, PCGS# 9156

4238 **1910-S MS64+ PCGS.** From a substantial mintage of 2.1 million pieces, the 1910-S Saint-Gaudens double eagle is easily located in MS64 condition, but finer coins are somewhat scarce. This Plus-graded Choice example is well-detailed and lightly marked, with lustrous orange-gold surfaces. NGC ID# 26FH, PCGS# 9156

4239 **1910-S MS64 PCGS. CAC.** An impressive Choice example that exhibits vibrant mint luster and rich orange-gold surfaces with only minor signs of contact. Sharply detailed design elements and vibrant mint luster add to the outstanding eye appeal. NGC ID# 26FH, PCGS# 9156

4240 **1913-S MS61 NGC.** An impressive Mint State example of this low-mintage branch mint issue, with well-detailed design elements and lustrous orange-gold surfaces that show the expected number of minor contact marks for the grade. NGC ID# 26FR, PCGS# 9163

1913-S Saint-Gaudens Twenty, MS63
Low-Mintage, Early Series Issue

4241 **1913-S MS63 NGC. CAC.** Only 34,000 Saint-Gaudens double eagles were struck at the San Francisco Mint in 1913, a small mintage for any 20th century coin. This attractive Select specimen exhibits sharply detailed design elements throughout, and the pleasing orange-gold surfaces are lightly marked and brightly lustrous. Eye appeal is outstanding. NGC ID# 26FR, PCGS# 9163

4242 **1915-S MS64+ PCGS. CAC.** A Plus-graded Choice example of this popular branch mint issue, with CAC approval, this coin displays well-detailed design elements and lightly marked orange-gold surfaces with vibrant mint luster on both sides. NGC ID# 26FW, PCGS# 9168

1922-S Saint-Gaudens Twenty, MS63+
Scarce With CAC Endorsement

4243 **1922-S MS63+ PCGS. CAC.** For the most part, the Saint-Gaudens double eagles from 1922 through 1928 are all plentiful if they were struck in Philadelphia, and rare if they were struck in Denver or San Francisco. The only exceptions to that rule are the scarce 1922-S and the plentiful 1923-D. This is a lovely Select 1922-S coin with frosty yellow-gold luster and considerable eye appeal. The reverse is rotated a few degrees clockwise. The Plus designation and CAC endorsement earn this coin high marks for eye appeal and technical quality. NGC ID# 26G4, PCGS# 9174

1923-D Twenty Dollar, MS66+
Remarkable Luster and Originality

4244 **1923-D MS66+ PCGS Secure.** This plentiful Denver issue often comes with terrific eye appeal, making it popular among type collectors. This frosty, luminous example displays a sharp strike and remarkably clean fields with outstanding wheat-gold and peach color. A vibrant cartwheel effect captivates the eye. Quality for the grade is outstanding, as the Plus designation affirms. Under a loupe, only the most trivial grazes are seen on the high points of the devices. NGC ID# 26G6, PCGS# 9176

4245 **1924 MS66 PCGS Secure.** The 1924 is well-known for its widespread availability in grades as high as MS66. This Premium Gem may not be rare, but its full strike, glowing mint luster, and exceptionally unabraded surfaces are no less impressive. Coloration is vibrant yellow-gold with faint rose accents toward the central obverse. Elusive in higher grades. NGC ID# 26G7, PCGS# 9177

4246 **1924 MS66+ PCGS Secure.** No issue in the Saint-Gaudens double eagle series is better suited for type representation than the 1924. This piece nearly qualifies for the rarified Superb Gem level. It features coruscating mint luster, uninhibited by marks or other defects, that rolls over warm yellow-gold surfaces. Strike detail is complete. NGC ID# 26G7, PCGS# 9177

4247 **1924 MS66+ NGC.** The Plus designation is an added appeal on this Premium Gem type coin, although the luminous, frosty mint luster is itself worthy of note. The strike is sharp and eye appeal is exceptional. The 1924 Saint-Gaudens double eagle is plentiful through MS66, but finer pieces are conditionally elusive. NGC ID# 26G7, PCGS# 9177

4248 **1927 MS66+ PCGS Secure.** A Plus-graded Premium Gem representative of this popular type issue, with sharply detailed design elements and impeccably preserved orange-gold surfaces that radiate vibrant mint luster and outstanding eye appeal. PCGS has graded 24 numerically finer examples (9/18). NGC ID# 26GG, PCGS# 9186

4249 **1928 MS66 PCGS.** A delightful Premium Gem representative of this popular type issue, with sharply detailed design elements and impeccably preserved orange-gold surfaces that radiate vibrant mint luster and outstanding eye appeal. NGC ID# 34VK, PCGS# 9189

COMMEMORATIVE SILVER

4250 **1921 Alabama MS66 PCGS.** Near-brilliant, unabraded luster shimmers under a light on this luminous Premium Gem example. The design elements are well-struck, and eye appeal is outstanding. PCGS lists only five finer representatives (10/18). NGC ID# BYF2, PCGS# 9224

1921 Alabama Half Dollar, MS66+
Condition Rarity in Finer Grades

4251 **1921 Alabama MS66+ PCGS Secure. CAC.** From a fairly substantial distribution of 59,038 pieces, the 1921 Alabama half dollar is still scarce in MS66 condition, and finer coins are condition rarities. This Plus-graded Premium Gem exhibits well-detailed design elements and impeccably preserved surfaces, with vibrant mint luster on both sides. PCGS has graded five numerically finer examples (9/18). NGC ID# BYF2, PCGS# 9224

4252 **1921 Alabama 2x2 MS66 PCGS Secure.** A delightful Premium Gem representative of this popular silver commemorative, with well-detailed design elements and vibrant mint luster, under shades of golden-brown and lavender-gray toning. PCGS has graded nine numerically finer examples (9/18). NGC ID# BYEZ, PCGS# 9225

4253 **1921 Alabama 2x2 MS66 PCGS Secure. CAC.** From a small distribution of 6,006 pieces, this spectacular Premium Gem offers well-detailed design elements and vibrant satiny mint luster on both sides. The well-preserved surfaces show hints of lavender-gray and pale gold toning. PCGS has graded nine numerically finer examples (9/18). NGC ID# BYEZ, PCGS# 9225

1921 Alabama Half Dollar, MS66+
Popular 2x2 Variant

4254 **1921 Alabama 2x2 MS66+ PCGS Secure. CAC.** Only 6,006 examples of the 1921 Alabama commemorative half dollar were issued with the 2x2 inscription in the field, making the issue scarce at the MS66 grade level, and rare any finer. This Plus-graded Premium Gem exhibits well-detailed design elements and well-preserved, lustrous surfaces, with a few highlights of lavender, pale jade, and amber toning. PCGS has graded nine numerically finer examples (9/18). NGC ID# BYEZ, PCGS# 9225

4255 **1935-S Arkansas MS67 PCGS Secure.** Gold and crimson hues dominate the borders, ceding to minimally toned, slightly dusky cream-gray centers. This Arkansas half dollar displays a full strike. The only evidence of microscopic chatter appears on the portraits. Population: 32 in 67 (7 in 67+), 0 finer (9/18). NGC ID# BYF7, PCGS# 9235

4256 **1937-D Arkansas MS67 PCGS Secure.** The Arkansas state seal on the reverse was combined with two different obverses to make the issues known as "Arkansas" and "Arkansas-Robinson" or "Robinson-Arkansas." This obverse, the traditional Arkansas, features a youth of 1936 and an Indian chief of 1836 on the obverse. This is a satiny silver-white Superb Gem with little toning but super eye appeal. Population: 39 in 67 (7 in 67+), 2 finer (9/18). NGC ID# BYFC, PCGS# 9242

4257 **1937-D Arkansas MS67 PCGS.** The 1937-D Arkansas half dollar claims a small distribution of 5,505 pieces. This delightful Superb Gem displays sharply detailed design elements and impeccably preserved , lustrous surfaces, with a few hints of lavender-gray and sea-green toning. Population: 39 in 67 (7 in 67+), 2 finer (9/18). NGC ID# BYFC, PCGS# 9242

1939-S Arkansas Half Dollar, MS67
Only One Finer Coin at NGC

4258 **1939-S Arkansas MS67 NGC.** The 1939-S Arkansas commemorative half dollar claims a small distribution total of 2,105 pieces, and the issue is rare at the MS67 grade level. This delightful Superb Gem exhibits sharply detailed design elements throughout and the impeccably preserved surfaces radiate satiny mint luster, under shades of lavender-gray and sea-green toning. Census: 9 in 67, 1 finer (10/18). NGC ID# BYFL, PCGS# 9251

4259 **1935-S Boone MS67 PCGS Secure.** Only 5,000 1935-S Boone half dollars were distributed to the public. Another five coins were made for assay purposes. Melded khaki-gold, crimson, and bluish-violet patina covers much of this strongly struck Superb Gem. Mint luster is satiny rather than deeply frosted. Population: 43 in 67 (3 in 67+), 1 finer (9/18). NGC ID# BYFW, PCGS# 9260

1925-S California Half, MS66
Spectacularly Toned

4260 **1925-S California MS66 PCGS Secure. CAC.** Undoubtedly one of the most impressive designs in the entire Classic Commemorative series. This high-grade example has the added visual appeal of rich, multicolored toning on each side. Original, bright mint luster enhances the iridescence. An outstanding example of Jo Mora's spectacular design. NGC ID# BYGA, PCGS# 9281

4261 **1936-D Columbia MS67 PCGS. CAC.** 30th Anniversary Green Label Holder. The 1936-D Columbia, South Carolina, Sesquicentennial half dollar is occasionally available in MS67, but finer pieces are rare. CAC-endorsed coins are in the minority. This piece is sharp and satiny with beautiful luster and multicolor toning. PCGS lists only 28 finer pieces (10/18). NGC ID# BYGD, PCGS# 9292

4262 **1935 Connecticut MS67 NGC. CAC.** An impressive Superb Gem specimen of this popular silver commemorative, with well-detailed design elements and impeccably preserved, lustrous surfaces that show highlights of lavender and pale gold toning, punctuated by specks of amber. NGC has graded only one numerically finer example (10/18). NGC ID# BYGH, PCGS# 9299

4263 **1936 Gettysburg MS66+ NGC.** Low-intensity shades of lavender-gray toning blanket the impeccably preserved surfaces of this Plus-graded Premium Gem, with satiny mint luster shining through the patina. NGC has certified 77 numerically finer examples (10/18). NGC ID# BYGM, PCGS# 9305

4264 **1922 Grant With Star MS63 NGC.** The With Star Grant Memorial half dollar is much scarcer than its No Star counterpart. The With Star variety comes from a small distribution of only 4,256 pieces, compared to more than 67,000 examples of the No Star issue. Tinges of multicolor toning accent grayish-gold toning on each side, and abrasions are minimal. Minor strike weakness is noted on the high point of Grant's hair. NGC ID# BYPP, PCGS# 9307

1928 Hawaiian Half Dollar, MS65
Border-Toned CAC Coin

4265 **1928 Hawaiian MS65 PCGS. CAC.** A sharp, CAC-approved Gem example of the Hawaiian Sesquicentennial half dollar, considered by many to be one of the keys to the classic commemorative half dollar series. Only 10,008 pieces were distributed, including assay coins and 50 sandblast proofs. Regular strikes grading finer than the present example are scarce. This piece is pearlescent across the interiors with deeper russet and olive border toning. NGC ID# BYGR, PCGS# 9309

1925 Lexington-Concord Half Dollar
Conditionally Rare, Toned MS67

4266 **1925 Lexington MS67 NGC.** The Lexington-Concord Sesquicentennial half dollar is available through MS66, but it suddenly becomes rare in MS67 and is almost unknown finer. This Superb Gem displays sharp detail and unabraded satin surfaces. Deep olive-gold toning on each side reveals tinges of forest-green and crimson throughout. Census: 16 in 67 (1 in 67+★), 0 finer (9/18). NGC ID# BYGW, PCGS# 9318

4267 **1923-S Monroe MS66 NGC.** Attractive shades of golden-brown and magenta toning enliven the well-preserved surfaces of this spectacular Premium Gem, with vibrant mint luster shining through the patina. Census: 66 in 66 (5 in 66+, 1 in 66 ★, 1 in 66+★), 11 finer (10/18). NGC ID# BYH4, PCGS# 9333

4268 **1938 New Rochelle MS66 Prooflike NGC.** A sharply struck and practically unabraded example of this city anniversary variety. A wisp of honey toning denies full brilliance. From a fairly low mintage of 15,266 pieces. Census: 58 in 66 Prooflike, 1 in 66+ Prooflike, 16 finer (10/18). NGC ID# BYDX, PCGS# 89335

1915-S/S Panama-Pacific Half, MS67
Exemplary Eye Appeal

4269 **1915-S/S Panama-Pacific MS67 PCGS. CAC. FS-502.** Soft electric-blue, purple, and orange toning adorns the intensely lustrous surfaces of this wonderful Superb Gem. These attributes are complemented by uniformly well-struck design elements and remarkable preservation, all of which combine to yield exemplary eye appeal. PCGS reports only four numerically finer representatives (9/18). NGC ID# BYHP, PCGS# 9357

4270 **1936-D Rhode Island MS67 PCGS Secure. CAC.** The Rhode Island Tercentenary half dollar commemorates the 300th anniversary of the founding of Providence. The Denver Mint struck 15,011 coins that were distributed through three-coin sets along with examples of the Philadelphia and Denver issues. This Superb Gem is conditionally scarce and CAC-endorsed. Finer pieces are major rarities. Frosty luster is beautifully preserved and showcases warm golden toning that deepens with a greenish hue around the obverse border. Population: 78 in 67 (5 in 67+), 2 finer. CAC: 34 in 67, 1 finer (9/18). NGC ID# BYHU, PCGS# 9364

4271 **1937-D Texas MS67+ PCGS Secure. CAC.** A Plus-graded Superb Gem representative of this popular silver commemorative, with sharply detailed design elements and impeccably preserved lustrous surfaces, under attractive shades of lavender-gray and greenish-gold toning. PCGS has graded three numerically finer examples (9/18). NGC ID# BYJJ, PCGS# 9391

4272 **1938 Texas MS67 PCGS Secure. CAC.** This final-year Texas commemorative half dollar was one of 3,780 pieces struck at the Philadelphia Mint in 1938. Dusky silver surfaces display little trace of color as satin mint luster glimmers softly over each side. The intricate design by Pompeo Coppini is strongly raised. There is one MS68 finer at PCGS (9/18). NGC ID# BYJL, PCGS# 9394

4273 **1938-S Texas MS67 PCGS Secure. CAC.** The 1938-S is the final San Francisco issue in the five-year series of the Texas Independence Centennial half dollar. Superb Gems are scarce, and coins are rarely offered finer than the present. This CAC-approved coin displays sharp design elements and satiny luster. Warm golden toning overall cedes to crimson and forest-green around the outer reverse periphery. PCGS lists only three finer submissions (9/18). NGC ID# BYJN, PCGS# 9396

4274 **1925 Vancouver MS67 PCGS Secure.** Dr. John McLoughlin established a Hudson's Bay Company trading post, later named Fort Vancouver, on the bank of the Columbia River in 1825. Although deeply loyal to his employer, McLoughlin understood the finite nature of beaver skins and sought to make Fort Vancouver an autonomous outpost with its own agriculture, livestock, and lumber mills. This Superb Gem is toned in gunmetal-blue and golden-orange patina, though the central obverse remains brilliant. A top-quality example with only three finer coins at PCGS (9/18). NGC ID# BYJP, PCGS# 9399

4275 **1951 Booker T. Washington MS67 NGC.** The majority of this 1951 Booker T. Washington half dollar is covered in mottled multicolor patina. Underlying luster is softly frosted, heightening the appeal. Each side is fully struck, and we can see no marks that deserve special attention. Census: 17 in 67 (1 in 67+, 2 in 67 ★), 1 finer (9/18). NGC ID# BYK9, PCGS# 9424

COMMEMORATIVE GOLD

4276 **1903 Louisiana Purchase, Jefferson Gold Dollar MS66 PCGS.** A delightful Premium Gem representative of the Jefferson variety, from a distribution of 17,500 pieces. This coin exhibits sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster on both sides. NGC ID# BYLD, PCGS# 7443

4277 **1903 Louisiana Purchase, McKinley Gold Dollar MS67 NGC.** This glistening Superb Gem displays sharp definition and remarkable preservation. Most of each side has fiery-orange coloration that captivates the eye, although small tinges of lilac are also visible on the obverse. NGC lists only five finer submissions (10/18). NGC ID# BYLE, PCGS# 7444

4278 **1904 Lewis and Clark Gold Dollar MS64 PCGS Secure.** From a distribution of 10,025 pieces, this attractive Choice example displays well-preserved orange-gold surfaces with vibrant mint luster on both sides. The design elements are sharply detailed and overall eye appeal is outstanding. NGC ID# BYLF, PCGS# 7447

1915-S Panama Pacific Quarter Eagle, MS64
Attractive Gold Commemorative

4279 **1915-S Panama-Pacific Quarter Eagle MS64 NGC.** The 1915-S Panama-Pacific quarter eagle claims a small distribution of 6,749 pieces. The coins were issued to commemorate the opening of the Panama Canal and the recovery of San Francisco after the disastrous earthquake of 1906. This attractive Choice specimen offers well-detailed design elements and lustrous, lightly marked orange-gold surfaces. NGC ID# BYLP, PCGS# 7450

1915-S Panama-Pacific Quarter Eagle, MS64
Popular Barber-Morgan Collaboration

4280 **1915-S Panama-Pacific Quarter Eagle MS64 PCGS.** Ex: Stecher Collection. This is the quarter eagle representative from a series of silver and gold coins struck in conjunction with the 1915 exposition held in San Francisco to celebrate the opening of the Panama Canal. Central peach-gold color is framed by wisps of apricot along the margins. The motifs are strongly defined. Minor obverse luster grazes preclude a higher grade. Purchased in the 1930s at face value by Karl Stecher Sr. from coins turned in by the public as per President Roosevelt's March 9, 1933 directive.
Ex: Stecher Collection / ANA National Money Show Signature (Heritage, 3/2007), lot 1504; ANA Signature (Heritage, 8/2017), lot 4679. NGC ID# BYLP, PCGS# 7450

1922 No Star Grant Gold Dollar, MS67
Only One Coin Finer at PCGS

4281 **1922 Grant Gold Dollar, No Star, MS67 PCGS.** The No Star Grant Memorial gold dollar is slightly scarcer in high grade than its With Star counterpart, despite both issues having equal distribution figures (5,016 pieces). This Superb Gem example displays a sharp strike and frosty, virtually pristine luster with rose and yellow-gold hues. Eye appeal is exceptional. Housed in a green label holder. PCGS lists a single MS68 coin finer (9/18). NGC ID# BYLN, PCGS# 7458

4282 **1926 Sesquicentennial Quarter Eagle MS65 PCGS Secure.** From a respectable distribution of 46,019 pieces, this attractive Gem exhibits sharply detailed design elements and well-preserved orange-gold surfaces that display glowing satiny mint luster on both sides. NGC ID# 2FE9, PCGS# 7466

4283 **1926 Sesquicentennial Quarter Eagle MS65 PCGS.** An attractive Gem representative of this popular gold commemorative, with sharply detailed design elements and well-preserved orange-gold surfaces. Vibrant mint luster on both sides adds to the outstanding visual appeal. NGC ID# 2FE9, PCGS# 7466

4284 **1926 Sesquicentennial Quarter Eagle MS65 PCGS.** A highly lustrous Gem. The peach-gold surfaces are crisply struck and display few imperfections. Encapsulated in an old green-label holder. The final classic gold commemorative issue, and coincidentally also the final year of Indian quarter eagle production. NGC ID# 2FE9, PCGS# 7466

4285 **1926 Sesquicentennial Quarter Eagle MS65+ PCGS Secure.** The 1926 Sesquicentennial quarter eagle becomes scarce in grades above the MS65 level. This Plus-graded Gem exhibits sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster throughout. NGC ID# 2FE9, PCGS# 7466

MODERN ISSUES

4286 **2014-W Baseball Hall of Fame Five Dollar, Roberto Alomar Signature, MS70 PCGS.** The initials of designer Cassie McFarland, "CM," appear left of the date on the obverse. McFarland's concave glove design garnered widespread acclaim, making this one of the most popular commemoratives in recent memory. Unmarked, satiny surfaces are finely textured and display pleasing lemon-gold color. NGC ID# AYYL, PCGS# 525643

4287 **2014-W Baseball Hall of Fame Five Dollar, Wade Boggs Signature, MS70 PCGS.** The PCGS insert features the signature of All-Star slugger Wade Boggs, who was inducted into the Baseball Hall of Fame in 2005. While most of this MS70 example is the usual shade of straw-gold, the obverse features a large, colorful alloy spot over the R in LIBERTY. NGC ID# AYYL, PCGS# 525643

4288 **2014-W Baseball Hall of Fame Five Dollar, Steve Carlton Signature, MS70 PCGS.** Circulation-strike production of the 2014-W Baseball Hall of Fame five dollar gold coin amounted to 17,674 pieces, or 35% of the authorized mintage of 50,000 coins for business strikes and proofs combined. This luminous straw-gold representative is flawless in every regard. NGC ID# AYYL, PCGS# 525643

4289 **2014-W Baseball Hall of Fame Gold Five Dollar, Rollie Fingers Signature, MS70 PCGS.** The 2014-W Baseball Hall of Fame five-dollar gold commemorative is the first curved coin ever issued by the U.S. Mint, with a concave obverse and convex reverse. This technically perfect example offers sharply detailed design elements and lustrous orange-gold surfaces with outstanding eye appeal. NGC ID# AYYL, PCGS# 525643

4290 **2014-W Baseball Hall of Fame Five Dollar, Carlton Fisk Signature, MS70 PCGS.** Public Law 112-152 authorized the National Baseball Hall of Fame coin program on August 3, 2012. The coins were released on March 27, 2014. A total of 17,674 circulation strikes sold out in days. Each side of this MS70 commemorative enjoys bright lemon-gold surfaces devoid of even the slightest flecks. NGC ID# AYYL, PCGS# 525643

4291 **2014-W Baseball Hall of Fame Five Dollar, Bob Gibson Signature, MS70 PCGS.** It is fitting that America's pastime and the institution dedicated to celebrating its history are commemorated with a series of coins. This is a technically perfect example from that popular 2014 issue. The strike is complete, allowing for a better appreciation of the unique curved design. NGC ID# AYYL, PCGS# 525643

4292 **2014-W Baseball Hall of Fame Five Dollar, Steve Carlton Signature, PR70 Deep Cameo PCGS.** The curved form of the Baseball Hall of Fame coins is unique in U.S. numismatics. It was modeled after the 2009 International Year of Astronomy coins struck by the Monnaie de Paris. The PR70 Deep Cameo assessment reflects the pristine quality and stark contrast on each side of this yellow-gold representative. NGC ID# AXP2, PCGS# 525644

4293 **2014-W Baseball Hall of Fame Five Dollar, Dennis Eckersley Signature, PR70 Deep Cameo PCGS.** These coins celebrate the 75th anniversary of the opening of the Baseball Hall of Fame in June 1939. The obverse displays textured motifs against reflective fields, while the reverse has a reverse proof finish — frosty fields against brilliant devices. An absolutely pristine representative. NGC ID# AXP2, PCGS# 525644

4294 **2014-W Baseball Hall of Fame Five Dollar, Carlton Fisk Signature, PR70 Deep Cameo PCGS.** Cassie McFarland won the competition to design the 2014 Baseball Hall of Fame coins, the first such competition open to the public since 1992. She based the obverse on a glove in her childhood home and was awarded $5,000. Mint engraver Don Everhart designed the reverse. This attractive proof is perfectly preserved and fully struck, as expected. NGC ID# AXP2, PCGS# 525644

4295 **2014-W Baseball Hall of Fame Five Dollar, Bob Gibson, PR70 Deep Cameo PCGS.** St. Louis Cardinals pitching legend and nine-time All Star Bob Gibson has hand-signed the PCGS insert for this 2014-W Baseball Hall of Fame five dollar gold coin. The concave glove designed by Cassie McFarland is fully frosted, while the surrounding fields produce a Deep Cameo effect. NGC ID# AXP2, PCGS# 525644

4296 **2014-W Baseball Hall of Fame Five Dollar, Doc Gooden Signature, PR70 Deep Cameo PCGS.** Numismatic firsts are always popular, and these curved five dollar gold coins celebrating the 75th anniversary of the Baseball Hall of Fame in Cooperstown, New York are no exception. This piece was struck at the nearby West Point Mint. It features a mix of frost and reflectivity that collectors are sure to appreciate. NGC ID# AXP2, PCGS# 525644

4297 **2014-W Baseball Hall of Fame Five Dollar, Tommy Lasorda Signature, PR70 Deep Cameo PCGS.** Not a single contact mark appears on the concave obverse or the convex reverse of this immaculate five dollar gold commemorative struck at the West Point facility. The PCGS insert is hand-signed by legendary Los Angeles Dodgers manager Tommy Lasorda. NGC ID# AXP2, PCGS# 525644

4298 **2014-W Baseball Hall of Fame Five Dollar, Tommy Lasorda Signature, PR70 Deep Cameo PCGS.** Up to 50,000 Baseball Hall of Fame five dollar gold coins were authorized, and they sold out in about one week. That total included a little more than 32,000 proofs. This PR70 coin with Deep Cameo contrast has attractive lemon-gold color and deep, watery fields on the obverse. The reverse is frosted, save for the legends and stitching. NGC ID# AXP2, PCGS# 525644

4299 **2014-W Baseball Hall of Fame Five Dollar, Mitch Williams Signature, PR70 Deep Cameo PCGS.** A flawless example of this popular five dollar gold issue, representing the first time a United States coin was struck with a concave obverse and a convex reverse. The design simulates a baseball glove on one side and a baseball on the other. Frosty devices contrast against reflective lemon-gold fields. NGC ID# AXP2, PCGS# 525644

MODERN BULLION COINS

1987 Half-Ounce Gold Eagle, MS70 Challenging Issue in the Series

4300 **1987 Half-Ounce Gold Eagle MS70 NGC.** Demand for half-ounce Gold Eagles dropped to about 40% of its 1986 levels in 1987. This issue has the second-lowest MS70 population at NGC after the 1990. Satiny and smooth lemon-gold surfaces showcase the razor-sharp definition expected of a modern Gold Eagle. There are absolutely no marks on either side. Census: 91 in 70 (9/18). NGC ID# 26N8, PCGS# 9812

1987 Half-Ounce Gold Eagle, MS70 Pristine Registry Coin

4301 **1987 Half-Ounce Gold Eagle MS70 NGC.** Gold prices averaged $447.95 dollars per ounce over the course of 1987, when 131,255 half-ounce Gold Eagles were struck at the West Point Mint. This technically pristine example enjoys satiny mint luster that shimmers delicately across the straw-gold surfaces. A perfect coin for Registry purposes. Census: 91 in 70 (9/18). NGC ID# 26N8, PCGS# 9812

4302 **1990 Silver Eagle MS70 NGC.** A flawlessly preserved example of the 1990 Silver Eagle. Brilliant luster shimmers beneath a light and produces a beautiful cartwheel effect when rotated. The strike is sharp and eye appeal excels. An exceptional Registry Set candidate. NGC ID# 26JC, PCGS# 9836

4303 **1990 Silver Eagle MS70 NGC.** The design elements showcase full definition on this top-grade 1990 Silver Eagle, complementing brilliant luster that shimmers beneath a light. The 1990 Silver Eagle is elusive in flawless condition and highly sought-after for Registry Sets in this grade. NGC ID# 26JC, PCGS# 9836

4304 **1991 Silver Eagle MS70 PCGS.** A respectable mintage of 7.1 million one-ounce Silver Eagles was produced in 1991 at the Philadelphia Mint, but PCGS has seen relatively few survivors in the ultimate grade of MS70. This magnificent MS70 example exhibits fully detailed design elements and technically perfect surfaces that radiate vibrant mint luster on both sides. Population: 36 in 70 (10/18). NGC ID# 26JE, PCGS# 9846

4305 **1992 Silver Eagle MS70 PCGS.** The 1992 Silver Eagle in perfect condition is rare in a PCGS holder, and such coins are highly sought-after for Registry Set purposes. This piece is one of only 77 coins to receive an MS70 grade at PCGS (10/18). The strike is razor-sharp, and the frosty, untoned surfaces are beautifully luminous. NGC ID# 26JG, PCGS# 9856

1995-W Silver Eagle, PR69 Deep Cameo Virtually Flawless, Registry Set Worthy

4306 **1995-W Silver Eagle PR69 Deep Cameo PCGS Secure.** Registry Set collectors not wanting to spend the money necessary for a PR70 Deep Cameo 1995-W Silver Eagle will appreciate this PR69 Deep Cameo coin. Certified by PCGS, it is flawlessly struck and untoned. Under a loupe, the surfaces are virtually indistinguishable from a PR70 coin to the average viewer. Only 30,125 examples of this key date were distributed. NGC ID# CFWX, PCGS# 9887

4307 **1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 NGC.** Prior to 1999, all four denominations of gold eagles were either mintmarked proofs or sans-mintmark Uncirculated finish examples. The year of Y2K trepidation resulted in a spike in bullion coin production, possibly the reason that one five dollar and one ten dollar die pair received a satin finish yet bore a West Point mintmark. Both varieties are scarce and popular today. This caramel-gold representative has a full strike and minimal indications of contact. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

4308 **1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 PCGS.** A popular mint error. A mintmarked fractional gold eagle die pair never received a proof finish, something that should not have happened prior to 2006. Attractive peripheral orange-gold patina ensures the eye appeal of this satiny and solidly struck example. Tiny flaws above the first U in PLURIBUS deny perfection. The insert displays the signature of U.S. Mint Artistic Infusion Program Master Designer Thomas S. Cleveland. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

4309 **2008-W Half-Ounce Gold Buffalo PR70 Ultra Cameo NGC.** The half-ounce Gold Buffalo was only produced in 2008 and only 12,169 proofs were struck. This technically perfect specimen displays textured, reflective yellow-gold surfaces that contrast with the fully detailed, frosty devices. NGC ID# 26RK, PCGS# 399936

4310 **2008-W One-Ounce Gold Buffalo PR70 Ultra Cameo NGC.** This stunning one-ounce Gold Buffalo features fully struck design elements and deeply reflective, textured fields that contrast profoundly with the richly frosted devices. The orange-gold surfaces are technically perfect and overall eye appeal is terrific. NGC ID# 26RH, PCGS# 393329

4311 **2008-W One-Ounce Gold Buffalo PR70 Ultra Cameo NGC.** From a mintage of 18,863 pieces, this technically perfect one-ounce Gold Buffalo offers fully detailed design elements, with a rich coat of mint frost that contrasts profoundly with the textured, reflective fields. NGC ID# 26RH, PCGS# 393329

4312 **2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike NGC.** The popular 2009 Ultra High Relief double eagles are replicas of the extremely rare Judd-1917 patterns in the Smithsonian Institution, with reduced diameters and double thick planchets. This fully detailed, technically perfect example exhibits deeply reflective prooflike fields. NGC ID# 26S4, PCGS# 506602

4313 **2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike NGC.** A stunning MS70 specimen of the popular Ultra High Relief double eagle, struck on a reduced diameter, double thick planchet containing one ounce of gold. The design elements are fully detailed and the technically perfect surfaces include deeply reflective prooflike fields. Listed among the *100 Greatest U.S. Modern Coins*. NGC ID# 26S4, PCGS# 506602

2009 Ultra High Relief Double Eagle
Flawless MS70 Prooflike

4314 **2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS.** Prior to 2009, ownership of an example of Augustus Saint-Gaudens double eagle in Ultra High Relief was unfathomable. That year, however, the Mint made the impossible possible with the production of these one-ounce gold coins — arguably the most popular of any modern commemorative or bullion issue. The major devices contrast considerably against the sunken, reflective fields. NGC ID# 26S4, PCGS# 506602

TERRITORIAL GOLD

1852 Humbert Ten Dollar, K-10
AU Sharpness

4315 **1852 Humbert Ten Dollar — Repaired — NGC. AU Details. K-10, Low R.4.** The field beneath the scroll has been smoothed, and the obverse rim is repaired between 2 and 4 o'clock. Apart from those issues, the yellow-gold surfaces show relatively few abrasions for a lightly circulated pioneer gold piece. Struck from rusted dies with light cracks through UNITED STATES, usual for K-10. Listed on page 398 of the 2019 *Guide Book*. NGC ID# ANGG, PCGS# 10187

CALIFORNIA FRACTIONAL GOLD

1854 Octagonal Liberty Quarter, MS66
Finest Certified BG-109

4316 **1854 Liberty Octagonal 25 Cents, BG-109, High R.5, MS66 NGC.** As of (10/18), this is the single-finest certified BG-109 example at either leading service. The mattelike apple-green and apricot-gold surfaces are nicely struck and unabraded. BG-109 is the rarest of the four Antoine Louis Nouizillet octagonal quarter die varieties, readily identified by an obverse date and DOLLAR spelled out in full. NGC ID# 2BGU, PCGS# 10378

4317 **1855 Liberty Round 25 Cents, BG-226A, R.5, MS64 NGC.** Die State II, without the usually seen reverse die cracks. A well-struck reddish-gold near-Gem. The fields display myriad die lines but there are no spots or abrasions. A small depression on the cheek is of mint origin. Census: 3 in 64, 0 finer (10/18). NGC ID# 2BHZ, PCGS# 10417

1855 Round Liberty Quarter
BG-227, MS65 Prooflike
None Certified Finer

4318 **1855 Liberty Round 25 Cents, BG-227, R.6, MS65 Prooflike NGC.** A rare round quarter dollar variety made by Antoine Louis Nouizillet in 1855. Struck from "solid native California gold" according to the BG reference. The reverse die is shattered, a diagnostic of this variety, while the obverse stars are noticeably repunched. The obverse die is heavily polished from its previous use for BG-226A; it is later polished again before being employed for BG-228. The present, yellow-gold example displays deep mirroring in the fields and well-defined motifs. This is one of only two examples of BG-227 certified as Prooflike by NGC, and it is numerically surpassed at that service only by a single MS65 Prooflike coin (10/18). PCGS# 710412

1859 Liberty Octagonal Quarter, BG-702
MS67 Prooflike, Single Finest Graded

4319 1859 Liberty Octagonal 25 Cents, BG-702, R.3, MS67 Prooflike NGC. Die State I, unbroken wreath. The 1859 BG-702 "Muscle Head" variant has stars directly above the hair bun. This terrific sun-gold Superb Gem is profoundly Prooflike with terrific eye appeal. Detail is slightly mushy, but the technical quality is unparalleled. Census: 1 in 67 Prooflike, 0 finer (10/18). NGC ID# 2BMB, PCGS# 710529

4320 1873 Indian Octagonal 25 Cents, BG-794, High R.5, MS65 PCGS Secure. Fractional gold researcher Kenneth W. Lee is credited as discoverer of this very scarce variety. A sun-gold Gem that boasts glassy fields and a full strike. A loupe fails to locate any imperfections. One of many die varieties issued by San Francisco merchant Christopher Ferdinand Mohrig. Population: 5 in 65, 0 finer (9/18). NGC ID# 2BRE, PCGS# 10621

4321 1865 Liberty Round 25 Cents, BG-803, High R.5, MS65 NGC. As of (10/18), NGC has certified just three examples of the rare Frontier & Co. BG-803, with the present lot as the single-finest at that service. This lime-green and apricot-gold Gem appears unabraded, though "ghosts" from high points on the opposite side are evident on the obverse field and central reverse. The strike is typical for the variety. DOLLAR is extensively lapped, and more closely resembles LOLA. NGC ID# 2BSR, PCGS# 10664

4322 1872 Liberty Round 25 Cents, BG-816, R.6, MS65 NGC. A semiprooflike sun-gold Gem. Unabraded, although the relief of the portrait causes incompleteness of strike on DOLLAR and CAL. The homely portrayal of Liberty is characteristic of the Frontier & Bellemere emissions. A scarce variety that has a total of only seven examples certified by NGC (9/18). NGC ID# 2BT7, PCGS# 10677

4323 1876 Indian Round 25 Cents, BG-853, Low R.5, MS66 PCGS Secure. The present lot is the single finest PCGS-certified BG-853 Indian round quarter, and is the first plate coin for the variety at PCGSCoinFacts.com. The dies are credited to Herman J. Brand of San Francisco, one of several varieties featuring a small Indian head obverse. This example is well struck except for the date and other select portions of the borders. The satiny canary-gold surfaces are free from marks or spots. NGC ID# 2BUG, PCGS# 10714

1876 Period Two Round Indian Quarter
BG-879, MS67 Prooflike

4324 1876 Indian Round 25 Cents, BG-879, R.4, MS67 Prooflike NGC. As of (10/18) the present coin is the finest Prooflike NGC-certified example of BG-879, by a margin of two grades. At PCGS, two are graded MS66 (non-Prooflike, of course) with none finer. This piece is from an unlisted die state with a small cud at the left wreath stem. A flashy yellow-gold Superb Gem with exemplary preservation and only minor incompleteness of strike. NGC ID# 2BVE, PCGS# 710740

1876 Indian Round Half, BG-1065
MS67 Deep Mirror Prooflike

4325 1876 Indian Round 50 Cents, BG-1065, R.5, MS67 Deep Mirror Prooflike NGC. As of (10/18), this is the single finest BG-1065 half dollar at either leading service. A scarce Christopher Ferdinand Mohrig variety noteworthy for its small date and repunched R in DOLLAR. Mirrored canary-gold fields contrast with the nicely struck motifs. The central reverse is incompletely brought up, usual for the variety. The reverse field has a couple of tiny strike-throughs, as made. NGC ID# 2C2G, PCGS# 910894

COINS OF HAWAII

4326 1847 Hawaii Cent MS62 Red and Brown PCGS. M. 2CC-5. Plain 4, 13 berries. Fire-red accompanies the legends and motifs of this single-year Hawaiian type coin. Blushes of charcoal-gray toning are east of the date and near the HA in HAWAII. The crisply struck surfaces are smooth aside from a flan depression on the reverse border at 1 o'clock. Listed on page 425 of the 2019 *Guide Book*. NGC ID# 2C52, PCGS# 10966

4327 1882 Haiku Plantation One Rial Token AU58 PCGS Secure. M. TE-15. The Maui Haiku sugar cane plantation issued the most aesthetically attractive Hawaiian tokens of the 19th century. The denomination of one rial is a misspelling of the Spanish-American real, or eighth dollar. This medium to deep brown representative is nicely struck and shows only a single mark, near the O in ONE. Listed on page 426 of the 2019 *Guide Book*. Population: 8 in 58, 12 finer (10/18). NGC ID# 2UBZ, PCGS# 600518

4328 **1973 Prince Kuhio Kauai Dollar, The Garden Isle, MS64 NGC. M. 2MD-855.** Gold, 22.86 gm. Serial #18. Listed on page 144 of the 1991 Second Edition of the Medcalf-Russell reference, which implies only 18 were made, in 21 karat gold. But the NGC holder states the fineness is 24 karat gold, and indeed the edge is marked 24K at 12 o'clock. Issued by the Kauai Chamber of Commerce to promote tourism. Prince Kuhio (1871-1922) was deposed in 1893 and later served as a Republican delegate to the U.S. House of Representatives. March 26, Prince Kuhio Day, is a state holiday in Hawaii.

PATTERNS

1858 Flying Eagle Cent in Copper-Nickel Judd-193, PR64

4329 **1858 Flying Eagle Cent, Judd-193, Pollock-236, R.5, PR64 PCGS.** Eagle Eye Photo Seal, card accompanies. The obverse is the regular issue Small Letters 1858 cent. The reverse resembles the as-issued 1860 Indian cent, as it displays an oak wreath and ONE CENT with a shield at the top, but the shield is much broader and ornamental. Struck in copper-nickel with a plain edge. Even though each side shows slightly brown patina, the copper-nickel composition is immediately apparent with a lighter honey-tan color evident beneath the toning. Sharply struck and problem-free. NGC ID# 29BD, PCGS# 11844

1858 Flying Eagle Cent by Anthony Paquet Copper-Nickel Judd-204, Iridescent PR64

4330 **1858 Flying Eagle Cent, Judd-204, Pollock-248, R.5, PR64 PCGS.** Eagle Eye Photo Seal, card accompanies. Anthony Paquet's small flying eagle motif is paired with an ornamental shield and oak wreath reverse. Struck in copper-nickel with a plain edge. This is the relatively common version of this popular pattern, making it a popular pattern for Flying Eagle cent collectors who wish to broaden their collecting horizon. The strike details are remarkably complete on each side. Subtle iridescence is seen over each side with a slight haziness present. NGC ID# 29BK, PCGS# 11871

1859 Half Dollar Pattern in Copper Judd-242, PR66 Red and Brown

4331 **1859 Half Dollar, Judd-242, Pollock-298, R.5, PR66 Red and Brown NGC.** The "French Head of Liberty" obverse design features a bust right of Liberty. This bust is often credited to Chief Engraver Longacre though the narrow lettering style of the legends is associated with Anthony Paquet. The reverse has 50 CENTS in the center, and is surrounded by a large wreath similar to that later introduced on the 1860 dime. Struck in copper with a reeded edge. Significant mint red remains over each side with slight blue-brown patina most evident in the fields. An exceptionally attractive example of this popular early pattern. NGC ID# 29CN, PCGS# 11981

1863 Washington Two Cent Pattern Judd-305, PR64 Brown

4332 **1863 Two Cents, Judd-305, Pollock-370, R.4, PR64 Brown NGC. CAC.** The obverse features a bust right of Washington, encircled by the words GOD AND OUR COUNTRY and the date below, on the obverse. The reverse displays a wheat wreath surrounded by UNITED STATES OF AMERICA. The denomination is at the center, with CENTS prominently curved. Struck with a plain edge. Even though the surfaces are brown, there is significant reflectivity in the proof fields. When angled just so, some of the underlying original red can still be seen.
Ex: Pittsburgh Signature (Heritage, 10/2011), lot 4553, where it realized $2,875. NGC ID# 29EK, PCGS# 60460

1863 Two Cent Pattern in Bronze
Judd-312, PR64 Brown

4333 **1863 Two Cents, Judd-312, Pollock-377, R.4, PR64 Brown PCGS.** The obverse is similar to the regular issue obverse of 1864, with GOD OUR TRUST on the ribbon above the shield. The reverse shows the denomination 2 CENTS sharply curved in a wreath with the legend UNITED STATES OF AMERICA around. Struck in bronze with a plain edge. These patterns were struck on multiple weight planchets that range from 76 grains to 101 grains. Fully struck in all areas, this piece shows even, deep brown patina over each side with faint glimmers of underlying mint red. An attractive, nearly carbon-free example of this popular two cent pattern.
Ex: FUN Signature (Heritage, 1/2007), lot 1282. NGC ID# 29ER, PCGS# 60467

1864 Two Cent Pattern in Copper-Nickel
Judd-371, PR64

4334 **1864 Two Cents, Judd-371, Pollock-440, Low R.6, PR64 PCGS.** The regular issue designs for the 1864 Large Motto two cent piece. Struck in copper-nickel with a plain edge. This impressive near-Gem proof is housed in a green-label PCGS holder. Reflective surfaces exhibit light tan color, the reverse is less deeply mirrored and slightly darker in tone. Both sides have a few widely scattered spots that keep this piece from a higher grade. In addition to this alloy, other examples from the same dies were coined in copper, aluminum, and a couple in nickel. Over a dozen are known in copper-nickel.
Ex: FUN Signature (Heritage, 1/2007), lot 1301, where it realized $2,530. NGC ID# 26VJ, PCGS# 60541

1865 Seated Quarter Pattern, PR64
Judd-423, Silver, Reeded Edge

4335 **1865 Quarter Dollar, Judd-423, Pollock-495, Low R.7, PR64 PCGS Secure.** The obverse is the regular Liberty Seated design for 1865. The reverse features a perched eagle with wings spread widely, clutching arrows with extremely long shafts. The legend UNITED STATES OF AMERICA is above, with the denomination fully spelled out below. Anthony Paquet designed the reverse, using the tall, thin letters often associated with his work. Struck in silver with a reeded edge. Deep lavender-red, gunmetal, and blue-green toning encompasses this fully struck and unblemished Choice pattern. The reverse has a thick wire rim between 11 and 3 o'clock. NGC ID# 29JB, PCGS# 60607

1866 Five Cent Pattern in Copper
Judd-490, PR64 Red and Brown

4336 **1866 Shield Five Cents, Judd-490, Pollock-578, Low R.7, PR64 Red and Brown NGC.** Ex: Exemplar Collection. Five cent pattern with an obverse similar to the adopted Shield nickel design, but the ball at the bottom of the shield divides the date. The reverse features a "Dutch" numeral 5 inside a laurel wreath. Struck in copper with a plain edge. This scarce pattern was also struck in nickel, but the copper variant is much more challenging. The fields display remarkable depth of mirroring with each side covered in streaks of multicolored iridescence. NGC ID# 29KU, PCGS# 70686

1869 Standard Silver Ten Cents in Aluminum
Judd-700, PR64

4337 **1869 Standard Silver Ten Cents, Judd-700, Pollock-779, Low R.7, PR64 NGC.** On the obverse, a right-facing Liberty wears a Phrygian cap decorated with three stars. UNITED STATES OF AMERICA borders the upper periphery of the obverse, with IN GOD WE TRUST in a curved ribbon below. The reverse displays STANDARD SILVER around the upper edge, and 10 CENTS is inside an oak and laurel wreath. Struck in aluminum with a reeded edge. Examples are also known in silver and copper (reeded and plain edges), but the aluminum pieces are the scarcest, in this case only an estimated half-dozen examples are known. The fields were heavily striated and have imparted depth of reflectivity that is often seen on aluminum patterns. The grade is derived from a couple of spots of oxidation. A curious flan crack is seen on the obverse margin at 4 o'clock. A planchet lamination, often seen on aluminum patterns, is seen at the top of the reverse. NGC ID# 29RD, PCGS# 60925

1869 Standard Silver Ten Cents in Silver
Judd-702, PR64

4338 **1869 Standard Silver Ten Cents, Judd-702, Pollock-781, R.5, PR64 NGC.** Standard Silver design, with a diadem in Liberty's hair on the obverse. Oak and laurel wreath reverse, with STANDARD SILVER above, the date below, 10 CENTS in the center. Struck in silver with a reeded edge. GOD is widely repunched. This fairly common Standard Silver dime was struck in silver, copper, and aluminum. Each composition was produced with a plain and reeded edge. Predictably, the aluminum strikings are the scarcest. Each side of this piece has slightly hazy, deep rose and blue toning. The depth of the toning slightly obscures the mirrors, but at the proper angle they flash forcefully through the patina.
Ex: Sacramento Signature (Heritage, 3/2011), lot 4393. NGC ID# 29RF, PCGS# 60927

1869 Standard Silver Ten Cents in Silver
Judd-702, Toned PR65

4339 **1869 Standard Silver Ten Cents, Judd-702, Pollock-781, R.5, PR65 PCGS.** Standard Silver design with a diadem on Liberty's hair on the obverse. The reverse has an oak and laurel wreath with STANDARD SILVER above and the date below with 10 CENTS in the center. Struck in silver with a reeded edge. GOD has been recut. This lovely pattern exhibits deep cobalt-blue and rose-violet colors and is well-struck in all regards. The surfaces are essentially undisturbed beneath the blanket of deep patina. NGC ID# 29RF, PCGS# 60927

1869 Standard Silver Ten Cents in Copper
Judd-710, PR64 Brown

4340 **1869 Standard Silver Ten Cents, Judd-710, Pollock-789, Low R.7, PR64 Brown PCGS. CAC.** Standard Silver issue with only one star at the front of Liberty's head on the obverse. The reverse has 10 CENTS in the center, surrounded by a wreath of oak and laurel with STANDARD SILVER 1869 around the margin. Struck in copper with a reeded edge. Struck also in silver and aluminum, reeded and plain edges. About a dozen copper / reeded edge examples are known, making examples such as this the logical choice for type purposes when just one example is needed of this obverse / reverse combination. Each side displays deep chocolate-brown patina and the strike is incompletely brought up in several areas. NGC ID# 29RR, PCGS# 60935

1879 Metric Dollar in Goloid or Silver
Judd-1617, Lightly Toned PR63

4341 **1879 Metric Dollar, Judd-1617, Pollock-1813, R.4, PR63 NGC.** William Barber's Metric dollar with Liberty wearing a coronet with a border of pearls, similar in design to the half union patterns from 1877. The reverse is elaborately laid out with a partial wreath of cotton and corn tied at the base, a ribbon, and with DEO EST GLORIA on a tablet above. Struck in goloid or silver with a reeded edge. Without metallurgical testing it is impossible to visually tell if a piece was struck from silver or goloid composition. Several hundred pieces are known. Much rarer are the copper and aluminum examples. This example displays pale golden-rose and lilac toning over each side with strong mirroring in the fields. NGC ID# 2AH8, PCGS# 61995

ERRORS

1945 Mercury Dime, MS64
On a Netherlands East Indies 10 Cent Blank

4342 **1945 Mercury Dime — Struck on a Netherlands East Indies 10 Cents Blank — MS64 NGC.** 1.28 gm. Since the Netherlands was occupied by German forces for portions of 1945, the U.S. Mint struck several denominations of coins for their East Indies colonies. A few foreign planchet blanks found their way between U.S. coin dies, such as the present Mercury dime struck on a .640 Fine silver Netherlands East Indies 10 cent piece. Struck aligned with the collar at 8 o'clock on the obverse. Most of AMERICA and the RTY in LIBERTY are off the flan. The date is present except for the lower half of the 5. Lustrous and brilliant with a minor fingerprint on the field near the profile.

1877-S Trade Dollar, Near-Mint
Broadstruck

4343 **1877-S Trade Dollar — Broadstruck — AU58 NGC.** Large S. Struck without a collar die, this centered broadstrike Trade dollar has a diameter of 39 mm, about one mm above standard width. The rims are broad and somewhat irregular, and the dentils and reverse peripheral legends have a stretched appearance. The breast feathers show light wear, but the deep gunmetal-gray and golden-brown surfaces are minimally marked.

4344 **1911 Indian Quarter Eagle, Struck 2% Off Center — Cleaned — PCGS Genuine Secure. AU.** Noticeably off center toward 5:30, with a broad rims near LIBERTY and the denomination. Portions of the date and STATES OF AMERICA are off the flan. The edge appears to be plain, suggesting the collar die was absent or, more likely, impeded. A well-defined if slightly bright quarter eagle with light wear and distributed minute marks. Mint errors on U.S. gold coins rarely appear at auction.

4345 **1995 One-Ounce Gold Eagle — Struck-Thru Reverse — MS69 PCGS Secure.** The strike-through has an approximately triangular shape, 4 x 5 mm, and is located between the Joseph Winter initials and the breast of the left eaglet. The remainder of the coin has a normal appearance. An immaculate and boldly struck honey-gold bullion coin with seamless sweeping luster.

4346 **1995 One-Ounce Gold Eagle — Struck-Thru Reverse — MS69 PCGS Secure.** An approximately rectangular strike-through, 7 x 8 mm, occupies the lower central reverse. The strike-through was sufficiently shallow that design elements are evident within it. An otherwise flawless example that has an intricate impression and lustrous, unabraded caramel-gold surfaces.

4347 **1995 One-Ounce Gold Eagle — Struck-Through Reverse — MS69 PCGS Secure.** A triangle-shaped strike-through, 4 x 5 mm, is concealed within the branch near the nesting eagles. A pristine bullion coin with pale peach-gold color, vibrant luster, and a full strike. A small, thin piece of foreign material, such as the peel from a sanding disc, apparently rested between planchets in a chute, and was fed with a planchet between dies.

SO-CALLED DOLLAR

4348 **1897 Utah, 50th Anniversary Of Settlement, Aluminum, HK-1009a, R.8 — Obverse Cleaned — NGC Details. Unc.** A very rare Hibler-Kappen variety that celebrates the 50th anniversary of the founding of Salt Lake City. The obverse depicts the Salt Lake Temple and small busts of Woodruff, Cannon, and Smith. The reverse exhibits the Brigham Young Monument and an encampment view. Satiny and untoned with moderate field hairlines. Included with the lot is a white custom Capital holder.

ALASKA TOKENS

4349 **Complete Eight-Piece (1935) Alaska Bingle Set. Gould-Bressett 4 through 11.** During the Great Depression, Dust Bowl farmers were relocated by the Federal government to Matanuska Valley, Alaska. They received Alaska Rural Rehabilitation Corporation tokens, which could be redeemed in government-run stores. This moderately abraded set contains all eight "bingle" denominations, and includes: **cent MS62 NGC; five cent MS62 NGC; ten cent MS63 NGC; 25 cent MS62 PCGS; 50 cent MS62 PCGS; one dollar MS62 NGC; five dollar MS61 NGC;** and **ten dollar — Improperly Cleaned — NGC Details, Unc.** (Total: 8 tokens)

WORLD MEDAL

1894-Dated Ten Dollar Gold Piece, Uncertified
Interesting, Unknown Reverse Imprint

4350 **1894 Liberty Eagle — PIEDBOEUF Imprint — Uncertified.** This unusual medal (?) is an 1894 U.S. ten dollar gold piece with the reverse planed off, and then struck with an unknown imprint. We once offered this same altered eagle in January 1997 as lot 7294 in our FUN Signature auction, where it was described:

> "The obverse is an AU 50 and has not been affected by the work done on the reverse. The reverse has been planed off except at the denticles and the following inscription engraved on that side: PIEDBOEUF/10.000.000 KG/1967. We are at a loss to explain this inscription. PIED is French for foot, BOEUF means beef. Together they do not make a sensible word to any of our resident linguists. The central inscription is the European method for expressing 10 million kilograms (using periods rather than commas). We have no clue of the significance of 1967 either. Any guesses?"

We note Piedboeuf is Belgium's preeminent brewer (now owned by Anheuser-Busch InBev), which in 1966 launched what is now its most popular brand, Jupiler, but any such connection to this enigmatic item is pure speculation on our part. It is certainly an interesting gold piece for more research.

LOVE TOKEN

1877 Trade Dollar
Elaborate Pictorial Engraving

4351 **1877 Trade Dollar, Engraved Reverse, Uncertified, XF Sharpness.** This is a rare, engraved 1877 Trade dollar, the reverse planed off and intricately hand-engraved in banknote style to mimic ferrotype quality. Black coloration in the recesses adds emphasis around the engraved devices. Lettering includes June 21st / 1886. at the top, and "BALLIE." in a curved panel at the bottom, framing an oval pictorial rendition of a gentleman. Delicate filigree work surrounds the oval left and right. The coin was once mounted (perhaps as a pinback, mounting now removed), with some minor obverse staining from the mount. All in all, this is a spectacular piece of numismatic memorabilia with attractive, briefly lustrous surfaces that display traces of gold toning over silver-gray fields — ideal for research, and a centerpiece for any specialized collection.

Red velvet case included.

End of Auction

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., Heritage Auctions, Inc., Heritage Collectibles, Inc., Heritage Luxury Property Auctions, Inc., Heritage Numismatic Auctions, Inc., Heritage Vintage Sports Auctions, Inc., Currency Auctions of America, Inc., Heritage Auctions (HK) Limited, or Heritage Auctions – Europe Cooperatief U.A. as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:

- For Domain Names & Intellectual Property Auction lots the Buyer's Premium is Fifteen percent (15%) subject to a minimum of $19 per lot;
- For Animation Art, Comic, Currency, Movie Posters, Sports Collectibles, US Coin, and World & Ancient Coin Auction lots the Buyer's Premium is Twenty percent (20%) subject to a minimum of $19 per lot, except for Sports Collectibles lots which are subject to a minimum of $14 per lot;
- For Wine Auction lots the Buyer's Premium is Twenty-three percent (23%) subject to a minimum of $19 per lot;
- For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first $250,000 subject to a minimum of $49 per lot, plus twenty percent (20%) of any amount between $250,000 and $2,500,000, plus twelve percent (12%) of any amount over $2,500,000.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Jewelry, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature® Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at http://www.ha.com/c/ref/web-tips.zx#biddingTutorial.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, email, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only $1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

    The following chart governs current bidding increments (see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment	Current Bid	Bid Increment
< $10	$1	$10,000 - $19,999	$1,000
$10 - $49	$2	$20,000 - $49,999	$2,000
$50 - $99	$5	$50,000 - $99,999	$5,000
$100 - $199	$10	$100,000 - $199,999	$10,000
$200 - $499	$20	$200,000 - $499,999	$20,000
$500 - $999	$50	$500,000 - $999,999	$25,000
$1,000 - $1,999	$100	$1,000,000 - $1,999,999	$50,000
$2,000 - $4,999	$200	$2,000,000 - $9,999,999	$100,000
$5,000 - $9,999	$500	>= $10,000,000	$200,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.
14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise. Regardless that bids are made on a Property, Auctioneer reserves the right to withdraw the Properties, or any part of the Properties, from the Auction at any time prior to the opening of any lot containing such Properties for sale by the auctioneer (crier), or in the case of Internet-only auctions when the bid opens for either live bidding online or the beginning of the extended period, if any.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer. Alternatively, Auctioneer at its sole option, may charge a twenty (20%) fee based on the amount of the purchase. In either case the Auctioneer may offset amount of its claim against any monies owing to the Bidder or secure its claim against any of the Bidder's properties held by the Auctioneer.
25. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Should state sales tax become applicable in the state for delivery prior to delivery of the property on the invoice, the bidder agrees to pay all applicable state sales tax as required by the delivery state as of the shipping date. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.
31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item'(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. On all shipments in which Heritage charges the Delivery, Handling, and Transit Fee *infra*, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file, this is the "Secure Location". A common carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature. Auctioneer shall arrange, select, and engage common carriers and other transportation vendors on your behalf. Transit services are subject to the following terms and conditions:
    a. Scope of Transit Services: Your properties for transit will be insured under one or more insurance policies issued by an authorized broker to Auctioneer. The properties will be insured for the invoice price of the properties (hammer price plus Buyer's Premium) ("Insured Value"). For each shipment, you will provide a Secure Location to which the items will be delivered. NOTICE: **Auctioneer is neither an insurance company nor a common carrier of any type.**
    b. Auctioneer's Compensation for Transit Services: Auctioneer will provide transit services to Buyer for ¾ of 1% of the Insured Value, plus packaging and handling fees and fees for the common carrier (collectively, "Delivery, Handling, and Transit Fee"). You agree to pay Delivery, Handling, and Transit Fee and comply with all terms of payment as set forth in paragraphs 23 to 31 of this Agreement.
    c. Auctioneer's Limitation of Liability for Transit Services: You understand and agree that Auctioneer's liability for loss of or damage to the items, if any, ends when the items have been delivered to the Secure Location, and Auctioneer has received evidence of delivery. If you claim that any property has sustained loss or damage during transit, you must report any such loss or damage to Auctioneer within seventy-two (72) hours of the delivery date. Your recovery for loss of or damage to any property is limited to the lesser of actual cash value of the property or the Insured Value. **Under no circumstances is Auctioneer liable for consequential or punitive damages.**
35. It shall be the responsibility for the successful Bidder to arrange pick-up or shipping in a timely manner (within 10 days). Held Lots will be subject to storage and moving charges, including a $100 administration fee plus $10 daily storage for larger items and $5 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 20% Seller's Commission.
36. A. NOTICE OF CITES COMPLIANCE: The purchase of items made from protected species: Any property made of or incorporating endangered or protected species or wildlife may have import and/or export restrictions established by the Convention of International Trade in Endangered Species of Wild Fauna and Flora (CITES) in various countries and domestically. Plant and animal properties include (but are not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, alligator, lizard, or other wildlife. These items may not be available to ship internationally or, in some cases, domestically. Domestic bans and restrictions exist in these states: 1) California state law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California. 2) Fossil Ivory is currently banned or restricted in 5 U.S. states: New York, New Jersey, California, Hawaii, and New Mexico. By placing a bid, the bidder acknowledges that he or she is aware of any restriction in their country or place of residence and takes responsibility for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment or afford them the capacity to void their purchase or payment. Lots containing potentially regulated wildlife material are noted in the description as a convenience to our clients. Heritage Auctions does not accept liability for errors or failure to mark lots containing protected or regulated species. For further assistance, please contact client services at 1-800-872-6467.
36. B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.
36. C. Auctioneer shall not be liable for any loss caused by or resulting from:
    a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
    b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles.
37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties, and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions.
39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.=
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opines, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.
44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or inconsequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.
46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and /or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City: This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site. All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Additional Terms & Conditions:
COINS & CURRENCY

COINS and CURRENCY TERM A: Signature® Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price ($10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, http://www.ngccoin.com/ services/writtenguarantee.asp; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, http://www.pcgs.com/guarantee.html; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Belleview Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency and PMG may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 10470, Peoria, IL 61612-0470. Third-party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the noncertified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions, call the Credit department at 877-HERITAGE (437-4824) or email: CreditDept@HA.com.

Notice as to an Auction in New York City:

This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site.

All lots are subject to the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21, which states: The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.
